Only material or significant changes from the Annual Statement have been updated for all other notes, or portions thereof.

1. Summary of Significant Accounting Policies

A. Allstate Insurance Company ("Company") prepares its financial statements in conformity with accounting practices prescribed or permitted by the Illinois Department of Insurance ("IL DOI"). Prescribed statutory accounting practices include a variety of publications of the National Association of Insurance Commissioners ("NAIC"), as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

The State of Illinois requires its domestic insurance companies to prepare financial statements in conformity with the NAIC Accounting Practices and Procedures Manual, which includes all Statements of Statutory Accounting Principles ("SSAPs"), subject to any deviations prescribed or permitted by the IL DOI.

5. Investments

D. Loan-Backed Securities

1. Prepayment assumptions for loan-backed and structured securities were obtained from external sources and internal estimates.
2. The table below presents the aggregate amortized cost of loan-backed and structured securities before recognized other-than-temporary impairment ("OTTI"), the amount of OTTI recognized and the fair value of those securities.

q. Annual Aggregate Total		<u>\$ 5</u>			<u>\$ 30</u>	

3. The following loan-backed and structured securities were other-than-temporarily impaired at the end of each quarter presented, as a result of the discounted present value of the cash flows expected to be collected being less than amortized cost. This includes any such impaired loan-backed and structured securities where there was also the intent to sell or the inability or lack of intent to retain the security for a period of time sufficient to recover the amortized cost basis.

4. The following table summarizes gross unrealized losses and the fair value of loan-backed and structured securities by the length of time the individual securities have been in a continuous unrealized loss position.

(in millions)		September 30, 2013	December 31, 2012
a. The aggregate amount of unrealized losses:			
1. Less than 12 months	\$	(10)	(2)
2. 12 months or longer	\$	(15)	(34)
b. The aggregate related fair value of securities with unrealized losses:			
1. Less than 12 months	\$	965	110
2. 12 months or longer	\$	136	335

5. Loan-backed and structured securities in an unrealized loss position were evaluated by the Company and were determined to be not other-than-temporarily impaired. The Company based its conclusions on actual and projected collateral losses relative to the securities' positions in the respective securitization trusts, security specific expectations of cash flows and credit ratings. This evaluation also takes into consideration credit enhancement, measured in terms of: (1) subordination from other classes of securities in the trust that are contractually obligated to absorb losses before the class of security the Company owns; (2) the expected impact of other structural features embedded in the securitization trust beneficial to the class of securities the Company owns, such as overcollateralization and excess spread; and (3) for residential mortgage-backed securities and asset backed securities in an unrealized loss position, credit enhancements from reliable bond insurers, where applicable.

NOTES TO FINANCIAL STATEMENTS

10. Information Concerning Parent, Subsidiaries, Affiliates and Other Related Parties

- A.,
B. &
C. The Company paid a total of \$1.75 billion cash dividends to its parent, Allstate Insurance Holdings, LLC (“AIH”), in the first nine months of 2013. See Note 13, Part 4 for details.

There were two advances made to the Company of \$500 million each by the Allstate Corporation under the Intercompany Liquidity Agreement to enhance investment returns. The first advance was made on March 22, 2013 at an interest rate of 0.32% and repaid April 30, 2013 with interest expense of \$177 thousand. The second advance was made on April 30, 2013 at an interest rate of 0.31% and repaid on June 7, 2013 with interest expense of \$161 thousand.

On June 19, 2013, with IL DOI approval, Allstate Life Insurance Company (“ALIC”) repaid the Company \$200 million of principal amount, which represented the remaining balance of the surplus note issued on November 17, 2008, as well as \$3 million of accrued interest.

There were no other transactions entered into by the Company with related parties in the first nine months of 2013 that involved more than ½ of 1% of the Company’s admitted assets. Activity resulting from reinsurance agreements, insurance contracts or cost allocation transactions in accordance with intercompany agreement provisions was excluded.

