NOTES TO FINANCIAL STATEMENTS

There have been no material changes to the following December 31, 2010 Annual Statement notes: 1(B, C), 2-4, 5(A-C, F, G), 6, 7, 8, 9(B, E, F), 10(A-D, F-L), 11, 12, 13(1-3, 5-13), 14(C, D), 15, 16(2, 3), 17(A), 18, 19, 21(A-F, G1, G2, G4), 23, 24 and 26-36A.

1. Summary of Significant Accounting Policies

A. Allstate Insurance Company (“Company”) prepares its financial statements in conformity with accounting practices prescribed or permitted by the Illinois Department of Insurance (“IL DOI”). Prescribed statutory accounting practices include a variety of publications of the National Association of Insurance Commissioners (“NAIC”), as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

The state of Illinois requires its domestic insurance companies to prepare financial statements in conformity with the NAIC Accounting Practices and Procedures Manual, which includes all Statements of Statutory Accounting Principles (“SSAPs”), subject to any deviations prescribed or permitted by the IL DOI.

5. Investments

D. Loan-Backed Securities

1. Prepayment assumptions for loan-backed and structured securities were obtained from brokers and internal estimates.
2. The Company is required to assess if an impairment is other than temporary when the fair value of a loan-backed or structured security is less than the amortized cost. The table below presents the aggregate amortized cost of loan-backed and structured securities before recognized other-than-temporary impairment (“OTTI”), the amount of OTTI recognized and the fair value of those securities.

Basis of Impairment	2011				2010			
	Amortized Cost Before OTTI	Recognized OTTI		Fair Value	Amortized Cost Before OTTI	Recognized OTTI		Fair Value
		Interest	Non- interest			Interest	Non- interest	
1 st Quarter								
Non-interest related	\$ 157	\$ -	\$ (13)	\$ 109	\$ 299	\$ -	\$ (35)	\$ 165
Intent to sell	112	(11)	-	101	73	(1)	-	73
Total 1 st Quarter	\$ 269	\$ (11)	\$ (13)	\$ 210	\$ 372	\$ (1)	\$ (35)	\$ 238
2 nd Quarter								
Non-interest related					\$ 186	\$ -	\$ (18)	\$ 100
Intent to sell					5	(2)	-	3
Total 2 nd Quarter					\$ 191	\$ (2)	\$ (18)	\$ 103
3 rd Quarter								
Non-interest related					\$ 263	\$ (5)	\$ (30)	\$ 153
Intent to sell					2	-	-	2
Total 3 rd Quarter					\$ 265	\$ (5)	\$ (30)	\$ 155
4 th Quarter								
Non-interest related					\$ 255	\$ -	\$ (45)	\$ 152
Intent to sell					14	-	-	14
Total 4 th Quarter					\$ 269	\$ -	\$ (45)	\$ 166
Year-to-date		\$ (11)	\$ (13)			\$ (8)	\$ (128)	

The classification basis of intent to sell is considered an interest related OTTI. The Company did not have OTTI that resulted from the inability or lack of intent to retain an investment in a security for a period of time sufficient to recover the amortized cost basis in 2011 or 2010.

3. The following loan-backed and structured securities were OTTI at the end of each quarter presented, as a result of the discounted present value of the cash flows expected to be collected being less than amortized cost.

(\$ in millions)		Amortized Cost Before OTTI	Present Value of Projected Cash	Recognized OTTI		Amortized Cost after OTTI	Fair Value

STATEMENT AS OF MARCH 31, 2011 OF ALLSTATE INSURANCE COMPANY

NOTES TO FINANCIAL STATEMENTS

4. The following tables provide the aggregate fair value and unrealized losses for all impaired loan-backed and structured securities for which an OTTI has not been recognized in earnings as a realized loss by the length of time the individual securities have been in a continuous unrealized loss position.

(in millions)	March 31, 2011		December 31, 2010

5. See Note 1, Part C - Investments of the December 31, 2010 Annual Statement for the portfolio monitoring process for loan-backed and structured securities.

E. Repurchase Agreements and/or Securities Lending Transactions

- The Company receives cash collateral for securities loaned in an amount generally equal to 102% and 105% of the fair value of domestic and foreign securities, respectively, and records the related obligations to return the collateral within liabilities. The Company did not enter into repurchase agreements in 2011 or 2010.
- The Company did not pledge its assets as collateral in repurchase agreement or securities lending transactions in 2011 or 2010.
- Assets were accepted as collateral by the Company as part of its securities lending program.
 - Cash collateral was received in connection with its securities lending program totaling \$233 million at March 31, 2011. The remaining term of the open securities lending contracts related to this collateral at March 31, 2011 was 30 days or less. The Company did not enter into securities lending transactions in 2010.
 - At March 31, 2011, the Company had securities with an aggregate fair value of \$233 million that were acquired from the sale, trade and use of accepted collateral (reinvested collateral).
 - All collateral is received in the form of cash, unrestricted and maintained in a separate custody account. Generally, collateral is invested in short-term investments or bonds during the agreement period. The Company monitors the fair value of securities loaned on a daily basis and obtains additional collateral as necessary to mitigate counterparty credit risk. The Company maintains the right and ability to redeem the securities loaned on short notice. Substantially all of the Company's securities loaned were placed with large brokerage firms.
- The Company does not use affiliated agents for its securities lending transactions in 2011. The Company did not enter into securities lending transactions in 2010.
- None of the collateral the Company received was sold or repledged at March 31, 2011. The Company did not enter into securities lending transactions in 2010.

