The Company follows the determination of nonguaranteed elements as set by the ceding companies. The responses provided here are in respect of the direct business.

B. Interrogatories in Regard to Direct Business

1. Since this statement was last filed, have there been any changes in the values of non-guaranteed elements on new or existing business authorized for illustration by the company? If yes, describe the changes that were made.

   Yes. Illustrated values reflect the credited interest rates in effect at the time of illustration. These rates change from time to time according to the determination procedures described herein or previously reported.

   Also, the mortality and interest rates used to determine fixed payment income factors for annuitizations on deferred, immediate, and structured settlement annuity business were updated periodically to reflect mortality improvement and the prevailing interest rates at the time of such annuitizations.

2. Since this statement was last filed, have there been any changes in the values of non-guaranteed elements actually charged or credited? If yes, describe changes that were made.

   Yes. Credited interest rates were changed for certain universal life and annuity plans during 2011 as described below.

Life

Base credited rates offered on Universal Life (UL) plans varied over a range from 4.50% to 5.50%. The participation rate for equity indexed UL has been 60%, and cap rates have been 8.50-10%. Base credited rates offered on Single Premium Life (SPL) have varied over a range from 1.50% to 4.75%.

Fixed Annuities

Base credited rates offered on new and renewing Flexible Premium Deferred Annuities (FPDA) and Single Premium Deferred Annuities (SPDA) have varied over a range from .50% to 5.00%. Base credited rates offered on new and renewing FPDA, and SPDA with Market Value Adjustment (MVA) have varied over a range of .15% to 3.60%. The participation rate for new and renewing Treasury Linked Annuities (T-Link) have ranges from 10%-100%.

Equity Linked Annuities

The participation rate for new and renewing equity linked annuities has been 100% and cap rates have varied over a range from 2.00% to 13.50%.

Equity Indexed Annuities

The participation rates for new and renewing equity indexed annuities (EIA) have ranged from 60% to 100% and cap rates have varied over a range from 2.00% to 7.5%.

Variable Annuities

Credited rates offered on new and renewing Variable Annuity (VA) fixed accounts have varied over a range from 1.00% to 3.00%.

3. Indicate to what extent any changes described in 1 or 2 vary from the policy and/or general methods and procedures last reported for the affected contracts.

   Default experience in most cases exceeds original pricing. This has been taken into account and negatively impacted crediting rates.

4. Are the anticipated experience factors underlying any non-guaranteed elements different from current experience? If yes, describe in general terms the way in which future experience is anticipated to differ from current experience and the non-guaranteed element factors which are affected by such anticipation.

   As interest rates change from current levels, this will cause the portfolio yields to change. For products whose credited rates are, in part, targeted to be a spread off of the portfolio rate, this would be considered in the future setting of the non-guaranteed elements.

5. State whether anticipated investment income experience factors are based on a (a) portfolio average approach, (b) an investment generation approach, or (c) other. If (b) or (c), describe the general basis used, including the investment generation groupings.

   Methods (a), (b), and (c) are used. Each product will employ only one of the methods.

An investment generation approach is used to determine interest rates for most variable annuity fixed accounts. Each block of new or renewal premiums constitutes an investment generation grouping for the purposes of determining interest crediting rates.

For deferred fixed annuities and SPL, (c) other is used. A modified investment generation approach is used where a proxy for gross investment income is derived for each contract class. For deferred fixed annuities contract class is defined as payments applied to the same initial interest rate guarantee period for a week or longer period depending on current market rates. For products where a new surrender charge or MVA period begins after the initial guarantee period these will be treated as a rollover of funds. For SPL, contract class is defined similarly to deferred annuities except that the concept of an initial interest rate guarantee period does not apply to SPL.

A portfolio average approach is used for all other products and the fixed accounts of one variable annuity. Assets are formally segmented by major product groupings for internal management purposes. Anticipated investment income experience is then based on the performance of the relevant asset segment portfolios.

6. Describe how the company allocates anticipated experience among its various classes of business.

   The company allocates anticipated experience among its various classes of business as follows:

   - Mortality experience is monitored separately for life and annuity products.
   - Withdrawals and loan utilization are based on recent company experience.
   - Expenses are based on unit expenses developed from recent experience.

7. Do the undersigned believe there is substantial probability that illustrations authorized by the company to be presented on new and existing business cannot be supported by currently anticipated experience? If yes, indicate which classes and explain.

   No.

8. Describe any aspects of the determination of non-guaranteed elements not covered above that involve material departures from the actuarial principles and practices of the American Academy of Actuaries applicable to the determination of non-guaranteed elements.

   None.

C. Internal Actuarial Opinion

We have examined the actuarial assumptions and methods used in determining non-guaranteed elements for the individual life insurance and annuity policies of the company used for delivery in the United States. The non-guaranteed elements included are those:

i) Paid, credited, charged or determined in 2011 and

ii) Authorized by the company to be illustrated on new and existing business during 2011,

Our examination included such review of the actuarial assumptions and methods of the underlying basic records and such tests of the actuarial calculations as we considered necessary. In our opinion with respect to our specific product responsibilities, the non-guaranteed elements described above have been determined in accordance with generally accepted actuarial principles and practices applicable to the determination of non-guaranteed elements.

NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Allstate Life Insurance Company ("Company") prepares its financial statements in conformity with accounting practices prescribed or permitted by the Illinois Department of Insurance ("IL DOI"). Prescribed statutory accounting practices include a variety of publications of the National Association of Insurance Commissioners ("NAIC"), as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

The state of Illinois requires its domestic insurance companies to prepare financial statements in conformity with the NAIC Accounting Practices and Procedures Manual ("APPM"), which includes all Statements of Statutory Accounting Principles ("SSAPs"), subject to any deviations prescribed or permitted by the IL DOI.

B. The preparation of financial statements is in conformity with the NAIC Annual Statement Instructions and accounting practices prescribed or permitted by the IL DOI, which requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

C. Listed below is a summary of the accounting policies that materially affect the financial statements.

Investments

Bonds with an NAIC designation of 1 through 5, including loan-backed and other structured securities, are stated at amortized cost using the effective yield method. Bonds with an NAIC designation of 6 are carried at the lower of amortized cost or fair value, with the difference reflected in unassigned surplus. In general, loan-backed and structured securities utilize a multi-step process for determining carrying value and NAIC designation in accordance with SSAP No. 43R, *Loan-backed and Structured Securities.*

Redeemable preferred stocks are stated at amortized cost or the lower of amortized cost or fair value, depending on the assigned credit rating. Perpetual preferred stocks are carried at fair value or the lower of cost or fair value depending on the assigned credit rating. Unaffiliated common stocks are carried at fair value. For preferred stocks stated at fair value and unaffiliated common stocks, the differences between amortized cost or cost and fair value are recorded as a change in net unrealized capital gains (losses), which is a component of unassigned surplus.

Common stock investments in insurance subsidiaries, controlled, and affiliated ("SCA") entities are based on the underlying statutory equity of the subsidiary. Common stock investments in non-insurance SCA entities are generally recorded based on the underlying Generally Accepted Accounting Principles ("GAAP") equity of the investee, with unrealized gains or losses reflected in unassigned surplus.

Mortgage loans are carried at outstanding principal balances, net of unamortized premium or discount and book value adjustments. Book value adjustments include other-than-temporary impairment ("OTTI") adjustments. OTTI adjustments are recorded when based on the current information and events, it is probable contractual principal and interest will not be collected. OTTI adjustments reduce the carrying value of mortgage loans to the fair value of the collateral less the estimated cost to sell.

Cash equivalents are carried at amortized cost. They are both readily convertible into known amounts of cash and so near to their maturity that they present an insignificant risk of change in value because of changes in interest rates.

Short-term investments are carried at cost or amortized cost that approximates fair value and includes the investment of collateral received in connection with the Company's securities lending business activities and cash collateral received from counterparties related to derivative transactions. For these transactions, the Company records an offsetting liability for the Company's obligation to return the collateral or funds received.

Contract loans are carried at the unpaid principal and capitalized interest balance. Interest is capitalized into the loan balance each contract anniversary. Loans deemed uncollectible are written off. Loans in excess of cash value are nonadmitted.

Other invested assets consists of investments in joint ventures, partnerships, limited liability companies, low income housing tax credit ("LIHTC") property investments, collateral loans and surplus notes. Investments in joint ventures, partnerships and limited liability companies are generally recorded based on the underlying GAAP equity of the investee, with undistributed earnings or losses reflected in unassigned surplus. Income is recognized upon cash distribution to the extent it does not exceed undistributed earnings. LIHTC property investments are generally recorded at cost and amortized based on the utilization of tax credits. Collateral loans are carried at the outstanding principal balance and any related accrued interest. Surplus notes are carried at either their face value or at a reduced face value based on a prescribed statement factor calculation.

