NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Allstate Insurance Company ("Company") prepares its financial statements in conformity with accounting practices prescribed or permitted by the Illinois Department of Insurance ("IL DOI"). Prescribed statutory accounting practices include a variety of publications of the National Association of Insurance Commissioners ("NAIC"), as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

The state of Illinois requires its domestic insurance companies to prepare financial statements in conformity with the NAIC Accounting Practices and Procedures Manual ("APPM"), which includes all Statements of Statutory Accounting Principles ("SSAPs"), subject to any deviations prescribed or permitted by the IL DOI.

B. The preparation of financial statements is in conformity with the NAIC Annual Statement Instructions and accounting practices prescribed or permitted by the IL DOI, which requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

C. Listed below is a summary of the accounting policies that materially affect the financial statements.

Investments

Bonds with an NAIC designation of 1 or 2, including loan-backed and other structured securities, are stated at amortized cost using the scientific interest method. Bonds with an NAIC designation of 3 through 6 are carried at the lower of amortized cost or fair value, with the difference reflected in unassigned surplus.

In general, loan-backed and structured securities, except agency and interest only bonds, utilize a two step process for determining carrying value and NAIC designation in accordance with SSAP No. 43R, *Loan-backed and Structured Securities* ("SSAP No. 43R). Loan-backed securities are defined as pass-through certificates, collateralized mortgage obligations and other securitized loans not included in structured securities, for which the payment of interest and/or principal is directly proportional to the interest and/or principal received by the issuer from the mortgage pool or other underlying securities. Structured securities are defined as loan-backed securities which have been divided into different classes for which the payment of interest and/or principal of any class of securities has been allocated in a manner which is not proportional to the interest and/or principal received. Prepayments are a significant variable element in the cash flow of loan-backed securities as they affect the yield and determine the expected maturity against which the yield is evaluated.

Redeemable preferred stocks are stated at amortized cost or the lower of amortized cost or fair value, depending on the assigned credit rating. Perpetual preferred stocks are carried at fair value or the lower of cost or fair value depending on the assigned credit rating. Unaffiliated common stocks are carried at fair value. For preferred stocks stated at fair value and unaffiliated common stocks, the differences between amortized cost or cost and fair value are recorded as a change in net unrealized capital gains (losses), which is a component of unassigned surplus.

Common stock investments in insurance subsidiaries, controlled, and affiliated ("SCA") entities are based on the underlying statutory equity of the subsidiary and adjusted for unamortized goodwill, if applicable. Common stock investments in non-insurance SCA entities are generally recorded based on the underlying Generally Accepted Accounting Principles ("GAAP") equity of the investee, with unrealized gains or losses reflected in unassigned surplus.

Mortgage loans are carried at outstanding principal balances, net of unamortized premium or discount and book value adjustments. Book value adjustments include other-than-temporary impairment ("OTTI") adjustments. OTTI adjustments are recorded when based on the current information and events, it is probable contractual principal and interest will not be collected. OTTI adjustments reduce the carrying value of mortgage loans to the fair value of the collateral less the estimated cost to sell.

Investments in real estate are stated at the lower of depreciated cost or fair value less encumbrances. The carrying value of real estate is adjusted for impairments that are other than temporary.

Cash equivalent investments are short-term, highly liquid investments, whose original maturities at the time of acquisition are three months or less. They are both readily convertible into known amounts of cash and so near to their maturity that they present an insignificant risk of change in value because of changes in interest rates.

Short-term investments are carried at cost or amortized cost that approximates fair value and includes the investment of cash collateral received from counterparties related to derivative transactions. The Company records an offsetting liability for the Company's obligation to return collateral or funds received.

Other invested assets include investments in joint ventures, limited partnerships, limited liability companies and surplus notes. Investments in joint ventures, limited partnerships and limited liability companies are generally recorded based on the underlying GAAP equity of the investee, with unrealized capital gains or losses reflected in unassigned surplus. Limited partnerships include low income housing tax credit ("LIHTC") property investments, which qualify as SCA entities in accordance with SSAP No. 97, *Investments in Subsidiary, Controlled and Affiliated Entities, A Replacement of SSAP No. 88* ("SSAP No. 97"). LIHTC property investments are generally recorded at cost and amortized based on the utilization of tax credits. Surplus notes of affiliates are carried at either their face value or at a reduced face value based on a prescribed statement factor calculation.

Investment income consists primarily of interest and dividends. Interest is recognized on an accrual basis using the effective yield method and dividends are recorded at the ex-dividend date. Interest income for certain loan-backed and structured securities is determined considering estimated principal repayments obtained from third party data sources and internal estimates. Actual prepayment experience is periodically reviewed and effective yields are recalculated when differences arise between the prepayments originally anticipated and the actual prepayments received and currently anticipated. For beneficial interests in securitized financial assets not of high credit quality, the effective yield is recalculated on a prospective basis. For all other loan-backed and structured securities the effective yield is recalculated on the retrospective basis. In periods subsequent to the recognition of an OTTI on a bond or mortgage loan, the Company accounts for the impaired asset as if it had been purchased on the measurement date of the impairment. The difference between the new amortized cost basis and the cash flows expected to be collected are accreted as interest income. Accrual of income is suspended for OTTI bonds when the timing and amount of cash flows expected to be received is not reasonably estimable. Accrual of income is suspended for mortgage loans that are in default or when the full and timely collection of principal and interest payments is not probable.

Realized capital gains and losses include gains and losses on investment sales, write-downs in value due to other than temporary declines in fair value and periodic changes in the fair value and settlements of certain derivatives. Realized capital gains and losses on investment sales include calls and prepayments and are determined on a specific identification basis.

The Company has a comprehensive portfolio monitoring process to identify and evaluate each security whose carrying value may be OTTI. For bonds, excluding loan-backed and structured securities, in an unrealized loss position, the Company assesses whether management with the appropriate authority has made a decision to sell the bond prior to its maturity at an amount below its carrying value. If the decision has been made to sell the bond, the bond's decline in fair value is other than temporary and the Company recognizes a realized loss equal to the difference between the amortized cost and the fair value of the bond at the balance sheet date the assessment is made. If the Company has not made the decision to sell the bond, but the bond's decline in value is specific to an issuer's fundamental credit difficulties, the decline is other than temporary and a write-down of the amortized cost to fair value is required.

For loan-backed and structured securities, the Company first assesses whether management with the appropriate authority has made a decision to sell each loan-backed and structured security in an unrealized loss position. If the determination is made to sell a particular loan-backed or structured security in an unrealized loss position, the security's decline in fair value is other than temporary and recognized in

NOTES TO FINANCIAL STATEMENTS

realized capital losses. If management has not made the decision to sell the loan-backed or structured security, then an evaluation of whether there is the intent and ability to retain the security for a period of time sufficient to recover amortized cost is required. If management does not have the intent and ability to retain the loan-backed and structured security for the time sufficient to recover the amortized cost basis, an OTTI shall be considered to have occurred. If management intends to hold the security, an evaluation of whether the entire amortized cost is expected to be recovered is needed. To determine if the amortized cost will be recovered, the present value of cash flows expected to be collected, discounted at the security's effective interest rate, is compared to amortized cost. When the present value of the discounted cash flows expected to be collected is less than the amortized cost, the security is OTTI and a realized capital loss is recognized for the difference between the amortized cost and the discounted present value of cash flows expected to be collected.

For common and preferred stocks, the Company considers various factors, including whether the Company has the intent and ability to hold the stock for a period of time sufficient to recover its cost basis. Where the Company lacks the intent and ability to hold to recovery, or believes the recovery period is significantly extended, the stock's decline in fair value is other than temporary and the difference between the stock's cost and fair value is recognized as a realized loss. A decision to sell stock for an amount below its cost would be an other than temporary decline and a realized loss is recorded. For stocks managed by a third party, the Company has contractually retained its decision making authority as it pertains to selling stocks that are in an unrealized loss position.

The Company's portfolio monitoring process includes a quarterly review of all securities to identify instances where the fair value of a security compared to its amortized cost (for bonds, including loan-backed and structured securities) and cost (for stocks) is below established thresholds. The process also includes the monitoring of other impairment indicators such as ratings and payment defaults. The securities identified, in addition to other securities for which the Company may have a concern, are evaluated for potential OTTI using all reasonably available information relevant to the collectibility or recovery of the security. Inherent in the Company's evaluation of OTTI for these securities are assumptions and estimates about the financial condition and future earnings potential of the issue or issuer. Some of the factors considered in evaluating whether a decline in fair value is other than temporary are: 1) the financial condition, near-term and long-term prospects of the issue or issuer, including relevant industry specific market conditions and trends, geographic location and implications of rating agency actions and offering prices; 2) the specific reasons that a security is in an unrealized loss position, including overall market conditions which could affect liquidity; and 3) the length of time and extent to which the fair value has been less than amortized cost or cost.

Derivative financial instruments

When derivatives meet specific criteria, they may be designated as accounting hedges, which means they may be accounted for and reported on in a manner that is consistent with the hedged asset or liability. Derivatives that are not designated as accounting hedges are accounted for on a fair value basis, with changes in fair value recorded as unrealized gains or losses in unassigned surplus.

Off-balance sheet financial instruments

Commitments to invest, commitments to purchase private placement securities and commitments to extend loans have off-balance sheet risk because their contractual amounts are not recorded in the Company's Assets or Liabilities, Surplus and Other Funds pages of the Annual Statement.

Premium revenue

Premiums are deferred and earned on a pro-rata basis over the policy period. The portion of premiums written applicable to the unexpired periods of the policies is recorded as unearned premiums. Premiums received in advance of the policies' effective dates are recorded as advance premiums.

Premiums written and not yet collected and agents' balances are shown as a receivable, with balances older than 90 days nonadmitted. The Company regularly evaluates this receivable and establishes valuation allowances, as appropriate, for items less than 90 days.

Reserves for losses and loss adjustment expenses

Reserves for losses and loss adjustment expenses are the estimated amounts necessary to settle all reported and unreported claims for the ultimate cost of insured losses, based upon the facts of each case and the Company's experience with similar cases. Estimated amounts of salvage and subrogation are deducted from the reserves for losses and loss adjustment expenses. The establishment of appropriate reserves, including reserves for catastrophes, is an inherently uncertain and complex process. Reserve estimates are regularly reviewed and updated using the most current information available. Any resulting reestimates are reflected in the current Statement of Income.

Reinsurance

In the normal course of business, the Company seeks to limit aggregate and single exposure to losses on large risks by purchasing reinsurance. The amounts reported in the Assets page as amounts recoverable from reinsurers include amounts billed to reinsurers for losses and loss adjustment expenses paid, as well as estimates of amounts expected to be recovered from reinsurers on losses and loss adjustment expense reserves that have not yet been paid. Reserves are reported net of unpaid reinsurance recoverables. Reinsurance recoverables on unpaid losses are estimated based upon the reinsurance contract, following assumptions consistent with those used in establishing the liabilities related to the underlying reinsured contract. Reinsurance premiums are generally reflected as income in a manner consistent with the recognition of premiums on the reinsured contracts. For catastrophe coverage, the cost of reinsurance premiums is earned ratably over the contract period to the extent coverage remains available. Reinsurance does not extinguish the Company's primary liability under the policies written. The Company regularly evaluates whether a provision for reinsurance is needed by evaluating the admissibility, collectibility and collateralization of reinsurers' balances in accordance with the APPM. A provision for reinsurance is established, as appropriate, and reported as a liability.

Income taxes

The income tax provision is calculated under the liability method. Deferred tax assets ("DTAs") and liabilities ("DTLs") are recorded based on the difference between the statutory financial statement and tax bases of assets and liabilities at the enacted tax rates. The principal assets and liabilities giving rise to such differences were unearned premiums, additional minimum pension liability, investments, discounted loss reserves and nonadmitted assets. Deferred income taxes also arise from net unrealized capital gains and losses on common stocks, limited partnerships and impaired bonds carried at fair value. The net change in DTAs and DTLs is applied directly to unassigned surplus. The nonadmitted portion of gross DTAs is determined by applying the rules prescribed by SSAP No. 10R, *Income Taxes - Revised, A Temporary Replacement of SSAP No. 10* ("SSAP No. 10R").