- L. At September 30, 2013, the Company utilized the look-through approach to determine the carrying value of its \$208 million investment in Current Creek Investments, LLC (“Current Creek”) and \$85 million investment in AP Real Estate, LLC (“AP Real Estate”). Current Creek and AP Real Estate are holding companies whose financial statements are not audited. Current Creek and AP Real Estate have invested in five joint ventures and two direct real estate properties, respectively. Each joint venture and the combined real estate properties prepare audited financial statements in conformity with accounting principles generally accepted in the U.S. The Company has limited its investments in Current Creek and AP Real Estate to the value contained in audited financial statements of its underlying assets as required by SSAP No. 97, *Investments in Subsidiary, Controlled and Affiliated Entities*. All liabilities, commitments, contingencies, guarantees and obligations of Current Creek and AP Real Estate, which are required to be recorded as liabilities, commitments, contingencies, guarantees and obligations under applicable accounting guidance, are reflected in the Company’s determination of the carrying value of Current Creek and AP Real Estate.
- The Company did not utilize the look-through approach in valuing its investments in downstream noninsurance holding companies at December 31, 2012.

12. Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Postretirement Benefit Plans

- A.
6. The Company was not a sponsor of defined benefit pension plans. The components of net periodic benefit cost for postretirement benefits for the nine months ended September 30 were as follows:

Credit guarantee related to certain bonds in which the Company is obligated to exchange credit risk or forfeit principal due, depending on the nature or occurrence of credit events for referenced entities.	\$ -	Bonds	\$ 1	Obligation associated with bonds expires on or before July 26, 2016.
The Company provides residual value guarantees on Company leased automobiles. The remaining term of each residual value guarantee is equal to the term of the underlying lease, which ranges from less than one to three years.	\$ 3	Expenses	\$ 41	Historically, there have not been any material payments pursuant to these guarantees.
The Company has certain limited rights and obligations under a capital support agreement ("Runoff Support Agreement") with PMI Mortgage Insurance Company ("PMI"), the primary operating subsidiary of PMI Group, related to the Company's disposition of PMI in prior years. Under the Runoff Support Agreement, the Company would be required to pay claims on PMI policies written prior to October 28, 1994, if PMI fails certain financial covenants and fails to pay such claims. The agreement only covers these policies and not any policies issued on or after that date. In the event any amounts are so paid, the Company would receive a commensurate amount of preferred stock or subordinated debt of PMI Group or PMI. The Runoff Support Agreement also restricts PMI's ability to write new business and pay dividends under certain circumstances.	\$ -	Paid losses	See ⁽²⁾ below	On October 20, 2011, the Director of the Arizona Department of Insurance took control of the PMI insurance companies; effective October 24, 2011, the Director instituted a partial claim payment plan: claim payments will be made at 50%, with the remaining amount deferred as a policyholder claim. The effect of these developments to the Company is uncertain. The Company has not received any notices or requests for payments under this agreement. Management does not believe these developments will have a material effect on the net income, cash flows or financial position of the Company.
With affiliates				
The Company and ALIC entered into the ALIC Agreement effective December 14, 2007. Under the ALIC Agreement, the Company agrees to provide capital and surplus to ALIC in order for ALIC to maintain a company action level risk-based capital ratio of at least 150%.	\$ See ⁽¹⁾ below	Investment in common stock of ALIC	\$ 1,000	Since the inception of the ALIC Agreement, no capital has been provided by the Company.
The Company and Allstate Financial Services, LLC ("AFS") entered into a Capital Support Agreement ("AFS Agreement") effective December 31, 2003. Under the AFS Agreement, the Company agrees to provide capital contributions as necessary to enable AFS to maintain net capital of at least \$10 million at all times.	\$ See ⁽¹⁾ below	Investment in common stock of AFS	\$ Unlimited	At December 31, 2012, AFS had capital of \$19 million. The Company's last payment pursuant to the AFS Agreement was \$13 million in 2004.