Investment income consists primarily of interest and is recognized on an accrual basis using the effective yield method. Interest income for loan-backed and structured securities is determined considering estimated paydowns, including prepayments, obtained from third party data sources and internal estimates. Actual prepayment experience is periodically reviewed and effective yields are recalculated when differences arise between the prepayments originally anticipated and the actual prepayments received and currently anticipated. For beneficial interests in securitized financial assets that are not of high credit quality, the effective yield is recalculated on a prospective basis. For all other loan-backed and structured securities the effective yield for loan-backed is recalculated on the retrospective basis. In periods subsequent to the recognition of an OTTI on a bond or mortgage loan, the Company accounts for the impaired asset as if it had been purchased on the measurement date of the impairment. The difference between the new amortized cost basis and the cash flows expected to be collected are accreted as interest income. Accrual of income is suspended for OTTI bonds when the timing and amount of cash flows expected to be received is not reasonably estimable. Accrual of income is suspended for mortgage loans that are in default or when the full and timely collection of principal and interest payments is not probable. Cash receipts on investments on nonaccrual status are generally recorded as a reduction of carrying value.

Realized capital gains and losses include gains and losses on investment sales, write-downs in value due to other than temporary declines in fair value and periodic changes in the fair value and settlements of certain derivatives. Realized capital gains and losses on investment sales, including calls and principal payments, are determined on a specific identification basis.

The Company has a comprehensive portfolio monitoring process to identify and evaluate each security whose carrying values may be other than temporarily impaired. For bonds, excluding loan-backed and structured securities, in an unrealized loss position, the Company assesses whether management with the appropriate authority has made a decision to sell the bond prior to its maturity at an amount below its carrying value. If the decision has been made to sell the bond, the bond's decline in fair value is other than temporary and the Company recognizes a realized loss equal to the difference between the amortized cost and the fair value of the bond at the balance sheet date the assessment is made. If the Company has not made the decision to sell the bond, but the bond's decline in value is specific to an issuer's fundamental credit difficulties, the decline is other than temporary and a write-down of the amortized cost to the fair value is required.

For loan-backed and structured securities, the Company first assesses whether management with the appropriate authority has made a decision to sell each loan-backed and structured security in an unrealized loss position (fair value is less than amortized cost). If the determination is made to sell a particular loan-backed or structured security in an unrealized loss position, the security's decline in fair value is other than temporary and the security is written down to fair value. The difference between the fair value and amortized cost is recognized in realized capital losses. If management has not made the decision to sell the loan-backed or structured security, then the Company analyzes the present value of the discounted cash flows expected to be collected. If the present value of the discounted cash flows expected to be collected is less than the amortized cost and management does not have the intent and ability to retain the loan-backed and structured security for a period of the time sufficient to recover the amortized cost basis, an OTTI shall be considered to have occurred and the Company recognizes a realized loss equal to the difference between the fair value and the amortized cost. If the present value of the discounted cash flows expected to be collected is less than the amortized cost and management has the intent and ability to retain the loan-backed and structured security, the security is considered OTTI and the Company recognizes a realized loss for the difference between the present value of the discounted cash flows and the amortized cost.

NOTES TO FINANCIAL STATEMENTS

Realized capital losses recognized on all bonds due to OTTI resulting from changes in the general level of interest rates are reported through the interest maintenance reserve ("IMR"), and OTTI realized losses that are not a result of changes in the general level of interest rates are reported directly through the Summary of Operations and are included in the asset valuation reserve ("AVR").

For common and preferred stocks, the Company considers various factors, including whether the Company has the intent and ability to hold the stock for a period of time sufficient to recover its cost basis. Where the Company lacks the intent and ability to hold to recovery, or believes the recovery period is significantly extended, the stock's decline in fair value is other than temporary and the difference between the stock's cost and fair value is recognized as a realized loss. A decision to sell stock for an amount below its cost would be an other than temporary decline and a realized loss is recorded. For stocks managed by a third party, the Company has contractually retained its decision making authority as it pertains to selling stocks that are in an unrealized loss position.

The Company's portfolio monitoring process includes a quarterly review of all securities to identify instances where the fair value of a security compared to its amortized cost (for bonds, including loan-backed and structured securities) or cost (for stocks) is below established thresholds. The process also includes the monitoring of other impairment indicators such as ratings, ratings downgrades and payment defaults. The securities identified, in addition to other securities for which the Company may have a concern, are evaluated for potential OTTI using all reasonably available information relevant to the collectibility or recovery of the security. Inherent in the Company's evaluation of OTTI for these securities are assumptions and estimates about the financial condition and future earnings potential of the issue or issuer. Some of the factors that may be considered in evaluating whether a decline in fair value is other than temporary are: 1) the financial condition, near-term and long-term prospects of the issue or issuer, including relevant industry specific market conditions and trends, geographic location and implications of rating agency actions and offering prices; 2) the specific reasons that a security is in an unrealized loss position, including overall market conditions which could affect liquidity; and 3) the length of time and extent to which the fair value has been less than amortized cost or cost.

Derivative financial instruments

Derivative financial instruments utilized by the Company include interest rate cap and floor agreements, index option contracts, interest rate swaption agreements, interest rate, credit default and foreign currency swap agreements, foreign currency forward contracts and futures contracts. When derivatives meet specific criteria, they may be designated as accounting hedges, which means they may be accounted for and reported on in a manner that is consistent with the hedged asset or liability. Derivatives that are not designated as accounting hedges are accounted for on a fair value basis, with changes in fair value recorded as unrealized gains or losses in unassigned surplus.

Off-balance sheet financial instruments

Commitments to invest, commitments to purchase private placement securities, commitments to extend mortgage loan, financial guarantees and credit guarantees have off-balance sheet risk because their contractual amounts are not recorded in the Company's Assets or Liabilities, Surplus and Other Funds pages of the Annual Statement.

Premiums and annuity considerations

Annual premiums for most traditional life insurance policies are recognized as revenue on the policy anniversary date. Premiums, based on modal payment, for accident and health insurance, group life and a minor portion of traditional life insurance policies are recognized as revenue when due. Considerations received for supplementary contracts with life contingencies are recognized as revenue when due. Premiums for all single and flexible premium life insurance and annuity products are recognized as revenue when collected. Considerations received on deposit-type funds, which do not contain any life contingencies, are recorded directly to the related reserve liability.

Premiums written and not yet collected from policyholders are shown as a receivable, with balances older than 90 days nonadmitted. Agents' balances, another component of the receivable, are subject to a valuation allowance, with the net amount nonadmitted.

Reserves for policy benefits

Policy benefit reserves for traditional and flexible premium life insurance policies and group annuities are computed actuarially according to the Commissioners' Reserve Valuation Method with interest, mortality and other assumptions applied in compliance with statutory regulations. Benefit reserves for individual annuity products are calculated according to the Commissioners' Annuity Reserve Valuation Method ("CARVM") with interest, mortality and other assumptions applied in compliance with statutory regulations. Benefit reserves for modified guaranteed annuity products are calculated according to Title 50 of the Administrative Code, Part 1410 with interest and mortality assumptions in compliance with statutory regulations. Reserve interest rates for life products ranged from 1.50% to 7.00% at both December 31, 2011 and 2010. Reserve interest rates for annuity products ranged from 2.50% to 11.25% at both December 31, 2011 and 2010.

Reserves for deposit-type funds are equal to deposits received and interest credited to the benefit of contractholders, less surrenders and withdrawals that represent a return to the contractholder. Interest rates credited for deposit-type funds ranged from 3.50% to 11.25% at both December 31, 2011 and 2010. For deposit-type funds with no cash values prior to maturity, reserves are present values of contractual payments with interest assumptions in compliance with statutory regulations. Tabular interest on deposit-type funds is calculated as the prescribed valuation interest rate times the mean amount of funds subject to such rate held at the beginning and end of the year of valuation.

Policy benefit reserves for accident and health and group life insurance products include claim reserves, contract reserves and unearned premiums, if applicable. Claim reserves, including incurred but not reported claims, represent management's estimate of the ultimate liability associated with unpaid policy claims, based primarily upon analysis of past experience. To the extent the ultimate liability differs from the amounts recorded, such differences are reflected in the Summary of Operations when additional information becomes known.

AVR and IMR

The Company establishes AVR and IMR as promulgated by the NAIC. The AVR offsets potential credit-related investment losses on all invested asset categories excluding cash, contract loans, premium notes, collateral notes and income receivables. The IMR defers the recognition of realized capital gains and losses resulting from changes in the general level of interest rates. These gains and losses are amortized into investment income over the approximate remaining life of the investments sold. Make whole fees and prepayment penalties are recorded as investment income and not included in IMR.