3. Business Combinations and Goodwill

A. Statutory Purchase Method

Encompass Insurance Company of America ("EICA"), Encompass Property and Casualty Company ("EPC"), Encompass Independent Insurance Company ("EIIC"), Encompass Insurance Company of Massachusetts ("EICMA") and Encompass Home and Auto Insurance Company ("EHAIC")

On October 1, 2005, Encompass Financial Group, LLC ("Encompass"), a subsidiary dissolved into the Company in December 2006, purchased all the outstanding common stock of EICA, EPC, EIIC, EICMA and EHAIC for $60 million from Continental Casualty Company ("CCC"). The Company paid consideration in 1999 for the option to acquire these insurance companies from CCC at a future date. This consideration was recorded as an intangible asset on the Company's books. In conjunction with the purchase of these five companies, the $8 million balance of intangible asset at October 1, 2005 was reclassed to goodwill and included in common stock investments. The purchase price, which included $55 million of cash, cash equivalents and short-term investments acquired, goodwill recorded by Encompass and the goodwill amortized in 2010 and 2009 by the Company is presented in the table below:

(in thousands)

Company Acquired	Purchase Price	Goodwill	Goodwill Amortized 2010	Goodwill Amortized 2009

The transaction was accounted for using the statutory purchase method. At the purchase date, goodwill of $429 thousand was recorded. In 2010 and 2009, the Company recognized yearly goodwill amortization of $4 thousand and $43 thousand, respectively, related to this acquisition. At December 31, 2010, the goodwill was fully amortized.

Encompass Insurance Company ("EIC")

On July 2, 2001, Encompass Holdings LLC ("Encompass LLC"), a former subsidiary of NIC, purchased all the outstanding common stock of EIC, formerly known as USF&G Business Insurance Company for $12 million from Fidelity and Guaranty Company. At the purchase date, goodwill of $2 million was recorded and is evaluated annually by Encompass LLC for impairment per the applicable GAAP guidance. Effective December 31, 2003, Encompass LLC was dissolved and its assets, including its investment in EIC and the related goodwill, were transferred to NIC. In 2004, NIC began amortizing the goodwill. On December 31, 2006, NIC paid an extraordinary stock dividend of all the common shares of EIC, including the related unamortized goodwill of $1 million, to its parent, Encompass. Subsequently, on December 31, 2006, Encompass was dissolved and its assets, including its investment in EIC and the related unamortized goodwill, were transferred to the Company. In 2010 and 2009, the Company recognized yearly goodwill amortization of $237 thousand related to this acquisition.

C. Reverse Mortgages

The Company did not enter into reverse mortgages in 2010 or 2009.

D. Loan-Backed Securities

1. Prepayment assumptions for loan-backed and structured securities were obtained from brokers and internal estimates.

2. Effective September 30, 2009, assessments of whether loan-backed or structured securities were OTTI were made in accordance with SSAP No. 43R, while assessments made prior to this date were made in accordance with SSAP No. 43, *Loan-backed and Structured Securities* ("SSAP No. 43"). In both cases, the Company is required to assess if an impairment is other than temporary when the fair value of a loan-backed or structured security is less than the amortized cost. The table below presents the aggregate amortized cost of loan-backed and structured securities before recognized OTTI, the amount of OTTI recognized and the fair value of those securities classified by the basis of impairment in accordance with SSAP No. 43R.

The classification basis of intent to sell is considered an interest related OTTI. The Company did not have OTTI that resulted from the inability or lack of intent to retain an investment in a security for a period of time sufficient to recover the amortized cost basis in 2010 or in the second half of 2009.

In accordance with SSAP No. 43, the Company recognized $7 million of OTTI losses on loan-backed and structured securities due to the undiscounted estimated cash flows for each of these securities being less than their book values for the quarter ended June 30, 2009. The amortized cost of these loan-backed and structured securities at June 30, 2009 before OTTI adjustments was $117 million. For the quarter ended March 31, 2009, the Company recognized $14 million of OTTI losses on loan-backed and structured securities due to the undiscounted estimated cash flows for each of these securities being less than their book values. The amortized cost of these loan-backed and structured securities at March 31, 2009 before OTTI adjustments was $41 million.

3. In accordance with SSAP No. 43R, the following loan-backed and structured securities were OTTI at the end of each quarter presented, as a result of the discounted present value of the cash flows expected to be collected being less than amortized cost. The use of the discounted present value of cash flows in the calculation of OTTI was not allowed under the guidance of SSAP No. 43, therefore disclosures are unavailable prior to September 30, 2009.

8. Derivative Instruments

A. Derivative financial instruments utilized by the Company during 2010 and 2009 included equity index option contracts, call and put option contracts on specific equities, options on interest rate futures, swaption agreements, interest rate and credit default swap agreements, foreign currency forward contracts and futures contracts.

Index option contracts provide returns at specified or optional dates based on a specified equity index applied to the option's notional amount. Call and put option contracts are publicly traded option contracts on specific equities. Options on interest rate futures give the holder the right, but not the obligation, to enter into futures contracts at a future date. They can be exercised on any business day prior to expiration. Swaption agreements give the holder the right, but not the obligation, to enter into an interest rate swap agreement at a future date. Interest rate swap agreements are agreements that periodically exchange the difference between two designated sets of cash flows, (fixed to variable rate, variable to fixed rate, or variable to variable rate) based upon designated market rates or rate indices and a notional amount. Credit default swap agreements are used for either buying credit protection or selling credit protection on a specified entity, basket of entities or index. Buying credit protection requires a payment of a premium to a counterparty in exchange for a future cash settlement or a promise to deliver a bond, if a specified credit event occurs. Selling credit protection provides for the receipt of a premium from a counterparty in exchange for a future cash settlement, or a promise to purchase a bond, if a specified credit event occurs. Foreign currency forward contracts involve the future exchange or delivery of foreign currencies based on terms negotiated at the inception of the contract which are settled at the end of the contract. The Company utilizes the following types of futures contracts: domestic and global index, commodities and interest rate. Futures contracts are defined as commitments to buy or sell designated financial instruments based on specified prices, yields or indexes. These futures contracts provide returns at specified or optional dates based upon a specified index or interest rate applied to a notional amount.

Market risk is the risk that the Company will incur losses due to adverse changes in market rates and prices. Market risk exists for all of the derivative financial instruments the Company currently holds, as these instruments may become less valuable due to adverse changes in

NOTES TO FINANCIAL STATEMENTS

market conditions. To limit this risk, the Company's senior management has established risk control limits. In addition, changes in the fair value of the derivative financial instruments that the Company uses for risk management purposes are generally offset by the change in the fair value or cash flows of the hedged risk component of the related assets, liabilities or forecasted transaction.

The Company manages its exposure to credit risk by utilizing highly rated counterparties, establishing risk control limits, executing legally enforceable master netting agreements and obtaining collateral where appropriate. The Company uses master netting agreements for over-the-counter derivative transactions, including interest rate and credit default swap agreements, swaption agreements and certain option contracts. These agreements permit either party to net payments due for transactions covered by the agreements. Under the provisions of the agreements, collateral is either pledged or obtained when certain predetermined exposure limits are exceeded. The Company has not incurred any losses on derivative financial instruments due to counterparty nonperformance. Other derivatives, including futures and certain option contracts, are traded on organized exchanges, which require margin deposits and guarantee the execution of trades, thereby mitigating any potential credit risk.

Counterparty credit exposure represents the Company's potential loss if all counterparties concurrently fail to perform under the terms of the contracts and all collateral, if any, becomes worthless. This exposure is measured by the statement value of over-the-counter contracts with a positive statement value at the reporting date reduced by the effect, if any, of legally enforceable master netting agreements.

The cash requirements of the derivatives vary by instrument. When the Company purchases/sells option contracts at specific prices, it is required to pay/receive a premium to/from the counterparties. The amount of premium paid/received is based on the number of contracts purchased/sold, the specified price and the maturity date of the contract. The Company receives/pays cash equal to the premium of written/purchased options when the contract is established. If the option is exercised, the Company receives/pays cash equal to the specified price in the contract (strike price) in exchange for the equity upon which the option is written/purchased. If the options are not exercised, then no additional cash is exchanged when the contract expires. Swaption agreements typically require a premium paid to the counterparty at the inception of a contract. Cash settlements for interest rate swap agreements usually occur at dates specified in individual agreements. The amount of cash exchanged is equal to the difference between the rate in the contract at which the Company receives cash compared to the rate at which the Company is to pay cash. Foreign currency forward contracts require cash settlements when the contract matures. The amount of cash exchanged is based on the difference between the specified rate on the date the contract was entered into (contract rate) compared to the actual rate on the settlement date. If the contract rate is less than the actual rate on the settlement date, the Company receives cash equal to the difference in rates multiplied by a specified notional amount. If the contract rate is greater than the actual rate on the settlement date, the Company pays cash equal to the difference in the rates multiplied by a specified notional amount. The Company utilizes credit default swap agreements for both buying credit protection and selling credit protection. The credit default swap agreement requires the purchaser of credit protection to make periodic premium payments to the seller of the credit protection in exchange for a future cash payment, or a promise to purchase a bond from the purchaser of credit protection, if a specified credit event occurs. Daily cash settlement of variation margins is required for futures contracts and is based on the changes in daily prices. The final settlement of interest rate, commodity, and equity futures contracts and index option contracts is typically in cash, but can also occur through delivery of an underlying instrument (e.g. specified bond or stock). The final settlement of indexed futures contracts is always in cash.

B. The Company primarily uses derivatives for risk management, to partially mitigate potential adverse impacts from changes in risk-free interest rates, negative equity market valuations and increases in credit spreads, and asset replication. With the exception of non-hedge derivatives used for asset replication, all of the Company's derivatives are evaluated for their ongoing effectiveness as either accounting hedge or non-hedge derivative financial instrument on at least a quarterly basis. The Company does not use derivatives for trading purposes.

Purchased put and call option contracts on specific equities and index option contracts allow the Company to participate in increases or hedge against decreases in the underlying market price of equities while limiting downside risk to the premium paid. Purchased put option contracts on specific equities and index option contracts allow the Company to limit potential losses on equities owned in exchange for a premium paid. Written option contracts used for income generation provide limited protection against declines in the underlying market price of equities owned by the Company. Put option contracts on interest rate futures are used to hedge against increasing interest rates. Swaption agreements are primarily used to hedge interest rate risk. The Company primarily uses interest rate swap agreements to change the interest rate characteristics of existing assets to facilitate asset-liability management. The Company enters into certain credit default swap agreements as a means to buy protection, reducing the credit risk in a particular bond or bond portfolio while leaving the security or bond portfolio intact. The Company enters into other credit default swap agreements as replication transactions, enabling greater diversification of credit risk by selling protection on specified entities, or baskets of entities that may not be frequent issuers in the traditional corporate bond market and by selling protection on indices also as a less expensive alternative to the cash market. Excess return swap agreements and commodities futures contracts are used to allow the Company to participate in asset classes that offer diversification benefits within the Company's existing portfolio. Foreign currency forward contracts are utilized to substantially eliminate currency risk exposure arising from investments in foreign currency denominated investments. The Company primarily utilizes index and interest rate futures contracts to reduce the duration of its bonds, manage equity risk in its equity portfolio and to reduce interest rate and equity risk associated with certain deferred compensation liability contracts. These futures contracts hedge the changes in fair value of certain assets or liabilities. The Company enters into equity futures contracts as replication transactions, increasing the Company's equity exposure.

C. The notional amounts specified in the contracts are used to calculate the exchange of contractual payments under the agreements and are generally not representative of the potential for gain or loss on these agreements. However, the notional amounts specified in credit default swap selling protection agreements represent the maximum amount of potential loss, assuming no recoveries.

Purchased put and call option contracts on specific equities, index option contracts and options on interest rate futures are reported on Schedule DB, Part A and receive non-hedge accounting treatment. Premiums paid on purchased option contracts are reported as derivatives. The change in the fair value of purchased option contracts is reported as net unrealized capital gains and losses, within unassigned surplus, with an adjustment to a corresponding asset. If the purchased call option contract on a specific stock is exercised, the carrying amount of the purchased option will be reclassified as a basis adjustment to the cost of the stock acquired. If the purchased put option contract on a specific stock is exercised, the carrying amount of the purchased put option contract will be reported as a realized capital gain, separate from the disposition accounting for the stock. If the purchased option contract expires without being exercised, the premiums paid are reported as realized capital losses and the corresponding asset previously recorded is reversed.