⁽¹⁾ Guarantees made to/or on behalf of a wholly-owned subsidiary and intercompany and related party guarantees are not required to record a liability in accordance with SSAP 5R, *Liabilities, Contingencies and Impairments of Assets*.

⁽²⁾ The maximum amount of future payments is the amount of claim payments on PMI policies written prior to October 28, 1994 that PMI fails to pay. The Company does not have access to information to develop an estimate at this time.

Legal and regulatory proceedings and inquiries

Claims related proceedings

Allstate is vigorously defending a class action lawsuit in Montana state court challenging aspects of its claim handling practices in Montana. The plaintiff alleges that the Company adjusts claims made by individuals who do not have attorneys in a manner that unfairly resulted in lower payments compared to claimants who were represented by attorneys. In January 2012, the court certified a class of Montana claimants who were not represented by attorneys with respect to the resolution of auto accident claims. The court certified the class to cover an indefinite period that commences in the mid-1990's. The certified claims include claims for declaratory judgment, injunctive relief and punitive damages in an unspecified amount. Injunctive relief may include a claim process by which unrepresented claimants could request that their claims be readjusted. No compensatory damages are sought on behalf of the class. The Company appealed the order certifying the class. In August 2013, the Montana Supreme Court affirmed in part, and reversed in part, the lower court's order granting plaintiff's motion for class certification and remanded the case for trial. The Company petitioned for rehearing of the Montana Supreme Court's decision, which the Court denied. To date no discovery has occurred related to the potential value of the class members' claims. The Company has asserted various defenses with respect to the plaintiff's claims, which have not been finally resolved. In the Company's judgment, a loss is not probable.

20. Fair Value Measurements

- A. Fair value is defined, per SSAP 100, *Fair Value Measurements* ("SSAP No. 100"), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP No. 100 identified three valuation techniques which are used, either independently or in combination, to determine fair value: (1) market approach; (2) income approach; and (3) cost approach. SSAP No. 100 also contains guidance about observable and unobservable inputs, which are assumptions that market

NOTES TO FINANCIAL STATEMENTS

participants would use in pricing an asset or liability. To increase consistency and comparability in fair value measurements, the fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels: 1, 2 and 3. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available.

The Company has two types of situations where investments are classified as Level 3. The first is where quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources. The second situation is where specific inputs significant to the fair value estimation models are not market observable. This primarily occurs in the Company's use of broker quotes to value certain securities where the inputs have not been corroborated to be market observable, and the use of valuation models that use significant non-market observable inputs.

Transfers into Level 3 during 2013 and 2012 included securities where assets were measured at lower of cost or market and reported at fair value in 2013 and 2012 and at cost in 2012 and 2011. In addition, transfers into Level 3 during 2012 included situations where there was a change in the NAIC designation that resulted in the asset being reported and measured at fair value.

Transfers out of Level 3 during 2013 and 2012 included situations where assets were measured at lower of cost or market were reported at cost in 2013 and 2012 and fair value in 2012 and 2011. Transfers out of Level 3 during 2013 included situations where there was a change in the NAIC designation that resulted in the asset not being reported and measured at fair value. In addition, transfers out of Level 3 during 2012 included situations where a broker quote was used in the prior period and a fair value quote became available from

NOTES TO FINANCIAL STATEMENTS

the Company's independent third-party valuation service provider in the current period. A quote utilizing the new pricing source was not available as of the prior period, and any gains and losses related to the change in valuation source for individual securities were not significant.

3. Transfers between level categorizations may occur due to changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity, trading volume or bid-ask spreads. Transfers between level categorizations may also occur due to changes in the valuation source. For example, in situations where a fair value quote is not provided by the Company's independent third-party valuation service provider and as a result, the price is stale or has been replaced with a broker quote, whose inputs have not been corroborated to be market observable, the security is transferred into Level 3. Transfers in and out of level categorizations are reported as having occurred at the beginning of the quarter in which the transfer occurred.
4. In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 and Level 3 valuations, a combination of the market and income approaches is used.