Reinsurance

In the normal course of business, the Company seeks to limit aggregate and single exposure to losses on large risks by purchasing reinsurance. The Company also uses reinsurance to effect the acquisition or disposition of certain blocks of business. Admitted assets and liabilities include amounts billed to reinsurers for losses paid, as well as estimates of amounts expected to be recovered from reinsurers on incurred losses that have not yet been paid. Reserves are reported net of reinsurance recoverables. Reinsurance recoverables on unpaid losses are estimated based upon assumptions consistent with those used in establishing the liabilities related to the underlying reinsured contracts. Reinsurance premiums are generally reflected in income in a manner consistent with the terms of the reinsurance contracts. Reinsurance does not extinguish the Company's primary liability under the policies written. Reinsurance recoverables that are 90 days past due are nonadmitted. If it is probable that reinsurance recoverables on paid or unpaid claim or benefit payments are uncollectible, these amounts are written off through a charge to the Summary of Operations.

NOTES TO FINANCIAL STATEMENTS

Income taxes

The income tax provision is calculated under the liability method. Deferred tax assets ("DTAs") and liabilities ("DTLs") are recorded based on the difference between the statutory financial statement and tax bases of assets and liabilities at the enacted tax rates. The principal assets and liabilities giving rise to such differences were tax deferred acquisition costs ("DAC"), insurance reserves, investments and the deferred gain on the sale of the variable annuity business. Deferred income taxes also arise from net unrealized capital gains and losses on common stocks, derivatives and impaired bonds carried at fair value. The net change in DTAs and DTLs is applied directly to unassigned surplus. The nonadmitted portion of gross DTAs is determined by applying the rules prescribed by SSAP No. 10R, *Income Taxes - Revised, A Temporary Replacement of* SSAP No. 10 ("SSAP No. 10R").

Separate Accounts

The assets of the Separate Accounts are carried at fair value. Separate Accounts liabilities represent the contractholders' claims to the related assets and are carried at the fair value of the assets. In the event the asset values of certain contractholder accounts are projected to be below the value guaranteed by the Company, a liability is established through a charge to earnings. Reserves for guarantees provided by the Company are included in Exhibit 5 of the Company's General Account Annual Statement.

The Company holds on a direct basis and assumes via a modified coinsurance agreement, reserves for variable annuity contracts and variable life policies at less than the fund balances carried in the Separate Accounts. The difference between the reserves and the fund balances of the Separate Accounts is transferred from the Separate Accounts to the General Account, and the majority of the variable annuity portion is subsequently reinsured via a modified coinsurance agreement. The direct and assumed reserve balances of the variable annuity contracts and variable life policies were $99 million and $147 million less than the fund balances at December 31, 2011 and 2010, respectively. Of these amounts, $50 million and $85 million related to variable annuity contracts that were reinsured at December 31, 2011 and 2010, respectively.

Separate Accounts premium deposits, benefit expenses and contract charges for mortality risk, contract and policy administration are recorded by the Company and reflected in the Summary of Operations. Investment income and realized and unrealized capital gains and losses related to assets which support variable annuity contracts and variable life policies accrue directly to the contractholders and, therefore, are not included in the Summary of Operations.

The amounts reported in the Notes to Financial Statements exclude information on the Company's Separate Accounts, except for Notes 17, Part B, 20, Part B, 32 and 34.

2. Accounting Changes and Corrections of Errors

For the year ended December 31, 2011, the Company changed the valuation interest rate on a closed block of non-participating paid-up group annuities to align with supporting assets, which resulted in a reserve increase of $181 million. Due and accrued investment income for investments other than mortgage loans, that is more than 90 days past due, is nonadmitted. In addition, due and accrued investment income that is determined to be uncollectible, regardless of its age, is written off in the period that determination is made.

B. All due and accrued investment income was admitted at December 31, 2011. The total amount of due and accrued investment income nonadmitted at December 31, 2010 was $168 thousand.

8. Derivative Instruments

A.,
B. &
C. Derivative financial instruments utilized by the Company during 2011 and 2010 included interest rate cap and floor agreements, index option contracts, interest rate swaption agreements, interest rate, credit default and foreign currency swap agreements, foreign currency forward contracts and futures contracts. The notional amounts specified in the contracts are used to calculate the exchange of contractual payments under the agreements and are generally not representative of the potential for gain or loss on these agreements. However, the notional amounts specified in credit default swap selling protection agreements represent the maximum amount of potential loss, assuming no recoveries.

Market risk is the risk that the Company will incur losses due to adverse changes in market rates and prices. Market risk exists for all of the derivative financial instruments the Company currently holds, as these instruments may become less valuable due to adverse changes in market conditions. To limit this risk, the Company's senior management has established risk control limits. In addition, changes in the fair value of the derivative financial instruments that the Company uses for risk management purposes are generally offset by the changes in the fair value or cash flows of the hedged risk component of the related assets, liabilities or forecasted transactions.

Counterparty credit exposure represents the Company's potential loss if all of the counterparties concurrently fail to perform under the contractual terms of the contracts and all collateral, if any, becomes worthless. This exposure is measured by the statement value of over-the-counter derivative contracts with a positive statement value at the reporting date reduced by the effect, if any, of legally enforceable master netting agreements.

The Company manages its exposure to credit risk by utilizing highly rated counterparties, establishing risk control limits, executing legally enforceable master netting agreements and obtaining collateral where appropriate. The Company uses master netting agreements for over-the-counter derivative transactions that permit either party to net payments due for transactions and collateral is either pledged or obtained when certain predetermined exposure limits are exceeded. The Company has not incurred any losses on derivative financial instruments due to counterparty nonperformance. Other derivatives, including futures and certain option contracts, are traded on organized exchanges, which require margin deposits and guarantee the execution of trades, thereby mitigating any potential credit risk.

The Company uses derivatives to manage risks with certain assets and liabilities arising from the potential adverse impacts from changes in risk-free interest rates, negative equity market valuations, increases in credit spreads and foreign currency fluctuations, and for asset replication. With the exception of non-hedge derivatives used for asset replication, all of the Company's derivatives are evaluated for their ongoing effectiveness as either accounting hedge or non-hedge derivative financial instruments on at least a quarterly basis. The Company does not use derivatives for speculative purposes.

NOTES TO FINANCIAL STATEMENTS

The paragraphs below describe the derivatives the Company uses, including the objectives, cash requirements and accounting policies.

Interest rate cap and floor agreements give the holder the right to receive at a future date, the amount, if any, by which a specified market interest rate exceeds the fixed cap rate or falls below the fixed floor rate, applied to a notional amount. These agreements are used by the Company to reduce its exposure to rising or falling interest rates relative to certain existing assets and liabilities in conjunction with asset-liability management. Interest rate cap and floor agreements hedge the variability of the expected future cash flows of assets or liabilities. Typically a premium is paid to the counterparty at the inception of a contract. Cash is received based on the amount, if any, by which a specified market interest rate exceeds the fixed cap rate or falls below the fixed floor rate, applied to the notional amount. Premiums paid are reported as derivative assets. Periodic settlements received are reported as net investment income. The change in fair value of open agreements is reported as net unrealized capital gains and losses, within unassigned surplus. If an agreement is terminated prior to its expiration date, gains or losses are reported in net realized capital gains or losses. For certain interest rate cap agreements whose premiums are payable in installments, the initial interest rate cap agreement asset is equal to the initial premium payment plus the sum of the remaining premium installments payable. The carrying amount of the interest rate cap agreement asset is netted against the carrying amount of the premium liability at the counterparty level. Interest rate cap and floor agreements are reported on Schedule DB, Part A and receive non-hedge accounting treatment.

Index option contracts provide returns at specified or optional dates based on a specified equity index applied to the option's notional amount. The Company purchases and writes (sells) option contracts primarily to reduce market risk associated with certain annuity contracts. When the Company purchases/sells option contracts at specific prices, it is required to pay/receive a premium to/from the counterparties. The amount of premium paid/received is based on the number of contracts purchased/sold, the specified price and the maturity date of the contract. The Company receives/pays cash equal to the premium of written/purchased options when the contract is established. If the option is exercised, the Company receives/pays cash equal to the specified price in the contract (strike price) in exchange for the equity upon which the option is written/purchased. If the options are not exercised, then no additional cash is exchanged when the contract expires. Premiums paid are reported as a derivative asset and premiums received are reported as a derivative liability. The change in the fair value of purchased option contracts is reported as net investment income, with an adjustment to derivatives. Purchased put and call index option contracts are cash settled upon exercise and the gain or loss on the settlement is reported in net investment income. If the purchased option contract expires without being exercised, the premiums paid are reported as net investment income and the corresponding asset previously recorded is reversed. The change in the fair value of written option contracts is reported as net investment income, with an adjustment to a corresponding liability. Written call index option contracts are cash settled upon exercise and the gain or loss on settlement is reported in net investment income. If the written option contract expires without being exercised, the premiums received are reported as net investment income and the corresponding liability previously recorded is reversed. Purchased and written option contracts are reported on Schedule DB, Part A and are accounted for as fair value hedges.

