(a)

Code	Financial or Economic Impact of the Hedge at the End of the Reporting Period
0001	Interest rate payer swaption contracts provide an offset to declines in fixed income market values resulting from potential rising interest rates. Notional amount is equivalent to the hedged amount of par on fixed rate securities.
0002	Equity Put Options provide an offset to significant declines in equity portfolio from equity market declines below a targeted level.
0003	Put options on Interest Rate Futures provide an offset to declines in fixed income market values resulting from potential rising interest rates.
0004	Written equity put options were used to provide an offset to losses resulting from potential rising equity markets.
0005	Interest rate swap effectively decreases duration of hedged fixed rate portfolio to the duration of an equivalent variable rate portfolio. Notional amount is equivalent to hedged amount of par on fixed rate portfolio.
0006	Basis swap effectively converts variable rate LIBOR exposure to 7-day BMA index and is used in tandem with the pay fixed / receive float interest rate swaps to effectively hedge the muni bond portfolio against increasing interest rates. Notional amount is equivalent to amount of par on muni bonds.
0007	Credit default swap effectively hedge credit risk exposure on the named debt security or related index or basket of debt securities. Notional amount is equivalent to hedged amount of par on debt security.
0008	Foreign Currency forward effectively reduces foreign currency exposure on the principal amount of foreign denominated fixed income securities. Notional amount is the USD equivalent of the hedged amount of par on debt securities.