Listed below is a summary of the significant valuation techniques for assets and liabilities measured and reported at fair value.

Level 2 measurements

Bonds - Industrial and miscellaneous and U.S. special revenue and special assessment obligations bonds consist of corporate bonds, including those that are privately placed, municipal bonds, residential ("RMBS") and commercial mortgage backed securities ("CMBS") and asset-backed securities ("ABS"). The primary inputs to the valuation for corporate bonds, including those that are privately placed include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Also included are privately placed securities valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The primary inputs to the valuation for municipal bonds include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. The primary inputs to the valuation for CMBS include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, collateral performance and credit spreads. The primary inputs to the valuation for RMBS and ABS include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. Certain ABS are valued based on non-binding broker quotes whose inputs have been corroborated to be market observable.

Unaffiliated common and preferred stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

Derivatives - Free-standing exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives, including certain credit default swap agreements, are valued using models that rely on inputs such as interest rate yield curves, currency rates, and counterparty credit spreads that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

Level 3 measurements

Bonds - Industrial and miscellaneous, U.S. special revenue and special assessment obligations and U.S. political subdivisions of states territories and possessions bonds consist of corporate bonds, including those that are privately placed, municipal bonds, CMBS and ABS. Corporate bonds, including those that are privately placed are valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Municipal bonds consist of auction rate securities primarily backed by student loans that have become illiquid due to failures in the auction market are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses significant non-market observable inputs, including the anticipated date liquidity will return to the market. Also included are municipal bonds that are not rated by third party credit rating agencies but are rated by the NAIC. The primary inputs to the valuation of these municipal bonds include quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields and credit spreads. CMBS and ABS are valued based on non-binding broker quotes received from brokers who are familiar with the investments and where the inputs have not been corroborated to be market observable.

Unaffiliated common stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 measurements.

The fair value of U.S. Treasury bonds in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of all other publicly traded bonds in Level 2, including loan-backed and structured securities, is based upon quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. Non-publicly traded bonds in Level 2, including loan-backed and structured securities, are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The fair value of municipal bonds in Level 3 is based on quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields and credit spreads. The fair value of all other bonds, including loan-backed and structured securities in Level 3 is primarily based on non-binding broker quotes where the inputs have not been corroborated to be market observable.

The fair value of preferred stocks in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

The fair value of unaffiliated common stocks in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of unaffiliated common stocks in Levels 2 and 3 is based on a combination of quoted prices of identical or similar assets in markets that are not active and prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Unobservable inputs reflect the Company's estimates of assumptions that market participants would use in valuing the asset.

The fair value of mortgage loans on real estate in Level 3 is based on discounted contractual cash flows, or if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics, using similar types of properties as collateral.

The fair value of cash equivalents and short-term investments in Level 1 is based on quoted prices or net asset values for identical assets in active markets the Company can access. The fair value of cash equivalents in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads or amortized cost.

The fair value of free-standing exchange listed derivatives in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of derivatives in Level 2 is based on the valuation methods described in Part A4 of this note.

The fair value of LIHTC property investments in Level 3 is based on amortized cost which approximates fair value.

The fair value of surplus notes of affiliates and collateral loans in Level 3 is based on discounted cash flow calculations using current interest rates for instruments with comparable terms.

The fair value of the reinvested collateral from securities lending in Level 2 is based on carrying value due to its short-term nature.