Interest rate swaption agreements give the holder the right, but not the obligation, to enter into an interest rate swap agreement at a future date. These agreements are used to hedge exposure to economic losses due to annuity surrenders. Typically, a premium is paid to the counterparty at the inception of the contract. Premiums paid are reported as a derivative asset. The change in fair value of the open interest rate swaption agreements is reported as net unrealized capital gains and losses, within unassigned surplus, with an adjustment to derivatives. If an interest rate swaption agreement terminates prior to its expiration date, or if it expires, gains or losses are reported in net realized capital gains or losses. Interest rate swaption agreements are reported on Schedule DB, Part A and receive non-hedge accounting treatment.

Interest rate swap agreements are agreements that periodically exchange the difference between two designated sets of cash flows, (fixed to variable rate, variable to fixed rate, or variable to variable rate) based upon designated market rates or rate indices and a notional amount. The Company primarily uses interest rate swap agreements to balance the respective interest rate sensitivities of it assets and liabilities in conjunction with asset-liability management. Interest rate swap agreements are utilized to hedge either the variability of the expected future cash flows, or changes in the fair value of an asset or a liability. Cash settlements usually occur at dates specified in individual agreements. The amount of cash exchanged is equal to the difference between the rate in the contract at which the Company receives cash compared to the rate at which the Company is to pay cash.

Credit default swap agreements are used for either buying credit protection or selling credit protection on a specified entity, basket of entities or index. Buying credit protection requires a payment of a premium to a counterparty in exchange for a future cash settlement or a promise to deliver a bond, if a specified credit event occurs. Selling credit protection provides for the receipt of a premium from a counterparty in exchange for a future cash settlement, or a promise to purchase a bond, if a specified credit event occurs. The Company enters into certain credit default swap agreements as a means to buy protection, reducing the credit risk in a particular bond or bond portfolio, while leaving the security or bond portfolio intact. The Company enters into other credit default swap agreements as replication transactions, enabling greater diversification of credit risk by selling protection on specified entities, or baskets of entities that may not be frequent issuers in the traditional corporate bond market and by selling protection on indices also as a less expensive alternative to the cash market.

Foreign currency swap agreements involve the periodic exchange of consideration based on relative changes in two designated currencies and, if applicable, differences between fixed rate and variable cash flows or two different variable cash flows, all based on a pre-determined notional amount. The Company enters into these agreements primarily to hedge the currency risk associated with investing in securities and issuing obligations that are denominated in foreign currencies. Cash settlements are required when the contract matures. The amount of cash exchanged is based on the difference between the specified rate on the date the contract was entered into (contract rate) compared to the actual rate on the settlement date. On the settlement date, the Company will either pay or receive cash equal to the difference between the contract rate and the actual rate multiplied by a specified notional amount.

Interest rate, foreign currency, and credit default swap agreements are reported in Schedule DB, Part A. If any of these contracts were used for replication purpose, then they are also reported in Schedule DB, Part C. Interest rate swap agreements receive either fair value, cash flow hedge accounting treatment or non-hedge accounting treatment, depending on the strategy. Foreign currency swap agreements are generally accounted for as foreign currency fair value or cash flow hedges. Credit default swap agreements used for buying protection receive non-hedge accounting treatment. Periodic settlements, which represent amounts receivable from/payable to the counterparties are based on the settlement terms within the agreement, and reported as a component of net investment income. For interest rate swap agreements and foreign currency swap agreements hedging liabilities that receive fair value hedge accounting treatment, periodic settlements are reported with policyholder benefits and expenses. The change in the fair value of certain open swap agreements that receive non-hedge accounting treatment are reported as net unrealized capital gains and losses, within unassigned surplus. Credit default swap agreements entered into as replication transactions are valued at amortized cost. When certain swap agreements receive hedge accounting treatment, the hedging relationship ceases if the swap agreement terminates or becomes ineffective or if the hedged asset becomes impaired or is sold. Generally, if a swap agreement is terminated prior to the expiration date, gains or losses are reported as net realized capital gains or losses if the underlying hedged item has been disposed. If the hedged item still exists and the swap agreement terminates or becomes ineffective, gains or losses are attached to the hedged item and amortized into net investment income over the remaining life of the underlying hedged item. If the hedged item is an impaired asset, gains or losses associated with the swap agreement are included in the written-down value of the impaired asset and depending on the circumstances, hedge accounting may cease. If the hedged item is sold, the swap agreement is generally terminated or accounted for as a non-hedge swap agreement.

Foreign currency forward contracts involve the future exchange or delivery of foreign currencies based on term negotiated at the inception of the contract which are settled at the end of the contract. They are utilized to reduce currency exposure arising from investments in foreign currency denominated investments. Cash settlement is required when the contract matures. The amount of cash exchanged is based on the difference between the specified rate on the date the contract was entered into (contract rate) compared to the actual rate on the settlement date. On the settlement date, the Company will either pay or receive cash equal to the difference between the contract rate and the actual rate multiplied by the specified notional amount. The change in the fair value of open foreign currency forward contracts is reported as net unrealized capital gains and losses, within unassigned surplus, until closed (e.g. terminated or settled). If the contract was hedging coupon payments of a bond, any gains and losses at closing are reported in net investment income. If the contract was hedging the original principal of a bond or the bond the Company was hedging is sold, any gains and losses at closing are reported in realized capital gains or losses. These contracts are reported in Schedule DB, Part A and receive non-hedge accounting treatment.

NOTES TO FINANCIAL STATEMENTS

The Company utilizes the following types of futures contracts: equity index and interest rate (Eurodollar). Futures contracts are defined as commitments to buy or sell designated financial instruments based on specified prices, yields or indexes. Futures contracts provide returns at specified or optional dates based upon a specified index or interest rate applied to a notional amount. The Company uses equity index futures to hedge exposures in annuity contracts. As part of its asset-liability management, the Company generally utilizes Eurodollar futures contracts to manage its interest rate risk. Daily cash settlement of variation margins is required for futures contracts and is based on the changes in daily prices. The final settlement of equity index and Eurodollar futures contracts is always in cash. Daily cash settlements of margin gains or losses for futures contracts receiving fair value hedge accounting treatment are reported in net investment income. The daily cash settlements of margin gains and losses for futures contracts that receive non-hedge accounting treatment and have terminated are reported in net realized capital gains or losses. The daily cash settlements of margin gains and losses for open futures contracts that receive non-hedge accounting treatment are reported in net unrealized capital gains and losses within unassigned surplus. Futures contracts are reported in Schedule DB, Part B and receive either fair value hedge accounting treatment or non-hedge accounting treatment, depending on the strategy.

D. The Company did not have gains or losses in net unrealized capital gains or losses that represented a component of any derivatives' gain or loss that was excluded from the assessment of hedge effectiveness in 2011 or 2010.

E. The Company recognized losses of $516 thousand and $1 million in net unrealized capital gains or losses during 2011 and 2010, respectively, that resulted from derivatives that no longer qualified for hedge accounting treatment.

F. The Company did not have derivatives accounted for as cash flow hedges of a forecasted transaction.

9. Income Taxes

The application of SSAP No. 10R requires the Company to evaluate the recoverability of DTAs and to establish a statutory valuation allowance adjustment ("valuation allowance") if necessary to reduce the DTA to an amount which is more likely than not to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary, and if so, the amount of such valuation allowance. In evaluating the need for a valuation allowance the Company considers many factors, including: (1) the nature of the DTAs and DTLs; (2) whether they are ordinary or capital; (3) the timing of their reversal; (4) taxable income in prior carryback years as well as projected taxable earnings exclusive of reversing temporary differences and carryforwards; (5) the length of time that carryovers can be utilized; (6) unique tax rules that would impact the utilization of the DTAs; and (7) any tax planning strategies that the Company would employ to avoid a tax benefit from expiring unused. Although the realization is not assured, management believes it is more likely than not that the DTAs will be realized. The Company did not record a valuation allowance at December 31, 2011 or 2010.

The Allstate Corporation

2. The Company joins the Corporation and its domestic subsidiaries in the filing of a consolidated federal income tax return. The consolidated group has elected under IRC Section 1552(a)(2) to allocate the consolidated federal income tax liability based on each member's federal income tax liability computed on a separate return basis, except all tax benefits resulting from operating losses and tax credits are allocated to the Company to the extent they can be utilized in the consolidated return. In years when the consolidated tax return results in an alternative minimum tax liability, the regular tax is allocated first as described above, and the excess of the alternative minimum tax over the regular tax is allocated to the members whose tax posture gives rise to the alternative minimum tax.

NOTES TO FINANCIAL STATEMENTS

10. Information Concerning Parent, Subsidiaries, Affiliates and Other Related Parties

A.,
B. &
C. The following transactions were entered into by the Company with related parties in 2011 and 2010 that involved more than ½ of 1% of the Company's admitted assets. Activity resulting from reinsurance agreements, insurance contracts or cost allocation transactions in accordance with intercompany agreement provisions was excluded.

