NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Allstate Insurance Company ("Company") prepares its financial statements in conformity with accounting practices prescribed or permitted by the Illinois Department of Insurance ("IL DOI"). Prescribed statutory accounting practices include a variety of publications of the National Association of Insurance Commissioners ("NAIC"), as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

The state of Illinois requires its domestic insurance companies to prepare financial statements in conformity with the NAIC Accounting Practices and Procedures Manual ("APPM"), which includes all Statements of Statutory Accounting Principles ("SSAPs"), subject to any deviations prescribed or permitted by the IL DOI.

B. The preparation of financial statements is in conformity with the NAIC Annual Statement Instructions and accounting practices prescribed or permitted by the IL DOI, which requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

C. Listed below is a summary of the accounting policies that materially affect the financial statements.

Investments

Bonds with an NAIC designation of 1 or 2, including loan-backed and other structured securities, are stated at amortized cost using the effective yield method. Bonds with an NAIC designation of 3 through 6 are carried at the lower of amortized cost or fair value, with the difference reflected in unassigned surplus. In general, loan-backed and structured securities utilize a multi-step process for determining carrying value and NAIC designation in accordance with SSAP No. 43R, *Loan-backed and Structured Securities*.

Redeemable preferred stocks are stated at amortized cost or the lower of amortized cost or fair value, depending on the assigned credit rating. Perpetual preferred stocks are carried at fair value or the lower of cost or fair value depending on the assigned credit rating. Unaffiliated common stocks are carried at fair value. For preferred stocks stated at fair value and unaffiliated common stocks, the differences between amortized cost or cost and fair value are recorded as a change in net unrealized capital gains (losses), which is a component of unassigned surplus.

Common stock investments in insurance subsidiaries, controlled, and affiliated ("SCA") entities are based on the underlying statutory equity of the subsidiary and adjusted for unamortized goodwill, if applicable. Common stock investments in non-insurance SCA entities are generally recorded based on the underlying Generally Accepted Accounting Principles ("GAAP") equity of the investee, with unrealized gains or losses reflected in unassigned surplus.

Mortgage loans are carried at outstanding principal balances, net of unamortized premium or discount and book value adjustments. Book value adjustments include other-than-temporary impairment ("OTTI") adjustments. OTTI adjustments are recorded when based on the current information and events, it is probable contractual principal and interest will not be collected. OTTI adjustments reduce the carrying value of mortgage loans to the fair value of the collateral less the estimated cost to sell.

Investments in real estate are stated at the lower of depreciated cost or fair value less encumbrances. The carrying value of real estate is adjusted for impairments that are other than temporary.

Cash equivalents are carried at amortized cost. They are both readily convertible into known amounts of cash and so near to their maturity that they present an insignificant risk of change in value because of changes in interest rates.

Short-term investments are carried at cost or amortized cost that approximates fair value and includes the investment of collateral received in connection with the Company's securities lending business activities and cash collateral received from counterparties related to derivative transactions. For these transactions, the Company records an offsetting liability for the Company's obligation to return collateral or funds received.

Other invested assets consists of investments in joint ventures, partnerships, limited liability companies, low income housing tax credit ("LIHTC") property investments, collateral loans and surplus notes. Investments in joint ventures, partnerships and limited liability companies are generally recorded based on the underlying GAAP equity of the investee, with undistributed earnings or losses reflected in unassigned surplus. Income is recognized upon cash distribution to the extent it does not exceed undistributed earnings. LIHTC property investments are generally recorded at cost and amortized based on the utilization of tax credits. Collateral loans are carried at the outstanding principal balance and any related accrued interest. Surplus notes are carried at either their face value or at a reduced face value based on a prescribed statement factor calculation.

Investment income consists primarily of interest and dividends. Interest is recognized on an accrual basis using the effective yield method and dividends are recorded at the ex-dividend date. Interest income for loan-backed and structured securities is determined considering estimated pay-downs, including prepayments, obtained from third party data sources and internal estimates. Actual prepayment experience is periodically reviewed and effective yields are recalculated when differences arise between the prepayments originally anticipated and the actual prepayments received and currently anticipated. For beneficial interests in securitized financial assets not of high credit quality, the effective yield is recalculated on a prospective basis. For all other loan-backed and structured securities the effective yield is recalculated on the retrospective basis. In periods subsequent to the recognition of an OTTI on a bond or mortgage loan, the Company accounts for the impaired asset as if it had been purchased on the measurement date of the impairment. The difference between the new amortized cost basis and the cash flows expected to be collected are accreted as interest income. Accrual of income is suspended for OTTI bonds when the timing and amount of cash flows expected to be received is not reasonably estimable. Accrual of income is suspended for mortgage loans that are in default or when the full and timely collection of principal and interest payments is not probable. Cash receipts on investments on nonaccrual status are generally recorded as a reduction of carrying value.

Realized capital gains and losses include gains and losses on investment sales, write-downs in value due to other-than-temporary declines in fair value and periodic changes in the fair value and settlements of certain derivatives. Realized capital gains and losses on investment sales, including calls and principal payments, are determined on a specific identification basis.

The Company has a comprehensive portfolio monitoring process to identify and evaluate each security whose carrying value may be other than temporarily impaired. For bonds, excluding loan-backed and structured securities, in an unrealized loss position, the Company assesses whether management with the appropriate authority has made a decision to sell the bond prior to its maturity at an amount below its carrying value. If the decision has been made to sell the bond, the bond's decline in fair value is other than temporary and the Company recognizes a realized loss equal to the difference between the amortized cost and the fair value of the bond at the balance sheet date the assessment is made. If the Company has not made the decision to sell the bond, but the bond's decline in value is specific to an issuer's fundamental credit difficulties, the decline is other than temporary and a write-down of the amortized cost to fair value is required.

For loan-backed and structured securities, the Company first assesses whether management with the appropriate authority has made a decision to sell each loan-backed and structured security in an unrealized loss position (fair value is less than amortized cost). If the determination is made to sell a particular loan-backed or structured security in an unrealized loss position, the security's decline in fair value is other than temporary and the security is written down to fair value. The difference between the fair value and amortized cost is recognized in realized capital losses. If management has not made the decision to sell the loan-backed or structured security, then the Company analyzes the present value of the discounted cash flows expected to be collected. If the present value of the discounted cash flows expected to be collected is less than the amortized cost and management does not have the intent and ability to retain the loan-backed and structured security for a period of the time sufficient to recover the amortized cost basis, an OTTI shall be considered to have occurred and the Company recognizes a realized loss equal to the difference between the fair value and the amortized cost. If the present value of the discounted cash flows expected to be collected is less than the amortized cost and management has the intent and ability to retain the loan-backed and

NOTES TO FINANCIAL STATEMENTS

structured security, the security is considered OTTI and the Company recognizes a realized loss for the difference between the present value of the discounted cash flows and the amortized cost.

For common and preferred stocks, the Company considers various factors, including whether the Company has the intent and ability to hold the stock for a period of time sufficient to recover its cost basis. Where the Company lacks the intent and ability to hold to recovery, or believes the recovery period is significantly extended, the stock's decline in fair value is other than temporary and the difference between the stock's cost and fair value is recognized as a realized loss. A decision to sell stock for an amount below its cost would be an other than temporary decline and a realized loss is recorded. For stocks managed by a third party, the Company has contractually retained its decision making authority as it pertains to selling stocks that are in an unrealized loss position.

The Company's portfolio monitoring process includes a quarterly review of all securities to identify instances where the fair value of a security compared to its amortized cost (for bonds, including loan-backed and structured securities) or cost (for stocks) is below established thresholds. The process also includes the monitoring of other impairment indicators such as ratings, ratings downgrades and payment defaults. The securities identified, in addition to other securities for which the Company may have a concern, are evaluated for potential OTTI using all reasonably available information relevant to the collectibility or recovery of the security. Inherent in the Company's evaluation of OTTI for these securities are assumptions and estimates about the financial condition and future earnings potential of the issue or issuer. Some of the factors that may be considered in evaluating whether a decline in fair value is other than temporary are: 1) the financial condition, near-term and long-term prospects of the issue or issuer, including relevant industry specific market conditions and trends, geographic location and implications of rating agency actions and offering prices; 2) the specific reasons that a security is in an unrealized loss position, including overall market conditions which could affect liquidity; and 3) the length of time and extent to which the fair value has been less than amortized cost or cost.

Derivative financial instruments

Derivative financial instruments utilized by the Company include index option contracts, option on interest rate futures, interest rate swaption agreements, interest rate and credit default swap agreements, foreign currency forward contracts and futures contracts. When derivatives meet specific criteria, they may be designated as accounting hedges, which means they may be accounted for and reported on in a manner that is consistent with the hedged asset or liability. Derivatives that are not designated as accounting hedges are accounted for on a fair value basis, with changes in fair value recorded as unrealized gains or losses in unassigned surplus.

Off-balance sheet financial instruments

Commitments to invest in limited partnership interests and commitments to purchase private placement securities have off-balance sheet risk because their contractual amounts are not recorded in the Company's Assets or Liabilities, Surplus and Other Funds pages of the Annual Statement.

Premium revenue

Premiums are deferred and earned on a pro-rata basis over the policy period. The portion of premiums written applicable to the unexpired periods of the policies is recorded as unearned premiums. Premiums received in advance of the policies' effective dates are recorded as advance premiums. Premiums written and not yet collected and agents' balances are shown as a receivable, with balances older than 90 days nonadmitted. The Company regularly evaluates this receivable and establishes valuation allowances, as appropriate, for items less than 90 days.

Reserves for losses and loss adjustment expenses

Reserves for losses and loss adjustment expenses are the estimated amounts necessary to settle all reported and unreported claims for the ultimate cost of insured losses, based upon the facts of each case and the Company's experience with similar cases. Estimated amounts of salvage and subrogation are deducted from the reserves for losses and loss adjustment expenses. The establishment of appropriate reserves, including reserves for catastrophes, is an inherently uncertain and complex process. Reserve estimates are regularly reviewed and updated using the most current information available. Any resulting reestimates are reflected in the current Statement of Income.

Reinsurance

The amounts reported in the Assets page as amounts recoverable from reinsurers include amounts billed to reinsurers for losses and loss adjustment expenses paid, as well as estimates of amounts expected to be recovered from reinsurers on losses and loss adjustment expense reserves that have not yet been paid. Reserves are reported net of unpaid reinsurance recoverables. Reinsurance recoverables on unpaid losses are estimated based upon the reinsurance contract, following assumptions consistent with those used in establishing the liabilities related to the underlying reinsured contract. Reinsurance premiums are generally reflected as income in a manner consistent with the recognition of premiums on the reinsured contracts. For catastrophe coverage, the cost of reinsurance premiums is earned ratably over the contract period to the extent coverage remains available. Reinsurance does not extinguish the Company's primary liability under the policies written. The Company regularly evaluates whether a provision for reinsurance is needed by evaluating the admissibility, collectibility and collateralization of reinsurers' balances in accordance with the APPM. A provision for reinsurance is established, as appropriate, and this liability is netted against the reported reinsurance recoverable.

Income taxes

The income tax provision is calculated under the liability method. Deferred tax assets ("DTAs") and liabilities ("DTLs") are recorded based on the difference between the statutory financial statement and tax bases of assets and liabilities at the enacted tax rates. The principal assets and liabilities giving rise to such differences were unearned premiums, investments, discounted loss reserves, tax credit carryforwards and additional minimum pension liability. Deferred income taxes also arise from net unrealized capital gains and losses on common stocks, limited partnerships and impaired bonds carried at fair value. The net change in DTAs and DTLs is applied directly to unassigned surplus. The nonadmitted portion of gross DTAs is determined by applying the rules prescribed by SSAP No. 10R, *Income Taxes - Revised, A Temporary Replacement of SSAP No. 10* ("SSAP No. 10R").

A. Statutory Purchase Method

Encompass Insurance Company of America ("EICA"), Encompass Property and Casualty Company ("EPC"), Encompass Independent Insurance Company ("EIIC"), Encompass Insurance Company of Massachusetts ("EICMA") and Encompass Home and Auto Insurance Company ("EHAIC")

On October 1, 2005, Encompass Financial Group, LLC ("Encompass"), a subsidiary dissolved into the Company in December 2006, purchased all the outstanding common stock of EICA, EPC, EIIC, EICMA and EHAIC for $60 million from Continental Casualty Company ("CCC"). The Company paid consideration in 1999 for the option to acquire these insurance companies from CCC at a future date. This consideration was recorded as an intangible asset on the Company's books. In conjunction with the purchase of these five companies, the $8 million balance of intangible asset at October 1, 2005 was reclassed to goodwill and included in common stock investments. The purchase price, which included $55 million of cash, cash equivalents and short-term investments, resulted in the recording of goodwill by Encompass, and the purchase price, goodwill and goodwill amortized in 2011 and 2010 by the Company is presented in the table below:

The transaction was accounted for using the statutory purchase method. At the purchase date, goodwill of $429 thousand was recorded. In 2010 the Company recognized yearly goodwill amortization of $4 thousand related to this acquisition. At December 31, 2010, the goodwill was fully amortized.