Swaption agreements are also reported on Schedule DB, Part A and receive non-hedge accounting treatment. Premiums paid on swaption agreements are reported as derivatives. The change in the fair value of open swaption agreements is reported as net unrealized capital gains and losses, within unassigned surplus, with an adjustment to derivatives. If a swaption agreement terminates prior to its expiration, or if it expires, gains or losses are reported in net realized capital gains or losses.

Written option contracts are reported on Schedule DB, Part A in 2010 and Schedule DB, Part B in 2009 and receive non-hedge accounting treatment. Premiums received on written option contracts are reported as a liability. The change in the fair value of written option contracts is reported as net unrealized capital gains and losses, within unassigned surplus, with an adjustment to a corresponding liability. If the written option contract is exercised by the counterparty, the remaining premium will adjust the proceeds associated with the exercise, resulting in no explicit gain or loss for the derivative itself. If the written option contract expires without being exercised, the premiums received are reported as realized capital gains and the corresponding liability previously reported is reversed.

Interest rate, credit default and excess return swap agreements are reported in Schedule DB, Part A in 2010 and Schedule DB, Part C in 2009. If any of these contracts were used for replication purposes, then they are also reported in Schedule DB, Part C in 2010 and Schedule DB, Part F in 2009. Interest rate and credit default swap agreements used for buying protection receive non-hedge accounting treatment, and the change in the fair value of open swap agreements are reported as net unrealized capital gains and losses within unassigned surplus. Credit default and excess return swap agreements entered into as replication transactions are valued at amortized cost. Periodic settlements, which represent amounts receivable from/payable to the counterparties are based on the settlement terms within the agreement, and reported as a component of net investment income for credit default swap agreements and interest rate and excess return swap agreements.

NOTES TO FINANCIAL STATEMENTS

Foreign currency forward contracts are also reported in Schedule DB, Part A in 2010 and Schedule DB, Part C in 2009, and receive non-hedge accounting treatment. The change in the fair value of open foreign currency forward contracts is reported as net unrealized capital gains and losses, within unassigned surplus, until closed (e.g. terminated or settled). If the contract was hedging coupon payments of a bond, any gains and losses at closing are reported in net investment income. If the contract was hedging the original principal of a bond or the bond the Company was hedging is disposed of, any gains and losses at closing are reported in realized capital gains or losses.

Futures contracts are reported in Schedule DB, Part B in 2010 and Schedule DB, Part D in 2009 and receive either fair value hedge accounting or non-hedge accounting treatment, depending on the strategy. Equity futures contracts entered into as replication transactions are also reported in Schedule DB, Part C in 2010 and Schedule DB, Part F in 2009. Daily cash settlements of margin gains or losses for futures contracts receiving fair value hedge accounting treatment are reported in net investment income. The daily cash settlements of margin gains and losses for futures contracts that receive non-hedge accounting treatment and have terminated are reported in net realized capital gains or losses. The daily cash settlements of margin gains and losses for open futures contracts that receive non-hedge accounting treatment are reported as net unrealized capital gains and losses within unassigned surplus.

D. The Company did not have gains or losses in net unrealized capital gains or losses that represented a component of any derivatives' gain or loss that was excluded from the assessment of hedge effectiveness in 2010 or 2009.

E. The Company did not have gains or losses in net unrealized capital gains or losses that resulted from derivatives that no longer qualify for hedge accounting treatment in 2010 or 2009.

F. The Company did not have derivatives accounted for as cash flow hedges of a forecasted transaction.

9. Income Taxes

The application of SSAP No. 10R requires the Company to evaluate the recoverability of DTAs and to establish a statutory valuation allowance adjustment ("valuation allowance") if necessary to reduce the DTA to an amount which is more likely than not to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary, and if so, the amount of such valuation allowance. In evaluating the need for a valuation allowance the Company considers many factors, including: (1) the nature of the DTAs and DTLs; (2) whether they are ordinary or capital; (3) the timing of their reversal; (4) taxable income in prior carryback years as well as projected taxable earnings exclusive of reversing temporary differences and carryforwards; (5) the length of time that carryovers can be utilized; (6) unique tax rules that would impact the utilization of the DTAs; and (7) any tax planning strategies that the Company would employ to avoid a tax benefit from expiring unused. Although the realization is not assured, management believes it is more likely than not that the DTAs, net of the valuation allowance, will be realized. The valuation allowance was $156 million and $256 million at December 31, 2010 and 2009, respectively.

At both December 31, 2010 or 2009, no capital had been provided by the Company under this agreement.

F. The Company, ALIC and the Corporation are parties to a one-year Liquidity Agreement. The purpose of the Liquidity Agreement is to allow for short-term advances of funds to be made between parties for liquidity and other general corporate purposes, but does not establish a commitment to advance funds. The Company and ALIC each serve as a lender and borrower, with the maximum amount of advances made or received limited to $1.00 billion.

The Company entered into an intercompany loan agreement with the Corporation. The amount available to the Company is at the discretion of the Corporation, however, the maximum amount of loans the Corporation can have outstanding to all eligible subsidiaries at any given point in time is limited to $1.00 billion. From time to time, the Company borrows money from the Corporation to meet its short-term cash needs. At December 31, 2010 and 2009, the Company did not have outstanding intercompany loans with the Corporation.

The Company, the Corporation and certain of its affiliated insurance companies are parties to an Amended and Restated Service and Expense Agreement (the "Agreement") pursuant to which the Company furnishes a variety of services. The Agreement provides for cost sharing and allocation of operating expenses among the parties.

The Company is a party to an Investment Management Agreement with AILLC whereby AILLC provides investment management services and advice.

There is a Reimbursement Agreement with the Corporation under which the Corporation sponsors certain benefit and compensation plans.

The Company is a party to a federal income tax allocation agreement with the Corporation (see Note 9, Part F).

G. The Company is a wholly-owned subsidiary of AIH, a Delaware limited liability company. AIH is a wholly-owned subsidiary of the Corporation.

H. At both December 31, 2010 and 2009, the Company owned 37,471 common shares of the Corporation with a cost of $1 million. The entire amount of the investment was reported as a nonadmitted asset.

I. The Company did not have investments in SCA entities that exceeded 10% of the Company's December 31, 2010 or 2009 admitted assets.

J. The Company recognized $171 thousand and $42 thousand of impairment write-downs related to investments in SCA entities in 2010 and 2009, respectively. In both 2010 and 2009, the write-downs were related to the Company's investments in partnerships that were nearing liquidation and the belief was the Company would be unlikely to recover the partnerships' carrying values. The fair value of the partnerships was determined by assessing the fair value of the investments the entities were holding. All SCA entities written down in 2010 and 2009 were also part of the disclosure in Note 6, Part B.

K. The Company did not have investments in foreign insurance subsidiaries that were calculated by adjusting annuity GAAP account value reserves using the Commissioners Annuity Reserve Valuation Method and the related actuarial guidelines at December 31, 2010 or 2009.

L. The Company did not utilize the look-through approach in valuing its investments in downstream noninsurance holding companies at December 31, 2010 or 2009.

11. Debt

A. The Company did not have debt outstanding at December 31, 2010 or 2009.

B. The Company did not have funding agreements or borrowing arrangements with the Federal Home Loan Bank at December 31, 2010 or 2009.

12. Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Postretirement Benefit Plans

Defined benefit pension plans cover most full-time employees, certain part-time employees and employee-agents. Benefits under the pension plans are based upon the employee's length of service and eligible annual compensation. A cash balance formula was added to the Allstate Retirement Plan effective January 1, 2003. All eligible employees hired before August 1, 2002 were provided with a one-time opportunity to choose between the cash balance formula and the final average pay formula. The cash balance formula applies to all eligible employees hired after August 1, 2002.

The Company and the Corporation also provide certain health care subsidies for eligible claim employees hired before January 1, 2003 when they retire and their eligible dependents and certain life insurance benefits for eligible claim employees hired before January 1, 2003 when they retire ("postretirement benefits"). Qualified employees may become eligible for these benefits if they retire in accordance with the Company's established retirement policy and are continuously insured under the Company's group plans or other approved plans in accordance with the plans' participation requirements. The Company shares the cost of retiree medical benefits with non Medicare-eligible retirees based on years of service, with the Company's share being subject to a 5% limit on annual medical cost inflation after retirement. During 2009, the Company decided to change its approach for delivering benefits to Medicare-eligible retirees. The Company no longer offers medical benefits for Medicare-eligible retirees, but instead, provides a fixed company contribution (based on years of service and other factors), which is not subject to adjustments for inflation.

The Company has reserved the right to modify or terminate its benefit plans at any time and for any reason.

Effective September 30, 2009, the Corporation became the sponsor of certain postretirement benefit plans. The Company remained the sponsor for the postretirement benefit plans for claim employees. Prior to September 30, 2009, the Company was the exclusive sponsor. In connection with the change in sponsorship, a liability totaling $607 million was forgiven. The forgiveness of this liability was recorded as an increase in gross paid in and contributed surplus. See Note 10, Parts A, B & C.

The Company calculates its benefit obligations based upon generally accepted actuarial methodologies using the projected benefit obligation ("PBO") for pension plans and the accumulated postretirement benefit obligation ("APBO") for other postretirement plans. Pension costs and other postretirement obligations at December 31, 2010 and 2009 were determined using a December 31 measurement date. The benefit obligations represent the actuarial present value of all benefits attributed to employee service rendered as of the measurement date. The PBO is measured using the pension benefit formula and assumptions as to future compensation levels. The plan's funded status is calculated as the difference between the benefit obligation and the fair value of plan assets. The Company's funding policy for the pension plans is to make annual contributions at a level that is in accordance with regulations under the IRC and generally accepted actuarial principles. The Company's postretirement benefit plans are not funded.

NOTES TO FINANCIAL STATEMENTS

A reconciliation of the plans' funded status to amounts recognized in Liabilities, Surplus and Other Funds at December 31 was as follows:

	Pension Benefits		Postretirement Benefits	
(in millions)	2010	2009	2010	2009
Fair value of plan assets	$ 4,338	$ 3,848	$ -	$ -
Benefit obligation	5,210	4,965	121	120
Funded status	(872)	(1,117)	(121)	(120)
Amounts not recognized:				
Unamortized prior service cost	-	-	(23)	(25)
Unamortized transition (asset) obligation	(114)	(130)	1	2
Unamortized net actuarial loss (gain)	2,382	2,563	(106)	(97)
Net amount recognized	$ 1,396	$ 1,316	$ (249)	$ (240)
Prepaid benefit cost	$ 358	$ -	$ -	$ -
Accrued benefit cost	(222)	(410)	(249)	(240)
Intangible asset	53	59	-	-
Minimum pension liability	1,207	1,667	-	-
Net amount recognized	$ 1,396	$ 1,316	$ (249)	$ (240)

The decrease of $181 million in the unrecognized net actuarial pension benefit loss during 2010 was related to higher than expected returns and higher amortization and settlement recognition, partially offset by a decrease in the discount rate. The majority of the $2.38 billion and $2.56 billion of unrecognized net actuarial pension benefit losses in 2010 and 2009, respectively, reflected the effect of unfavorable market conditions on the value of pension plan assets in prior years, and to a lesser extent, decreases in the discount rate. The Company amortizes its excess unrecognized net actuarial losses over the average remaining service period of active employees expected to receive benefits. The increase of $9 million in the unrecognized net actuarial postretirement benefit gain during 2010 was primarily related to a decrease in enrollment of Medicare-eligible retirees.

The accumulated benefit obligation ("ABO") for all defined benefit pension plans was $4.52 billion and $4.26 billion at December 31, 2010 and 2009, respectively. The ABO is the actuarial present value of all benefits attributed by the pension benefit formula to employee service rendered at the measurement date. However, it differs from the PBO due to the exclusion of an assumption as to future compensation levels. A minimum pension liability is recognized when the ABO exceeds the fair value of plan assets. The minimum pension liability, less allowable intangible assets, was $1.21 billion and $1.67 billion, at December 31, 2010 and 2009, respectively, and was reported as an adjustment to unassigned surplus.

The PBO, ABO and fair value of plan assets for the Company's pension plans with an ABO in excess of plan assets were $4.45 billion, $3.76 billion and $3.54 billion, respectively, at December 31, 2010, and $4.97 billion, $4.26 billion and $3.85 billion, respectively, at December 31, 2009. Included in the accrued benefit cost of the pension benefits were certain unfunded non-qualified plans with accrued benefit costs of $104 million and $106 million for 2010 and 2009, respectively.