9. Income Taxes

The application of SSAP No. 10R, *Income Taxes - Revised, A Temporary Replacement of SSAP No. 10* ("SSAP No. 10R") requires the Company to evaluate the recoverability of deferred tax assets ("DTAs") and to establish a statutory valuation allowance adjustment ("valuation allowance") if necessary to reduce the DTA to an amount which is more likely than not to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary, and if so, the amount of such valuation allowance. In evaluating the need for a valuation allowance the Company considers many factors, including: (1) the nature of the DTAs and deferred tax liabilities ("DTLs"); (2) whether they are ordinary or capital; (3) the timing of their reversal; (4) taxable income in prior carryback years as well as projected taxable earnings exclusive of reversing temporary differences and carryforwards; (5) the length of time that carryovers can be utilized; (6) unique tax rules that would impact the utilization of the DTAs; and (7) any tax planning strategies that the Company would employ to avoid a tax benefit from expiring unused. Although the realization is not assured, management believes it is more likely than not that the DTAs, net of the valuation allowance, will be realized. The Company did not have a valuation allowance at March 31, 2011. The valuation allowance was \$156 million at December 31, 2010.

A. The components of the net DTA were as follows:

(in millions)	March 31, 2011			December 31, 2010			Change		
	Ordinary	Capital	Total	Ordinary	Capital	Total	Ordinary	Capital	Total
Gross DTAs	\$ 2,091	\$ 592	\$ 2,683	\$ 2,146	\$ 636	\$ 2,782	\$ (55)	\$ (44)	\$ (99)

10. Information Concerning Parent, Subsidiaries, Affiliates and Other Related Parties

E. The Company purchased structured settlement annuities, a type of immediate annuity, at prices determined based on interest rates in effect at the time of purchase, to fund structured settlements from Allstate Life Insurance Company ("ALIC") and its subsidiary, Allstate Life Insurance Company of New York ("ALNY"). Prior to July 1, 2001, these annuities were issued to Allstate Settlement Corporation ("ASC"), a subsidiary of ALIC. Most of the structured settlements issued to ASC were under a "qualified assignment", meaning these entities assumed the Company's obligation to make future payments.

The Company also issued surety bonds to guarantee the payment of structured settlement benefits assumed by ASC (from both the Company and non-related parties) and funded by certain annuity contracts issued by ALIC and ALNY. ASC entered into a General Indemnity Agreement pursuant to which it indemnified the Company for any liabilities associated with the surety bonds and provided certain collateral security rights with respect to the annuities and certain other rights in the event of default covered by the surety bonds. Reserves recorded by ALIC and ALNY for annuities that are guaranteed by the surety bonds were \$5.06 billion and \$5.07 billion at March 31, 2011 and December 31, 2010, respectively.

In addition, the Company and ALIC entered into a Capital Support Agreement effective December 14, 2007. Under the terms of this agreement, the Company agrees to provide capital and surplus to ALIC in order for ALIC to maintain a company action level RBC ratio of at least 150%. The Company's obligation to provide capital and surplus to ALIC is limited to an aggregate amount of \$1.00 billion, for which ALIC pays the Company an annual commitment fee of 1% of the amount of the capital and surplus maximum, as defined in the agreement. At both March 31, 2011 and December 31, 2010, no capital had been provided by the Company under this agreement.

13. Capital and Surplus, Dividend Restrictions and Quasi-Reorganizations

4. On January 27, 2011, the Company paid an ordinary cash dividend of \$200 million to Allstate Insurance Holdings, LLC ("AIH"). The following ordinary cash dividends were paid to AIH in 2010:

(in millions)	
Date of Payment	Amount
June 29	\$ 200
August 4	200
September 30	200
October 21	200
November 24	300
December 30	200
Total	\$ 1,300

14. Contingencies

A. Contingent Commitments

The Company made the following contingent commitments with external parties.

Commitments to acquire financial interests or make additional capital contributions

The Company made commitments to invest in limited partnerships interests of \$915 million and \$740 million at March 31, 2011 and December 31, 2010, respectively. These commitments are generally for making additional capital contributions or acquiring financial interests.

California Earthquake Authority ("CEA")

Exposure to certain potential losses from earthquakes in California is limited by the Company's participation in the CEA, which provides insurance for California earthquake losses. The CEA is a privately-financed, publicly-managed state agency created to provide insurance coverage for earthquake damage. Insurers selling homeowners insurance in California are required to offer earthquake insurance to their customers either through their company or by participation in the CEA. The Company's homeowners policies continue to include coverages for losses caused by explosions, theft, glass breakage and fires following an earthquake, which are not underwritten by the CEA.