Encompass Insurance Company ("EIC")

On July 2, 2001, Encompass Holdings LLC ("Encompass LLC"), a former subsidiary of NIC, purchased all the outstanding common stock of EIC, formerly known as USF&G Business Insurance Company for $12 million from Fidelity and Guaranty Company. At the purchase date, goodwill of $2 million was recorded and was evaluated annually by Encompass LLC for impairment per the applicable GAAP guidance. Effective December 31, 2003, Encompass LLC was dissolved and its assets, including its investment in EIC and the related goodwill, were transferred to NIC. In 2004, NIC began amortizing the goodwill. On December 31, 2006, NIC paid an extraordinary stock dividend of all the common shares of EIC, including the related unamortized goodwill of $1 million, to its parent, Encompass. Subsequently, on December 31, 2006, Encompass was dissolved and its assets, including its investment in EIC and the related unamortized goodwill, were transferred to the Company. In 2010 the Company recognized yearly goodwill amortization of $237 thousand related to this acquisition. At December 31, 2010, the goodwill was fully amortized.

E. Repurchase Agreements and/or Securities Lending Transactions

The Company entered into securities lending transactions in 2011. The Company did not enter into securities lending transactions in 2010. Repurchase agreements and dollar repurchase agreements were not entered into in 2011 or 2010.

1. In 2011, the Company received cash collateral for securities loaned in an amount generally equal to 102% and 105% of the fair value of domestic and foreign securities, respectively, and recorded the related obligation to return the collateral within liabilities.

NOTES TO FINANCIAL STATEMENTS

2. The Company did not pledge its assets as collateral in securities lending transactions in 2011.

3. In 2011, assets were accepted as collateral by the Company as part of its securities lending program.

   a. Cash collateral was received in connection with its securities lending program totaling $199 million at December 31, 2011. The remaining term of the open securities lending contracts related to this collateral at December 31, 2011 was 30 days or less.

   b. At December 31, 2011, the Company had securities with an aggregate fair value of $200 million that were acquired from the sale, trade or use of accepted collateral.

   c. All collateral is received in the form of cash, unrestricted and maintained in a separate custody account. Generally, collateral is invested in short-term investments or bonds during the agreement period. The Company monitors the fair value of securities loaned on a daily basis and obtains additional collateral as necessary to mitigate counterparty credit risk. The Company maintains the right and ability to redeem the securities loaned on short notice. Substantially all of the Company's securities loaned were placed with large brokerage firms.

4. The Company used an unaffiliated agent for its securities lending program for equity transactions in 2011.

5. None of the collateral the Company received was sold or repledged at December 31, 2011.

F. Real Estate

1. During 2011, a Company occupied building was classified as held for sale after the Company made a decision to no longer occupy the building. As a result of the change in classification to held for sale, the building was recognized at fair value less the cost to sell. The fair value was based on the appraised value. An impairment loss of $8 million was recognized as a net realized capital loss in the Statement of Income. The Company did not recognize impairment losses related to its real estate investments in 2010.

2. At December 31, 2011, two properties were classified as held for sale. As mentioned above, a Company occupied building was classified as held for sale as a result of the Company's decision to no longer occupy the building and a loss was recognized. The other Company occupied building was classified as held for sale after receiving offers from third parties to purchase the building. The Company is currently in negotiations with the third parties to enter into a sale-leaseback agreement for this property and expects to finalize the terms during the first half of 2012. As the fair value of this property, based on an appraisal, was higher than the carrying value, no gains were recognized.

   None of the Company's real estate investments were held for sale at December 31, 2010. In 2010, portions of land that are part of properties owned by the Company in Northbrook, Illinois were acquired via public condemnation actions for road improvements. The Company recognized net realized capital gains of $132 thousand in the Statement of Income related to this action.

3. The Company did not experience changes to any plans of sale for real estate investments classified as held for sale at December 31, 2011. There were no properties held for sale at December 31, 2010.

NOTES TO FINANCIAL STATEMENTS

8. Derivative Instruments

A.,
B. &
C. Derivative financial instruments utilized by the Company during 2011 and 2010 included index option contracts, options on interest rate futures contracts, interest rate swaption agreements, interest rate and credit default swap agreements, foreign currency forward contracts and futures contracts. The notional amounts specified in the contracts are used to calculate the exchange of contractual payments under the agreements and are generally not representative of the potential for gain or loss on these agreements. However, the notional amounts specified in credit default swap selling protection agreements represent the maximum amount of potential loss, assuming no recoveries.

Market risk is the risk that the Company will incur losses due to adverse changes in market rates and prices. Market risk exists for all of the derivative financial instruments the Company currently holds, as these instruments may become less valuable due to adverse changes in market conditions. To limit this risk, the Company's senior management has established risk control limits. In addition, changes in the fair value of the derivative financial instruments that the Company uses for risk management purposes are generally offset by the change in the fair value or cash flows of the hedged risk component of the related assets, liabilities or forecasted transaction.

Counterparty credit exposure represents the Company's potential loss if all of the counterparties concurrently fail to perform under the contractual terms of the contracts and all collateral, if any, becomes worthless. This exposure is measured by the statement value of over-the-counter derivative contracts with a positive statement value at the reporting date reduced by the effect, if any, of legally enforceable master netting agreements.

The Company manages its exposure to credit risk by utilizing highly rated counterparties, establishing risk control limits, executing legally enforceable master netting agreements and obtaining collateral where appropriate. The Company uses master netting agreements for over-the-counter derivative transactions that permit either party to net payments due for transactions and collateral is either pledged or obtained when certain predetermined exposure limits are exceeded. The Company has not incurred any losses on derivative financial instruments due to counterparty nonperformance. Other derivatives, including futures and certain option contracts, are traded on organized exchanges, which require margin deposits and guarantee the execution of trades, thereby mitigating any potential credit risk.

The Company uses derivatives to manage risks with certain assets and liabilities arising from the potential adverse impacts from changes in risk-free interest rates, negative equity market valuations, increases in credit spreads and foreign currency fluctuations, and for asset replication. With the exception of non-hedge derivatives used for asset replication, all of the Company's derivatives are evaluated for their ongoing effectiveness as either accounting hedge or non-hedge derivative financial instrument on at least a quarterly basis. The Company does not use derivatives for speculative purposes.

The paragraphs below describe the derivatives the Company utilizes, including the objectives, cash requirements and accounting policies.

Index option contracts provide returns at specified or optional dates based on a specified equity index applied to the option's notional amount. Options on interest rate futures contracts give the holder the right, but not the obligation, to enter into futures contracts at a future date. They can be exercised on any business day prior to expiration. Purchased put and call option contracts allow the Company to offset valuation losses in the equity portfolio during periods of declining equity market values while limiting downside risk to the premium paid. Purchased put index option contracts allow the Company to limit potential losses on equities owned in exchange for a premium paid. Put option contracts on interest rate futures are used to hedge against increasing interest rates.

When the Company purchases/writes (sells) option contracts at specific prices, it is required to pay/receive a premium to/from the counterparties. The amount of premium paid/received is based on the number of contracts purchased/sold, the specified price and the maturity date of the contract. The Company receives/pays cash equal to the premium of written/purchased options when the contract is established. If the option is exercised, the Company receives/pays cash equal to the specified price in the contract (strike price) in exchange for the equity upon which the option is written/purchased. If the options are not exercised, then no additional cash is exchanged when the contract expires. Premiums paid are reported as a derivative asset and premiums received are reported as a derivative liability. The change in the fair value of purchased option contracts is reported as net unrealized capital gains and losses, within unassigned surplus, with an adjustment to a corresponding asset. Purchased put index option contracts and option contracts on interest rate futures are cash settled upon exercise and the gain or loss on the settlement is reported as realized capital gain/loss. If the purchased option contract expires without being exercised, the premiums paid are reported as realized capital gain/loss and the corresponding asset previously recorded is reversed. The change in the fair value of written option contracts is reported as net unrealized capital gains and losses, within unassigned surplus, with an adjustment to a corresponding liability. Written call index option contracts are cash settled upon exercise and the gain or loss on settlement is reported as realized capital gain/loss. If the written option contract expires without being exercised, the premiums received are reported as realized capital gains and the corresponding liability previously reported is reversed. Purchased and written option contracts are reported on Schedule DB, Part A and receive non-hedge accounting treatment.

Interest rate swaption agreements give the holder the right, but not the obligation, to enter into an interest rate swap agreement at a future date. These agreements are primarily used to maintain the interest rate characteristics of existing investments within specified ranges and to reduce exposure to rising or falling interest rates. Typically, a premium is paid to the counterparty at the inception of a contract. Premiums paid are reported as a derivative asset. The change in fair value of open interest rate swaption agreements is reported as net unrealized capital gains and losses, within unassigned surplus, with an adjustment to derivatives. If an interest rate swaption agreement terminates prior to its expiration date, or if it expires, gains or losses are reported in net realized capital gains or losses. Interest rate swaption agreements are reported on Schedule DB, Part A and receive non-hedge accounting treatment.

Interest rate swap agreements are agreements that periodically exchange the difference between two designated sets of cash flows, (fixed to variable rate, variable to fixed rate, or variable to variable rate) based upon designated market rates or rate indices and a notional amount. The Company uses interest rate swap agreements to manage the interest rate risks of existing investments and to reduce exposure to rising or falling interest rates. Portfolio duration management is a risk management strategy that is principally employed wherein interest rates swap agreements are utilized to change the duration of the portfolio in order to offset the economic effect that interest rates would otherwise have on the fair value of its bonds. Cash settlements usually occur at dates specified in individual agreements. The amount of cash exchanged is equal to the difference between the rate in the contract at which the Company receives cash compared to the rate at which the Company is to pay cash.

Credit default swap agreements are used for either buying credit protection or selling credit protection on a specified entity, basket of entities or index. Buying credit protection requires a payment of a premium to a counterparty in exchange for a future cash settlement or a promise to deliver a bond, if a specified credit event occurs. Selling credit protection provides for the receipt of a premium from a counterparty in exchange for a future cash settlement, or a promise to purchase a bond, if a specified credit event occurs. The Company enters into certain credit default swap agreements as a means to buy protection, reducing the credit risk in a particular bond or bond portfolio, while leaving the security or bond portfolio intact. The Company enters into other credit default swap agreements as replication transactions, enabling greater diversification of credit risk by selling protection on specified entities, or baskets of entities that may not be frequent issuers in the traditional corporate bond market and by selling protection on indices also as a less expensive alternative to the cash market.

Credit default swap agreements used for buying protection and interest rate swap agreements receive non-hedge accounting treatment, and the change in the fair value of open swap agreements are reported as net unrealized capital gains and losses within unassigned surplus. Credit default swap agreements entered into as replication transactions are valued at amortized cost. Periodic settlements, which represent amounts receivable from/payable to the counterparties are based on the settlement terms within the agreement, and reported as a component of net investment income. Interest rate and credit default swap agreements are reported in Schedule DB, Part A. If any of these contracts were used for replication purposes, then they are also reported in Schedule DB, Part C.

Foreign currency forward contracts involve the future exchange or delivery of foreign currencies based on terms negotiated at the inception of the contract which are settled at the end of the contract. They are utilized to reduce currency risk exposure arising from investments in foreign

NOTES TO FINANCIAL STATEMENTS

currency denominated investments. Cash settlement is required when the contract matures. The amount of cash exchanged is based on the difference between the specified rate on the date the contract was entered into (contract rate) compared to the actual rate on the settlement date. On the settlement date, the Company will either pay or receive cash equal to the difference between the contract rate and the actual rate multiplied by the specified notional amount. The change in the fair value of open foreign currency forward contracts is reported as net unrealized capital gains and losses, within unassigned surplus, until closed (e.g. terminated or settled). If the contract was hedging coupon payments of a bond, any gains and losses at closing are reported in net investment income. If the contract was hedging the original principal of a bond or the bond the Company was hedging is sold, any gains and losses at closing are reported in realized capital gains or losses. These contracts are reported in Schedule DB, Part A and receive non-hedge accounting treatment.

The Company utilizes the following types of futures contracts: equity index and interest rate (Eurodollar). Futures contracts are defined as commitments to buy or sell designated financial instruments based on specified prices, yields or indices. Futures contracts provide returns at specified or optional dates based upon a specified index or interest rate applied to a notional amount. The Company primarily utilizes equity index and Eurodollar futures contracts to reduce the duration of its bonds, manage equity risk in its equity portfolio and to reduce interest rate and equity risk associated with certain deferred compensation liability contracts. Daily cash settlement of variation margins is required for futures contracts and is based on the changes in daily prices. The final settlement of Eurodollar and equity index futures contracts is always in cash. Daily cash settlements of margin gains or losses for futures contracts receiving fair value hedge accounting treatment are reported in net investment income. The daily cash settlements of margin gains and losses for futures contracts that receive non-hedge accounting treatment and have terminated are reported in net realized capital gains or losses. The daily cash settlements of margin gains and losses for open futures contracts that receive non-hedge accounting treatment are reported as net unrealized capital gains and losses within unassigned surplus. Futures contracts are reported in Schedule DB, Part B and receive either fair value hedge accounting or non-hedge accounting treatment, depending on the strategy.

D. The Company did not have gains or losses in net unrealized capital gains or losses that represented a component of any derivatives' gain or loss that was excluded from the assessment of hedge effectiveness in 2011 or 2010.

E. The Company did not have gains or losses in net unrealized capital gains or losses that resulted from derivatives that no longer qualify for hedge accounting treatment in 2011 or 2010.

F. The Company did not have derivatives accounted for as cash flow hedges of a forecasted transaction.

9. Income Taxes

The application of SSAP No. 10R requires the Company to evaluate the recoverability of DTAs and to establish a statutory valuation allowance adjustment ("valuation allowance") if necessary to reduce the DTA to an amount which is more likely than not to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary, and if so, the amount of such valuation allowance. In evaluating the need for a valuation allowance the Company considers many factors, including: (1) the nature of the DTAs and DTLs; (2) whether they are ordinary or capital; (3) the timing of their reversal; (4) taxable income in prior carryback years as well as projected taxable earnings exclusive of reversing temporary differences and carryforwards; (5) the length of time that carryovers can be utilized; (6) unique tax rules that would impact the utilization of the DTAs; and (7) any tax planning strategies that the Company would employ to avoid a tax benefit from expiring unused. Although the realization is not assured, management believes it is more likely than not that the DTAs, net of the valuation allowance, will be realized. The valuation allowance was $130 million and $156 million at December 31, 2011 and 2010, respectively.