Transactions with Allstate Insurance Company ("AIC")

The Company issued $43 million and $44 million of structured settlement annuities ("SSAs"), a type of immediate annuity, in 2011 and 2010, respectively, at prices determined based upon interest rates in effect at the time of issuance, to fund SSAs in matters involving AIC. Of these amounts, $5 million and $10 million related to SSAs with life contingencies that were included in premium income for 2011 and 2010, respectively. In most cases, these annuities were issued under a qualified assignment, whereby prior to July 1, 2001 Allstate Settlement Corporation ("ASC"), and on and subsequent to July 1, 2001 Allstate Assignment Company ("AACO"), both wholly-owned subsidiaries of the Company, purchased annuities from the Company and assumed AIC's obligation to make the future payments.

AIC issued surety bonds to guarantee the payment of structured settlement benefits assumed by ASC (from both AIC and non-related parties) and funded by certain annuity contracts issued by the Company through June 30, 2001. ASC entered into a General Indemnity Agreement pursuant to which it indemnified AIC for any liabilities associated with the surety bonds and gave AIC certain collateral security rights with respect to the annuities and certain other rights in the event of default covered by the surety bonds. For contracts written on or after July 1, 2001, AIC no longer issues surety bonds to guarantee the payment of structured settlement benefits. Alternatively, the Company guarantees the payment of structured settlement benefits on all contracts issued on or after July 1, 2001. Reserves recorded by the Company for annuities that are guaranteed by the surety bonds of AIC were $3.62 billion and $3.64 billion at December 31, 2011 and 2010, respectively.

At December 31, 2011 and 2010, the Company had an outstanding surplus note payable to AIC with a face value of $400 million. The details of this surplus note, including amount of interest paid, are disclosed in Note 13, Part 11.

AIC's obligation to provide capital and surplus to the Company is limited to an aggregate amount of $1.00 billion, for which the Company pays AIC an annual commitment fee of 1.0% of the amount of the capital and surplus maximum, as defined in the agreement.

The Company, AIC and the Corporation are parties to an Amended and Restated Intercompany Liquidity Agreement ("Liquidity Agreement") which allows for short-term advances of funds to be made between parties for liquidity and other general corporate purposes. The Company entered into an Intercompany Loan Agreement with the Corporation. The amount available to the Company is at the discretion of the Corporation, however, the maximum amount of loans the Corporation will have outstanding to all its eligible subsidiaries at any given point in time is limited to $1.00 billion. From time to time, the Company borrows money from the Corporation to meet its short-term cash needs. The Corporation may use commercial paper borrowings, bank lines of credit and securities lending to fund intercompany borrowings.

The Company is a party to a federal income tax allocation agreement with the Corporation (see Note 9, Part F).

G. The Company is a wholly-owned subsidiary of AIC, an insurance company domiciled in the state of Illinois. AIC is a wholly-owned subsidiary of Allstate Insurance Holdings, LLC ("AIH"), a Delaware limited liability company. AIH is a wholly-owned subsidiary of the Corporation.

K. The Company did not have investments in foreign insurance subsidiaries at December 31, 2011 or 2010.

Plan. The Company was allocated an appropriate share of the costs associated with these benefits in accordance with the Agreement. The Company's allocated share of these benefits, before reinsurance, was $13 million and $19 million in 2011 and 2010, respectively.

13. Capital and Surplus, Shareholders' Dividend Restrictions and Quasi-Reorganizations

1. The Company had 23,800 common shares authorized, issued and outstanding at December 31, 2011 and 2010. All common shares had a par value of $227 per share. In addition, the Company had 3,000,000 shares of preferred stock authorized, but none issued and outstanding at December 31, 2011 and 2010. The preferred stock shares had a par value of $100 per share.

2. The Company did not have preferred stock issued and outstanding at December 31, 2011 or 2010.

3. The ability of the Company to pay dividends is generally dependent on business conditions, income, cash requirements of the Company, receipt of dividends and other relevant factors. More specifically, the Illinois Insurance Code ("Code") provides a two-step process. First, no dividend may be declared or paid except out of earned (unassigned) surplus, as distinguished from contributed surplus, nor when the payment of a dividend reduces surplus below the minimum amount required by the Code. Secondly, a determination of the ordinary versus extraordinary dividends that can be paid is formula based and considers net income and capital and surplus, as well as the timing and amounts of dividends paid in the preceding twelve months as specified by the Code. Ordinary dividends to shareholders do not require prior approval of the IL DOI. Dividends are not cumulative. Currently, the Company cannot declare or pay dividends without the prior approval of the IL DOI because of its negative unassigned surplus.

4. The Company did not pay dividends in 2011 or 2010.

5. Within the limitations of Part 3 above, there were no restrictions placed on the portion of the Company's profits that may be paid as ordinary dividends to stockholders.

6. The unassigned funds, which are held for the benefit of the shareholder, are unrestricted except by requirement for regulatory approval as described in Part 3 above.

7. The Company is not a mutual or similarly organized company, and therefore, this disclosure requirement does not apply.

8. The Company did not hold stock for special purposes at December 31, 2011 or 2010.

9. The special surplus funds balance of $476 million and $460 million at December 31, 2011 and 2010, respectively, was comprised of two components. The first component relates to after-tax deferred gains associated with reinsurance transactions for the disposal of certain blocks of business in 2004 and 2006. These gains totaled $315 million and $320 million at December 31, 2011 and 2010, respectively. The change in the balance was due to the amortization of the deferred gains. The second component was $161 million and $140 million at December 31, 2011 and 2010, respectively, and relates to the Company's election to admit a higher amount of adjusted gross DTAs per SSAP No. 10R.

10. Cumulative unrealized gains and losses reduced the negative unassigned funds by $467 million and $351 million at December 31, 2011 and 2010, respectively.

11. On November 17, 2008, the Company issued a surplus note to AIC for $400 million in exchange for cash. The accrued interest rate is 7.00%, and due on the first day of April and October in each year beginning April 1, 2009 until maturity on November 17, 2028. Principal and interest payments may be repaid in whole or in part from time to time without premium or penalty. The payment of interest or principal is subject to prior written approval from the IL DOI, and can only be paid out of the Company's surplus that is in excess of minimum amounts required by the Code. In accordance with the APPM, interest is not recorded in the financial statements as an accrual until approval from the IL DOI is granted. The Company received approval from the IL DOI to pay interest accrued through September 30, 2011. Total interest paid and cumulative interest paid on the surplus note in 2011 and 2010 was $80.4M and $0, respectively. No interest was accrued on the surplus note as of December 31, 2011 or 2010. Principal is due upon demand of AIC. In the event of the liquidation of the Company, the payment of claims under this surplus note is subordinate and junior in right of payment to the prior payment in full of all policy obligations and all other liabilities of the Company other than any indebtedness that is subordinate to, or ranks at equal standing with, these surplus notes, but prior to the distribution of assets to shareholders.

12. The Company did not have restatements due to quasi-reorganizations in 2011 or 2010.

13. The Company was not quasi-reorganized.

14. Contingencies

A. Contingent Commitments

1. The Company made commitments to invest in limited partnerships interests of $677 million and $633 million at December 31, 2011 and 2010, respectively. These commitments are generally for making additional capital contributions or acquiring financial interests.

The Company has made no contingent commitments or guarantees related to its investments in joint ventures, limited liability companies or LIHTC property investments.

2. The Company was a party to the following guarantee agreements at December 31, 2011:

(in millions)

Nature and circumstances of guarantee and key attributes	Liability recognition of guarantee	Ultimate financial statement impact if action under guarantee required	Maximum potential amount of future payments	Current status of payment or performance risk of guarantee

[1]Guarantees made to/or on behalf of a wholly-owned subsidiary and intercompany and related party guarantees are not required to record a liability in accordance with SSAP 5R, *Liabilities, Contingencies and Impairments of Assets*.

None of the agreements above contained recourse provisions that would enable the Company to recover amounts paid to third parties under the guarantees and there were no assets held by the Company as collateral under the agreements.

In the normal course of business, the Company provides standard indemnifications to contractual counterparties in connection with numerous transactions. The types of indemnifications typically provided include indemnifications for breaches of representations and warranties, taxes and certain other liabilities, such as third party lawsuits. The indemnification clauses are often standard contractual terms and are entered into in the normal course of business based on an assessment that the risk of loss would be remote. The terms of the indemnifications vary in duration and nature. In many cases, the maximum obligation is not explicitly stated and the contingencies triggering the obligation to indemnify have not occurred are not expected to occur. Consequently, the maximum amount of the obligation under such indemnifications is not determinable. Historically, the Company has not made any material payments pursuant to these obligations.