The changes in benefit obligations for all plans for the years ended December 31 were as follows:

	Pension Benefits		Postretirement Benefits	
(in millions)	2010	2009	2010	2009
Benefit obligation, beginning of year	$ 4,965	$ 4,317	$ 120	$ 528
Service cost	149	128	13	20
Interest cost	302	314	7	30
Participant contributions	-	-	22	38
Actuarial (gain) loss	188	544	(13)	42
Benefits paid	(388)	(333)	(28)	(68)
Plan amendments	-	-	-	(145)
Plan transfer due to change in sponsorship	-	-	-	(325)
Other	(6)	(5)	-	-
Benefit obligation, end of year	$ 5,210	$ 4,965	$ 121	$ 120

The PBO and ABO for non-vested pension participants were $6 million and $4 million, respectively, at December 31, 2010. The PBO and ABO for non-vested pension participants were $8 million and $5 million, respectively, at December 31, 2009. The postretirement benefit obligation for non-vested employees was $75 million and $94 million at December 31, 2010 and 2009, respectively.

The components of net periodic cost for all plans for the years ended December 31 were as follows:

	Pension Benefits		Postretirement Benefits	
(in millions)	2010	2009	2010	2009
Service cost	$ 149	$ 128	$ 13	$ 20
Interest cost	302	314	7	30
Expected return on plan assets	(313)	(384)	-	-
Amortization of:				
Unrecognized transition obligation	(3)	5	1	11
Unrecognized net actuarial (gain) loss	-	-	(4)	(15)
Prior service cost	(1)	(1)	(2)	-
Unrecognized prior period (gain) loss	173	23	-	-
Settlement loss	35	19	-	-
Net periodic cost	$ 342	$ 104	$ 15	$ 46

Weighted average assumptions used to determine net pension cost and net postretirement benefit cost for the years ended December 31 were:

	Pension Benefits		Postretirement Benefits	
	2010	2009	2010	2009
Weighted average discount rate	6.25 %	7.50 %	6.25 %	6.50 %
Rate of increase in compensation levels	4.00 - 4.50 %	4.00 - 4.50 %	n/a	n/a
Expected long-term rate of return on plan assets	8.50 %	8.50 %	n/a	n/a

NOTES TO FINANCIAL STATEMENTS

Weighted average assumptions used to determine benefit obligations at December 31 are listed in the following table. Assumptions were based on a December 31 measurement date.

	Pension Benefits		Postretirement Benefits	
	2010	2009	2010	2009
Weighted average discount rate	6.00 %	6.25 %	6.00 %	6.25 %
Rate of increase in compensation levels	4.00 - 4.50 %	4.00 - 4.50 %	n/a	n/a

The weighted average health care trend rate used in measuring the APBO was 7.40% for 2011, gradually declining to 4.50% in 2024, and remaining level thereafter.

Assumed health care cost trend rates have a significant effect on the amounts reported for the postretirement health care plans. A one percentage-point increase in assumed health care cost trend rates would increase the total of the service and interest cost components of net periodic benefit cost of other postretirement benefits and the APBO by $431 thousand and $629 thousand, respectively. A one percentage-point decrease in assumed health care cost trend rates would decrease the total of the service and interest cost components of net periodic benefit cost of other postretirement benefits and the APBO by $413 thousand and $554 thousand, respectively.

The pension plans' target asset allocation and the actual percentage of plan assets, by asset category at December 31 were as follows:

	Target Asset Allocation	Actual Percentage of Plan Assets	
Asset Category	2010	2010	2009
Fixed income securities	34 - 48 %	40 %	37 %
U.S. equity securities	26 - 34 %	26	27
International equity securities	16 - 22 %	13	11
Hedge funds	6 - 10 %	9	9
Real estate funds	3 - 7 %	4	3
Private equity funds	3 - 7 %	4	4
Short-term investments	- %	4	9
Other	1 - 3 %	-	-
Total		100 %	100 %

The expected long-term rate of return on plan assets reflects the average rate of earnings expected on plan assets. This assumption is reviewed annually giving consideration to appropriate financial data including, but not limited to, the plan asset allocation, the period over which benefits will be paid, historical returns on plan assets and other relevant market data. A consistent method was used to determine the long-term return on plan assets assumption at both December 31, 2010 and 2009 of 8.50%. At the 2010 measurement date, the arithmetic average of the annual actual return on plan assets for the most recent 10 and 5 years was 3.54% and 6.02%, respectively.

Pension plan assets did not include any of the Corporation's stock at December 31, 2010 or 2009.

The change in pension plan assets for the years ended December 31 was as follows:

(in millions)	2010	2009
Fair value of plan assets, beginning of year	$ 3,848	$ 3,195
Actual return on plan assets	463	482
Employer contributions	421	511
Benefits paid	(388)	(333)
Other	(6)	(7)
Fair value of plan assets, end of year	$ 4,338	$ 3,848

There was no minimum funding requirement under the IRC for the tax qualified pension plans at December 31, 2010. The Company currently plans to contribute $242 million to its pension plans in 2011. This plan may be amended or terminated at any time.

The Company contributed $28 million and $30 million to the postretirement benefit plans in 2010 and 2009, respectively. Contributions by participants were $22 million and $38 million in 2010 and 2009, respectively.

Estimated future benefit payments expected to be paid in the next 10 years, based on the assumptions used to measure the Company's benefit obligation at December 31, 2010, are presented in the following table. Effective January 1, 2010, the Company will no longer participate in the Retiree Drug Subsidy program due to the change in the Company's retiree medical plan for Medicare-eligible retirees.

(in millions)	Pension Benefits	Postretirement Benefits
2011	$ 277	$ 8
2012	298	9
2013	305	10
2014	340	11
2015	357	11
2016 - 2020	2,306	51
Total benefit payments	$ 3,883	$ 100

Employees of the Company are eligible to become members of The Allstate 401(K) Savings Plan. The Company's contributions are based on the Company's matching obligations and certain performance measures. The cost allocated to the Company for this benefit was $28 million and $62 million in 2010 and 2009, respectively.

13. Capital and Surplus, Dividend Restrictions and Quasi-Reorganizations

1. The Company had 42,000 common shares authorized, issued and outstanding at December 31, 2010 and 2009. All shares had a par value of $100 per share.

2. The Company did not have preferred stock outstanding at December 31, 2010 or 2009.

3. The ability of the Company to pay dividends is generally dependent on business conditions, income, cash requirements of the Company, receipt of dividends and other relevant factors. More specifically, the Illinois Insurance Code ("Code") provides a two-step process. First, no dividend may be declared or paid except out of earned (unassigned) surplus, as distinguished from contributed surplus, nor when the payment of a dividend reduces surplus below the minimum amount required by the Code. Secondly, a determination of the ordinary versus extraordinary dividends that can be paid is formula based and considers net income and capital and surplus, as well as the timing and amounts of dividends paid in the preceding twelve months as specified by the Code. Ordinary dividends to shareholders do not require prior approval of the IL DOI. Dividends are not cumulative. At December 31, 2010, the maximum ordinary dividend that can be declared and paid was limited to $238 million.

NOTES TO FINANCIAL STATEMENTS

4. The following ordinary cash dividends were paid to AIH in 2010:

(in millions)

Date of Payment	Amount
June 29	$ 200
August 4	200
September 30	200
October 21	200
November 24	300
December 30	200
Total	$ 1,300

The Company did not pay dividends in 2009.

5. Within the limitations of Part 3 above, there were no restrictions placed on the portion of the Company's profits that may be paid as ordinary dividends to stockholders.

6. The unassigned funds, which are held for the benefit of the shareholder, are unrestricted except by requirement for regulatory approval as described in Part 3 above.

7. The Company is not a mutual or similarly organized company, and therefore, this disclosure requirement does not apply.

8. The Company did not hold stock for special purposes at December 31, 2010 or 2009.

9. The special surplus funds balance of $209 million and $230 million at December 31, 2010 and 2009, respectively, was comprised of two components. The first component relates to the completion of the Company's sale of its United States-based reinsurance operations for policies written after 1984 to SCOR U.S. Corporation ("SCOR") in September 1996. The transaction consisted of the sale of certain non-insurance assets, liabilities and renewal rights and a reinsurance transaction for the insurance liabilities. The Company followed the APPM for the treatment of retroactive contracts and reported the gain on the sale as a write-in component of special surplus funds from retroactive reinsurance account of $16 million and $24 million at December 31, 2010 and 2009, respectively. The decrease in the balance of this component was due to lower reported reserves by a non-novated cedant and a corresponding decrease in incurred but not reported ("IBNR") reserves. The second component, which was $193 million and $206 million at December 31, 2010 and 2009, respectively, relates to the Company's election to admit a higher amount of adjusted gross DTAs as calculated in paragraph 10e of SSAP No. 10R.

10. Cumulative unrealized gains and losses reduced unassigned funds by $207 million and $510 million at December 31, 2010 and 2009, respectively.

11. The Company did not have surplus notes or similar obligations outstanding at December 31, 2010 or 2009.

12. The Company did not have restatements due to quasi-reorganizations in 2010 or 2009.

13. The Company was not quasi-reorganized.

14. Contingencies

A. Contingent Commitments

The Company made the following contingent commitments with external parties.

Commitments to acquire financial interests or make capital contributions

The Company made commitments to invest in limited partnerships interests of $740 million and $631 million at December 31, 2010 and 2009, respectively. These commitments are generally for making additional capital contributions or acquiring financial interests.

California Earthquake Authority ("CEA")

Exposure to certain potential losses from earthquakes in California is limited by the Company's participation in the CEA, which provides insurance for California earthquake losses. The CEA is a privately-financed, publicly-managed state agency created to provide insurance coverage for earthquake damage. Insurers selling homeowners insurance in California are required to offer earthquake insurance to their customers either through their company or by participation in the CEA. The Company's homeowners policies continue to include coverages for losses caused by explosions, theft, glass breakage and fires following an earthquake, which are not underwritten by the CEA.

As of October 31, 2010, the CEA's capital balance was approximately $3.68 billion. Should losses arising from an earthquake cause a deficit in the CEA, additional funding would be obtained from the proceeds of revenue bonds the CEA may issue, an existing $3.12 billion reinsurance layer, and finally, if needed, assessments on participating insurance companies. The authority of the CEA to assess participating insurers extends through December 1, 2018. Participating insurers are required to pay an assessment, currently estimated not to exceed $1.56 billion, if the capital of the CEA falls below $350 million. Participating insurers are required to pay a second additional assessment, currently estimated not to exceed $1.09 billion, if aggregate CEA earthquake losses exceed $9.77 billion and the capital of the CEA falls below $350 million. Within the limits previously described, the assessment could be intended to restore the CEA's capital to a level of $350 million. There is no provision that allows insurers to recover assessments through premium surcharge or other mechanism. The CEA's projected aggregate claim paying capacity is $9.77 billion as of October 31, 2010 and if an event were to result in claims greater than its capacity, affected policyholders would be paid a prorated portion of their covered losses.

All future assessments on participating CEA insurers are based on their CEA insurance market share as of December 31 of the preceeding year. As of April 1, 2010, the Company's share of the CEA was 17.2%. The Company does not expect its CEA market share to materially change. At this level, the Company's maximum possible CEA assessment would be $456 million during 2011. Accordingly, assessments from the CEA for a particular quarter or annual period may be material to income and cash flows, but not the financial position of the Company. Management believes the Company's exposure to earthquake losses in California has been significantly reduced as a result of its participation in the CEA.

Shared markets

The Company is required to participate in assigned risk plans, reinsurance facilities and joint underwriting associations in various states that provide insurance coverage to individuals or entities that otherwise are unable to purchase such coverage from private insurers. Underwriting results related to these arrangements, which tend to be adverse, have been immaterial to the Statement of Income. Because of the Company's participation, it may be exposed to losses that surpass the capitalization of these facilities and/or assessments from these facilities.

Guarantees

The Company provides residual value guarantees on Company leased automobiles. If all outstanding leases were terminated effective December 31, 2010, the Company's maximum obligation pursuant to these guarantees, assuming the automobiles have no residual value,

NOTES TO FINANCIAL STATEMENTS

would be $10 million at December 31, 2010. If all outstanding leases were terminated effective December 31, 2009, the Company's maximum obligation pursuant to these guarantees, assuming the automobiles have no residual value, would be $11 million at December 31, 2009. The remaining term of each residual value guarantee is equal to the term of the underlying lease, which ranges from less than one year to three years. Historically, the Company has not made any material payments pursuant to these guarantees.