The Allstate Corporation

2. The Company joins the Corporation and its domestic subsidiaries in the filing of a consolidated federal income tax return. The consolidated group has elected under IRC Section 1552(a)(2) to allocate the consolidated federal income tax liability based on each member's federal income tax liability computed on a separate return basis, except all tax benefits resulting from operating losses and tax credits are allocated to the Company to the extent they can be utilized in the consolidated return. In years when the consolidated tax return results in an alternative minimum tax liability, the regular tax is allocated first as described above, and the excess of the alternative minimum tax over the regular tax is allocated to the members whose tax posture gave rise to the alternative minimum tax.

C. The following transactions were entered into by the Company with related parties in 2011 and 2010 that involved more than ½ of 1% of the Company's admitted assets. Activity resulting from reinsurance agreements, insurance contracts or cost allocation transactions in accordance with intercompany agreement provisions was excluded.

Transactions with Allstate Insurance Holdings, LLC ("AIH")

The Company paid a total of $838 million and $1.30 billion cash dividends to its parent, AIH, in 2011 and 2010, respectively. See Note 13, Part 4 for details.

On November 30, 2011, the Company recorded contributed capital of $222 million from AIH as a result of transferring the liability related to the defined benefit pension plans previously sponsored by the Company. See Note 12 for additional information.

Transactions with the Corporation

The Company entered into an Intercompany Loan Agreement with the Corporation. The amount available to the Company is at the discretion of the Corporation, however, the maximum amount of loans the Corporation can have outstanding to all its eligible subsidiaries at any given point in time is limited to $1.00 billion. From time to time, the Company borrows money from the Corporation to meet its short-term cash needs. The Corporation may use commercial paper borrowings, bank lines of credit and securities lending to fund intercompany borrowings.

On July 22, 2011, the Company borrowed $400 million from the Corporation at an interest rate of 0.385% in accordance with the Intercompany Loan Agreement. The principal was repaid in full in five transactions on August 22, August 23, August 24, September 6 and September 7, 2011 along with interest expense totaling $169 thousand. The Company made capital contributions to AEAIC totaling $190 million and $70 million in cash, and $5 million and $21 million in the form of limited partnership investments, in 2011 and 2010, respectively. Net intercompany balances with AFS are settled monthly regardless of dollar amount. In addition, net intercompany balances with the Corporation related to profit sharing the Corporation grants to the Company's employees are settled annually.

E. The Company issued surety bonds to guarantee the performance of structured settlement arrangements assumed by Allstate Settlement Corporation ("ASC") (from both the Company and non-related parties) and funded by certain annuity contracts issued by ALIC and ALNY, subsidiaries of the Company. The Company, ALIC and the Corporation are parties to an Amended and Restated Intercompany Liquidity Agreement ("Liquidity Agreement") which allows for short-term advances of funds to be made between parties for liquidity and other general corporate purposes. I. The Company did not have investments in SCA entities that exceeded 10% of the Company's December 31, 2011 or 2010 admitted assets.

J. The Company did not recognize impairments related to its SCA entity investments in 2011. In 2010, the Company recognized a $171 thousand impairment write-down in a partnership investment, considered an SCA entity that was nearing liquidation and unlikely that the carrying value will be recovered. The fair value of the Company's investment in the partnership was determined by assessing the fair value of the assets the partnership held. The SCA entity written down in 2010 was also part of the disclosure in Note 6, Part B.

K. The Company did not have investments in foreign insurance subsidiaries that were calculated by adjusting annuity GAAP account value reserves using the Commissioners Annuity Reserve Valuation Method and the related actuarial guidelines at December 31, 2011 or 2010.

12. Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Postretirement Benefit Plans

Defined benefit pension plans cover most full-time employees, certain part-time employees and employee-agents. Benefits under the pension plans are based upon the employee's length of service and eligible annual compensation. A cash balance formula was added to the Allstate Retirement Plan effective January 1, 2003. All eligible employees hired before August 1, 2002 were provided with a one-time opportunity to choose between the cash balance formula and the final average pay formula. The cash balance formula applies to all eligible employees hired after August 1, 2002.

Effective November 30, 2011, the Corporation became the sponsor of the defined benefit pension plans. Prior to November 30, 2011, the Company was the sponsor. In connection with the change in sponsorship, a liability totaling $222 million was forgiven. The forgiveness of this liability was recorded as an increase in gross paid in and contributed surplus.

The Company and the Corporation also provide certain health care subsidies for eligible claim employees hired before January 1, 2003 when they retire and their eligible dependents and certain life insurance benefits for eligible claim employees hired before January 1, 2003 when they retire ("postretirement benefits"). Qualified employees may become eligible for these benefits if they retire in accordance with the Company's established retirement policy and are continuously insured under the Company's group plans or other approved plans in accordance with the plans' participation requirements. The Company shares the cost of retiree medical benefits with non Medicare-eligible retirees based on years of service, with the Company's share being subject to a 5.0% limit on annual medical cost inflation after retirement. In 2009, the Company changed its approach for delivering benefits to Medicare-eligible retirees. The Company no longer offers medical benefits for Medicare-eligible retirees, but instead, provides a fixed company contribution (based on years of service and other factors), which is not subject to adjustments for inflation. The Company has reserved the right to modify or terminate its benefit plans at any time and for any reason.

The Company calculates its benefit obligations based upon generally accepted actuarial methodologies using the projected benefit obligation ("PBO") for pension plans and the accumulated postretirement benefit obligation ("APBO") for other postretirement plans. Pension costs at December 31, 2010, and other postretirement obligations at December 31, 2011 and 2010 were determined using a December 31 measurement date. The benefit obligations represent the actuarial present value of all benefits attributed to employee service rendered as of the measurement date. The PBO is measured using the pension benefit formula and assumptions as to future compensation levels. The plan's funded status is calculated as the difference between the benefit obligation and the fair value of plan assets. The Company's funding policy for the pension plans is to make annual contributions at a level that is in accordance with regulations under the IRC and generally accepted actuarial principles. The Company's postretirement benefit plans are not funded.

A reconciliation of the plans' funded status to amounts recognized in Liabilities, Surplus and Other Funds at December 31 is shown below. The Company was no longer the sponsor of the defined pension plans at December 31, 2011.

	Pension Benefits	Postretirement Benefits	
(in millions)	2010	2011	2010
Fair value of plan assets	$ 4,338	$ -	$ -
Benefit obligation	5,210	140	121
Funded status	(872)	(140)	(121)
Amounts not recognized:			
Unamortized prior service cost	-	(21)	(23)
Unamortized transition (asset) obligation	(114)	-	1
Unamortized net actuarial loss (gain)	2,382	(92)	(106)
Net amount recognized	$ 1,396	$ (253)	$ (249)
Prepaid benefit cost	$ 358	$ -	$ -
Accrued benefit cost	(222)	(253)	(249)
Intangible asset	53	-	-
Minimum pension liability	1,207	-	-
Net amount recognized	$ 1,396	$ (253)	$ (249)

The majority of the $2.38 billion of unrecognized net actuarial pension benefit losses in 2010 reflected the effect of unfavorable market conditions on the value of the pensions plan assets in the prior years, and to a lesser extent, decreases in the discount rate.

The accumulated benefit obligation ("ABO") for all defined benefit pension plans was $4.52 billion at December 31, 2010. The ABO is the actuarial present value of all benefits attributed by the pension benefit formula to employee service rendered at the measurement date. However, it differs from the PBO due to the exclusion of an assumption as to future compensation levels. A minimum pension liability is recognized when the ABO exceeds the fair value of plan assets. The minimum pension liability, less allowable intangible assets, was $1.21 billion, at December 31, 2010, and was reported as an adjustment to unassigned surplus.

The PBO, ABO and fair value of plan assets for the Company's pension plans with an ABO in excess of plan assets were $4.45 billion, $3.76 billion and $3.54 billion, respectively, at December 31, 2010. Included in the accrued benefit cost of the pension benefits were certain unfunded non-qualified plans with accrued benefit costs of $104 million for 2010.

NOTES TO FINANCIAL STATEMENTS

The changes in benefit obligations for all plans for the years ended December 31 were as follows:

(in millions)	Pension Benefits 2011	Pension Benefits 2010	Postretirement Benefits 2011	Postretirement Benefits 2010
fit obligation, beginning of year	$ 5,210	$ 4,965	$ 121	$ 120

The PBO and ABO for non-vested pension participants were $6 million and $4 million, respectively, at December 31, 2010. The Company was no longer the sponsor of the defined pension plans at December 31, 2011. The postretirement benefit obligation for non-vested employees was $96 million and $75 million at December 31, 2011 and 2010, respectively.

The components of net periodic cost for all plans for the years ended December 31 were as follows:

(in millions)	Pension Benefits 2011	Pension Benefits 2010	Postretirement Benefits 2011	Postretirement Benefits 2010
Service cost	$ 137	$ 149	$ 9	$ 13
Interest cost	279	302	7	7
Expected return on plan assets	(318)	(313)	-	-
Amortization of:				
Unrecognized transition obligation	3	(3)	1	1
Unrecognized net actuarial gain	-	-	(4)	(4)
Prior service cost	(1)	(1)	(2)	(2)
Unrecognized prior period loss	149	173	-	-
Settlement loss	21	35	-	-
Net periodic cost	$ 270	$ 342	$ 11	$ 15

Weighted average assumptions used to determine net pension cost and net postretirement benefit cost for the years ended December 31 were:

	Pension Benefits 2011	Pension Benefits 2010	Postretirement Benefits 2011	Postretirement Benefits 2010
Weighted average discount rate	n/a %	6.25 %	6.00 %	6.25 %
Rate of increase in compensation levels	n/a %	4.00 - 4.50 %	n/a	n/a
Expected long-term rate of return on plan assets	n/a %	8.50 %	n/a	n/a

Weighted average assumptions used to determine benefit obligations at December 31 are listed in the following table. Assumptions were based on a December 31 measurement date.

	Pension Benefits 2011	Pension Benefits 2010	Postretirement Benefits 2011	Postretirement Benefits 2010
Weighted average discount rate	n/a %	6.00 %	5.25 %	6.00 %
Rate of increase in compensation levels	n/a %	4.00 - 4.50 %	n/a	n/a

The weighted average health care trend rate used in measuring the APBO was 7.30% for 2012, gradually declining to 4.50% in 2024, and remaining level thereafter.

Assumed health care cost trend rates have a significant effect on the amounts reported for the postretirement health care plans. A one percentage-point increase in assumed health care cost trend rates would increase the total of the service and interest cost components of net periodic benefit cost of other postretirement benefits and the APBO by $272 thousand and $801 thousand, respectively. A one percentage-point decrease in assumed health care cost trend rates would decrease the total of the service and interest cost components of net periodic benefit cost of other postretirement benefits and the APBO by $264 thousand and $797 thousand, respectively.

The pension plans' target asset allocation and the actual percentage of plan assets, by asset category at December 31, 2010, are shown below. The Company was no longer the sponsor of the defined pension plans at December 31, 2011.

Asset Category	Target Asset Allocation	Actual Percentage of Plan Assets
Fixed income securities	34 - 48 %	40 %
U.S. equity securities	26 - 34 %	26
International equity securities	16 - 22 %	13
Hedge funds	6 - 10 %	9
Real estate funds	3 - 7 %	4
Private equity funds	3 - 7 %	4
Short-term investments	- %	4
Other	1 - 3 %	-
Total		100 %

The expected long-term rate of return on plan assets reflects the average rate of earnings expected on plan assets. This assumption is reviewed annually giving consideration to appropriate financial data including, but not limited to, the plan asset allocation, the period over which benefits will be paid, historical returns on plan assets and other relevant market data. A consistent method was used to determine the long-term return on plan assets assumption at December 31, 2010 of 8.50%.

Pension plan assets did not include any of the Corporation's stock at December 31, 2010.

NOTES TO FINANCIAL STATEMENTS

The change in pension plan assets for the years ended December 31 was as follows:

(in millions)	2011	2010
value of plan assets, beginning of year	$ 4,338	$ 3,848
Actual return on plan assets	232	463
Employer contributions	243	421

Plan transfer due to change in sponsorship	(4,380)	-
Other	(8)	(6)
Fair value of plan assets, end of year	$ -	$ 4,338

The Company contributed $27 million and $28 million to the postretirement benefit plans in 2011 and 2010, respectively. Contributions by participants were $20 million and $22 million in 2011 and 2010, respectively.

Estimated future benefit payments expected to be paid in the next 10 years, based on the assumptions used to measure the Company's benefit obligation at December 31, 2011, are presented in the following table.

(in millions)	Postretirement Benefits
2012	$ 11
2013	11
2014	12
2015	12
2016	13
2017 - 2021	55
Total benefit payments	$ 114

Employees of the Company are eligible to become members of The Allstate 401(k) Savings Plan. The Company's contributions are based on the Company's matching obligations and certain performance measures. The cost allocated to the Company for this benefit was $37 million and $28 million in 2011 and 2010, respectively.

13. Capital and Surplus, Dividend Restrictions and Quasi-Reorganizations

1. The Company had 42,000 common shares authorized, issued and outstanding at December 31, 2011 and 2010. All shares had a par value of $100 per share.