At October 31, 2010, the CEA's capital balance was approximately \$3.68 billion. Should losses arising from an earthquake cause a deficit in the CEA, additional funding would be obtained from the proceeds of revenue bonds the CEA may issue, an existing \$3.12 billion reinsurance layer, and finally, if needed, assessments on participating insurance companies. The authority of the CEA to assess participating insurers extends through December 1, 2018. Participating insurers are required to pay an assessment, currently estimated not to exceed \$1.56 billion, if the capital of the CEA falls below \$350 million. Participating insurers are required to pay a second additional assessment, currently estimated not to exceed \$1.09 billion, if aggregate CEA earthquake losses exceed \$9.77 billion and the capital of the CEA falls below \$350 million. Within the limits previously described, the assessment could be intended to restore the CEA's capital to a level of \$350 million. There is no provision that allows insurers to recover assessments through premium surcharge or other mechanism. The CEA's projected aggregate claim paying capacity is \$9.77 billion as of October 31, 2010 and if an event were to result in claims greater than its capacity, affected policyholders would be paid a prorated portion of their covered losses.

All future assessments on participating CEA insurers are based on their CEA insurance market share as of December 31 of the preceeding year. As of April 1, 2010, the Company's share of the CEA was 17.2%. The Company does not expect its CEA market share to materially

NOTES TO FINANCIAL STATEMENTS

change. At this level, the Company's maximum possible CEA assessment would be \$456 million during 2011. Accordingly, assessments from the CEA for a particular quarter or annual period may be material to income and cash flows, but not the financial position of the Company. Management believes the Company's exposure to earthquake losses in California has been significantly reduced as a result of its participation in the CEA.

Shared markets

As a condition of maintaining its licenses to write personal property and casualty insurance in various states, the Company is required to participate in assigned risk plans, reinsurance facilities and joint underwriting associations that provide various types of insurance coverage to individuals or entities that otherwise are unable to purchase such coverage from private insurers. Underwriting results related to these arrangements, which tend to be adverse, have been immaterial to the Statement of Income.

Guarantees

The Company provides residual value guarantees on Company leased automobiles. If all outstanding leases were terminated effective March 31, 2011, the Company's maximum obligation pursuant to these guarantees, assuming the automobiles have no residual value, would be \$9 million at March 31, 2011. If all outstanding leases were terminated effective December 31, 2010, the Company's maximum obligation pursuant to these guarantees, assuming the automobiles have no residual value, would be \$10 million at December 31, 2010. The remaining term of each residual value guarantee is equal to the term of the underlying lease, which ranges from less than one year to three years. Historically, the Company has not made any material payments pursuant to these guarantees.

PMI Runoff Support Agreement

The Company has certain limited rights and obligations under a capital support agreement ("Runoff Support Agreement") with PMI Mortgage Insurance Company ("PMI"), the primary operating subsidiary of PMI Group, related to the Company's disposition of PMI in prior years. Under the Runoff Support Agreement, the Company would be required to pay claims on PMI policies written prior to October 28, 1994, if PMI fails certain financial covenants and fails to pay such claims. The agreement only covers these policies and not any policies issued on or after that date. In the event any amounts are so paid, the Company would receive a commensurate amount of preferred stock or subordinated debt of PMI Group or PMI. The Runoff Support Agreement also restricts PMI's ability to write new business and pay dividends under certain circumstances. Management does not believe this agreement will have a material adverse effect on the net income, liquidity or financial position of the Company.

B. Assessments

Guaranty funds

Under state insurance guaranty fund laws, insurers doing business in a state can be assessed, up to prescribed limits, for certain obligations of insolvent insurance companies to policyholders and claimants. Amounts assessed to each company are typically related to its proportion of business written in each state. The Company's policy is to accrue guaranty fund assessments when the entity for which the insolvency relates has met the applicable state of domicile's statutory definition of insolvent and the amount of loss is reasonably estimable. In most states the definition is met with a declaration of financial insolvency by a court of competent jurisdiction. In certain states there must also be a final order of liquidation. At March 31, 2011 and December 31, 2010, the Company had accrued \$20 million and \$72 million, respectively, for future guaranty fund assessments and \$194 thousand and \$4 million, respectively, for the related premium tax offset expected to be realized. The period over which assessments are expected to be paid varies. Premium tax offsets are realized on a straight-line basis over the period allowed by each individual state once the guaranty fund assessment has been paid.

State facilities

The Company is also subject to assessments from the Louisiana Citizens Property Insurance Corporation ("LA Citizens"). LA Citizens can levy a regular assessment on participating companies for a deficit in any calendar year up to a maximum of the greater of 10.0% of the calendar year deficit or 10.0% of Louisiana direct property premiums industry-wide for the prior calendar year.

Facilities such as LA Citizens are generally designed so that the ultimate cost is borne by policyholders, however, the exposure to assessments and the availability of recoupments or premium rate increases from the facility may not offset each other in the Company's financial statements. Moreover, even if they do offset each other, they may not offset each other in financial statements in the same fiscal period due to the ultimate timing of the assessments and recoupments or premium rate increases, as well as the possibility of policies not being renewed in subsequent years.

E. All Other Contingencies

Regulation and compliance

The Company is subject to changing social, economic and regulatory conditions. From time to time, regulatory authorities or legislative bodies seek to influence and restrict premium rates, require premium refunds to policyholders, require reinstatement of terminated policies, restrict the ability of insurers to cancel or non-renew policies, require insurers to continue to write new policies or limit their ability to write new policies, limit insurers' ability to change coverage terms or to impose underwriting standards, impose additional regulations regarding agent and broker compensation, regulate the nature of and amount of investments, and otherwise expand overall regulation of insurance products and the insurance industry. The Company has established procedures and policies to facilitate compliance with laws and regulations, to foster prudent business operations, and to support financial reporting. The Company routinely reviews its practices to validate compliance with laws and regulations and with internal procedures and policies. As a result of these reviews, from time to time the Company may decide to modify some of its procedures and policies. Such modifications, and the reviews that led to them, may be accompanied by payments being made and costs being incurred. The ultimate changes and eventual effects of these actions on the Company's business, if any, are uncertain.