3.

a. The aggregate maximum potential amount of future payments (undiscounted) related to all guarantees was $780 million at December 31, 2011.

b. The entire current liability recognized in the financial statements was related to contingent guarantees at December 31, 2011.

c. The ultimate financial statement impact if the Company had to perform on all items it guarantees was as follows at December 31, 2011:

(in millions)	
Reserves	$ 751
Bonds	28
Expenses	1
Total financial statement impact	$ 780

B. Assessments

Under state insurance guaranty fund laws, insurers doing business in a state can be assessed, up to prescribed limits, for certain obligations of insolvent insurance companies to policyholders and claimants. Amounts assessed to each insurer are typically related to its proportion of business written in each state. The Company's policy is to accrue a guaranty fund assessment when the entity for which the insolvency relates has met its state of domicile's statutory definition of insolvent and the amount of loss is reasonably estimable. In most states the definition is met with a declaration of financial insolvency by a court of competent jurisdiction. In certain states there must also be a final order of liquidation. At December 31, 2011 and 2010, the Company had accrued $35 million and $30 million, respectively, for future guaranty fund assessments and $20 million and $19 million, respectively, for the related premium tax offset expected to be received. The period over which assessments are expected to be paid varies. Premium tax offsets are realized on a straight-line basis over the period allowed by each individual state once the guaranty fund assessment has been paid. The Company did not recognize an impairment loss on the premium tax offsets in 2011 or 2010.

Reconciliations of assets recognized from paid and accrued premium tax offsets and policy surcharges were as follows:

(in millions)		**2011**	**2010**
a.	Assets recognized from paid and accrued premium tax offsets at prior year end	$ 27	$ 30

Executive Life Insurance Company of New York ("ELNY") has been under the jurisdiction of the New York Liquidation Bureau (the "Bureau") as part of a 1992 court-ordered rehabilitation plan. ELNY continues to fully pay annuity benefits when due. The Superintendent of Insurance of the state of New York, in conjunction with the New York Attorney General, filed a proposed formal plan of liquidation on September 1, 2011 and a public hearing on the proposed plan is scheduled for March 15, 2012. The current publicly available estimated shortfall from the Bureau

NOTES TO FINANCIAL STATEMENTS

is $1.57 billion. If the proposed plan of liquidation is accepted by the court, the Company will have exposure to future guaranty fund assessments. New York law currently contains an aggregate limit on insurer assessments by the guaranty fund, the Life Insurance Corporation of New York, of $500 million, of which approximately $40 million has been used.

The Company's three-year average market share for New York at December 31, 2009, based on assessable premiums, was approximately 0.6%. In 2011, the Company accrued its estimated aggregate exposure of $5 million pre-tax for guaranty fund assessment, or $2 million net of state related taxes and federal income tax. The ultimate cost will depend on an approved court-ordered liquidation plan, the level of guaranty fund system participation and the realization of tax benefits. Under current law, the Company may be allowed to recoup a portion of the amount of any additional guaranty fund assessment in periods subsequent to the recognition of the assessment by offsetting future state related taxes.

C. Gain Contingencies

The Company has not recognized gain contingencies subsequent to December 31, 2011, but prior to the issuance of the Company's Annual Statement.

D. Claims Related Extra Contractual Obligation and Bad Faith Losses Stemming from Lawsuits

The Company did not incur losses related to extra contractual obligation lawsuits in 2011 or 2010.

E. All Other Contingencies

Regulation and compliance

The Company is currently being examined by certain states for compliance with unclaimed property laws. It is possible that this examination may result in additional payments of abandoned funds to states and to changes in the Company's practices and procedures for the identification of escheatable funds, which could impact benefit payments and reserves, among other consequences; however, it is not likely to have a material effect on the operating results, cash flows or financial position of the Company.

Legal and regulatory proceedings and inquiries

The Company did not have material loss contingencies.

15. Leases

A. Lessee Operating Leases

The Company was not involved in operating lease obligations in 2011 or 2010.

B. Lessor Leases

Leasing activities were not part of the Company's business activities in 2011 or 2010.

Volume for over-the-counter derivative contracts is represented by their notional amounts. Volume for exchange traded derivatives is represented by the number of contracts which is the basis on which they are traded (n/a = not applicable). The notional amounts specified in the contracts are used to calculate the exchange of contractual payments under the agreements and are not representative of the potential for gain or loss on these agreements. However, the notional amounts specified in credit default swap agreements where the Company has sold credit protection represent the maximum amount of potential loss, assuming no recoveries. Statement values are generally equal to consideration paid or received except when non-hedge accounting is used, in which case statement value is equal to current fair value. Fair value is the estimated amount that the Company would receive or pay to terminate the derivative contracts at the reporting date.

2. The credit risk, market risk and cash requirements of the Company's derivative instruments utilized during 2011 and 2010 are discussed in Note 8, Parts A-C. The accounting policies for the Company's derivative instruments are disclosed in Note 1, Part C and Note 8, Parts A-C.

3. The following table summarizes the credit exposure on the Company's over-the-counter contracts at December 31:

(in millions)	2011	2010
Interest rate swap agreements	$ 85	$ 114
Foreign currency swap agreements	4	36
Credit default swap agreements – buying protection	1	(1)
Interest rate cap and floor agreements	(3)	(3)
Option contracts	-	327
Interest rate swaption agreements	-	4
Credit default swap agreements – selling protection	-	1
Total derivative credit exposure	$ 87	$ 478

Counterparty credit exposure represents the Company's potential loss if all counterparties concurrently fail to perform under the contractual terms of the contracts and all collateral, if any, becomes worthless. This exposure is measured by the statement value of over-the-counter derivative contracts with a positive statement value at the reporting date reduced by the effect, if any, of legally enforceable master netting agreements. The Company has not incurred any losses on derivative financial instruments due to counterparty nonperformance.

4. The Company's policy for requiring collateral is discussed in Note 8, Parts A-C. In general, the collateral pledged by the Company is in the custody of a counterparty or an exchange. However, the Company has access to this collateral at any time, subject to replacement. For certain exchange traded derivatives, the exchange requires margin deposits as well as daily cash settlements of margin accounts. Usually, the Company pledges U.S. Treasury bonds to satisfy this collateral requirement. At December 31, 2011, the Company pledged $6 million of securities in the form of margin deposits. At December 31, 2010, the Company pledged $18 million of securities and cash in the form of margin deposits.

   The Company uses master netting agreements for over-the-counter derivative transactions that permit either party to net payments due for transactions and collateral is either pledged or obtained when certain predetermined exposure limits are exceeded. At December 31, 2011, counterparties pledged $63 million of cash and securities to the Company, and the Company pledged $72 million of securities to counterparties. At December 31, 2010, counterparties pledged $17 million of cash and securities to the Company, and the Company pledged $149 million of securities to counterparties.

Commitments to extend mortgage loans	$ 49	$ -
Private placement commitments	$ 30	$ 111
Credit guarantees	$ 28	$ 64

The Company enters into these agreements to commit to future loan fundings at a predetermined interest rate. Commitments generally have fixed expiration dates or other termination clauses.

   Private placement commitments represent conditional commitments to purchase private placement debt and equity securities at a specified future date. The Company regularly enters into these agreements in the normal course of business.

   Credit guarantees represent conditional commitments included in certain bonds owned by the Company. These commitments obligate the Company to exchange credit risk or to forfeit principal due, depending on the nature or occurrence of specified credit events for referenced entities. The obligations associated with these bonds expire at various dates on or before March 11, 2018.

NOTES TO FINANCIAL STATEMENTS

Other loan commitments are agreements to lend to a borrower provided there is no violation of any condition established in the contract. The Company enters into these agreements to commit to future loan fundings at predetermined interest rates. Commitments generally have fixed or varying expiration dates or other termination clauses.

3. The contractual amounts represent the amount at risk if the contract is fully drawn upon, the counterparty defaults and the value of any underlying security becomes worthless.

4. The Company does not require collateral or other security to support off-balance sheet financial instruments with credit risk.

17. Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

C. In the course of managing the Company's investment portfolio, securities may be sold and reacquired within 30 days of the sale date. Such transactions are referred to as wash sales. The details, by NAIC designation 3 or below, of bonds sold during 2011 and 2010 and reacquired within 30 days of the sale date were:

($ in millions)	2011			
	Number of Transactions	Book Value of Securities Sold	Cost of Securities Repurchased	Gain (Loss)

The Company did not act as a third party administrator for uninsured accident and health plans.

19. Direct Premium Written/Produced by Managing General Agents/Third Party Administrators

The aggregate amount of direct premiums written/produced by managing general agents/third party administrators was $93 million and $95 million for the years ended December 31, 2011 and 2010, respectively, which was less than 5% of the Company's surplus.

20. Fair Value Measurements

A. Fair value is defined, per SSAP 100, *Fair Value Measurements* ("SSAP No. 100"), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP No. 100 identified three valuation techniques which are used, either independently or in combination, to determine fair value: 1) market approach; 2) income approach; and 3) cost approach. SSAP No. 100 also contains guidance about observable and unobservable inputs, which are assumptions that market participants would use in pricing an asset or liability. To increase consistency and comparability in fair value measurements, the fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels; 1, 2 and 3. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available.