2. The Company did not have preferred stock outstanding at December 31, 2011 or 2010.

3. The ability of the Company to pay dividends is generally dependent on business conditions, income, cash requirements of the Company, receipt of dividends and other relevant factors. More specifically, the Illinois Insurance Code ("Code") provides a two-step process. First, no dividend may be declared or paid except out of earned (unassigned) surplus, as distinguished from contributed surplus, nor when the payment of a dividend reduces surplus below the minimum amount required by the Code. Secondly, a determination of the ordinary versus extraordinary dividends that can be paid is formula based and considers net income and capital and surplus, as well as the timing and amounts of dividends paid in the preceding twelve months as specified by the Code. Ordinary dividends to shareholders do not require prior approval of the IL DOI. Dividends are not cumulative. At December 31, 2011, the maximum ordinary dividend that can be declared and paid was limited to $1.51 billion.

4. The following ordinary cash dividends were paid to AIH:

(in millions)

Date of Payment	2011	2010
January 27	$ 200	$ -
June 29	-	200
June 30	238	-
August 4	-	200
September 9	200	-
September 30	-	200
October 21	-	200
November 24	-	300
December 13	200	-
December 30	-	200
Total	$ 838	$ 1,300

5. Within the limitations of Part 3 above, there were no restrictions placed on the portion of the Company's profits that may be paid as ordinary dividends to stockholders.

6. The unassigned funds, which are held for the benefit of the shareholder, are unrestricted except by requirement for regulatory approval as described in Part 3 above.

7. The Company is not a mutual or similarly organized company, and therefore, this disclosure requirement does not apply.

8. The Company did not hold stock for special purposes at December 31, 2011 or 2010.

9. The special surplus funds balance of $398 million and $209 million at December 31, 2011 and 2010, respectively, was comprised of two components. The first component, which was $384 million and $193 million at December 31, 2011 and 2010, respectively, relates to the Company's election to admit a higher amount of adjusted gross DTAs per SSAP No. 10R. The second component relates to the completion of the Company's sale of its United States-based reinsurance operations for policies written after 1984 to SCOR U.S. Corporation ("SCOR") in September 1996. The transaction consisted of the sale of certain non-insurance assets, liabilities and renewal rights and a reinsurance transaction for the insurance liabilities. The Company reported a gain on the sale from retroactive reinsurance account of $14 million and $16 million at December 31, 2011 and 2010, respectively. The decrease in the balance of this component was due to lower reported reserves by a non-novated cedant and a corresponding decrease in incurred but not reported ("IBNR") reserves. The second component, which was $384 million and $193 million at December 31, 2011 and 2010, respectively, relates to the Company's election to admit a higher amount of adjusted gross DTAs per SSAP No. 10R.

10. Cumulative unrealized gains and losses reduced unassigned funds by $144 million and $207 million at December 31, 2011 and 2010, respectively.

11. The Company did not have surplus notes or similar obligations outstanding at December 31, 2011 or 2010.

12. The Company did not have restatements due to quasi-reorganizations in 2011 or 2010.

13. The Company was not quasi-reorganized.

NOTES TO FINANCIAL STATEMENTS

14. Contingencies

A. Contingent Commitments

1. The Company made commitments to invest in limited partnerships interests of $1.22 billion and $740 million at December 31, 2011 and 2010, respectively. These commitments are generally for making additional capital contributions or acquiring financial interests.

The Company has made no contingent commitments or guarantees related to its investments in joint ventures, limited liability companies or LIHTC property investments.

2. The Company was a party to the following guarantee agreements at December 31, 2011:

(in millions) Nature and circumstances of guarantee and key attributes	Liability recognition of guarantee	Ultimate financial statement impact if action under guarantee required	Maximum potential amount of future payments	Current status of payment or performance risk of guarantee
With third parties				
The Company provides residual value guarantees on Company leased automobiles. The remaining term of each residual value guarantee is equal to the term of the underlying lease, which ranges from less than one to three years.	$ -	Expense	$ 6	Historically, there have not been any material payments pursuant to these guarantees.
The Company has certain limited rights and obligations under a capital support agreement ("Runoff Support Agreement") with PMI Mortgage Insurance Company ("PMI"), the primary operating subsidiary of PMI Group, related to the Company's disposition of PMI in prior years. Under the Runoff Support Agreement, the Company would be required to pay claims on PMI policies written prior to October 28, 1994, if PMI fails certain financial covenants and fails to pay such claims. The agreement only covers these policies and not any policies issued on or after that date. In the event any amounts are so paid, the Company would receive a commensurate amount of preferred stock or subordinated debt of PMI Group or PMI. The Runoff Support Agreement also restricts PMI's ability to write new business and pay dividends under certain circumstances.	$ -	Paid losses	See footnote (2) to table.	On October 20, 2011, the Director of the Arizona Department of Insurance took control of the PMI insurance companies; effective October 24, 2011, the Director instituted a partial claim payment plan: claim payments will be made at 50%, with the remaining amount deferred as a policyholder claim. The effect of these developments to the Company is uncertain. Management does not believe this agreement will have a material adverse effect on the net income, cash flows or financial position of the Company.
With affiliates				
The Company negotiated settlement agreements with certain claimants to pay annuities. Prior to July 1, 2001, the Company assigned its obligation to pay those claimants to ASC, a subsidiary of ALIC, who purchased structured settlement annuities from ALIC and ALNY. In addition, the Company sold surety bonds to ASC which guaranteed the payment of the structured settlement annuity in the event ALIC and ALNY could not pay. ASC conducted similar transactions with unrelated parties and acquired surety bonds from the Company to guarantee the payment of those structured settlement annuity contracts issued by ALIC and ALNY. Most of the structured settlements issued to ASC were under "qualified assignment" meaning ASC assumed the Company's obligation to make future payments.	$ n/a[1]	Expense	$ 5,045	A.M. Best ratings of both ALIC and ALNY are A+ (Stable).
The Company and ALIC entered into a Capital Support Agreement ("ALIC Agreement") effective December 14, 2007. Under the ALIC Agreement, the Company agrees to provide capital and surplus to ALIC in order for ALIC to maintain a company action level RBC ratio of at least 150%.	$ n/a	Investment in common stock of ALIC	$ 1,000	Since the inception of the ALIC Agreement, no capital has been provided by the Company.
The Company and AFS entered into a Capital Support Agreement ("AFS Agreement") effective December 31, 2003. Under the AFS Agreement, the Company agrees to provide capital contributions as necessary to enable AFS to maintain net capital of at least $10 million at all times.	$ n/a	Investment in common stock of AFS	$ Unlimited	At December 31, 2011, AFS had capital of $16 million. The Company's last payment pursuant to the AFS Agreement was $13 million in 2004.

[1] Guarantees made to/or on behalf of a wholly-owned subsidiary and intercompany and related party guarantees are not required to record a liability in accordance with SSAP 5R, *Liabilities, Contingencies and Impairments of Assets*.

[2] The maximum amount of future payments is the amount of claim payments on PMI policies written prior to October 28, 1994 that PMI fails to pay. The Company does not have access to information to develop an estimate at this time.

ASC entered into a General Indemnity Agreement pursuant to which it indemnifies the Company for any liabilities associated with the surety bonds and provided certain collateral security rights with respect to the annuities and certain other rights in the event of default covered by the surety bonds. None of the other agreements above contained recourse provisions that would enable the Company to recover amounts paid to third parties under the guarantees and there were no assets held by the Company as collateral under the agreements. None of the other agreements above contained a recourse provision that would enable the Company to recover amounts paid to third parties under the guarantee and there were no assets held by the Company as collateral under the agreements.

NOTES TO FINANCIAL STATEMENTS

In the normal course of business, the Company provides standard indemnifications to contractual counterparties in connection with numerous transactions. The types of indemnifications typically provided include indemnifications for breaches of representations and warranties, taxes and certain other liabilities, such as third party lawsuits. The indemnification clauses are often standard contractual terms and are entered into in the normal course of business based on an assessment that the risk of loss would be remote. The terms of the indemnifications vary in duration and nature. In many cases, the maximum obligation is not explicitly stated and the contingencies triggering the obligation to indemnify have not occurred are not expected to occur. Consequently, the maximum amount of the obligation under such indemnifications is not determinable. Historically, the Company has not made any material payments pursuant to these obligations.

c. The ultimate financial statement impact if the Company had to perform on all items it guarantees, excluding the PMI guarantee for which the Company doesn not have access to information to develop an estimated amount, was as follows at December 31, 2011:

(in millions)	Debit/ (Credit)
Expense	$ 5,051

B. Assessments

Guaranty funds

Under state insurance guaranty fund laws, insurers doing business in a state can be assessed, up to prescribed limits, for certain obligations of insolvent insurance companies to policyholders and claimants. Amounts assessed to each company are typically related to its proportion of business written in each state. The Company's policy is to accrue guaranty fund assessments when the entity for which the insolvency relates has met the applicable state of domicile's statutory definition of insolvent and the amount of loss is reasonably estimable. In most states the definition is met with a declaration of financial insolvency by a court of competent jurisdiction. In certain states there must also be a final order of liquidation. At December 31, 2011 and 2010, the Company had accrued $10 million and $72 million, respectively, for future guaranty fund assessments and $4 million for the related premium tax offset expected to be realized at December 31, 2010. There were no accruals for premium tax offsets related to future guaranty fund assessments at December 31, 2011. The period over which assessments are expected to be paid varies. Premium tax offsets are realized on a straight-line basis over the period allowed by each individual state once the guaranty fund assessment has been paid.

State facilities

The Company is also subject to assessments from the Louisiana Citizens Property Insurance Corporation ("LA Citizens"). LA Citizens can levy a regular assessment on participating companies for a deficit in any calendar year up to a maximum of the greater of 10.0% of the calendar year deficit or 10.0% of Louisiana direct property premiums industry-wide for the prior calendar year.

Facilities such as LA Citizens are generally designed so that the ultimate cost is borne by policyholders, however, the exposure to assessments and the availability of recoupments or premium rate increases from the facility may not offset each other in the Company's financial statements. Moreover, even if they do offset each other, they may not offset each other in financial statements in the same fiscal period due to the ultimate timing of the assessments and recoupments or premium rate increases, as well as the possibility of policies not being renewed in subsequent years.

C. Gain Contingencies

The Company has not recognized gain contingencies subsequent to December 31, 2011, but prior to the issuance of the Company's Annual Statement.

D. Claims Related Extra Contractual Obligation and Bad Faith Losses Stemming From Lawsuits

The Company incurred direct losses of $2.1 million related to two extra contractual obligation lawsuits in 2011. The Company did not incur losses related to extra contractual obligation lawsuits in 2010.

E. Product Warranties

The Company did not have warranties on its products at December 31, 2011 or 2010.

F. All Other Contingencies

California Earthquake Authority ("CEA")

Exposure to certain potential losses from earthquakes in California is limited by the Company's participation in the CEA, which provides insurance for California earthquake losses. The CEA is a privately-financed, publicly-managed state agency created to provide insurance coverage for earthquake damage. Insurers selling homeowners insurance in California are required to offer earthquake insurance to their customers either through their company or by participation in the CEA. The Company's homeowners policies continue to include coverages for losses caused by explosions, theft, glass breakage and fires following an earthquake, which are not underwritten by the CEA.

As of September 30, 2011, the CEA's capital balance was approximately $3.96 billion. Should losses arising from an earthquake cause a deficit in the CEA, additional funding would be obtained from the proceeds of revenue bonds the CEA may issue, an existing $3.05 billion reinsurance layer, and finally, if needed, assessments on participating insurance companies. The authority of the CEA to assess participating insurers extends through December 1, 2018. Participating insurers are required to pay an assessment, currently estimated not to exceed $1.56 billion, if the capital of the CEA falls below $350 million. Participating insurers are required to pay a second additional assessment, currently estimated not to exceed $804 million, if aggregate CEA earthquake losses exceed $9.69 billion and the capital of the CEA falls below $350 million. Within the limits previously described, the assessment could be intended to restore the CEA's capital to a level of $350 million. There is no provision that allows insurers to recover assessments through premium surcharge or other mechanism. The CEA's projected aggregate claim paying capacity is $9.69 billion as of October 31, 2011 and if an event were to result in claims greater than its capacity, affected policyholders would be paid a prorated portion of their covered losses.

All future assessments on participating CEA insurers are based on their CEA insurance market share as of December 31 of the preceding year. As of April 1, 2011, the Company's share of the CEA was 16.2%. The Company does not expect its CEA market share to materially change. At this level, the Company's maximum possible CEA assessment would be $382 million during 2012. Accordingly, assessments from the CEA for a particular quarter or annual period may be material to income and cash flows, but not the financial position of the Company. Management believes the Company's exposure to earthquake losses in California has been significantly reduced as a result of its participation in the CEA.

NOTES TO FINANCIAL STATEMENTS

Shared markets

The Company is required to participate in assigned risk plans, reinsurance facilities and joint underwriting associations in various states that provide insurance coverage to individuals or entities that otherwise are unable to purchase such coverage from private insurers. Underwriting results related to these arrangements, which tend to be adverse, have been immaterial to the Statement of Income. Because of the Company's participation, it may be exposed to losses that surpass the capitalization of these facilities and/or assessments from these facilities.

Legal and regulatory proceedings and inquiries

Background

The Company and certain subsidiaries are involved in a number of lawsuits, regulatory inquiries, and other legal proceedings arising out of various aspects of its business.