PMI Runoff Support Agreement

The Company has certain limited rights and obligations under a capital support agreement ("Runoff Support Agreement") with PMI Mortgage Insurance Company ("PMI"), the primary operating subsidiary of PMI Group, related to the Company's disposition of PMI in prior years. Under the Runoff Support Agreement, the Company would be required to pay claims on PMI policies written prior to October 28, 1994, if PMI fails certain financial covenants and fails to pay such claims. The agreement only covers these policies and not any policies issued on or after that date. In the event any amounts are so paid, the Company would receive a commensurate amount of preferred stock or subordinated debt of PMI Group or PMI. The Runoff Support Agreement also restricts PMI's ability to write new business and pay dividends under certain circumstances. Management does not believe this agreement will have a material adverse effect on the net income, liquidity or financial position of the Company.

B. Assessments

Guaranty funds

Under state insurance guaranty fund laws, insurers doing business in a state can be assessed, up to prescribed limits, for certain obligations of insolvent insurance companies to policyholders and claimants. Amounts assessed to each company are typically related to its proportion of business written in each state. The Company's policy is to accrue guaranty fund assessments when the entity for which the insolvency relates has met the applicable state of domicile's statutory definition of insolvent and the amount of loss is reasonably estimable. In most states the definition is met with a declaration of financial insolvency by a court of competent jurisdiction. In certain states there must also be a final order of liquidation. At December 31, 2010 and 2009, the Company had accrued $72 million and $93 million, respectively, for future guaranty fund assessments and $4 million and $6 million, respectively, for the related premium tax offset expected to be realized. The period over which assessments are expected to be paid varies. Premium tax offsets are realized on a straight-line basis over the period allowed by each individual state once the guaranty fund assessment has been paid.

State facilities

The Company is also subject to assessments from the Louisiana Citizens Property Insurance Corporation ("LA Citizens"). LA Citizens can levy a regular assessment on participating companies for a deficit in any calendar year up to a maximum of the greater of 10.0% of the calendar year deficit or 10.0% of Louisiana direct property premiums industry-wide for the prior calendar year.

Facilities such as LA Citizens are generally designed so that the ultimate cost is borne by policyholders, however, the exposure to assessments and the availability of recoupments or premium rate increases from the facility may not offset each other in the Company's financial statements. Moreover, even if they do offset each other, they may not offset each other in financial statements in the same fiscal period due to the ultimate timing of the assessments and recoupments or premium rate increases, as well as the possibility of policies not being renewed in subsequent years.

C. Gain Contingencies

The Company has not recognized gain contingencies subsequent to December 31, 2010, but prior to the issuance of the Company's Annual Statement.

D. Claims Related Extra Contractual Obligation and Bad Faith Losses Stemming From Lawsuits

The Company did not incur losses related to extra contractual obligation lawsuits in 2010. The Company incurred direct losses of $5 thousand on one claim in 2009.

E. All Other Contingencies

Regulation and compliance

The Company is subject to changing social, economic and regulatory conditions. From time to time, regulatory authorities or legislative bodies seek to influence and restrict premium rates, require premium refunds to policyholders, require reinstatement of terminated policies, restrict the ability of insurers to cancel or non-renew policies, require insurers to continue to write new policies or limit their ability to write new policies, limit insurers' ability to change coverage terms or to impose underwriting standards, impose additional regulations regarding agent and broker compensation, regulate the nature of and amount of investments, and otherwise expand overall regulation of insurance products and the insurance industry. The Company has established procedures and policies to facilitate compliance with laws and regulations, to foster prudent business operations, and to support financial reporting. The Company routinely reviews its practices to validate compliance with laws and regulations and with internal procedures and policies. As a result of these reviews, from time to time the Company may decide to modify some of its procedures and policies. Such modifications, and the reviews that led to them, may be accompanied by payments being made and costs being incurred. The ultimate changes and eventual effects of these actions on the Company's business, if any, are uncertain.

Legal and regulatory proceedings and inquiries

Background

The Company and certain subsidiaries are involved in a number of lawsuits, regulatory inquiries, and other legal proceedings arising out of various aspects of its business. As background to the "Proceedings" subsection below, please note the following:

- These matters raise difficult and complicated factual and legal issues and are subject to many uncertainties and complexities, including the underlying facts of each matter; novel legal issues; variations between jurisdictions in which matters are being litigated, heard or investigated; differences in applicable laws and judicial interpretations; the length of time before many of these matters might be resolved by settlement, through litigation or otherwise; the fact that some of the lawsuits are putative class actions in which a class has not been certified and in which the purported class may not be clearly defined; the fact that some of the lawsuits involve multi-state class actions in which the applicable law(s) for the claims at issue is in dispute and therefore unclear; and the current challenging legal environment faced by large corporations and insurance companies.

- The outcome of these matters may be affected by decisions, verdicts, and settlements, and the timing of such decisions, verdicts, and settlements, in other individual and class action lawsuits that involve the Company, other insurers, or other entities and by other legal, governmental, and regulatory actions that involve the Company, other insurers, or other entities. The outcome may also be affected by future state or federal legislation, the timing or substance of which cannot be predicted.

- In the lawsuits, plaintiffs seek a variety of remedies including equitable relief in the form of injunctive and other remedies and monetary relief in the form of contractual and extra contractual damages. In some cases, the monetary damages sought include punitive or treble damages. Often specific information about the relief sought, such as the amount of damages, is not available because plaintiffs have not requested specific relief in their pleadings. When specific monetary demands are made, they are often set just below a state court jurisdictional limit in order to seek the maximum amount available in state court, regardless of the

NOTES TO FINANCIAL STATEMENTS

specifics of the case, while still avoiding the risk of removal to federal court. In the Company's experience, monetary demands in pleadings bear little relation to the ultimate loss, if any, to the Company.

- In connection with regulatory examinations and proceedings, government authorities may seek various forms of relief, including penalties, restitution and changes in business practices. The Company may not be advised of the nature and extent of relief sought until the final stages of the examination or proceeding.

- For the reasons specified above, it is not possible to make meaningful estimates of the amount or range of loss that could result from the matters described below in the "Proceedings" subsection. The Company reviews these matters on an ongoing basis and follows the APPM when making accrual and disclosure decisions. When assessing reasonably possible and probable outcomes, the Company bases its decisions on its assessment of the ultimate outcome following all appeals.

- Due to the complexity and scope of the matters disclosed in the "Proceedings" subsection below and the many uncertainties that exist, the ultimate outcome of these matters cannot be reasonably predicted. In the event of an unfavorable outcome in one or more of these matters, the ultimate liability may be in excess of amounts currently reserved, if any, and may be material to the Company's net income or cash flows for a particular quarterly or annual period. However, based on information currently known to it, management believes that the ultimate outcome of all matters described below, as they are resolved over time, is not likely to have a material adverse effect on the financial position of the Company.

Proceedings

The Company is vigorously defending a number of matters in various stages of development filed in the aftermath of Hurricane Katrina, including individual lawsuits and a statewide putative class action in Louisiana. The Louisiana Attorney General filed a putative class action lawsuit in state court against the Company and other insurers on behalf of Road Home fund recipients alleging that the insurers have failed to pay all damages owed under their policies. The insurers removed the matter to federal court. The district court denied plaintiffs' motion to remand the matter to state court and the U.S. Court of Appeals for the Fifth Circuit ("Fifth Circuit") affirmed that ruling. The defendants filed a motion to dismiss and the plaintiffs filed a motion to remand the claims involving a Road Home subrogation agreement. In March 2009, the district court denied the state's request that its claims be remanded to state court. As for the defendant insurers' motion, the judge granted it in part and denied it in part. Dismissal of all of the extra-contractual claims, including the bad faith and breach of fiduciary duty claims, was granted. Dismissal also was granted of all claims based on the Valued Policy Law and all flood loss claims based on the levee breaches finding that the insurers flood exclusions precluded coverage. The remaining claims are for breach of contract and for declaratory relief on the alleged underpayment of claims by the insurers. The judge did not dismiss the class action allegations. The defendants also had moved to dismiss the complaint on grounds that the state had no standing to bring the lawsuit as an assignee of insureds because of anti-assignment language in the insurers' policies. The judge denied the defendants' motion for reconsideration on the assignment issue but found the matter was ripe for consideration by the federal appellate court. The defendants have filed a petition for permission to appeal to the Fifth Circuit. The Fifth Circuit has accepted review. After the Fifth Circuit accepted review, plaintiffs filed a motion to remand the case to state court, asserting that the class claims on which federal jurisdiction was premised have now effectively been dismissed as a result of a ruling in a related case. The Fifth Circuit has denied the motion for remand, without prejudice to plaintiffs' right to refile the motion for remand after the Fifth Circuit disposes of the pending appeal. On July 28, 2010, the Fifth Circuit issued an order stating that since there is no controlling Louisiana Supreme Court precedent on the issue of whether an insurance policy's anti-assignment clause prohibits post-loss assignments, the Fifth Circuit is certifying that issue to the Louisiana Supreme Court. The issue has been briefed to the Louisiana Supreme Court. That court will hold oral argument on the appeal on March 14, 2011.

There are one nationwide and several statewide class action lawsuits pending against the Company alleging that it failed to properly pay general contractors overhead and profit on many homeowner structural loss claims. Most of these lawsuits contain counts for breach of contract, as well as one or more counts asserting other theories of liability such as bad faith, fraud, unjust enrichment or unfair claims practices. General contractors overhead and profit is an amount that is added to payments on claims where the services of a general contractor are reasonably likely to be required. To a large degree, these lawsuits mirror similar lawsuits filed against other carriers in the industry, some of which have settled. These lawsuits are pending in various state and federal courts, and they are in different stages of development. The company has reached an agreement to settle on a 48-state basis the nationwide class action. This settlement received preliminary approval from the court on December 6, 2010, and the case was certified as a class for settlement purposes only. The settlement was accrued as a prior year reserve reestimate in property-liability insurance claims and claims expense in 2010. No other classes have been certified against the Company on this issue. The hearing for final approval of the settlement is scheduled for May 6, 2011.

The Company is vigorously defending a lawsuit in regards to certain claims employees involving worker classification issues. This lawsuit is a certified class action challenging a state wage and hour law. This lawsuit is a certified class action challenging a state wage and hour law. In this case, plaintiffs sought monetary relief, such as penalties and liquidated damages, and non-monetary relief, such as injunctive relief. In December 2009, the liability phase of the case was tried and on July 6, 2010, the court issued its decision finding in favor of the Company on all claims. The plaintiffs are appealing the decision.

The Company is defending certain matters relating to the Company's agency program reorganization announced in 1999. These matters are in various stages of development.

- These matters include a lawsuit filed in 2001 by the U.S. Equal Employment Opportunity Commission ("EEOC") alleging retaliation under federal civil rights laws (the "EEOC I" suit) and a class action filed in 2001 by former employee agents alleging retaliation and age discrimination under the Age Discrimination in Employment Act ("ADEA"), breach of contract and Employee Retirement Income Security Act ("ERISA") violations (the "Romero I" suit). In 2004, in the consolidated EEOC I and Romero I litigation, the trial court issued a memorandum and order that, among other things, certified classes of agents, including a mandatory class of agents who had signed a release, for purposes of effecting the court's declaratory judgment that the release is voidable at the option of the release signer. The court also ordered that an agent who voids the release must return to the Company "any and all benefits received by the [agent] in exchange for signing the release." The court also stated that, "on the undisputed facts of record, there is no basis for claims of age discrimination." The EEOC and plaintiffs asked the court to clarify and/or reconsider its memorandum and order and in January 2007, the judge denied their request. In June 2007, the court granted the Company's motions for summary judgment. Following plaintiffs' filing of a notice of appeal, the U.S. Court of Appeals for the Third Circuit ("Third Circuit") issued an order in December 2007 stating that the notice of appeal was not taken from a final order within the meaning of the federal law and thus not appealable at this time. In March 2008, the Third Circuit decided that the appeal should not summarily be dismissed and that the question of whether the matter is appealable at this time will be addressed by the Third Circuit along with the merits of the appeal. In July 2009, the Third Circuit vacated the decision which granted the Company's summary judgment motions, remanded the cases to the trial court for additional discovery, and directed that the cases be reassigned to another trial court judge. In January 2010, the cases were assigned to a new judge for further proceedings in the trial court.