Legal and regulatory proceedings and inquiries

Background

The Company and certain subsidiaries are involved in a number of lawsuits, regulatory inquiries, and other legal proceedings arising out of various aspects of its business. As background to the "Proceedings" subsection below, please note the following:

- These matters raise difficult and complicated factual and legal issues and are subject to many uncertainties and complexities, including the underlying facts of each matter; novel legal issues; variations between jurisdictions in which matters are being litigated, heard or investigated; differences in applicable laws and judicial interpretations; the length of time before many of these matters might be resolved by settlement, through litigation or otherwise; the fact that some of the lawsuits are putative class actions in which a class has not been certified and in which the purported class may not be clearly defined; the fact that some of the lawsuits involve multi-state class actions in which the applicable law(s) for the claims at issue is in dispute and therefore unclear; and the current challenging legal environment faced by large corporations and insurance companies.
- The outcome of these matters may be affected by decisions, verdicts, and settlements, and the timing of such decisions, verdicts, and settlements, in other individual and class action lawsuits that involve the Company, other insurers, or other entities and by other legal, governmental, and regulatory actions that involve the Company, other insurers, or other entities. The outcome may also be affected by future state or federal legislation, the timing or substance of which cannot be predicted.

NOTES TO FINANCIAL STATEMENTS

- In the lawsuits, plaintiffs seek a variety of remedies including equitable relief in the form of injunctive and other remedies and monetary relief in the form of contractual and extra contractual damages. In some cases, the monetary damages sought include punitive or treble damages. Often specific information about the relief sought, such as the amount of damages, is not available because plaintiffs have not requested specific relief in their pleadings. When specific monetary demands are made, they are often set just below a state court jurisdictional limit in order to seek the maximum amount available in state court, regardless of the specifics of the case, while still avoiding the risk of removal to federal court. In the Company's experience, monetary demands in pleadings bear little relation to the ultimate loss, if any, to the Company.
- In connection with regulatory examinations and proceedings, government authorities may seek various forms of relief, including penalties, restitution and changes in business practices. The Company may not be advised of the nature and extent of relief sought until the final stages of the examination or proceeding.
- For the reasons specified above, it is not possible to make meaningful estimates of the amount or range of loss that could result from the matters described below in the "Proceedings" subsection. The Company reviews these matters on an ongoing basis and follows the APPM when making accrual and disclosure decisions. When assessing reasonably possible and probable outcomes, the Company bases its decisions on its assessment of the ultimate outcome following all appeals.
- Due to the complexity and scope of the matters disclosed in the "Proceedings" subsection below and the many uncertainties that exist, the ultimate outcome of these matters cannot be reasonably predicted. In the event of an unfavorable outcome in one or more of these matters, the ultimate liability may be in excess of amounts currently reserved, if any, and may be material to the Company's net income or cash flows for a particular quarterly or annual period. However, based on information currently known to it, management believes that the ultimate outcome of all matters described below, as they are resolved over time, is not likely to have a material adverse effect on the financial position of the Company.

Proceedings

The Company is vigorously defending a number of matters in various stages of development filed in the aftermath of Hurricane Katrina, including individual lawsuits and a statewide putative class action in Louisiana. The Louisiana Attorney General filed a putative class action lawsuit in state court against the Company and other insurers on behalf of Road Home fund recipients alleging that the insurers have failed to pay all damages owed under their policies. The insurers removed the matter to federal court. The district court denied plaintiffs' motion to remand the matter to state court and the U.S. Court of Appeals for the Fifth Circuit ("Fifth Circuit") affirmed that ruling. The defendants filed a motion to dismiss and the plaintiffs filed a motion to remand the claims involving a Road Home subrogation agreement. In March 2009, the district court denied the state's request that its claims be remanded to state court. As for the defendant insurers' motion, the judge granted it in part and denied it in part. Dismissal of all of the extra-contractual claims, including the bad faith and breach of fiduciary duty claims, was granted. Dismissal also was granted of all claims based on the Valued Policy Law and all flood loss claims based on the levee breaches finding that the insurers flood exclusions precluded coverage. The remaining claims are for breach of contract and for declaratory relief on the alleged underpayment of claims by the insurers. The judge did not dismiss the class action allegations. The defendants also had moved to dismiss the complaint on grounds that the state had no standing to bring the lawsuit as an assignee of insureds because of anti-assignment language in the insurers' policies. The judge denied the defendants' motion for reconsideration on the assignment issue but found the matter was ripe for consideration by the federal appellate court. The defendants have filed a petition for permission to appeal to the Fifth Circuit. The Fifth Circuit has accepted review. After the Fifth Circuit accepted review, plaintiffs filed a motion to remand the case to state court, asserting that the class claims on which federal jurisdiction was premised have now effectively been dismissed as a result of a ruling in a related case. The Fifth Circuit has denied the motion for remand, without prejudice to plaintiffs' right to refile the motion for remand after the Fifth Circuit disposes of the pending appeal. On July 28, 2010, the Fifth Circuit issued an order stating that since there is no controlling Louisiana Supreme Court precedent on the issue of whether an insurance policy's anti-assignment clause prohibits post-loss assignments, the Fifth Circuit is certifying that issue to the Louisiana Supreme Court. The issue has been briefed to the Louisiana Supreme Court. That court heard oral argument on the appeal on March 14, 2011 and a decision is pending. If the insurers are not successful on the appeal, we anticipate the state to vigorously pursue the case once it returns to the trial court.