As of December 31, 2011, the Company estimates that the aggregate range of reasonably possible loss in excess of the amount accrued, if any, for the following disclosed matters where such an estimate is possible is zero to $855 million pre-tax. This disclosure is not an indication of expected loss, if any. Under accounting guidance, an event is "reasonably possible" if "the chance of the future event or events occurring is more than remote but less than likely" and an event is "remote" if "the chance of the future event or events occurring is slight." This estimate is based upon currently available information and is subject to significant judgment and a variety of assumptions, and known and unknown uncertainties. The matters underlying the estimate will change from time to time, and actual results may vary significantly from the current estimate. The estimate does not include matters or losses for which an estimate is not possible. Therefore, this estimate represents an estimate of possible loss only for certain matters meeting these criteria. It does not represent the Company's maximum possible loss exposure. Information is provided below regarding the nature of all of the disclosed matters and, where specified, the amount, if any, of plaintiff claims associated with these loss contingencies.

Due to the complexity and scope of the matters disclosed in the "Claims related proceedings" and "Other proceedings" subsections below and the many uncertainties that exist, the ultimate outcome of these matters cannot be predicted. In the event of an unfavorable outcome in one or more of these matters, the ultimate liability may be in excess of amounts currently accrued, if any, and may be material to the Company's operating results or cash flows for a particular quarterly or annual period. However, based on information currently known to it, management believes that the ultimate outcome of all matters described below**,** as they are resolved over time**,** is not likely to have a material effect on the financial position of the Company.

Claims related proceedings

The Company is vigorously defending a putative class action lawsuit filed in the aftermath of Hurricane Katrina and currently pending in the United States District Court for the Eastern District of Louisiana ("District Court"). This matter was filed by the Louisiana Attorney General against the Company and every other homeowner insurer doing business in the state of Louisiana, on behalf of the state of Louisiana, as assignee, and on behalf of a class of Road Home fund recipients. In this matter the state alleged that the insurers failed to pay all damages owed under their policies. The claims currently pending in this matter are for breach of contract and for declaratory relief on the alleged underpayment of claims by the insurers. All other claims, including extra contractual claims, have been dismissed. The Company had moved to dismiss the complaint on the grounds that the state had no standing to bring the lawsuit as an assignee of insureds because of anti-assignment language in the underlying insurance policies. Now, however, due to a ruling by the Louisiana Supreme Court, the Company will not pursue a motion to dismiss, but will preserve the anti-assignment issue in a defense.

The state has not yet identified the specific details by properly supporting its allegations of breach of contract or the alleged deficiencies in adjusting those claims. There are many potential individual claims at issue in this matter, each of which will require individual analysis, and a number of which may be subject to individual defenses, including release, accord and satisfaction, prescription, waiver and estoppel. There has been no discovery in connection with this matter. The Company has now filed a motion seeking to force the state to provide more specificity as to its claims in this matter.

The Company believes that its adjusting practices in connection with Katrina homeowners claims were sound and in accordance with industry standards and state law. There remain significant questions of Louisiana law that have yet to be decided. In the Company's judgment, given the issues discussed above, a loss is not probable.

The Company is vigorously defending a lawsuit in regards to certain claims employees involving worker classification issues. This lawsuit is a certified class action challenging a state wage and hour law. In this case, plaintiffs sought actual damages in an amount to be proven at trial, liquidated damages in an amount equal to an unspecified percentage of aggregate underpayment of wages to be proven at trial, as well as attorneys' fees and costs. Plaintiffs have not made a settlement demand nor have they alleged the amount of damages with any specificity. The case was bifurcated between liability and damages and is currently focused only on liability issues. No discovery has taken place regarding plaintiffs' alleged damages. In December 2009, the liability phase of the case was tried, and, on July 6, 2010, the court issued its decision finding in favor of the Company on all claims. The plaintiffs have appealed the decision in favor of the Company to the first level of appellate court. After concluding the current appeal, the parties may seek a subsequent appeal to the Illinois Supreme Court. Only liability issues are being addressed on appeal and no damages may be awarded at this stage of the proceedings. In the event the trial court's order were to be overturned, however, the parties would need to conduct damages discovery, and a trial on damages would have to take place before any damages could be awarded. In the Company's judgment a loss is not probable.

The Company is vigorously defending a class action lawsuit in Montana state court challenging aspects of its claim handling practices in Montana. The plaintiff alleges that the Company adjusts claims made by individuals who do not have attorneys in a manner that unfairly resulted in lower payments compared to claimants who were represented by attorneys. In January 2012, the court certified a class of Montana claimants who were not represented by attorneys with respect to the resolution of auto accident claims. The court certified the class to cover an indefinite period that commences in the mid-1990's. The certified claims include claims for declaratory judgment, injunctive relief and punitive damages in an unspecified amount. Injunctive relief may include a claim process by which unrepresented claimants could request that their claims be readjusted. No compensatory damages are sought on behalf of the class. To date no discovery has occurred related to the potential value of the class members' claims. The Company has asserted various defenses with respect to the plaintiff's claims which have not been finally resolved. The proposed injunctive relief claim process would be subject to defenses and offsets ordinarily associated with the adjustment of claims. Any differences in amounts paid to class members compared to what class members might be paid under a different process would be speculative and subject to individual variation and determination dependent upon the individual circumstances presented by each class claimant. In the Company's judgment a loss is not probable.

NOTES TO FINANCIAL STATEMENTS

The Company is defending certain matters relating to the Company's agency program reorganization announced in 1999. Although these cases have been pending for many years, they currently are in the early stages of litigation because of appellate court proceedings and threshold procedural issues.

- These matters include a lawsuit filed in 2001 by the U.S. Equal Employment Opportunity Commission ("EEOC") alleging retaliation under federal civil rights laws ("EEOC I") and a class action filed in 2001 by former employee agents alleging retaliation and age discrimination under the Age Discrimination in Employment Act ("ADEA"), breach of contract and ERISA violations ("Romero I"). In 2004, in the consolidated EEOC I and Romero I litigation, the trial court issued a memorandum and order that, among other things, certified classes of agents, including a mandatory class of agents who had signed a release, for purposes of effecting the court's declaratory judgment that the release was voidable at the option of the release signer. The court also ordered that an agent who voided the release must return to Allstate "any and all benefits received by the [agent] in exchange for signing the release." The court also stated that, "on the undisputed facts of record, there is no basis for claims of age discrimination." The EEOC and plaintiffs asked the court to clarify and/or reconsider its memorandum and order and in January 2007, the judge denied their request. In June 2007, the court reversed its prior ruling that the release was voidable and granted the Company's motions for summary judgment, ruling that the asserted claims were barred by the release signed by most plaintiffs. Plaintiffs filed a notice of appeal with the U.S. Court of Appeals for the Third Circuit ("Third Circuit"). In July 2009, the Third Circuit vacated the trial court's entry of summary judgment in the Company's favor and remanded the cases to the trial court for additional discovery, including additional discovery related to the validity of the release and waiver. In its opinion, the Third Circuit held that if the release and waiver is held to be valid, then all of the claims in Romero I and EEOC I are barred. Thus, if the waiver and release is upheld, then only the claims in Romero I asserted by the small group of employee agents who did not sign the release and waiver would remain for adjudication. In January 2010, following the remand, the cases were assigned to a new judge for further proceedings in the trial court. Plaintiffs filed their Second Amended Complaint on July 28, 2010. Plaintiffs seek broad but unspecified "make whole relief," including back pay, compensatory and punitive damages, liquidated damages, lost investment capital, attorneys' fees and costs, and equitable relief, including reinstatement to employee agent status with all attendant benefits for up to approximately 6,500 former employee agents. Despite the length of time that these matters have been pending, to date only limited discovery has occurred related to the damages claimed by individual plaintiffs, and no damages discovery has occurred related to the claims of the putative class. Nor have plaintiffs provided any calculations of the putative class's alleged back pay or the alleged liquidated, compensatory or punitive damages, instead asserting that such calculations will be provided at a later stage during expert discovery. Damage claims are subject to reduction by amounts and benefits received by plaintiffs and putative class members subsequent to their employment termination. Little to no discovery has occurred with respect to amounts earned or received by plaintiffs and putative class members in mitigation of their alleged losses. Alleged damage amounts and lost benefits of the approximately 6,500 putative class members also are subject to individual variation and determination dependent upon retirement dates, participation in employee benefit programs, and years of service. Discovery limited to the validity of the waiver and release is in process. At present, no class is certified. Summary judgment proceedings on the validity of the waiver and release are expected to occur in the first half of 2012.

- A putative nationwide class action has also been filed by former employee agents alleging various violations of ERISA, including a worker classification issue ("Romero II"). These plaintiffs are challenging certain amendments to the Agents Pension Plan and are seeking to have exclusive agent independent contractors treated as employees for benefit purposes. Romero II was dismissed with prejudice by the trial court, was the subject of further proceedings on appeal, and was reversed and remanded to the trial court in 2005. In June 2007, the court granted the Company's motion to dismiss the case. Plaintiffs filed a notice of appeal with the Third Circuit. In July 2009, the Third Circuit vacated the district court's dismissal of the case and remanded the case to the trial court for additional discovery, and directed that the case be reassigned to another trial court judge. In its opinion, the Third Circuit held that if the release and waiver is held to be valid, then one of plaintiffs' three claims asserted in Romero II is barred. The Third Circuit directed the district court to consider on remand whether the other two claims asserted in Romero II are barred by the release and waiver. In January 2010, following the remand, the case was assigned to a new judge (the same judge for the Romero I and EEOC I cases) for further proceedings in the trial court. On April 23, 2010, plaintiffs filed their First Amended Complaint. Plaintiffs seek broad but unspecified "make whole" or other equitable relief, including losses of income and benefits as a result of their decision to retire from the Company between November 1, 1999 and December 31, 2000. They also seek repeal of the challenged amendments to the Agents Pension Plan with all attendant benefits revised and recalculated for thousands of former employee agents, and attorney's fees and costs. Despite the length of time that this matter has been pending, to date only limited discovery has occurred related to the damages claimed by individual plaintiffs, and no damages discovery has occurred related to the claims of the putative class. Nor have plaintiffs provided any calculations of the putative class's alleged losses, instead asserting that such calculations will be provided at a later stage during expert discovery. Damage claims are subject to reduction by amounts and benefits received by plaintiffs and putative class members subsequent to their employment termination. Little to no discovery has occurred with respect to amounts earned or received by plaintiffs and putative class members in mitigation of their alleged losses. Alleged damage amounts and lost benefits of the putative class members also are subject to individual variation and determination dependent upon retirement dates, participation in employee benefit programs, and years of service. As in Romero I and EEOC I, discovery at this time is limited to issues relating to the validity of the waiver and release. Class certification has not been decided. Summary judgment proceedings on the validity of the waiver and release are expected to occur in the first half of 2012.

In these agency program reorganization matters, the threshold issue of the validity and scope of the waiver and release is yet to be decided and, if decided in favor of the Company, would preclude any damages being awarded in Romero I and EEOC I and may also preclude damages from being awarded in Romero II. In the Company's judgment a loss is not probable. The Company has been vigorously defending these lawsuits and other matters related to its agency program reorganization.

15. Leases

A. Lessee Operating Lease

1. The Company leases certain office facilities and computer equipment under various noncancelable operating lease agreements that expire through 2022. Total rent expense, net of sublease rental income, was $229 million and $237 million in 2011 and 2010, respectively, before allocation to affiliates. Sublease rental income was $1 million and $2 million in 2011 and 2010, respectively.

   The Company closed certain leased office facilities, which resulted in the early termination or non-use of leased property benefits. Under these lease agreements, the Company recognized a liability of $2 million at both December 31, 2011 and 2010.

2. a. At December 31, 2011, the minimum aggregate rental commitments under noncancelable operating leases with an initial or remaining term of more than one year were as follows:

(in millions)	
2012	$ 161
2013	119
2014	75
2015	54
2016	37
Thereafter	44
Total	$ 490

   b. At December 31, 2011, the total of minimum aggregate rental commitments to be received under noncancelable subleases with an initial or remaining term of more than one year was $2 million.

16. Information about Financial Instruments with Off-Balance Sheet Risk and Financial Instruments with Concentrations of Credit Risk

Derivative financial instruments

1. The following tables summarize the volume, statement value and fair value of the Company's derivative financial instruments, including those with off-balance sheet risk at December 31:

Total derivative financial instruments	$ 10,904	42,125	$ 36	$ 26

Volume for over-the-counter derivative contracts is represented by their notional amounts. Volume for exchange traded derivatives is represented by the number of contracts which is the basis on which they are traded (n/a = not applicable). The notional amounts specified in the contracts are used to calculate the exchange of contractual payments under the agreements and are not representative of the potential for gain or loss on these agreements. However, the notional amounts specified in credit default swap agreements where the Company has sold credit protection represent the maximum amount of potential loss, assuming no recoveries. Statement values are generally equal to consideration paid or received except when non-hedge accounting is used, in which case statement value is equal to current fair value. Fair value is the estimated amount that the Company would receive or pay to terminate the derivative contracts at the reporting date.

2. The credit risk, market risk and cash requirements of the Company's derivative instruments utilized during 2011 and 2010 are discussed in Note 8, Parts A-C. The accounting policies for the Company's derivative instruments are disclosed in Note 1, Part C and Note 8, Parts A-C.