- A putative nationwide class action has also been filed by former employee agents alleging various violations of ERISA, including a worker classification issue. These plaintiffs are challenging certain amendments to the Agents Pension Plan and are seeking to have exclusive agent independent contractors treated as employees for benefit purposes. This matter was dismissed with prejudice by the trial court, was the subject of further proceedings on appeal, and was reversed and remanded to the trial court in 2005. In June 2007, the court granted the Company's motion to dismiss the case. Following plaintiffs' filing of a notice of appeal, the Third Circuit issued an order in December 2007 stating that the notice of appeal was not taken from a final order within the meaning of the federal law and thus not appealable at this time. In March 2008, the Third Circuit decided that the appeal should not summarily be dismissed and that the question of whether the matter is appealable at this time will be addressed by the Third Circuit along with the merits of the appeal. In July 2009, the Third Circuit vacated the decision which granted the Company's motion to dismiss the case,

remanded the case to the trial court for additional discovery, and directed that the case be reassigned to another trial court judge. In January 2010, the case was assigned to a new judge for further proceedings in the trial court.

In all of these various matters, plaintiffs seek compensatory and punitive damages, and equitable relief. The Company has been vigorously defending these lawsuits and other matters related to its agency program reorganization.

Other matters

Various other legal, governmental, and regulatory actions, including state market conduct exams, and other governmental and regulatory inquiries are currently pending that involve the Company and specific aspects of its conduct of business. Like other members of the insurance industry, the Company is the target of a number of class action lawsuits and other types of proceedings, some of which involve claims for substantial or indeterminate amounts. These actions are based on a variety of issues and target a range of the Company's practices. The outcome of these disputes is currently unpredictable.

One or more of these matters could have an adverse effect on the Company's net income or cash flows for a particular quarterly or annual period. However, based on information currently known to it, management believes that the ultimate outcome of all matters described in this "Other matters" subsection, in excess of amounts currently reserved, if any, as they are resolved over time is not likely to have a material effect on the net income, cash flows or financial position of the Company.

Volume for over-the-counter derivative contracts is represented by their notional amounts. Volume for exchange traded derivatives is represented by the number of contracts which is the basis on which they are traded (n/a = not applicable). The notional amounts specified in the contracts are used to calculate the exchange of contractual payments under the agreements and are generally not representative of the potential for gain or loss on these agreements. However, the notional amounts specified in credit default swap selling protection agreements represent the maximum amount of potential loss, assuming no recoveries. Statement values are generally equal to consideration paid or received except when non-hedge accounting is used, in which case statement value is equal to current fair value. Fair value is the estimated amount that the Company would receive or pay to terminate the derivative contracts at the reporting date. The fair value for exchange traded derivative contracts is based on observable market quotations in active markets, whereas the fair value for non-exchange traded derivative contracts is determined using widely accepted valuation models and other appropriate valuation methods.

2. The credit risk, market risk and cash requirements of the Company's derivative instruments utilized during 2010 and 2009 are discussed in Note 8, Part A. The accounting policies for the Company's derivative instruments are disclosed in Note 1, Part C and Note 8, Part C.

3. The following table summarizes the credit exposure on the Company's over-the-counter contracts at December 31:

(in millions)	2010	2009
Interest rate swaption agreements	$ 53	$ 114
Foreign currency forward contracts	1	3
Interest rate swap agreements	(13)	(12)
Credit default swap agreements - buying protection	(5)	(7)
Credit default swap agreements - selling protection	(1)	-
Total derivative financial instruments	$ 35	$ 98

Credit exposure represents the Company's potential loss if all counterparties concurrently fail to perform under the contractual terms of the contracts and all collateral, if any, becomes worthless. This exposure is measured by the statement value of over-the-counter derivative contracts with a positive statement value at the reporting date reduced by the effect, if any, of legally enforceable master netting agreements. The Company has not incurred any losses on derivative financial instruments due to counterparty nonperformance.

4. The Company's policy for requiring collateral is discussed in Note 8, Part A. In general, the collateral pledged by the Company is in the custody of a counterparty or an exchange. However, the Company has access to this collateral at any time, subject to replacement. For exchange traded derivatives, the exchange requires margin deposits as well as daily cash settlements of margin accounts. At December 31, 2010 and 2009, the Company pledged $18 million and $9 million, respectively, of securities in the form of margin deposits. Usually, the Company pledges U.S. Treasury bonds to satisfy this collateral requirement. The Company uses master netting agreements for over-the-counter derivative transactions. These agreements permit either party to net payments due for transactions covered by the agreements. Under the provisions of the agreements, collateral is either pledged or obtained when certain predetermined exposure limits are exceeded. At December 31, 2010, counterparties pledged $19 million in cash and $22 million in securities to the Company, and the Company pledged $40 million in securities to counterparties. At December 31, 2009, counterparties pledged $39 million in cash to the Company, and the Company pledged $9 million in securities to counterparties.

Off-balance sheet financial instruments

1. The contractual amounts of off-balance sheet financial instruments at December 31 were as follows:

(in millions)	2010	2009
Commitments to invest in limited partnership interests	$ 740	$ 631
Private placement commitments	$ 48	$ -
Other loan commitments	$ -	$ 2

2. Commitments to invest generally represent commitments to acquire financial interests or instruments. The Company enters into these agreements to allow for additional participation in certain limited partnership investments.

   Private placement commitments represent conditional commitments to purchase private placement debt and equity securities at a specified future date. The Company regularly enters into these agreements in the normal course of business.

   Other loan commitments are agreements to lend to a borrower provided there is no violation of any condition established in the contract. The Company enters into these agreements to commit to future loan fundings at predetermined interest rates. Commitments generally have fixed or varying expiration dates or other termination clauses.

3. The contractual amounts represent the amount at risk if the contract was fully drawn upon, the counterparty defaults and the value of any underlying security becomes worthless.

4. The Company does not require collateral or other security to support off-balance sheet financial instruments with credit risk.

17. Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

A. The Company did not report transfers of premium receivables as sales in 2010 or 2009.

B. The Company did not enter into agreements for the transfer or servicing of financial assets or extinguishment of liabilities in 2010 or 2009.

There were no direct premiums written/produced by managing general agents/third party administrators in 2010 or 2009.

20. Fair Value Measurements

A. Fair value is defined, per SSAP 100, *Fair Value Measurements* ("SSAP No. 100"), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP No. 100 identified three valuation techniques which are used, either independently or in combination, to determine fair value: 1) market approach; 2) income approach; and 3) cost approach. SSAP No. 100 also contains guidance about observable and unobservable inputs, which are assumptions that market participants would use in pricing an asset or liability. To increase consistency and comparability in fair value measurements, the fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels; levels 1, 2 and 3. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available.

The Company has two types of situations where investments are classified as Level 3 in the fair value hierarchy. The first is where quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources. The second situation is where specific inputs significant to the fair value estimation models are not market observable, including the Company's use of broker quotes.

During 2010, certain securities were transferred into Level 2 from Level 3 as a result of increased liquidity in the market and the availability of market observable quoted prices for similar assets. When transferring these securities into Level 2, the Company did not change the source of fair value estimates or modify the estimates received from independent third-party valuation service providers or the internal valuation approach. Accordingly, for securities included within this group, there was no change in fair value in conjunction with the transfer resulting in a realized or unrealized gain or loss.

Transfers into Level 3 during the 2010 included situations where a fair value quote was not provided by the Company's independent third-party valuation service provider, and as a result the price was stale or had been replaced with a broker quote resulting in the security being classified as Level 3. Transfers out of Level 3 during 2010, included situations where a broker quote was used in the prior period and a fair value quote became available from the Company's independent third-party valuations service provider in the current period. A quote utilizing the new pricing source was not available as of the prior period, and any gains or losses related to the change in valuation source for individual securities were not significant.

3. Transfers between level categorizations may occur due to changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity, trading volume or bid-ask spreads. Transfers between level categorizations may also occur due to changes in the valuation source. For example, in situations where a fair value quote is not provided by the Company's independent third-party valuation service provider and as a result, the price is stale or has been replaced with a broker quote, the security is transferred into Level 3. Transfers in and out of level categorizations are reported as having occurred at the beginning of the quarter in which the transfer occurred.

4. In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 and Level 3 valuations, a combination of the market and income approaches is used.

Listed below is a summary of the significant valuation techniques for assets and liabilities measured and reported at fair value.

Level 2 measurements

Bonds

Municipal - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

Corporate, including privately placed - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Also included are privately placed securities valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer.

Residential mortgage-backed securities ("RMBS") - prime residential mortgage-backed securities ("Prime") and Alt-A residential mortgage-backed securities ("Alt-A"), asset-backed securities ("ABS")-auto and student loans and other - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads.

Unaffiliated common and preferred stocks - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

Derivatives - Exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives, including interest rate swap agreements, foreign exchange forward

NOTES TO FINANCIAL STATEMENTS

contracts, and certain credit default swap agreements, are valued using models that rely on inputs such as interest rate yield curves, currency rates, and counterparty credit spreads that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

Level 3 measurements

Bonds

Municipal - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields and credit spreads.

Corporate, including privately placed - Primarily valued based on non-binding broker quotes.

RMBS - Subprime residential mortgage-backed securities ("Subprime") - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. Also included are Subprime valued based on non-binding broker quotes. Due to the reduced availability of actual market prices or relevant observable inputs as a result of the decrease in liquidity that has been experienced in the market for these securities, Subprime are categorized as Level 3.

Commercial mortgage-backed securities (“CMBS”) - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields, collateral performance and credit spreads. Also included are CMBS that are valued based on non-binding broker quotes. Due to the reduced availability of actual market prices or relevant observable inputs as a result of the decrease in liquidity that has been experienced in the market for these securities, certain CMBS are categorized as Level 3.

ABS - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. Also included are ABS that are valued based on non-binding broker quotes. Due to the reduced availability of actual market prices or relevant observable inputs as a result of the decrease in liquidity that has been experienced in the market for these securities, certain ABS are categorized as Level 3.

Preferred stocks - The primary inputs to the valuation included quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

Unaffiliated common stocks - Value based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Unobservable inputs reflect the Company’s estimates of assumptions that market participants would use in valuing the asset.

Derivatives - Certain interest rate contracts are valued using models that are widely accepted in the financial services industry. These are categorized as Level 3 as a result of the significance of non-market observable inputs such as volatility. Other primary inputs include interest rate yield curves.

The fair value of U.S. Treasury bonds is based on unadjusted quoted market prices for identical assets in active markets the Company can access. The fair value of all other publicly traded bonds, including loan-backed and structured securities, is based upon quoted market prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Non-publicly traded bonds, including loan-backed and structured securities, are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. In 2009, NAIC Securities Valuation Office (“SVO”) market prices were used when available.

The fair value of preferred stocks is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads. In 2009, SVO market prices were used when available.

The fair value of unaffiliated common stocks is based on unadjusted quoted market prices for identical assets in active markets the Company can access. In 2009, SVO market prices were used when available.

The fair value of mortgage loans on real estate is based on discounted contractual cash flows or if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics, using similar types of properties as collateral.

The fair value of cash equivalents and short-term investments is based on quoted market prices for identical or similar assets in markets that are not active or amortized cost.

Exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives are valued using models that are widely accepted in the financial services industry. Primary inputs include interest rate yield curves, currency rates and counterparty credit spreads.

The fair value of LIHTC property investments is based on amortized cost which approximates fair value.

NOTES TO FINANCIAL STATEMENTS

The fair value of surplus notes of affiliates is based on discounted cash flow calculations using current interest rates for instruments with comparable terms.

D. The Company was able to estimate the fair value of all its financial instruments in 2010 and 2009.

21. Other Items

A. Extraordinary Items

The Company did not have extraordinary items at December 31, 2010 or 2009.

B. Troubled Debt Restructuring: Debtors

The Company did not have troubled debt restructurings at December 31, 2010 or 2009.

C. Other Disclosures

Credit facility

The Company, along with ALIC and the Corporation, has access to a $1.00 billion unsecured revolving credit facility that has an initial term of 5 years expiring in 2012 with two optional one-year extensions that can be exercised at the end of any of the remaining anniversary years of the facility upon approval of existing or replacement lenders providing more than two thirds of the commitments to lend. This facility contains an increase provision that would allow up to an additional $500 million of borrowing provided the increased portion could be fully syndicated at a later date among existing and new lenders. There were no borrowings under the line of credit in 2010 or 2009.