There are one nationwide and several statewide class action lawsuits pending against the Company alleging that it failed to properly pay general contractors overhead and profit on many homeowner structural loss claims. Most of these lawsuits contain counts for breach of contract, as well as one or more counts asserting other theories of liability such as bad faith, fraud, unjust enrichment or unfair claims practices. General contractors overhead and profit is an amount that is added to payments on claims where the services of a general contractor are reasonably likely to be required. To a large degree, these lawsuits mirror similar lawsuits filed against other carriers in the industry, some of which have settled. These lawsuits are pending in various state and federal courts, and they are in different stages of development. The company has reached an agreement to settle on a 48-state basis the nationwide class action. This settlement received preliminary approval from the court on December 6, 2010, and the case was certified as a class for settlement purposes only. The settlement was accrued as a prior year reserve reestimate in property-liability insurance claims and claims expense in 2010. No other classes have been certified against the Company on this issue. The hearing for final approval of the settlement is scheduled for May 6, 2011.

The Company is vigorously defending a lawsuit in regards to certain claims employees involving worker classification issues. This lawsuit is a certified class action challenging a state wage and hour law. This lawsuit is a certified class action challenging a state wage and hour law. In this case, plaintiffs sought monetary relief, such as penalties and liquidated damages, and non-monetary relief, such as injunctive relief. In December 2009, the liability phase of the case was tried and on July 6, 2010, the court issued its decision finding in favor of the Company on all claims. The plaintiffs are appealing the decision.

The Company is defending certain matters relating to the Company's agency program reorganization announced in 1999. These matters are in various stages of development.

- These matters include a lawsuit filed in 2001 by the U.S. Equal Employment Opportunity Commission ("EEOC") alleging retaliation under federal civil rights laws (the "EEOC I" suit) and a class action filed in 2001 by former employee agents alleging retaliation and age discrimination under the Age Discrimination in Employment Act ("ADEA"), breach of contract and Employee Retirement Income Security Act ("ERISA") violations (the "Romero I" suit). In 2004, in the consolidated EEOC I and Romero I litigation, the trial court issued a memorandum and order that, among other things, certified classes of agents, including a mandatory class of agents who had signed a release, for purposes of effecting the court's declaratory judgment that the release is voidable at the option of the release signer. The court also ordered that an agent who voids the release must return to the Company "any and all benefits received by the [agent] in exchange for signing the release." The court also stated that, "on the undisputed facts of record, there is no basis for claims of age discrimination." The EEOC and plaintiffs asked the court to clarify and/or reconsider its memorandum and order and in January 2007, the judge denied their request. In June 2007, the court granted the Company's motions for summary judgment. Following plaintiffs' filing of a notice of appeal, the U.S. Court of Appeals for the Third Circuit ("Third Circuit") issued an order in December 2007 stating that the notice of appeal was not taken from a final order within the meaning of the federal law and thus not appealable at this time. In March 2008, the Third Circuit decided that the appeal should not summarily be dismissed and that the question of whether the matter is appealable at this time will be addressed by the Third Circuit along with the merits of the appeal. In July 2009, the Third Circuit vacated the decision which granted the Company's summary judgment motions, remanded the cases to the trial court for additional discovery, and directed that the cases be reassigned to another trial court judge. In January 2010, the cases were assigned to a new judge for further proceedings in the trial court.
- A putative nationwide class action has also been filed by former employee agents alleging various violations of ERISA, including a worker classification issue. These plaintiffs are challenging certain amendments to the Agents Pension Plan and are seeking to have exclusive agent independent contractors treated as employees for benefit purposes. This matter was dismissed with prejudice by the trial court, was the subject of further proceedings on appeal, and was reversed and remanded to the trial court in 2005. In

NOTES TO FINANCIAL STATEMENTS

June 2007, the court granted the Company’s motion to dismiss the case. Following plaintiffs’ filing of a notice of appeal, the Third Circuit issued an order in December 2007 stating that the notice of appeal was not taken from a final order within the meaning of the federal law and thus not appealable at this time. In March 2008, the Third Circuit decided that the appeal should not summarily be dismissed and that the question of whether the matter is appealable at this time will be addressed by the Third Circuit along with the merits of the appeal. In July 2009, the Third Circuit vacated the decision which granted the Company’s motion to dismiss the case, remanded the case to the trial court for additional discovery, and directed that the case be reassigned to another trial court judge. In January 2010, the case was assigned to a new judge for further proceedings in the trial court.

In all of these various matters, plaintiffs seek compensatory and punitive damages, and equitable relief. The Company has been vigorously defending these lawsuits and other matters related to its agency program reorganization.