3. The following table summarizes the credit exposure on the Company's over-the-counter contracts at December 31:

(in millions)	2011	2010
Credit default swap agreements - buying protection	$ 4	$ (5)
Interest rate swaption agreements	-	53
Foreign currency forward contracts	-	1
Interest rate swap agreements	-	(13)
Credit default swap agreements - selling protection	-	(1)
Total derivative credit exposure	$ 4	$ 35

Counterparty credit exposure represents the Company's potential loss if all counterparties concurrently fail to perform under the contractual terms of the contracts and all collateral, if any, becomes worthless. This exposure is measured by the statement value of over-the-counter derivative contracts with a positive statement value at the reporting date reduced by the effect, if any, of legally enforceable master netting agreements. The Company has not incurred any losses on derivative financial instruments due to counterparty nonperformance.

4. The Company's policy for requiring collateral is discussed in Note 8, Parts A-C. In general, the collateral pledged by the Company is in the custody of a counterparty or an exchange. However, the Company has access to this collateral at any time, subject to replacement. For certain exchange traded derivatives, the exchange requires margin deposits as well as daily cash settlements of margin accounts. Usually, the Company pledges U.S. Treasury bonds to satisfy this collateral requirement. At December 31, 2011, the Company pledged $5 million of securities in the form of margin deposits. At December 31, 2010, the Company pledged $19 million of cash and securities in the form of margin deposits.

NOTES TO FINANCIAL STATEMENTS

The Company uses master netting agreements for over-the-counter derivative transactions that permit either party to net payments due for transactions and collateral is either pledged or obtained when certain predetermined exposure limits are exceeded. At December 31, 2011, counterparties pledged $1 million of securities to the Company, and the Company pledged $5 million of cash to counterparties. At December 31, 2010, counterparties pledged $41 million of cash and securities to the Company, and the Company pledged $40 million of securities to counterparties.

Off-balance sheet financial instruments

1. The contractual amounts of off-balance sheet financial instruments at December 31 were as follows:

(in millions)	2011	2010
Commitments to invest in limited partnership interests	$ 1,218	$ 740
Private placement commitments	$ 53	$ 48

2. Commitments to invest generally represent commitments to acquire financial interests or instruments. The Company enters into these agreements to allow for additional participation in certain limited partnership investments.

   Private placement commitments represent conditional commitments to purchase private placement debt and equity securities at a specified future date. The Company regularly enters into these agreements in the normal course of business.

3. The contractual amounts represent the amount at risk if the contract was fully drawn upon, the counterparty defaults and the value of any underlying security becomes worthless.

4. The Company does not require collateral or other security to support off-balance sheet financial instruments with credit risk.

17. Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

A. The Company did not report transfers of premium receivables as sales in 2011 or 2010.

B. Transfer and Servicing of Financial Assets

1. During 2011, the Company entered into securities lending agreements. The Company was able to estimate the fair value of assets obtained and liabilities incurred in these agreements. The Company did not enter into securities lending agreements in 2010.

2. The Company entered into securities lending agreements using U.S. Treasury and corporate bonds in 2011. Securities lent were either specifically identified by the lending bank or segregated into a separate custody account. The fair value of securities loaned were $71 million at December 31, 2011. For more information on securities lending collateral please see Note 5, Part E. The Company did not enter into securities lending transactions in 2010.

3. The Company did not enter into servicing asset or liability agreements in 2011 or 2010.

4. The Company did not have securitized financial assets accounted for as sales in 2011 or 2010.

5. The Company was not the transferor of securitized financial assets in 2011 or 2010.

6. The Company did not transfer receivables with recourse in 2011 or 2010.

C. In the course of managing the Company's investment portfolio, securities may be sold and reacquired within 30 days of the sale date. Such transactions are referred to as wash sales. The details, by NAIC designation 3 or below, of bonds sold during 2011 and 2010 and reacquired within 30 days of the sale date were:

($ in millions)	2011			
	Number of Transactions	Book Value of Securities Sold	Cost of Securities Repurchased	Gain (Loss)
NAIC 3	27	$ 55	$ 56	$ 1
NAIC 4	3	$ 4	$ 5	$ -

($ in millions)	2010			
	Number of Transactions	Book Value of Securities Sold	Cost of Securities Repurchased	Gain (Loss)
NAIC 3	1	$ 1	$ 1	$ -
NAIC 4	2	$ 1	$ 2	$ -

The Company did not have any other wash sales in 2011 or 2010 that involved unrated securities or securities with a NAIC 3 designation or below.

18. Gain or Loss to the Reporting Entity from Uninsured Plans and the Uninsured Portion of Partially Insured Plans

The Company did not act as a third party administrator for uninsured accident and health plans.

19. Direct Premium Written/Produced by Managing General Agents/Third Party Administrators

There were no direct premiums written/produced by managing general agents/third party administrators in 2011 or 2010.

20. Fair Value Measurements

A. Fair value is defined, per SSAP 100, *Fair Value Measurements* ("SSAP No. 100"), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP No. 100 identified three valuation techniques which are used, either independently or in combination, to determine fair value: 1) market approach; 2) income approach; and 3) cost approach. SSAP No. 100 also contains guidance about observable and unobservable inputs, which are assumptions that market participants would use in pricing an asset or liability. To increase consistency and comparability in fair value measurements, the fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels; 1, 2 and 3. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available.

The Company has two types of situations where investments are classified as Level 3. The first is where quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources. The second situation is where specific inputs significant to the fair value estimation models are not market observable, including the Company's use of broker quotes.

During 2011, certain residential mortgage-backed securities (“RMBS”) were transferred into Level 2 from Level 3 as a result of increased liquidity in the market and a sustained increase in the market activity for these assets. When transferring these securities into Level 2, the Company did not change the source of fair value estimates or modify the estimates received from independent third-party valuation service providers or the internal valuation approach. Accordingly, for securities included within this group, there was no change in fair value in conjunction with the transfer resulting in a realized or unrealized gain or loss.

Transfers into Level 3 during 2011 and 2010 included situations where there was a change in the NAIC designation that resulted in the asset being reported and measured at fair value. In addition, transfers into Level 3 included situations where assets measured at lower of cost or market were reported at cost at December 31, 2010 and 2009 and fair value at December 31, 2011 and 2010. Transfers into Level 3 during 2011 and 2010 included situations where a fair value quote was not provided by the Company’s independent third-party valuation service provider, and as a result the price was stale or had been replaced with a broker quote where input have not been corroborated to be market observable resulting in the security being classified as Level 3. Transfers into Level 3 included situations where the fair value hierarchy of a security remained at Level 3, but the classification of the security changed.

Transfers out of Level 3 during 2011 and 2010 included situations where a broker quote was used in the prior period and a fair value quote became available from the Company’s independent third-party valuation service provider in the current period. A quote utilizing the new pricing source was not available as of the prior period, and any gains and losses related to the change in valuation source for individual securities were not significant. Additionally, transfers out of Level 3 included situations where assets measured at lower of cost or market were reported at fair value at December 31, 2010 and 2009 and cost at December 31, 2011 and 2010. In addition, transfers out of Level 3 included situations where there was a change in the NAIC designation that resulted in the asset not being reported and measured at fair value. Transfers out of Level 3 during 2010 also included situations where the fair value hierarchy of a security remained Level 3, but the classification of the security changed.

3. Transfers between level categorizations may occur due to changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity, trading volume or bid-ask spreads. Transfers between level categorizations may also occur due to changes in the valuation source. For example, in situations where a fair value quote is not provided by the Company’s independent third-party valuation service provider and as a result, the price is stale or has been replaced with a broker quote, the security is transferred into Level 3. Transfers in and out of level categorizations are reported as having occurred at the beginning of the quarter in which the transfer occurred.

4. In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 and Level 3 valuations, a combination of the market and income approaches is used.

Listed below is a summary of the significant valuation techniques for assets and liabilities measured and reported at fair value.

Level 2 measurements

Bonds

Municipal - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

NOTES TO FINANCIAL STATEMENTS

Corporate, including privately placed - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Also included are privately placed securities valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer.

RMBS and asset-backed securities ("ABS") - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads.

Commercial mortgage-backed securities ("CMBS") - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, collateral performance and credit spreads.

Unaffiliated common and preferred stocks - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

Derivatives - Exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives, including interest rate swap agreements, foreign exchange forward contracts, and certain credit default swap agreements, are valued using models that rely on inputs such as interest rate yield curves, currency rates, and counterparty credit spreads that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

Level 3 measurements

Bonds

Municipal - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields and credit spreads.

Corporate, including privately placed - Primarily valued based on non-binding broker quotes.

RMBS, CMBS and ABS - Value based on non-binding broker quotes received from brokers who are familiar with the investments and where the inputs have not been corroborated to be market observable.

Preferred stocks - The primary inputs to the valuation included quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

Unaffiliated common stocks - Value based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Unobservable inputs reflect the Company's estimates of assumptions that market participants would use in valuing the asset.

Derivatives - Certain over-the-counter derivatives, such as certain credit default swap contracts and certain options contracts (including interest rate swaption agreements), are valued using models that are widely accepted in the financial services industry. These are categorized as Level 3 as a result of the significance of non-market observable inputs such as volatility. Other primary inputs include interest rate yield curves and credit spreads.

5. All information related to derivatives measured and reported at fair value is presented above.

B. Presented below are the statement value and fair value estimates of financial instruments at December 31:

The fair value of U.S. Treasury bonds is based on unadjusted quoted market prices for identical assets in active markets the Company can access. The fair value of all other publicly traded bonds, including loan-backed and structured securities, is based upon quoted market prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Non-publicly traded bonds, including loan-backed and structured securities, are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer.

The fair value of preferred stocks is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

The fair value of mortgage loans on real estate is based on discounted contractual cash flows or if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics, using similar types of properties as collateral.

The fair value of cash equivalents and short-term investments is based on quoted market prices for identical or similar assets in markets that are not active or amortized cost.

Exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives are valued using models that are widely accepted in the financial services industry. Primary inputs include interest rate yield curves, currency rates and counterparty credit spreads.

The fair value of LIHTC property investments is based on amortized cost which approximates fair value.

NOTES TO FINANCIAL STATEMENTS

The fair value of surplus notes of affiliates and collateral loans is based on discounted cash flow calculations using current interest rates for instruments with comparable terms.

21. Other Items

A. Extraordinary Items

The Company did not have extraordinary items at December 31, 2011 or 2010.

B. Troubled Debt Restructuring: Debtors

The Company did not have troubled debt restructurings at December 31, 2011 or 2010.

C. Other Disclosures

Included in the Annual Statement is a schedule of net losses and loss expenses unpaid, as reported in Schedule P - Part 1, columns 13 through 24, for accident years 2001, 2000, 1999, 1998, 1997, and 1996 and prior, for each line of business reported.

D. Premium Balances Reasonably Possible to be Uncollectible

The Company routinely assesses the collectibility of its premiums and considerations that are less than 90 days old. The allowance for uncollectible premiums and considerations is determined based on the age of the receivable and prior collection experience. The allowance balance for admitted premiums and considerations, after reinsurance, was $20 million and $23 million at December 31, 2011 and 2010, respectively. Premiums and considerations older than 90 days are nonadmitted.

E. Business Interruption Insurance Recoveries

The Company did not procure business interruption insurance in 2011 or 2010.

F. State Transferable and Non-transferable Tax Credits

1. The Company did not own state tax credits at December 31, 2011. At December 31, 2010, the Company had unused transferable state tax credits in Connecticut of $2 million, with a carrying value rounded to the same amount that were recorded as an admitted asset on the Company's Asset page. The Company did not own state non-transferable tax credits at December 31, 2010.

2. The Company estimates the utilization of the remaining transferable state tax credits by projecting the future tax liability and comparing it to the availability of remaining transferable state tax credits. At December 31, 2010, the estimated unused transferable state tax credits were expected to be fully utilized by December 31, 2011.

3. The Company did not recognize impairment losses on the carrying values of state tax credits in 2011 or 2010.

G. Subprime Mortgage Related Risk Exposure

1. The Company identified it had exposure to subprime residential mortgage related risk in the form of asset-backed residential mortgage-backed securities ("ABS RMBS"), as well as a limited partnership investment. The ABS RMBS portfolio includes securities that are collateralized by mortgage loans issued to borrowers that cannot qualify for prime or alternative financing terms due in part to an impaired or limited credit history. It also includes securities that are collateralized by certain second lien mortgages regardless of the borrower's credit profile. At December 31, 2011, the ABS RMBS portfolio had net unrealized losses of $37 million, comprised of $39 million in gross unrealized losses and $2 million in gross unrealized gains. At December 31, 2010, the ABS RMBS portfolio had net unrealized losses of $34 million, comprised of $35 million in gross unrealized losses and $1 million in gross unrealized gains.

   In addition, the Company owns Alt-A securities, which it does not consider to be a component of its exposure to subprime mortgage related risk. The Alt-A portfolio consists of mortgage-backed securities at fixed or variable rates and includes certain securities that are collateralized by residential mortgage loans issued to borrowers with stronger credit profiles than subprime borrowers, but do not qualify for prime financing terms due to high loan-to-value ratios or limited supporting documentation. At December 31, 2011, the Alt-A portfolio had net unrealized losses of $3 million, comprised of $12 million in gross unrealized losses and $9 million in gross unrealized gains. At December 31, 2010, the Alt-A portfolio had net unrealized gains of $11 million, comprised of $23 million in gross unrealized gains and $12 million in gross unrealized losses.

   Both ABS RMBS and Alt-A securities are considered loan-backed, and included in bonds in the Company's Asset page.