Miscellaneous

Included in the Annual Statement is a schedule of net losses and loss expenses unpaid, as reported in Schedule P - Part 1, columns 13 through 24, for accident years 2000, 1999, 1998, 1997, 1996, and 1995 and prior, for each line of business reported.

Other expenses reported on Page 3, Line 5, Liabilities, Surplus and Other Funds, included $41 million and $37 million of reserves related to employee medical and dental plans at December 31, 2010 and 2009, respectively.

D. Premium Balances Reasonably Possible to be Uncollectible

The Company routinely assesses the collectibility of its premiums and considerations that are less than 90 days old. The allowance for uncollectible premiums and considerations is determined based on the age of the receivable and prior collection experience. The allowance balance for admitted premiums and considerations, after reinsurance, was $23 million at both December 31, 2010 and 2009. Premiums and considerations older than 90 days are nonadmitted.

E. Business Interruption Insurance Recoveries

The Company did not procure business interruption insurance in 2010 or 2009.

F. State Transferable Tax Credits

1. At December 31, 2010, the Company had unused transferable state tax credits in Connecticut of $2 million, with a carrying value rounded to the same amount. The Company did not have state transferable tax credits at December 31, 2009.

2. The Company estimates the utilization of the remaining transferable state tax credits by projecting the future tax liability and comparing it to the availability of remaining transferable state tax credits. At December 31, 2010, the estimated unused transferable state tax credits are expected to be fully utilized by December 31, 2011.

3. The Company did not recognize impairment losses on the carrying values of state transferable tax credits in 2010 or 2009.

G. Subprime Mortgage Related Risk Exposure

1. The Company identified it had exposure to subprime residential mortgage related risk in the form of asset-backed residential mortgage-backed securities (“ABS RMBS”), as well as a limited partnership investment. The ABS RMBS portfolio includes securities that are collateralized by mortgage loans issued to borrowers that cannot qualify for prime or alternative financing terms due in part to an impaired or limited credit history. It also includes securities that are collateralized by certain second lien mortgages regardless of the borrower’s credit profile. At December 31, 2010, the ABS RMBS portfolio had net unrealized losses of $34 million, comprised of $35 million in gross unrealized losses and $1 million in gross unrealized gains. At December 31, 2009, the ABS RMBS portfolio had net unrealized losses of $78 million, comprised of $79 million in gross unrealized losses and $1 million in gross unrealized gains.

   In addition, the Company owns Alt-A securities, which it does not consider to be a component of its exposure to subprime mortgage related risk. The Alt-A portfolio consists of mortgage-backed securities at fixed or variable rates and includes certain securities that are collateralized by residential mortgage loans issued to borrowers with stronger credit profiles than subprime borrowers, but do not qualify for prime financing terms due to high loan-to-value ratios or limited supporting documentation. At December 31, 2010, the Alt-A portfolio had net unrealized gains of $11 million, comprised of $23 million were gross unrealized gains and $12 million in gross unrealized losses. At December 31, 2009, the Alt-A portfolio had net unrealized gains of $3 million, comprised of $11 million in gross unrealized gains and $8 million in gross unrealized losses.

   Both ABS RMBS and Alt-A securities are considered loan-backed, and included in bonds in the Company’s Asset page.

   The Company has a comprehensive portfolio monitoring process to identify and evaluate, on a case-by-case basis, investments whose carrying value may be OTTI. See the investments accounting policy in Note 1, Part C for more details. The Company recorded investment write-downs related to asset impairments in the ABS RMBS portfolio of $87 million and $38 million in 2010 and 2009, respectively. The Company recorded investment write-downs of $2 million in the ABS RMBS portfolio in 2010 due the potential sale of assets to meet future cash flow requirements. There were no investment write-downs recorded in 2009 in the ABS RMBS portfolio due to the potential sale of assets to meet future cash flow requirements. In addition, investment write-downs of $29 million and $27 million

NOTES TO FINANCIAL STATEMENTS

were recorded in the Alt-A portfolio related to asset impairments in 2010 and 2009, respectively. There were no investment write-downs recorded in 2010 or 2009 in the Alt-A portfolio due to the potential sale of assets to meet future cash flow requirements. The Company continues to believe that the unrealized losses on these securities are not necessarily predictive of the performance of the underlying collateral. In the absence of further deterioration in the collateral relative to the Company's positions in the securities' respective capital structures, which could require recognition of OTTI, the unrealized losses should reverse over the remaining lives of the securities.

The Company's practice for acquiring and monitoring ABS RMBS and Alt-A securities takes into consideration the quality of the originator, quality of the servicer, security credit rating, underlying characteristics of the mortgages, borrower characteristics, level of credit enhancement in the transaction, and bond insurer strength, where applicable. The originators and servicers of the underlying mortgage loans are primarily subsidiaries of large banks and brokers.

2. The Company did not have direct exposure to subprime mortgage loans.

3. The Company's direct exposure to other subprime investments is summarized as follows at December 31:

(in millions)	2010

4. The Company did not sell mortgage guaranty or financial guaranty insurance coverage, and therefore, does not have underwriting exposure to subprime mortgage risk.

22. Events Subsequent

An evaluation of subsequent events was made through February 23, 2011 for the Annual Statement issued on February 25, 2011. There were no significant subsequent events requiring adjustment to or disclosure in the financial statements.

23. Reinsurance

A. Unsecured Reinsurance Recoverables

B. Reinsurance Recoverable in Dispute

The Company did not have reinsurance recoverables on paid or unpaid (including incurred but not reported) losses in dispute by reason of notification, arbitration or litigation at December 31, 2010 or 2009, that either individually exceeded 5% of the Company's policyholders surplus, or in the aggregate exceeded 10% of the Company's policyholders surplus.

C. Reinsurance Assumed and Ceded

1. The maximum amount of return commission which would have been due to reinsurers if they or the Company had canceled all of the Company's reinsurance, or if the Company or reinsurers had canceled all the Company's insurance assumed as of December 31 with the return of unearned premium reserve was as follows:

a. Reserves transferred:		
1. Initial reserves	$ 411	$ 411

e. SCOR (NAIC Company Code 30058) was the only cedant involved in all the transactions included in the summary totals above. The Company did not assume retroactive reinsurance in 2010 or 2009.

f. There were no amounts of total paid loss or loss adjustment expenses recoverable at December 31, 2010 or 2009.

G. Reinsurance Accounted for as a Deposit

On October 1, 1999, the Company completed the acquisition of the personal lines business from CNA Financial Corporation ("CNA"). The transaction included an indemnity reinsurance agreement and a reserve agreement. The reserve agreement guaranteed the adequacy, in all material respects, of the loss reserves transferred by CNA under the indemnity reinsurance agreement. The Company used deposit accounting to account for the indemnity reinsurance agreement, as the portion of the indemnity reinsurance agreement governing the transfer of the loss reserves did not, despite its form, transfer both components of insurance risk. In accordance with the requirements of deposit accounting, an initial asset deposit of $1.05 billion was recorded. The inception-to-date payments for this agreement totaled $836 million and $833 million at December 31, 2010 and 2009, respectively. Inception-to-date net adjustments related to the reserve agreement reduced the reserves on deposit by $187 million at both December 31, 2010 and 2009. The balance of the reserves on deposit was $24 million and $28 million at December 31, 2010 and 2009, respectively.

H. Transfer of Run-off Agreements

The Company did not enter into any agreements that qualified to receive run-off accounting treatment in 2010.

NOTES TO FINANCIAL STATEMENTS

24. Retrospectively Rated Contracts and Contracts Subject to Redetermination

A. The Company accrues estimated retrospective premium adjustments on certain commercial insurance policies through the review of each individual retrospectively rated risk, comparing the known loss development, including IBNR reserves, with that anticipated in the policy contract to arrive at the best estimate of returned or additional retrospective premium.

The Company also accrues estimated retrospective premium adjustments related to Your Choice Auto platinum ("YCA"), Your Choice Home platinum and gold ("YCH") and Allstate Blue policies in eligible states. YCA and YCH policies that are claim free during the policy period receive 5.0% of the premium paid for certain major coverages as a billing credit or refund. Allstate Blue policies offer non-standard auto coverage and contain a loyalty bonus which rewards eligible policyholders who stay with the Company for a full policy term with a 5.0% to 10.0% bonus of premium paid for certain major coverages. The amount of accrued retrospective premium adjustments is determined by analyzing the historical loss experience of these policyholders.

B. The Company records accrued retrospective premium as an adjustment to earned premiums on certain commercial insurance policies. For YCA, YCH and Allstate Blue policies, the Company records accrued retrospective premium as an adjustment to written premiums.

C. The amount of net premiums written by the Company in 2010 and 2009 subject to retrospective rating features was $2.11 billion and $2.01 billion, respectively. These amounts represented 9.0% and 8.4% of total net premiums written in 2010 and 2009, respectively.

D. The Company nonadmitted 10.0% of accrued retrospective premiums related to certain commercial insurance policies not offset by retrospective return premiums, other liabilities to the same party (other than loss and loss adjustment expense reserves), or collateral as permitted by SSAP No. 66, *Retrospectively Rated Contracts*, as follows:

(in millions)	2010	2009
a. Total accrued retro premiums	$ 3	$ 3
b. Unsecured amount	3	3
c. Less: Nonadmitted amount (10.0%)	-	-
d. Less: Nonadmitted for any person for whom agents' balances or uncollected premiums are nonadmitted	-	-
e. Admitted amount (a) - (c) - (d)	$ 3	$ 3

The Company is responsible for the return of premium to YCA, YCH and Allstate Blue policyholders. These amounts represent a liability to the Company.

25. Changes in Incurred Losses and Loss Adjustment Expenses

The Company establishes reserves for losses and loss adjustment expenses on reported and unreported claims of insured losses. The Company's reserving process takes into account known facts and interpretations of circumstances and factors including the Company's experience with similar cases, actual claims paid, historical trends involving claim payment patterns and pending levels of unpaid claims, loss management programs, product mix and contractual terms, changes in law and regulation, judicial decisions, and economic conditions. In the normal course of business, the Company may also supplement its claim processes by utilizing third party adjusters, appraisers, engineers, inspectors, other professionals and information sources to assess and settle catastrophe and non-catastrophe related claims. The effects of inflation are implicitly considered in the reserving process.

Since reserves are estimates of the unpaid portion of losses that have occurred, including IBNR losses, the establishment of appropriate reserves is an inherently uncertain and complex process. The ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimates. The highest degree of uncertainty is associated with reserves for losses incurred in the current reporting period as it contains the greatest proportion of losses that have not been reported or settled. The Company regularly updates its reserve estimates as new information becomes available and as events unfold that may affect the resolution of unsettled claims. Changes in prior year reserve estimates, which may be material, are reflected in the Statement of Income in the period such changes are determined.

Activity in the reserve for losses and loss adjustment expenses was summarized as follows:

(in millions)	2010	2009
Balance at January 1	$ 14,499	$ 14,859
Incurred related to:		
Current year	17,404	17,259
Prior years	(95)	(68)
Total incurred	17,309	17,191
Paid related to:		
Current year	11,165	11,282
Prior years	5,863	6,269
Total paid	17,028	17,551
Balance at December 31	$ 14,780	$ 14,499

Incurred losses and loss adjustment expenses represent the sum of paid losses and reserve changes in the calendar year. This expense included net losses from catastrophes of $2.15 billion and $2.05 billion in 2010 and 2009, respectively. Catastrophes are an inherent risk that have contributed to, and will continue to contribute to, material year-to-year fluctuations in the Company's net income and financial position.

The Company calculates and records a single best reserve estimate for losses from catastrophes, in conformity with generally accepted actuarial principles. As a result, management believes that no other estimate is better than the recorded amount. Due to the uncertainties involved, including the factors described above, the ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimates. Accordingly, management believes that it is not practicable to develop a meaningful range for such changes in losses incurred.