Other matters

Various other legal, governmental, and regulatory actions, including state market conduct exams, and other governmental and regulatory inquiries are currently pending that involve the Company and specific aspects of its conduct of business. Like other members of the insurance industry, the Company is the target of a number of class action lawsuits and other types of proceedings, some of which involve claims for substantial or indeterminate amounts. These actions are based on a variety of issues and target a range of the Company’s practices. The outcome of these disputes is currently unpredictable.

One or more of these matters could have an adverse effect on the Company’s net income or cash flows for a particular quarterly or annual period. However, based on information currently known to it, management believes that the ultimate outcome of all matters described in this “Other matters” subsection, in excess of amounts currently reserved, if any, as they are resolved over time is not likely to have a material effect on the net income, cash flows or financial position of the Company.

Volume for over-the-counter derivative contracts is represented by their notional amounts. Volume for exchange traded derivatives is represented by the number of contracts which is the basis on which they are traded (n/a = not applicable). The notional amounts specified in the contracts are used to calculate the exchange of contractual payments under the agreements and are generally not representative of the potential for gain or loss on these agreements. However, the notional amounts specified in credit default swap selling protection agreements represent the maximum amount of potential loss, assuming no recoveries. Statement values are generally equal to consideration paid or received except when non-hedge accounting is used, in which case statement value is equal to current fair value. Fair value is the estimated amount that the Company would receive or pay to terminate the derivative contracts at the reporting date. The fair value for exchange traded derivative contracts is based on observable market quotations in active markets, whereas the fair value for non-exchange traded derivative contracts is determined using widely accepted valuation models and other appropriate valuation methods.

4. The Company’s policy for requiring collateral is discussed in Note 8, Part A of the December 31, 2010 Annual Statement. In general, the collateral pledged by the Company is in the custody of a counterparty or an exchange. However, the Company has access to this collateral at any time, subject to replacement. For exchange traded derivatives, the exchange requires margin deposits as well as daily cash settlements of margin accounts. At March 31, 2011 and December 31, 2010, the Company pledged \$80 thousand and \$18 million, respectively, of securities in the form of margin deposits. Usually, the Company pledges U.S. Treasury bonds to satisfy this collateral requirement. The Company uses master netting agreements for over-the-counter derivative transactions. These agreements permit either party to net

NOTES TO FINANCIAL STATEMENTS

payments due for transactions covered by the agreements. Under the provisions of the agreements, collateral is either pledged or obtained when certain predetermined exposure limits are exceeded. At March 31, 2011, the Company pledged \$72 million in securities to counterparties. At December 31, 2010, the Company pledged \$40 million in securities to counterparties, and counterparties pledged \$19 million in cash and \$22 million in securities to the Company.

Off-balance sheet financial instruments

1. The contractual amounts of off-balance sheet financial instruments were as follows:

(in millions)	March 31, 2011	December 31, 2010
Commitments to invest in limited partnership interests	\$ 915	\$ 740
Private placement commitments	\$ 67	\$ 48

4. The Company does not require collateral or other security to support off-balance sheet financial instruments with credit risk.

17. Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

- B.
- The Company entered into securities lending agreements in 2011. The Company was able to estimate the fair value of assets obtained and liabilities incurred in these agreements. The Company did not enter into securities lending agreements in 2010.
 - The Company entered into securities lending agreements using U.S. Treasury and corporate bonds in 2011. Securities lent were either specifically identified by the lending bank or segregated into a separate custody account. The fair values of securities loaned were \$228 million at March 31, 2011. The Company receives collateral for securities loaned in an amount generally equal to 102% and 105% of the fair value of domestic and foreign securities, respectively, and records the related obligations to return the collateral within liabilities. See Note 5, Part E for more information on securities lending collateral.
 - The Company did not enter into servicing asset or liability agreements in 2011 or 2010.
 - The Company did not have securitized financial assets accounted for as sales in 2011 or 2010.
 - The Company was not the transferor of securitized financial assets in 2011 or 2010.
 - The Company did not transfer receivables with recourse in 2011 or 2010.

C. In the course of managing the Company's investment portfolio, securities may be sold and reacquired within 30 days of the sale date. Such transactions are referred to as wash sales. The Company did not have wash sales in 2011 that involved unrated securities or securities with a NAIC 3 designation or below. The details, by NAIC designation 3 or below, of bonds sold during the first quarter of 2010 and reacquired within 30 days of the sale date were:

(\$ in millions)	2010			
	Number of Transactions	Book Value of Securities Sold	Cost of Securities Repurchased	Gain (Loss)
Bonds				
NAIC 3	1	\$ -	\$ -	\$ -
NAIC 4	3	\$ 5	\$ 5	\$ -
NAIC 5	2	\$ 2	\$ 2	\$ -
Preferred stocks				
NAIC P/RP3	-	\$ -	\$ -	\$ -
NAIC P/RP4	-	\$ -	\$ -	\$ -

The Company did not have any other wash sales in 2011 or 2010 that involved unrated securities or securities with a NAIC 3 designation or below.

20. Fair Value Measurements

A. Fair value is defined, per SSAP 100, *Fair Value Measurements* ("SSAP No. 100"), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP No. 100 identified three valuation techniques which are used, either independently or in combination, to determine fair value: 1) market approach; 2) income approach; and 3) cost approach. SSAP No. 100 also contains guidance about observable and unobservable inputs, which are assumptions that market participants would use in pricing an asset or liability. To increase consistency and comparability in fair value measurements, the fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels; levels 1, 2 and 3. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available.