   The Company has a comprehensive portfolio monitoring process to identify and evaluate, on a case-by-case basis, investments whose carrying value may be OTTI. See the investments accounting policy in Note 1, Part C for more details. The Company recorded the following OTTI for the years ended December 31:

(in millions)	2011		2010	
	ABS RMBS	Alt-A	ABS RMBS	Alt-A
Related to asset impairments	$ 28	$ 14	$ 87	$ 29
Due to the potential sale of assets to meet cash flow needs	15	1	2	-
Total OTTI	$ 43	$ 15	$ 89	$ 29

NOTES TO FINANCIAL STATEMENTS

The Company continues to believe the unrealized losses on these securities are not necessarily predictive of the performance of the underlying collateral. In the absence of further deterioration in the collateral relative to the Company's positions in the securities' respective capital structures, which could require recognition of OTTI, the unrealized losses should reverse over the remaining lives of the securities.

The Company's practice for acquiring and monitoring ABS RMBS and Alt-A securities takes into consideration the quality of the originator, quality of the servicer, security credit rating, underlying characteristics of the mortgages, borrower characteristics, level of credit enhancement in the transaction, and bond insurer strength, where applicable. The originators and servicers of the underlying mortgage loans are primarily subsidiaries of large banks and brokers.

2. The Company did not have direct exposure to subprime mortgage loans.

3. The Company's direct exposure to other subprime investments is summarized as follows at December 31:

(in millions)	2011			
Type of Investment	Actual Cost	Book/ Adjusted Carrying Value	Fair Value	OTTI Losses
ABS RMBS	$ 383	$ 267	$ 230	$ 43
Other assets	65	78	78	-
Total	$ 448	$ 345	$ 308	$ 43

(in millions)	2010			
Type of Investment	Actual Cost	Book/ Adjusted Carrying Value	Fair Value	OTTI Losses
ABS RMBS	$ 676	$ 486	$ 452	$ 89
Other assets	65	76	76	-
Total	$ 741	$ 562	$ 528	$ 89

In addition, the Company had Alt-A securities with the following actual cost, book/adjusted carrying value, fair value and OTTI losses at December 31:

(in millions)	2011	2010
Actual cost	$ 174	$ 203
Book/adjusted carrying value	$ 135	$ 164
Fair value	$ 132	$ 175
OTTI losses	$ 15	$ 29

4. The Company did not sell mortgage guaranty or financial guaranty insurance coverage, and therefore, does not have underwriting exposure to subprime mortgage risk.

22. Events Subsequent

The maximum amount of return commission which would have been due to reinsurers if they or the Company had canceled all of the Company's reinsurance, or if the Company or reinsurers had canceled all the Company's insurance assumed as of December 31 with the return of unearned premium reserve was as follows:

	Losses Incurred	Increase (Decrease) to Income
Insurance Corporation of New York	$ 2,705	$ (2,705)
Nauru Insurance Corporation	4	(4)
Total	$ 2,709	$ (2,709)

E. Commutation of Ceded Reinsurance

The Company reported the following impact to net incurred losses as a result of commutations with certain companies in 2011 and 2010:

(in thousands)	2011

e. SCOR (NAIC Company Code 30058) was the only cedant involved in all the transactions included in the summary totals above. The Company did not assume retroactive reinsurance in 2011 or 2010.

f. There were no amounts of total paid loss or loss adjustment expenses recoverable at December 31, 2011 or 2010.

G. Reinsurance Accounted for as a Deposit

On October 1, 1999, the Company completed the acquisition of the personal lines business from CNA Financial Corporation (“CNA”). The transaction included an indemnity reinsurance agreement and a reserve agreement. The reserve agreement guaranteed the adequacy, in all material respects, of the loss reserves transferred by CNA under the indemnity reinsurance agreement. The Company used deposit accounting to account for the indemnity reinsurance agreement, as the portion of the indemnity reinsurance agreement governing the transfer of the loss reserves did not, despite its form, transfer both components of insurance risk. In accordance with the requirements of deposit accounting, an initial asset deposit of $1.05 billion was recorded. The inception-to-date payments for this agreement totaled $837 million and $836 million at December 31, 2011 and 2010, respectively. Inception-to-date net adjustments related to the reserve agreement reduced the reserves on deposit by $187 million at both December 31, 2011 and 2010. The balance of the reserves on deposit was $23 million and $24 million at December 31, 2011 and 2010, respectively.

H. Transfer of Run-off Agreements

The Company did not enter into any agreements that qualified to receive run-off accounting treatment in 2011 or 2010.

24. Retrospectively Rated Contracts and Contracts Subject to Redetermination

A. The Company accrues estimated retrospective premium adjustments on certain commercial insurance policies through the review of each individual retrospectively rated risk, comparing the known loss development, including IBNR reserves, with that anticipated in the policy contract to arrive at the best estimate of returned or additional retrospective premium.

The Company also accrues estimated retrospective premium adjustments related to Your Choice Auto platinum (“YCA”), Your Choice Home platinum and gold (“YCH”) and Allstate Blue policies in eligible states. YCA and YCH policies that are claim free during the policy period receive 5.0% of the premium paid for certain major coverages as a billing credit or refund. Allstate Blue policies offer non-standard auto coverage and contain a loyalty bonus which rewards eligible policyholders who stay with the Company for a full policy term with a 5.0% to 10.0% bonus of premium paid for certain major coverages. The amount of accrued retrospective premium adjustments is determined by analyzing the historical loss experience of these policyholders.

B. The Company records accrued retrospective premium as an adjustment to earned premiums on certain commercial insurance policies. For YCA, YCH and Allstate Blue policies, the Company records accrued retrospective premium as an adjustment to written premiums.

NOTES TO FINANCIAL STATEMENTS

C. The amount of net premiums written by the Company in 2011 and 2010 subject to retrospective rating features was $2.07 billion and $2.11 billion, respectively. These amounts represented 8.8% and 9.0% of total net premiums written in 2011 and 2010, respectively.

D. The Company did not have medical loss ratio rebates required pursuant to the Public Health Service Act.

E. The Company nonadmitted 10.0% of accrued retrospective premiums related to certain commercial insurance policies not offset by retrospective return premiums, other liabilities to the same party (other than loss and loss adjustment expense reserves), or collateral as permitted by SSAP No. 66, *Retrospectively Rated Contracts*, as follows:

25. Changes in Incurred Losses and Loss Adjustment Expenses

The Company establishes reserves for losses and loss adjustment expenses on reported and unreported claims of insured losses. The Company's reserving process takes into account known facts and interpretations of circumstances and factors including the Company's experience with similar cases, actual claims paid, historical trends involving claim payment patterns and pending levels of unpaid claims, loss management programs, product mix and contractual terms, changes in law and regulation, judicial decisions, and economic conditions. In the normal course of business, the Company may also supplement its claim processes by utilizing third party adjusters, appraisers, engineers, inspectors, other professionals and information sources to assess and settle catastrophe and non-catastrophe related claims. The effects of inflation are implicitly considered in the reserving process.

Since reserves are estimates of the unpaid portion of losses that have occurred, including IBNR losses, the establishment of appropriate reserves, including reserves for catastrophes, is an inherently uncertain and complex process. The ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimates. The highest degree of uncertainty is associated with reserves for losses incurred in the current reporting period as it contains the greatest proportion of losses that have not been reported or settled. The Company regularly updates its reserve estimates as new information becomes available and as events unfold that may affect the resolution of unsettled claims. Changes in prior year reserve estimates, which may be material, are reflected in the Statement of Income in the period such changes are determined.

Activity in the reserve for losses and loss adjustment expenses was summarized as follows:

(in millions)	2011	2010
Balance at January 1	$ 14,780	$ 14,499
Incurred related to:		
Current year	18,651	17,404
Prior years	(296)	(95)
Total incurred	18,355	17,309
Paid related to:		
Current year	12,444	11,165
Prior years	5,607	5,863
Total paid	18,051	17,028
Balance at December 31	$ 15,084	$ 14,780

Incurred losses and loss adjustment expenses represent the sum of paid losses and reserve changes in the calendar year. This expense included net losses from catastrophes of $3.70 billion and $2.15 billion for the years ended December 31, 2011 and 2010, respectively. Catastrophes are an inherent risk that have contributed to, and will continue to contribute to, material year-to-year fluctuations in the Company's net income and financial position.

The Company calculates and records a single best reserve estimate for losses from catastrophes, in conformity with generally accepted actuarial principles. As a result, management believes that no other estimate is better than the recorded amount. Due to the uncertainties involved, including the factors described above, the ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimates. Accordingly, management believes that it is not practicable to develop a meaningful range for such changes in losses incurred.

Incurred losses and loss adjustment expenses attributable to insured events of prior years were $(296) million and $(95) million as a result of the reestimation of unpaid losses and loss adjustment expenses for the years ended December 31, 2011 and 2010, respectively. During 2011, favorable development in incurred losses and loss adjustment expenses related to prior years was primarily due to severity development that was better than expected and catastrophes. During 2010, favorable development in incurred losses and loss adjustment expenses related to prior years was primarily due to favorable prior year catastrophes and severity development that was better than expected, partially offset by litigation settlements. These changes were generally the result of ongoing analyses of recent loss development trends. Initial estimates were revised as additional information regarding claims became known.

Anticipated salvage and subrogation of $525 million and $552 million was included as a reduction of loss reserves at December 31, 2011 and 2010, respectively.

26. Intercompany Pooling Arrangements

The Company was not a member of an intercompany pooling arrangement in 2011 or 2010.

27. Structured Settlements

A. To settle certain claims, the Company purchased annuities from various life insurers where the claimant was the payee but for which the Company was contingently liable in the event the issuer of the annuity was unable to perform. At December 31, 2011 and 2010, the aggregate amount of reserves for which the Company was contingently liable was $306 million and $309 million, respectively.

B. ALIC, located in Northbrook, Illinois, was the only life insurer where the total statement value of reserves for which the Company was contingently liable exceeded 1.0% of the Company's policyholder surplus at December 31. The statement value (i.e. present value) of ALIC's reserves for which the Company was contingently liable was $179 million and $182 million at December 31, 2011 and 2010, respectively. This affiliated life insurer is licensed in the Company's state of domicile.

28. Health Care Receivables

The Company did not have health care receivables at December 31, 2011 or 2010.

NOTES TO FINANCIAL STATEMENTS

29. Participating Policies

The Company did not have participating policies, as defined by SSAP No. 51, *Life Contracts*, or SSAP No. 54, *Individual and Group Accident and Health Contracts*, at December 31, 2011 or 2010.

30. Premium Deficiency Reserves

The Company did not record premium deficiency reserves at December 31, 2011 or 2010. Anticipated investment income was considered as a factor in the premium deficiency calculation.

31. High Deductibles

At December 31, 2011 and 2010, the amount of reserve credit recorded for high deductibles on unpaid claims was $71 thousand and $159 thousand, respectively. The Company did not have amounts billed and recoverable on paid claims at December 31, 2011 or 2010.

32. Discounting of Liabilities for Unpaid Losses or Unpaid Loss Adjustment Expenses

The Company did not discount its liabilities for unpaid losses or unpaid loss adjustment expenses at December 31, 2011 or 2010.

33. Asbestos/Environmental Reserves

A. The Company continues to receive asbestos and environmental claims. Asbestos claims relate primarily to bodily injuries asserted by people who were exposed to asbestos or products containing asbestos. Environmental claims relate primarily to pollution and related clean-up costs.

The Company's exposure to asbestos and environmental claims arises principally from assumed reinsurance coverage written during the 1960s through the mid-1980s, including reinsurance on primary insurance written on large U.S. companies, and from direct excess insurance written from 1972 through 1985, including substantial excess general liability coverages on large U.S. companies. Additional exposure stems from direct primary commercial insurance written during the 1960s through the mid-1980s.

In 1986, the general liability policy form used by the Company and others in the property and casualty insurance industry was amended to introduce an "absolute pollution exclusion," which excluded coverage for environmental damage claims, and added an asbestos exclusion. Most general liability policies issued prior to 1987 contain annual aggregate limits for product liability coverage. General liability policies issued in 1987 and thereafter contain annual aggregate limits for product liability coverage and annual aggregate limits for all coverages. The Company's experience to date has been that these policy form changes have limited the extent of its exposure to environmental and asbestos claim risks.

The Company's exposure to liability for asbestos and environmental losses manifests differently depending on whether it arises from assumed reinsurance coverage, direct excess insurance, or direct primary commercial insurance. The direct insurance coverage the Company provided for these exposures was substantially "excess" in nature.

Direct excess insurance and reinsurance involve coverage written by the Company for specific layers of protection above retentions and other insurance plans. The nature of excess coverage and reinsurance provided to other insurers limits the Company's exposure to loss to specific layers of protection in excess of policyholder retention on primary insurance plans. The Company's exposure is further limited by the significant reinsurance that was purchased on the direct excess business.

The Company's assumed reinsurance business involved writing generally small participations in other insurers' reinsurance programs. The reinsured losses in which the Company participates may be a proportion of all eligible losses or eligible losses in excess of defined retentions. The majority of the Company's assumed reinsurance exposure, approximately 85%, is for excess of loss coverage, while the remaining 15% is for pro-rata coverage.

The Company's direct primary commercial insurance business did not include coverage to large asbestos manufacturers. This business comprises a cross section of policyholders engaged in many diverse business sectors located throughout the country.

The Company conducts an annual review in the third quarter of each year to evaluate and establish asbestos and environmental reserves. Reserves are recorded in the reporting period in which they are determined. Using established industry and actuarial best practices and assuming no change in the regulatory or economic environment, this detailed and comprehensive "ground up" methodology determines asbestos reserves based on assessments of the characteristics of the exposure (e.g. claim activity, potential liability, jurisdiction, products versus non-products exposure) presented by individual policyholders, and determines environmental reserves based on assessments of the characteristics of exposure (e.g. environmental damages, respective shares of liability of potentially responsible parties, appropriateness and cost of remediation) to pollution and related clean-up costs. The number and cost of these claims is affected by intense advertising by trial lawyers seeking asbestos plaintiffs, and entities with asbestos exposure seeking bankruptcy protection as a result of asbestos liabilities, initially causing a delay in the reporting of claims, often followed by acceleration and an increase in losses and loss adjustment expenses as settlements occur.