D. The Company was able to estimate the fair value of all its financial instruments in 2013 and 2012.

21. Other Items

C. Other Disclosures

On July 17, 2013, the Company's wholly-owned subsidiary, ALIC, entered into a definitive agreement with Resolution Life Holdings, Inc., and Resolution Life L.P., both unaffiliated entities, to sell all of the outstanding shares of Lincoln Benefit Life Company ("LBL"), a Nebraska domiciled insurance company, for \$600 million subject to certain adjustments as of the closing date. Prior to closing of the sale, LBL business written through independent master brokerage agencies, totaling approximately \$12 billion of total policy reserves, and ceded to ALIC will be commuted. An estimated \$3 billion of LBL's total policy reserves will continue to be reinsured by ALIC. An after-tax gain on this transaction is estimated to be \$350 million to \$400 million, and will increase The Allstate Corporation's deployable capital by approximately \$1 billion. The

NOTES TO FINANCIAL STATEMENTS

transaction is subject to regulatory approvals and other customary closing conditions. The Company expects the closing to occur during the first quarter of 2014.

Currently, ALIC will not be able to pay dividends to the Company in 2013 without prior IL DOI approval due to its negative unassigned surplus balance excluding unrealized appreciation from investments. At December 31, 2012 ALIC's negative unassigned surplus balance was \$675 million, excluding unrealized appreciation from investments. The sale of LBL is expected to reduce the negative unassigned surplus balance, excluding unrealized appreciation from investments, in the range of approximately \$425 million to \$475 million. ALIC also can repurchase its shares and return capital to the Company with the approval of the IL DOI.

22. Events Subsequent
An evaluation of subsequent events was made through November 11, 2013 for the Quarterly Statement issued on November 13, 2013. There were no other significant subsequent events requiring adjustment to or disclosure in the financial statements.

23. Reinsurance

A. Unsecured Reinsurance Recoverables

The Company had the following unsecured reinsurance recoverables that exceeded 3% of the Company's policyholders surplus:

(\$ in millions)	NAIC Group Code	FEIN	September 30, 2013	December 31, 2012
Reinsurer				
Michigan Catastrophic Claim Association	0000	AA-9991159	\$ 1,816	\$ 1,805
National Flood Insurance Program	0000	AA-9992201	\$ 225	\$ 513

25. Changes in Incurred Losses and Loss Adjustment Expenses

For a summary of management's policies and methodologies for estimating the liabilities for losses and loss adjustment expenses, please refer to this note in the Annual Statement.

Activity in the reserve for losses and loss adjustment expenses was summarized as follows:

(in millions)	September 30, 2013	December 31, 2012
Balance at January 1	\$ 14,499	\$ 15,084
Incurred related to:		
Current year	12,502	17,173
Prior years	29	(527)
Total incurred	12,531	16,646
Paid related to:		
Current year	7,727	11,527
Prior years	4,696	5,704
Total paid	12,423	17,231
Balance	\$ 14,607	\$ 14,499

Incurred losses and loss adjustment expenses represent the sum of paid losses and reserve changes in the calendar year. This expense included net losses from catastrophes of \$1.13 billion and \$2.06 billion for the first nine months of 2013 and the year ended December 31, 2012, respectively. Catastrophes are an inherent risk that have contributed to, and will continue to contribute to, material year-to-year fluctuations in the Company's net income and financial position.

The Company calculates and records a single best reserve estimate for losses from catastrophes, in conformity with generally accepted actuarial principles. As a result, management believes that no other estimate is better than the recorded amount. Due to the uncertainties involved, including the factors described above, the ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimates. Accordingly, management believes that it is not practicable to develop a meaningful range for such changes in losses incurred.

Incurred losses and loss adjustment expenses attributable to insured events of prior years were \$29 million and \$(527) million as a result of the reestimation of unpaid losses and loss adjustment expenses for the first nine months of 2013 and the year ended December 31, 2012, respectively. During the first nine months of 2013 and the year ended December 31, 2012, development in incurred losses and loss adjustment expenses related to prior years was primarily due to favorable prior year catastrophes. These changes were generally the result of ongoing analyses of recent loss development trends. Initial estimates were revised as additional information regarding claims became known.

Anticipated salvage and subrogation of \$536 million and \$512 million was included as a reduction of loss reserves at September 30, 2013 and December 31, 2012, respectively.

36. Financial Guaranty Insurance

The Company did not write financial guaranty insurance in 2013 or 2012.