The Company has two types of situations where investments are classified as Level 3 in the fair value hierarchy. The first is where quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources. The second situation is where specific inputs significant to the fair value estimation models are not market observable, including the Company's use of broker quotes.

During 2011 and 2010, certain securities were transferred into Level 2 from Level 3 as a result of increased liquidity in the market and the availability of market observable quoted prices for similar assets. When transferring these securities into Level 2, the Company did not change the source of fair value estimates or modify the estimates received from independent third-party valuation service providers or the internal valuation approach. Accordingly, for securities included within this group, there was no change in fair value in conjunction with the transfer resulting in a realized or unrealized gain or loss.

Transfers into Level 3 during 2011 and 2010 included situations where a fair value quote was not provided by the Company's independent third-party valuation service provider, and as a result the price was stale or had been replaced with a broker quote resulting in the security being classified as Level 3. Transfers out of Level 3 during 2011 and 2010, included situations where a broker quote was used in the prior period and a fair value quote became available from the Company's independent third-party valuations service provider in the current period. A quote utilizing the new pricing source was not available as of the prior period, and any gains or losses related to the change in valuation source for individual securities were not significant.

3. Transfers between level categorizations may occur due to changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity, trading volume or bid-ask spreads. Transfers between level categorizations may also occur due to changes in the valuation source. For example, in situations where a fair value quote is not provided by the Company's independent third-party valuation service provider and as a result, the price is stale or has been replaced with a broker quote, the security is transferred into Level 3. Transfers in and out of level categorizations are reported as having occurred at the beginning of the quarter in which the transfer occurred.
4. In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 and Level 3 valuations, a combination of the market and income approaches is used.

NOTES TO FINANCIAL STATEMENTS

Listed below is a summary of the significant valuation techniques for assets and liabilities measured and reported at fair value.

Level 2 measurements

Bonds

Municipal - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

Corporate, including privately placed - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Also included are privately placed securities valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer.

Residential mortgage-backed securities ("RMBS") - prime residential mortgage-backed securities ("Prime") and Alt-A residential mortgage-backed securities ("Alt-A"), asset-backed securities ("ABS")-auto and student loans and other - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads.

Unaffiliated common and preferred stocks - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

Derivatives - Exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives, including interest rate swap agreements, foreign exchange forward contracts, and certain credit default swap agreements, are valued using models that rely on inputs such as interest rate yield curves, currency rates, and counterparty credit spreads that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

Level 3 measurements

Bonds

Municipal - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields and credit spreads.

Corporate, including privately placed - Primarily valued based on non-binding broker quotes.

RMBS - Subprime residential mortgage-backed securities ("Subprime") - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. Also included are Subprime valued based on non-binding broker quotes. Due to the reduced availability of actual market prices or relevant observable inputs as a result of the decrease in liquidity that has been experienced in the market for these securities, Subprime are categorized as Level 3.

Commercial mortgage-backed securities ("CMBS") - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields, collateral performance and credit spreads. Also included are CMBS that are valued based on non-binding broker quotes. Due to the reduced availability of actual market prices or relevant observable inputs as a result of the decrease in liquidity that has been experienced in the market for these securities, certain CMBS are categorized as Level 3.

ABS - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. Also included are ABS that are valued based on non-binding broker quotes. Due to the reduced availability of actual market prices or relevant observable inputs as a result of the decrease in liquidity that has been experienced in the market for these securities, certain ABS are categorized as Level 3.

Preferred stocks - The primary inputs to the valuation included quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

Unaffiliated common stocks - Value based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Unobservable inputs reflect the Company's estimates of assumptions that market participants would use in valuing the asset.

Derivatives - Certain interest rate contracts are valued using models that are widely accepted in the financial services industry. These are categorized as Level 3 as a result of the significance of non-market observable inputs such as volatility. Other primary inputs include interest rate yield curves.

5. All information related to derivatives measured and reported at fair value is presented above.

B. Presented below are the statement values and fair value estimates of financial instruments:

Surplus notes of affiliates	\$ 585	\$ 591	\$ 575	\$ 591

The fair value of U.S. Treasury bonds is based on unadjusted quoted market prices for identical assets in active markets the Company can access. The fair value of all other publicly traded bonds, including loan-backed and structured securities, is based upon quoted market prices

NOTES TO FINANCIAL STATEMENTS

for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Non-publicly traded bonds, including loan-backed and structured securities, are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer.

The fair value of preferred stocks is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

The fair value of unaffiliated common stocks is based on unadjusted quoted market prices for identical assets in active markets the Company can access.

The fair value of mortgage loans on real estate is based on discounted contractual cash flows or if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics, using similar types of properties as collateral.

The fair value of cash equivalents and short-term investments is based on quoted market prices for identical or similar assets in markets that are not active or amortized cost.

Exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives are valued using models that are widely accepted in the financial services industry. Primary inputs include interest rate yield curves, currency rates and counterparty credit spreads.

The fair value of LIHTC property investments is based on amortized cost which approximates fair value.

The fair value of surplus notes of affiliates is based on discounted cash flow calculations using current interest rates for instruments with comparable terms.