After evaluating insureds' probable liabilities for asbestos and/or environmental claims, the Company evaluates the insureds' coverage programs for such claims. The Company considers the insureds' total available insurance coverage, including the coverage it issued. The Company also considers relevant judicial interpretations of policy language and applicable coverage defenses or determinations, if any.

Evaluation of both the insureds' estimated liabilities and the Company's exposure to the insureds depends heavily on an analysis of the relevant legal issues and litigation environment. This analysis is conducted by the Company's specialized claims adjusting staff and legal counsel. Based on these evaluations, case reserves are established by claims adjusting staff and actuarial analysis is employed to develop an IBNR reserve, which includes estimated potential reserve development and claims that have occurred but have not been reported.

For both asbestos and environmental reserves, the Company also evaluates its historical direct net loss and loss adjustment expenses paid and incurred experience to assess any emerging trends, fluctuations or characteristics suggested by the aggregate paid and incurred activity.

Establishing net loss reserves for asbestos and environmental claims is subject to uncertainties that are much greater than those presented by other types of claims. Among the complications are lack of historical data, long reporting delays, uncertainty as to the number and identity of insureds with potential exposure and unresolved legal issues regarding policy coverage; unresolved legal issues regarding the determination, availability and timing of exhaustion of policy limits; plantiffs' evolving and expanding theories of liability, availability and collectibility of recoveries from reinsurance; retrospectively determined premiums and other contractual agreements; estimates of the extent and timing of any contractual liability; the impact of bankruptcy protection sought by various asbestos producers and other asbestos defendants; and other uncertainties. There are also complex legal issues concerning the interpretation of various insurance policy provisions and whether those losses are covered, or were ever intended to be covered, and could be recoverable through retrospectively determined premium, reinsurance or other contractual agreements. Courts have reached different and sometimes inconsistent conclusions as to when losses were deemed to have occurred and which policies provide coverage; what types of losses are covered; whether there is an insurer obligation to defend; how policy limits are determined; how policy exclusions and conditions are applied and interpreted; and whether clean-up costs represent insured property damage. The Company's reserves for asbestos and environmental exposures could be affected by tort reform, class action litigation and other potential legislation and judicial decisions. Environmental exposures could also be affected by a change in the existing federal Superfund law and similar state statutes. There can be no assurance that any reform legislation will be enacted or that any such legislation will provide for a fair, effective and cost-efficient system for settlement of asbestos or environmental claims. Management believes these issues are not likely to be resolved in the near future, and the ultimate costs may vary materially from the amounts currently recorded resulting in material changes in loss reserves.

NOTES TO FINANCIAL STATEMENTS

Management believes its net loss reserves for asbestos and environmental exposures are appropriately established based on available facts, technology, laws, regulations, and assessments of other pertinent factors and characteristics of exposure (e.g. claim activity, potential liability, jurisdiction, products versus non-products exposure) presented by individual policyholders, assuming no change in the legal, legislative or economic environment. Due to the uncertainties and factors described above, management believes it is not practicable to develop a meaningful range for any such additional net loss reserves that may be required.

The following table summarizes the Company's reserve and claim activity for asbestos claims on a direct basis, for assumed reinsurance and after (net) the effects of ceded reinsurance.

GENERAL INTERROGATORIES

PART 2 - PROPERTY AND CASUALTY INTERROGATORIES

6.1 What provision has this reporting entity made to protect itself from an excessive loss in the event of a catastrophe under a workers' compensation contract issued without limit of loss?
THE COMPANY DOES NOT WRITE THIS LINE OF BUSINESS.

6.2 Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process.
THE COMPANY PLACES HEAVY EMPHASIS ON THE USE OF CATASTROPHIC ("CAT") SIMULATION MODELING PROVIDED BY LEADING CAT MODELING VENDORS TO ESTIMATE PROBABLE MAXIMUM LOSS ("PML"). AN ADVANCED METHODOLOGY IS EMPLOYED TO GENERATE A LARGE SAMPLE OF HYPOTHETICAL BUT POSSIBLE EVENTS, APPLY MODEL DAMAGE EXPECTATIONS AGAINST THE COMPANY'S BOOK OF BUSINESS, AND EVALUATE THE EXISTING POLICY CONDITIONS OF THE POLICIES IN FORCE TO DETERMINE AN ESTIMATE OF TOTAL DAMAGE.

6.3 What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?
UTILIZING A RISK MANAGEMENT METHODOLOGY, THE CORPORATION HAS DESIGNED A REINSURANCE PROGRAM TO ADDRESS EXPOSURE TO CATASTROPHES NATIONWIDE. THE PROGRAM PROVIDES REINSURANCE PROTECTION FOR CATASTROPHES INCLUDING STORMS NAMED OR NUMBERED BY THE NATIONAL WEATHER SERVICE, FIRES FOLLOWING EARTHQUAKES, EARTHQUAKES AND WILDFIRES. CONSISTENT WITH THE CORPORATION'S CATASTROPHE MANAGEMENT STRATEGY, THE PROGRAM IS INTENDED TO PROVIDE AN ACCEPTABLE RETURN ON THE RISKS ASSUMED IN OUR PROPERTY BUSINESS AND SUPPORT THE CORPORATION'S GOAL TO HAVE NO MORE THAN A 1% LIKELIHOOD OF EXCEEDING ANNUAL AGGREGATE CATASTROPHE LOSSES BY $2 BILLION.

6.4 Does the reporting entity carry catastrophe reinsurance protection for at least one reinstatement, in an amount sufficient to cover its estimated probable maximum loss attributable to a single loss event or occurrence? Yes [X] No [ ]

6.5 If no, describe any arrangements or mechanisms employed by the reporting entity to supplement its catastrophe reinsurance program or to hedge its exposure to unreinsured catastrophic loss.

7.1 Has this reporting entity reinsured any risk with any other entity under a quota share reinsurance contract that includes a provision that would limit the reinsurer's losses below the stated quota share percentage (e.g., a deductible, a loss ratio corridor, a loss ratio cap, an aggregate limit or any similar provisions)? Yes [ ] No [X]

7.2 If yes, indicate the number of reinsurance contracts containing such provisions:

7.3 If yes, does the amount of reinsurance credit taken reflect the reduction in quota share coverage caused by any applicable limiting provision(s)? Yes [ ] No [ ]

8.1 Has this reporting entity reinsured any risk with any other entity and agreed to release such entity from liability, in whole or in part, from any loss that may occur on this risk, or portion thereof, reinsured? Yes [ ] No [X]

8.2 If yes, give full information

9.1 Has the reporting entity ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or its affiliates) for which during the period covered by the statement: (i) it recorded a positive or negative underwriting result greater than 5% of prior year-end surplus as regards policyholders or it reported calendar year written premium ceded or year-end loss and loss expense reserves ceded greater than 5% of prior year-end surplus as regards policyholders; (ii) it accounted for that contract as reinsurance and not as a deposit; and (iii) the contract(s) contain one or more of the following features or other features that would have similar results:
(a) A contract term longer than two years and the contract is noncancellable by the reporting entity during the contract term;
(b) A limited or conditional cancellation provision under which cancellation triggers an obligation by the reporting entity, or an affiliate of the reporting entity, to enter into a new reinsurance contract with the reinsurer, or an affiliate of the reinsurer;
(c) Aggregate stop loss reinsurance coverage;
(d) A unilateral right by either party (or both parties) to commute the reinsurance contract, whether conditional or not, except for such provisions which are only triggered by a decline in the credit status of the other party;
(e) A provision permitting reporting of losses, or payment of losses, less frequently than on a quarterly basis (unless there is no activity during the period); or
(f) Payment schedule, accumulating retentions from multiple years or any features inherently designed to delay timing of the reimbursement to the ceding entity. Yes [ ] No [X]

9.2 Has the reporting entity during the period covered by the statement ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or its affiliates), for which, during the period covered by the statement, it recorded a positive or negative underwriting result greater than 5% of prior year-end surplus as regards policyholders or it reported calendar year written premium ceded or year-end loss and loss expense reserves ceded greater than 5% of prior year-end surplus as regards policyholders; excluding cessions to approved pooling arrangements or to captive insurance companies that are directly or indirectly controlling, controlled by, or under common control with (i) one or more unaffiliated policyholders of the reporting entity, or (ii) an association of which one or more unaffiliated policyholders of the reporting entity is a member where:
(a) The written premium ceded to the reinsurer by the reporting entity or its affiliates represents fifty percent (50%) or more of the entire direct and assumed premium written by the reinsurer based on its most recently available financial statement; or
(b) Twenty-five percent (25%) or more of the written premium ceded to the reinsurer has been retroceded back to the reporting entity or its affiliates in a separate reinsurance contract. Yes [ ] No [X]

9.3 If yes to 9.1 or 9.2, please provide the following information in the Reinsurance Summary Supplemental Filing for General Interrogatory 9:
(a) The aggregate financial statement impact gross of all such ceded reinsurance contracts on the balance sheet and statement of income;
(b) A summary of the reinsurance contract terms and indicate whether it applies to the contracts meeting the criteria in 9.1 or 9.2; and
(c) A brief discussion of management's principle objectives in entering into the reinsurance contract including the economic purpose to be achieved.

9.4 Except for transactions meeting the requirements of paragraph 32 of SSAP No. 62R, Property and Casualty Reinsurance, has the reporting entity ceded any risk under any reinsurance contract (or multiple contracts with the same reinsurer or its affiliates) during the period covered by the financial statement, and either:
(a) Accounted for that contract as reinsurance (either prospective or retroactive) under statutory accounting principles ("SAP") and as a deposit under generally accepted accounting principles ("GAAP"); or
(b) Accounted for that contract as reinsurance under GAAP and as a deposit under SAP? Yes [ ] No [X]

9.5 If yes to 9.4, explain in the Reinsurance Summary Supplemental Filing for General Interrogatory 9 (Section D) why the contract(s) is treated differently for GAAP and SAP.

SCHEDULE P INTERROGATORIES

1. The following questions relate to yet-to-be-issued Extended Reporting Endorsements (EREs) arising from Death, Disability, or Retirement (DDR) provisions in Medical Professional Liability Claims Made insurance policies. EREs provided for reasons other than DDR are not to be included.

1.1 Does the company issue Medical Professional Liability Claims Made insurance policies that provide tail (also known as an extended reporting endorsement, or "ERE") benefits in the event of Death, Disability, or Retirement (DDR) at a reduced charge or at no additional cost? ..... Yes [ ] No [X]

If the answer to question 1.1 is "no", leave the following questions blank. If the answer to question 1.1 is "yes", please answer the following questions:

1.2 What is the total amount of the reserve for that provision (DDR Reserve), as reported, explicitly or not, elsewhere in this statement (in dollars)? ..... $.....

1.3 Does the company report any DDR reserve as Unearned Premium Reserve per SSAP #65? ..... Yes [ ] No [ ]

1.4 Does the company report any DDR reserve as loss or loss adjustment expense reserve? ..... Yes [ ] No [ ]

1.5 If the company reports DDR reserve as Unearned Premium Reserve, does that amount match the figure on the Underwriting and Investment Exhibit, Part 1A – Recapitulation of all Premiums (Page 7) Column 2, Lines 11.1 plus 11.2? ..... Yes [ ] No [ ] N/A [ ]

1.6 If the company reports DDR reserve as loss or loss adjustment expense reserve, please complete the following table corresponding to where these reserves are reported in Schedule P:

Years in Which Premiums Were Earned and Losses Were Incurred		DDR Reserve Included in Schedule P, Part 1F, Medical Professional Liability Column 24: Total Net Losses and Expenses Unpaid

2. The definition of allocated loss adjustment expenses (ALAE) and, therefore, unallocated loss adjustment expenses (ULAE) was changed effective January 1, 1998. This change in definition applies to both paid and unpaid expenses. Are these expenses (now reported as " Defense and Cost Containment" and "Adjusting and Other") reported in compliance with these definitions in this statement? ..... Yes [X] No [ ]

3. The Adjusting and Other expense payments and reserves should be allocated to the years in which the losses were incurred based on the number of claims reported, closed and outstanding in those years. When allocating Adjusting and Other expense between companies in a group or a pool, the Adjusting and Other expense should be allocated in the same percentage used for the loss amounts and the claim counts. For reinsurers, Adjusting and Other expense assumed should be reported according to the reinsurance contract. For Adjusting and Other expense incurred by reinsurers, or in those situations where suitable claim count information is not available, Adjusting and Other expense should be allocated by a reasonable method determined by the company and described in Interrogatory 7, below. Are they so reported in this Statement? ..... Yes [X] No [ ]

6. Claim count information is reported per claim or per claimant (Indicate which). ..... per claim .....

If not the same in all years, explain in Interrogatory 7.

7.1 The information provided in Schedule P will be used by many persons to estimate the adequacy of the current loss and expense reserves, among other things. Are there any especially significant events, coverage, retention or accounting changes that have occurred that must be considered when making such analyses? ..... Yes [X] No [ ]

7.2 (An extended statement may be attached.)

Persons using Schedule P to estimate the adequacy of auto liability loss and loss expense reserves should consider the effect that disposition rate changes over the last 10 year period may have on their estimates, taking into account the distortions that changing claim disposition rates cause to development patterns inherent in the historical data and projections that rely on that data. .....