Incurred losses and loss adjustment expenses attributable to insured events of prior years were $(95) million and $(68) million as a result of the reestimation of unpaid losses and loss adjustment expenses for the years ended December 31, 2010 and 2009, respectively. During 2010, favorable development in incurred losses and loss adjustment expenses related to prior years was primarily due to favorable prior year catastrophes and severity development that was better than expected, partially offset by litigation settlements. During 2009, favorable development in incurred losses and loss adjustment expenses related to prior years was primarily due to a reduction in catastrophe losses. These changes were generally the result of ongoing analyses of recent loss development trends. Initial estimates were revised as additional information regarding claims became known.

Anticipated salvage and subrogation of $552 million and $573 million was included as a reduction of loss reserves at December 31, 2010 and 2009, respectively.

26. Intercompany Pooling Arrangements

The Company was not a member of an intercompany pooling arrangement in 2010 or 2009.

NOTES TO FINANCIAL STATEMENTS

27. Structured Settlements

A. To settle certain claims, the Company purchased annuities from various life insurers where the claimant was the payee but for which the Company was contingently liable in the event the issuer of the annuity was unable to perform. At December 31, 2010 and 2009, the aggregate amount of reserves for which the Company was contingently liable was $309 million and $308 million, respectively.

B. ALIC, located in Northbrook, Illinois, was the only life insurer where the total statement value of reserves for which the Company was contingently liable exceeded 1% of the Company's policyholder surplus at December 31. The statement value (i.e. present value) of ALIC's reserves for which the Company was contingently liable was $182 million at both December 31, 2010 and 2009. This affiliated life insurer is licensed in the Company's state of domicile.

28. Health Care Receivables

The Company did not have health care receivables at December 31, 2010 or 2009.

29. Participating Policies

The Company did not have participating policies, as defined by SSAP No. 51, *Life Contracts*, or SSAP No. 54, *Individual and Group Accident and Health Contracts*, at December 31, 2010 or 2009.

30. Premium Deficiency Reserves

The Company did not record premium deficiency reserves at December 31, 2010 or 2009. Anticipated investment income was considered as a factor in the premium deficiency calculation.

31. High Deductibles

At December 31, 2010 and 2009, the amount of reserve credit recorded for high deductibles on unpaid claims was $159 thousand and $368 thousand, respectively. The Company did not have amounts billed and recoverable on paid claims at December 31, 2010. At December 31, 2009, the amount billed and recoverable on paid claims was $40 thousand.

32. Discounting of Liabilities for Unpaid Losses or Unpaid Loss Adjustment Expenses

The Company did not discount its liabilities for unpaid losses or unpaid loss adjustment expenses at December 31, 2010 or 2009.

33. Asbestos/Environmental Reserves

A. The Company continues to receive asbestos and environmental claims. Asbestos claims relate primarily to bodily injuries asserted by people who were exposed to asbestos or products containing asbestos. Environmental claims relate primarily to pollution and related clean-up costs.

The Company's exposure to asbestos and environmental claims arises principally from assumed reinsurance coverage written during the 1960s through the mid-1980s, including reinsurance on primary insurance written on large U.S. companies, and from direct excess insurance written from 1972 through 1985, including substantial excess general liability coverages on large U.S. companies. Additional exposure stems from direct primary commercial insurance written during the 1960s through the mid-1980s.

In 1986, the general liability policy form used by the Company and others in the property and casualty insurance industry was amended to introduce an "absolute pollution exclusion," which excluded coverage for environmental damage claims, and added an asbestos exclusion. Most general liability policies issued prior to 1987 contain annual aggregate limits for product liability coverage. General liability policies issued in 1987 and thereafter contain annual aggregate limits for product liability coverage and annual aggregate limits for all coverages. The Company's experience to date has been that these policy form changes have limited the extent of its exposure to environmental and asbestos claim risks.

The Company's exposure to liability for asbestos and environmental losses manifests differently depending on whether it arises from assumed reinsurance coverage, direct excess insurance, or direct primary commercial insurance. The direct insurance coverage the Company provided for these exposures was substantially "excess" in nature.

Direct excess insurance and reinsurance involve coverage written by the Company for specific layers of protection above retentions and other insurance plans. The nature of excess coverage and reinsurance provided to other insurers limits the Company's exposure to loss to specific layers of protection in excess of policyholder retention on primary insurance plans. The Company's exposure is further limited by the significant reinsurance that was purchased on the direct excess business.

The Company's assumed reinsurance business involved writing generally small participations in other insurers' reinsurance programs. The reinsured losses in which the Company participates may be a proportion of all eligible losses or eligible losses in excess of defined retentions. The majority of the Company's assumed reinsurance exposure, approximately 85%, is for excess of loss coverage, while the remaining 15% is for pro-rata coverage.

The Company's direct primary commercial insurance business did not include coverage to large asbestos manufacturers. This business comprises a cross section of policyholders engaged in many diverse business sectors located throughout the country.

The Company conducts an annual review in the third quarter of each year to evaluate and establish asbestos and environmental reserves. Reserves are recorded in the reporting period in which they are determined. Using established industry and actuarial best practices and assuming no change in the regulatory or economic environment, this detailed and comprehensive "ground up" methodology determines asbestos reserves based on assessments of the characteristics of the exposure (e.g. claim activity, potential liability, jurisdiction, products versus non-products exposure) presented by individual policyholders, and determines environmental reserves based on assessments of the characteristics of exposure (e.g. environmental damages, respective shares of liability of potentially responsible parties, appropriateness and cost of remediation) to pollution and related clean-up costs. The number and cost of these claims is affected by intense advertising by trial lawyers seeking asbestos plaintiffs, and entities with asbestos exposure seeking bankruptcy protection as a result of asbestos liabilities, initially causing a delay in the reporting of claims, often followed by acceleration and an increase in losses and loss adjustment expenses as settlements occur.

After evaluating insureds' probable liabilities for asbestos and/or environmental claims, the Company evaluates the insureds' coverage programs for such claims. The Company considers the insureds' total available insurance coverage, including the coverage it issued. The Company also considers relevant judicial interpretations of policy language and applicable coverage defenses or determinations, if any.

Evaluation of both the insureds' estimated liabilities and the Company's exposure to the insureds depends heavily on an analysis of the relevant legal issues and litigation environment. This analysis is conducted by the Company's specialized claims adjusting staff and legal counsel. Based on these evaluations, case reserves are established by claims adjusting staff and actuarial analysis is employed to develop an IBNR reserve, which includes estimated potential reserve development and claims that have occurred but have not been reported.

For both asbestos and environmental reserves, the Company also evaluates its historical direct net loss and loss adjustment expenses paid and incurred experience to assess any emerging trends, fluctuations or characteristics suggested by the aggregate paid and incurred activity.

Establishing net loss reserves for asbestos and environmental claims is subject to uncertainties that are much greater than those presented by other types of claims. Among the complications are lack of historical data, long reporting delays, uncertainty as to the number and identity of

NOTES TO FINANCIAL STATEMENTS

insureds with potential exposure and unresolved legal issues regarding policy coverage; unresolved legal issues regarding the determination, availability and timing of exhaustion of policy limits; plantiffs' evolving and expanding theories of liability, availability and collectibility of recoveries from reinsurance; retrospectively determined premiums and other contractual agreements; estimates of the extent and timing of any contractual liability; the impact of bankruptcy protection sought by various asbestos producers and other asbestos defendants; and other uncertainties. There are also complex legal issues concerning the interpretation of various insurance policy provisions and whether those losses are covered, or were ever intended to be covered, and could be recoverable through retrospectively determined premium, reinsurance or other contractual agreements. Courts have reached different and sometimes inconsistent conclusions as to when losses were deemed to have occurred and which policies provide coverage; what types of losses are covered; whether there is an insurer obligation to defend; how policy limits are determined; how policy exclusions and conditions are applied and interpreted; and whether clean-up costs represent insured property damage. The Company's reserves for asbestos and environmental exposures could be affected by tort reform, class action litigation and other potential legislation and judicial decisions. Environmental exposures could also be affected by a change in the existing federal Superfund law and similar state statutes. There can be no assurance that any reform legislation will be enacted or that any such legislation will provide for a fair, effective and cost-efficient system for settlement of asbestos or environmental claims. Management believes these issues are not likely to be resolved in the near future, and the ultimate costs may vary materially from the amounts currently recorded resulting in material changes in loss reserves.

Management believes its net loss reserves for asbestos and environmental exposures are appropriately established based on available facts, technology, laws, regulations, and assessments of other pertinent factors and characteristics of exposure (e.g. claim activity, potential liability, jurisdiction, products versus non-products exposure) presented by individual policyholders, assuming no change in the legal, legislative or economic environment. Due to the uncertainties and factors described above, management believes it is not practicable to develop a meaningful range for any such additional net loss reserves that may be required.

The following table summarizes the Company's reserve and claim activity for asbestos claims on a direct basis, for assumed reinsurance and after (net) the effects of ceded reinsurance.

SCHEDULE P INTERROGATORIES

1. The following questions relate to yet-to-be-issued Extended Reporting Endorsements (EREs) arising from Death, Disability, or Retirement (DDR) provisions in Medical Professional Liability Claims Made insurance policies. EREs provided for reasons other than DDR are not to be included.

1.1 Does the company issue Medical Professional Liability Claims Made insurance policies that provide tail (also known as an extended reporting endorsement, or "ERE") benefits in the event of Death, Disability, or Retirement (DDR) at a reduced charge or at no additional cost? ..... Yes [ ] No [X]

If the answer to question 1.1 is "no", leave the following questions blank. If the answer to question 1.1 is "yes", please answer the following questions:

1.2 What is the total amount of the reserve for that provision (DDR Reserve), as reported, explicitly or not, elsewhere in this statement (in dollars)? ..... $.....

1.3 Does the company report any DDR reserve as Unearned Premium Reserve per SSAP #65? ..... Yes [ ] No [ ]

1.4 Does the company report any DDR reserve as loss or loss adjustment expense reserve? ..... Yes [ ] No [ ]

1.5 If the company reports DDR reserve as Unearned Premium Reserve, does that amount match the figure on the Underwriting and Investment Exhibit, Part 1A – Recapitulation of all Premiums (Page 7) Column 2, Lines 11.1 plus 11.2? ..... Yes [ ] No [ ] N/A [ ]

1.6 If the company reports DDR reserve as loss or loss adjustment expense reserve, please complete the following table corresponding to where these reserves are reported in Schedule P:

Years in Which Premiums Were Earned and Losses Were Incurred		DDR Reserve Included in Schedule P, Part 1F, Medical Professional Liability Column 24: Total Net Losses and Expenses Unpaid

2. The definition of allocated loss adjustment expenses (ALAE) and, therefore, unallocated loss adjustment expenses (ULAE) was changed effective January 1, 1998. This change in definition applies to both paid and unpaid expenses. Are these expenses (now reported as " Defense and Cost Containment" and "Adjusting and Other") reported in compliance with these definitions in this statement? ..... Yes [X] No [ ]

3. The Adjusting and Other expense payments and reserves should be allocated to the years in which the losses were incurred based on the number of claims reported, closed and outstanding in those years. When allocating Adjusting and Other expense between companies in a group or a pool, the Adjusting and Other expense should be allocated in the same percentage used for the loss amounts and the claim counts. For reinsurers, Adjusting and Other expense assumed should be reported according to the reinsurance contract. For Adjusting and Other expense incurred by reinsurers, or in those situations where suitable claim count information is not available, Adjusting and Other expense should be allocated by a reasonable method determined by the company and described in Interrogatory 7, below. Are they so reported in this Statement? ..... Yes [X] No [ ]

Schedule P must be completed gross of non-tabular discounting. Work papers relating to discount calculations must be available for examination upon request.

Discounting is allowed only if expressly permitted by the state insurance department to which this Annual Statement is being filed.

5. What were the net premiums in force at the end of the year for:

(in thousands of dollars)

5.1 Fidelity 283

5.2 Surety 4

6. Claim count information is reported per claim or per claimant (Indicate which). ..... per claim.....

If not the same in all years, explain in Interrogatory 7.

7.1 The information provided in Schedule P will be used by many persons to estimate the adequacy of the current loss and expense reserves, among other things. Are there any especially significant events, coverage, retention or accounting changes that have occurred that must be considered when making such analyses? ..... Yes [X] No [ ]

7.2 (An extended statement may be attached.)

Persons using Schedule P to estimate the adequacy of auto liability loss and loss expense reserves should consider the effect that disposition rate changes over the last 10 year period may have on their estimates, taking into account the distortions that changing claim disposition rates cause to development patterns inherent in the historical data and projections that rely on that data. .....