Financial liabilities

Presented below are the statement values and fair value estimates of financial liabilities:

(in millions)	March 31, 2011		December 31, 2010	
	Statement Value	Fair Value	Statement Value	Fair Value
Derivatives	\$ 57	\$ 63	\$ 33	\$ 36
Derivatives collateral	\$ -	\$ -	\$ 19	\$ 19

The liabilities for derivatives collateral are valued at carrying value due to its short-term nature.

D. The Company was able to estimate the fair value of all its financial instruments in 2011 and 2010.

21. Other Items

G. Subprime Mortgage Related Risk Exposure

3. The Company’s direct exposure to other subprime investments is summarized as follows:

(in millions)	March 31, 2011		
	Actual Cost	Book/Adjusted Carrying Value	Fair Value
Type of Investment			
ABS RMBS	\$ 498	\$ 358	\$ 334
Other assets	65	80	80
Total	\$ 563	\$ 438	\$ 414

(in millions)	December 31, 2010		
	Actual Cost	Book/Adjusted Carrying Value	Fair Value
Type of Investment			
ABS RMBS	\$ 676	\$ 486	\$ 452
Other assets	65	76	76
Total	\$ 741	\$ 562	\$ 528

OTTI losses for the ABS RMBS portfolio were \$14 million and \$15 million for the three months ended March 31, 2011 and 2010, respectively.

In addition, the Company had Alt-A securities with the following actual cost, book/adjusted carrying value, fair value and OTTI losses:

(in millions)	March 31, 2011	December 31, 2010
Actual cost	\$ 198	\$ 203
Book/adjusted carrying value	\$ 162	\$ 164
Fair value	\$ 163	\$ 175

For the three months ended March 31, 2011 and 2010, OTTI losses for Alt-A portfolio were \$8 million \$20 million, respectively.

22. Events Subsequent

An evaluation of subsequent events was made through May 11, 2011 for the Quarterly Statement issued on May 13, 2011. There were no significant subsequent events requiring adjustment to or disclosure in the financial statements.

25. Changes in Incurred Losses and Loss Adjustment Expenses

For a summary of management’s policies and methodologies for estimating the liabilities for losses and loss adjustment expenses, please refer to this note in the December 31, 2010 Annual Statement.

NOTES TO FINANCIAL STATEMENTS

Activity in the reserve for losses and loss adjustment expenses was summarized as follows:

(in millions)	March 31, 2011	December 31, 2010
Balance at January 1	\$ 14,780	\$ 14,499
Incurred related to:		
Current year	4,089	17,404
Prior years	(44)	(95)
Total incurred	4,045	17,309
Paid related to:		
Current year	1,782	11,165
Prior years	2,360	5,863
Total paid	4,142	17,028
Ending balance	\$ 14,683	\$ 14,780

Incurred losses and loss adjustment expenses represent the sum of paid losses and reserve changes in the calendar year. This expense included net losses from catastrophes of \$330 million and \$2.15 billion for the first three months ended March 31, 2011 and the year ended December 31, 2010, respectively. Catastrophes are an inherent risk that have contributed to, and will continue to contribute to, material year-to-year fluctuations in the Company's net income and financial position.

The Company calculates and records a single best reserve estimate for losses from catastrophes, in conformity with generally accepted actuarial principles. As a result, management believes that no other estimate is better than the recorded amount. Due to the uncertainties involved, including the factors described above, the ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimates. Accordingly, management believes that it is not practicable to develop a meaningful range for such changes in losses incurred.

Incurred losses and loss adjustment expenses attributable to insured events of prior years were \$(44) million and \$(95) million as a result of the reestimation of unpaid losses and loss adjustment expenses for the three months ended March 31, 2011 and the year ended December 31, 2010, respectively. During the first three months of 2011, favorable development in incurred losses and loss adjustment expenses related prior years was primarily due to favorable prior year catastrophes. During 2010, favorable development in incurred losses and loss adjustment expenses related to prior years was primarily due to favorable prior year catastrophes and severity development that was better than expected, partially offset by litigation settlements. These changes were generally the result of ongoing analyses of recent loss development trends. Initial estimates were revised as additional information regarding claims became known.

Anticipated salvage and subrogation of \$517 million and \$552 million was included as a reduction of loss reserves at March 31, 2011 and December 31, 2010, respectively.

36. Financial Guaranty Insurance

B. The Company did not write financial guaranty insurance in 2011 or 2010.

(a)	Code	Financial or Economic Impact of the Hedge at the End of the Reporting Period
	0001	Interest rate payer swaption contracts provide an offset to declines in fixed income market values resulting from potential rising interest rates. Notional amount is equivalent to the hedged amount of par on fixed rate securities.
	0002	Interest rate swap effectively decreases duration of hedged fixed rate portfolio to the duration of an equivalent variable rate portfolio. Notional amount is equivalent to hedged amount of par on fixed rate portfolio.
	0003	Basis swap effectively converts variable rate LIBOR exposure to 7-day BMA index and is used in tandem with the pay fixed / receive float interest rate swaps to effectively hedge the muni bond portfolio against increasing interest rates. Notional amount is equivalent to amount of par on muni bonds.
	0004	Credit default swap effectively hedge credit risk exposure on the named debt security or related index or basket of debt securities. Notional amount is equivalent to hedged amount of par on debt security.