The Company has two types of situations where investments are classified as Level 3. The first is where quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources. The second situation is where specific inputs significant to the fair value estimation models are not market observable, including the Company's use of broker quotes.

Transfer into Level 3 during 2011 included situations where the fair value hierarchy of a security remained at Level 3, but the classification of the security changed. In addition, transfers into Level 3 during 2011 and 2010 included situations where there was a change in the NAIC designation that resulted in the asset being reported and measured at fair value. Transfers into Level 3 included situations where assets were measured at lower of cost or market were reported at cost at December 31, 2010 and 2009 and fair value at December 31, 2011 and 2010. Transfers into Level 3 during 2010 also included situations where the fair value was not provided by the Company's independent third-party valuation service provider and as a result the price was stale or had been replaced with a broker quote where inputs have not been corroborated to be market observable resulting in the security being classified as Level 3.

Transfers out of Level 3 during 2011 included situations where a broker quote was used in the prior period and a fair value quote became available from the Company's independent third-party valuations service provider in the current period. A quote utilizing the new pricing source was not available as of the prior period, and any gains or losses related to the change in valuation source for individual securities were not significant. In addition, transfers out of Level 3 during 2010 included situations where there was a change in the NAIC designation that resulted in the asset not being reported and measured at fair value. Additionally, transfers out of Level 3 included situations where assets measured at lower of cost or market were reported at fair value at December 31, 2009 and reported at cost at December 31, 2010.

3. Transfers between level categorizations may occur due to changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity, trading volume or bid-ask spreads. Transfers between level categorizations may also occur due to changes in the valuation source. For example, in situations where a fair value quote is not provided by the Company's independent third-party valuation service provider and as a result, the price is stale or has been replaced with a broker quote whose inputs have not been corroborated to be market observable, the security is transferred into Level 3. Transfers in and out of level categorizations are reported as having occurred at the beginning of the quarter in which the transfer occurred.

4. In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 and Level 3 valuations, a combination of the market and income approaches is used.

Listed below is a summary of the significant valuation techniques for assets and liabilities measured and reported at fair value.

Level 2 measurements

Bonds

Corporate, including privately placed - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Also included are privately placed securities valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer.

Residential mortgage-backed securities ("RMBS") and Asset-backed securities ("ABS") - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads.

Commercial mortgage-backed securities ("CMBS") - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, collateral performance and credit spreads.

Redeemable preferred stocks - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

Unaffiliated common stocks - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active.

Derivatives - Exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives, including interest rate swap agreements, foreign currency swap

agreements, foreign exchange forward contracts, and certain credit default swap agreements, are valued using models that rely on inputs such as interest rate yield curves, currency rates, and counterparty credit spreads that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

Separate Accounts - Registered deferred annuity contracts may be supported by corporate bonds, including those that are privately placed. The primary inputs to the valuation include quoted market prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Also included are privately placed securities valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. In addition, registered deferred annuity contracts may be supported by exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active.

Level 3 measurements

Bonds

Corporate, including privately placed - Primarily valued based on non-binding broker quotes.

RMBS, CMBS and ABS - Value based on non-binding broker quotes received from brokers who are familiar with the investments and where the inputs have not been corroborated to be market observable.

Unaffiliated common stocks - Value based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Unobservable inputs reflect the Company's estimates of assumptions that market participants would use in valuing the asset.

Derivatives - Certain over-the-counter derivatives, such as interest rate cap and floor agreements and swaption agreements are valued using models that are widely accepted in the financial services industry. These are categorized as Level 3 as a result of the significance of non-market observable inputs such as volatility. Other primary inputs include interest rate yield curves and credit spreads.

Separate Accounts - Registered deferred annuity contracts are supported by mortgage loans. The fair value of mortgage loans on real estate is based on discounted contractual cash flows or if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics using similar types of properties as collateral.

5. All information related to derivatives measured and reported at fair value is presented above.

The fair value of U.S. Treasury bonds is based on unadjusted quoted market prices for identical assets in active markets the Company can access. The fair value of all other publicly traded bonds, including loan-backed and structured securities, is based upon quoted market prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Non-publicly traded bonds, including loan-backed and structured securities, are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer.

The fair value of preferred stocks is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

The fair value of unaffiliated common stocks is based on a combination of 1) unadjusted quoted market prices for identical assets in active markets the Company can access, 2) quoted market prices of identical or similar assets in markets that are not active and 3) prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Unobservable inputs reflect the Company's estimates of assumptions that market participants would use in valuing the asset.

The fair value of mortgage loans on real estate is based on discounted contractual cash flows, or if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics, using similar types of properties as collateral.

The fair value of cash equivalents and short-term investments is based on quoted market prices for identical or similar assets in markets that are not active or amortized cost.

Exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives are valued using models that are widely accepted in the financial services industry. Primary inputs include interest rate yield curves, currency rates and counterparty credit spreads.

The fair value of LIHTC property investments is based on amortized cost which approximates fair value.

The fair value of surplus notes and collateral loans is based on discounted cash flow calculations using current interest rates for instruments with comparable terms.

NOTES TO FINANCIAL STATEMENTS

Financial liabilities

Presented below are the statement value and fair value estimates of financial liabilities at December 31:

(in millions)	2011		2010	
	Statement Value	Fair Value	Statement Value	Fair Value
Deposit-type contracts	$ 4,940	$ 5,523	$ 5,675	$ 6,270
Securities lending collateral	$ 158	$ 158	$ 333	$ 333
Derivatives	$ 86	$ 92	$ 248	$ 277
Derivatives collateral	$ 43	$ 43	$ 4	$ 4

The fair value of the liability for deposit-type contracts is based on the terms of the underlying contracts utilizing prevailing market rates for similar contracts adjusted for credit risk. Deferred annuities included in deposit-type contracts are valued using discounted cash flow models that incorporate market value margins, which are based on the cost of holding economic capital, and the Company's own credit risk. Immediate annuities without life contingencies are valued at the present value of future benefits using market implied interest rates which include the Company's own credit risk. Fixed annuities were valued at the account value less surrender charges.

The liabilities for collateral for securities lending and derivatives are valued at carrying value due to their short-term nature.

C. The Company was able to estimate the fair value of all its financial instruments in 2011 and 2010.

21. Other Items

A. Extraordinary Items

The Company did not have extraordinary items at December 31, 2011 or 2010.

B. Troubled Debt Restructuring: Debtors

The Company did not have troubled debt restructurings at December 31, 2011 or 2010.

C. Other Disclosures

The state of Illinois has adopted the Valuation of Life Insurance Policies Model Regulation (i.e. Regulation XXX). As such, the Company's reserve calculations comply with the regulation. This note is intended as an informational disclosure for states that have not adopted this regulation.

D. Balances Reasonably Possible to be Uncollectible

Agents' balances receivable are 100% nonadmitted after the establishment of a valuation allowance. The allowance balance for admitted agents' balances receivable, after reinsurance, was $1 million at both December 31, 2011 and

E. Business Interruption Insurance Recoveries

The Company did not procure business interruption insurance in 2011 or 2010.

F. State Transferable and Non-transferable Tax Credits

The Company did not own state tax credits at December 31, 2011 or 2010.

G. Subprime Mortgage Related Risk Exposure

1. The Company identified it had exposure to subprime residential mortgage related risk in the form of asset-backed residential mortgage-backed securities ("ABS RMBS") at December 31, 2011 and 2010 and asset-backed collateralized debt obligations ("ABS CDO") at December 31, 2010. The ABS RMBS portfolio includes securities that are collateralized by mortgage loans issued to borrowers that cannot qualify for prime or alternative financing terms due in part to an impaired or limited credit history. It also includes securities that are collateralized by certain second lien mortgages regardless of the borrower's credit profile. The ABS CDO portfolio contains securities collateralized by a variety of residential mortgage-backed and other securities, which may include subprime residential mortgage-backed securities. At December 31, 2011, the ABS RMBS portfolio had net unrealized losses of $205 million, comprised of $208 million in gross unrealized losses and $3 million in gross unrealized gains. At December 31, 2010, the ABS RMBS portfolio had net unrealized losses of $261 million, comprised of $265 million in gross unrealized losses and $4 million in gross unrealized gains. At December 31, 2010, the ABS CDO portfolio did not have unrealized gains or losses.

   In addition, the Company owns Alt-A securities which it does not consider to be a component of its exposure to subprime mortgage related risk. The Alt-A portfolio consists of mortgage-backed securities at fixed or variable rates and includes certain securities that are collateralized by residential mortgage loans issued to borrowers with stronger credit profiles than subprime borrowers, but do not qualify for prime financing terms due to high loan-to-value ratios or limited supporting documentation. At December 31, 2011, the Alt-A portfolio had net unrealized losses of $47 million, comprised of $50 million in gross unrealized losses and $3 million in gross unrealized gains. At December 31, 2010, the Alt-A portfolio had net unrealized losses of $49 million, comprised of $56 million in gross unrealized losses and $7 million in gross unrealized gains.

   ABS RMBS, ABS CDO and Alt-A securities are considered loan-backed, and included in bonds in the Company's Asset page.

   The Company has a comprehensive portfolio monitoring process to identify and evaluate, on a case-by-case basis, investments whose carrying value may be OTTI. See the investments accounting policy in Note 1, Part C for more details. The Company recorded the following OTTI for the years ended December 31:

(in millions)	2011			2010		
	ABS RMBS	ABS CDO	Alt-A	ABS RMBS	ABS CDO	Alt-A
Related to asset impairments	$ 67	$ -	$ 19	$ 183	$ 4	$ 9
Due to the potential sale of assets to meet cash flow needs	22	-	-	5	-	-
Total OTTI	$ 89	$ -	$ 19	$ 188	$ 4	$ 9

   The Company continues to believe the unrealized losses on these securities are not necessarily predictive of the performance of the underlying collateral. In the absence of further deterioration in the collateral relative to the Company's positions in the securities' respective capital structures, which could require recognition of OTTI, the unrealized losses should reverse over the remaining lives of the securities.

   The Company's practice for acquiring and monitoring ABS RMBS, ABS CDO and Alt-A securities takes into consideration the quality of the originator, quality of the servicer, security credit rating, underlying characteristics of the mortgages, borrower characteristics, level of

NOTES TO FINANCIAL STATEMENTS

credit enhancement in the transaction, and bond insurer strength, where applicable. The originators and servicers of the underlying mortgage loans are primarily subsidiaries of large banks and brokers.

2. The Company did not have direct exposure to subprime mortgage loans.

3. The Company's direct exposure to other subprime investments is summarized as follows at December 31:

(in millions)	2011			
Type of Investment	Actual Cost	Book/Adjusted Carrying Value	Fair Value	OTTI Losses
ABS RMBS	$ 828	$ 754	$ 549	$ 89
ABS CDO	-	-	-	-
Total	$ 828	$ 754	$ 549	$ 89

(in millions)	2010			
Type of Investment	Actual Cost	Book/Adjusted Carrying Value	Fair Value	OTTI Losses

ABS CDO	37	1	1	4
Total	$ 1,335	$ 1,143	$ 882	$ 192

In addition, the Company had Alt-A securities with the following actual cost, book/adjusted carrying value, fair value and OTTI losses at December 31:

(in millions)	2011	2010
Actual cost	$ 372	$ 434
Book/adjusted carrying value	$ 361	$ 429
Fair value	$ 314	$ 380
OTTI losses	$ 19	$ 9

4. The Company is not licensed to sell mortgage guaranty or financial guaranty insurance coverage, and therefore, does not have underwriting exposure to subprime mortgage risk.

H. Retained Assets

The Company did not have retained asset accounts at December 31, 2011. In 2010, the Company offered beneficiaries of certain life policies and annuity contracts different settlement options, including one where proceeds were deposited with its affiliate, Allstate Bank ("Bank"). If this option was selected, the Company extinguished its liability related to the policy or contract and deposited the proceeds in an interest-bearing money market account, in the beneficiary's name, at the Bank. The Bank paid interest rates on these money market accounts ranging from 0.10% to 0.30% in 2011 and 0.10% to 1.00% in 2010. Interest rates could change weekly. During the second half of 2011, the Bank was dissolved and the account owners received payment for the balance of their money market account, including interest. The Bank was insured under the Federal Deposit Insurance Corporation. In most states, using the Bank's interest-bearing money market account was the default method for satisfying claims. The Company did not charge any fees to the beneficiary when this settlement option is selected.

In both 2011 and 2010, these amounts represented less than one-half of one percent of total life premiums and annuity considerations earned. The Company uses accrual accounting to record policyholder dividends on participating policies. The Company paid dividends of $56 thousand and $61 thousand in 2011 and 2010, respectively, to participating policyholders and did not allocate additional income.

All of the Company's accident and health contracts were nonparticipating at December 31, 2011 and 2010.

30. Premium Deficiency Reserves

The Company did not record premium deficiency reserves related to accident and health contracts at December 31, 2011 or 2010.

31. Reserves for Life Contracts and Annuity Contracts

1. On traditional life insurance contracts, the Company waives deduction of deferred fractional premiums upon the death of the insured and returns any portion of the final premium beyond the date of death. Surrender values are not contracted in excess of the reserve as legally computed.

2. The cost of additional mortality for each policy is assumed to equal the additional premium charged for that policy period and is reserved accordingly. Additional premiums are collected for policies issued on substandard lives. Reserves are held in a manner consistent with standard policies.

3. At December 31, 2011 and 2010, the Company had $7.53 billion and $9.20 billion, respectively, of insurance in force for which the gross premiums were less than the net premiums according to the standards of valuation set by the state of Illinois. 4. Tabular interest, tabular less actual reserves released and tabular cost are determined by formula as described in the APPM.

34. Separate Accounts

A. Separate Account Activity

Separate Accounts held by the Company are for variable annuity contracts, variable life policies and registered deferred annuity contracts.

The assets and liabilities of variable annuity contracts and variable life policies are recorded as assets and liabilities of the Separate Accounts and are legally insulated from the General Account. The legal insulation of the Separate Accounts assets prevents such assets from being generally available to satisfy claims resulting from the General Account. Separate Accounts which contain variable annuity and variable life business are unit investment trusts and registered with the Securities and Exchange Commission ("SEC"). As of December 31, 2011 and 22010, all assets of the Separate Accounts that support the variable annuity and variable life business were legally insulated.

The assets and liabilities of registered deferred annuity contracts are also recorded as assets and liabilities of the Separate Accounts, however, they are not legally insulated from the General Account. The registered deferred annuity product is non-unitized and is registered with the SEC.

At December 31, the Company's Separate Accounts were attributed to the following products:

(in millions)	2011		2010	
	Legally insulated assets	Not legally insulated assets	Legally insulated assets	Not legally insulated assets
Variable annuity contracts	$ 4,642	$ -	$ 5,858	$ -
Variable life policies	55	-	62	-
Registered deferred annuity contracts	-	144	-	2
Total	$ 4,697	$ 144	$ 5,920	$ 2

Some of the Separate Account liabilities are guaranteed by the General Account. As of December 31, 2011 and 2010, the Company had a maximum guarantee for Separate Account liabilities of $1,435 million and $1,350 million, respectively. To compensate the General Account for the risk taken, the Separate Accounts paid risk charges of $24 million and $27 million in 2011 and 2010, respectively. The amount paid by the General Account for Separate Account guarantees was $73 million and $160 million in 2011 and 2010, respectively.

The Company did not have securities lending transactions within the Separate Accounts in 2011 or 2010.

B. General Nature and Characteristics of Separate Account Business

Variable annuity and variable life business allow the contractholder to accumulate funds within a variety of portfolios, at rates which depend upon the return achieved from the types of investments chosen. The net investment experience of the Separate Accounts is credited directly to the contractholder and can be favorable or unfavorable. The assets of each portfolio are held separately from the other portfolios and each has distinct investment objectives and policies. Absent any contract provision wherein the Company provides a guarantee, the contractholders of the variable annuity and variable life products bear the investment risk that the Separate Account's funds may not meet their stated investment objectives. Variable annuity and variable life business is included in the Nonguaranteed Separate Accounts column of the following tables. Registered deferred annuity business is included in the Index column of the following tables.

In connection with the disposal of the Company's variable annuity business to Prudential, there is a modified coinsurance reinsurance agreement under which the Separate Account assets and liabilities remain in the Company's Assets and Liabilities, Surplus and Other Funds pages, but the related results of operations are fully reinsured to Prudential and presented net of reinsurance in the Summary of Operations. In contrast, assets supporting General Account liabilities have been transferred to Prudential under the coinsurance reinsurance provisions. The Reinsurance Agreements do not contain limits or indemnifications with regard to the insurance risk transferred and transferred all of the future risks and responsibilities for performance in the underlying variable annuity contracts to Prudential, including those related to benefit guarantees, in accordance with SSAP No. 61, *Life, Deposit-Type and Accident and Health Reinsurance*. The Separate Accounts balances related to the modified coinsurance reinsurance were $5.64 billion and $7.11 billion at December 31, 2011 and 2010, respectively.

Explanation of basis of allocation by states, etc., of premiums and annuity considerations

Ordinary insurance and annuity considerations are allocated to the address of the policy owner. For group policies and contracts covering less than 500 lives, premiums or considerations are allocated to the state in which the employees are principally located, or in which the principal office of the creditor group policyholder is located. For such policies and contracts covering 500 lives or more, the premium or considerations are allocated according to the locations of various employees, or the locations and volume of business of the various agencies of the creditor group policyholders.
