NOTES TO FINANCIAL STATEMENTS

Notes required on a quarterly basis have been updated. There have been no material changes to the following December 31, 2014 Annual Statement notes: 1(B), 2-4, 5(A-C, F-H, K), 6-8, 9(B, E-G), 10(D-L), 11(A), 12(B-I), 13(1-3, 5-13), 14(A-F), 15, 17(A), 18, 19, 21(A-F), 23, 24(A-E) and 26-35. Only material or significant changes from the Annual Statement have been updated for all other notes, or portions thereof.

1. Summary of Significant Accounting Policies

- A. Allstate Insurance Company (“Company” or “Allstate”) prepares its financial statements in conformity with accounting practices prescribed or permitted by the Illinois Department of Insurance (“IL DOI”). Prescribed statutory accounting practices include a variety of publications of the National Association of Insurance Commissioners (“NAIC”), as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

The State of Illinois requires its domestic insurance companies to prepare financial statements in conformity with the NAIC Accounting Practices and Procedures Manual, which includes all Statements of Statutory Accounting Principles (“SSAPs”), subject to any deviations prescribed or permitted by the IL DOI.

The Company’s net income and capital and surplus did not include any accounting practices prescribed or permitted by the IL DOI during 2015 and 2014.

C. Investments

Loan-backed and structured securities (“LBASS”) with a NAIC designation of 1 or 2 are reported at amortized cost using the effective yield method. LBASS with a NAIC designation of 3 through 6 are reported at the lower of amortized cost or fair value, with the difference reflected in unassigned surplus as unrealized capital loss. In general, LBASS utilize a multi-step process for determining carrying value and NAIC designation in accordance with SSAP No. 43R, *Loan-backed and Structured Securities*. For LBASS that are purchased with high credit quality and fixed interest rates, the effective yield is recalculated on a retrospective basis. For all other LBASS, the effective yield is recalculated on a prospective basis.

4. Unrealized losses are calculated as the difference between amortized cost and fair value. They result from declines in fair value below amortized cost and are evaluated for OTTI. Every LBASS with unrealized losses was included in the portfolio monitoring process.

The following table summarizes gross unrealized losses and the fair value of LBASS by the length of time the individual securities have been in a continuous unrealized loss position.

(in millions)		September 30, 2015	December 31, 2014
a. The aggregate amount of unrealized losses:			
1. Less than 12 months	\$	(7)	\$ (7)
2. 12 months or longer	\$	(5)	\$ (6)
b. The aggregate related fair value of securities with unrealized losses:			
1. Less than 12 months	\$	340	\$ 1,110
2. 12 months or longer	\$	255	\$ 289

5. As of September 30, 2015, the aggregate amount of unrealized losses related to LBASS was \$12 million. Of the \$12 million of unrealized losses, \$8 million related to LBASS with an unrealized loss position less than 20% of amortized cost, the degree of which suggests these securities did not pose a high risk of being other than temporarily impaired. Of the \$8 million, \$6 million were related to unrealized losses on investment grade LBASS. Investment grade is defined as a security having an NAIC designation 1 or 2; a rating of Aaa, Aa, A or Baa from Moodys; a rating of AAA, AA, A or BBB from Standard & Poors, Fitch, Dominion, Kroll, Realpoint or Egan Jones; a rating of aaa, aa, a or bbb from A.M. Best; or a comparable internal rating if an externally provided rating is not available. Unrealized losses on investment grade securities are principally related to increasing risk-free interest rates or widening credit spreads since the time of initial purchase.

As of September 30, 2015, the remaining \$4 million unrealized losses were related to LBASS in unrealized loss positions greater than or equal to 20% of amortized cost and related to below investment grade LBASS. Unrealized losses on below investment grade securities were the result of wider credit spreads resulting from higher risk premiums since the time of initial purchase. These wider spreads are largely due to the risk associated with the underlying collateral supporting certain LBASS.

LBASS in an unrealized loss position were evaluated based on actual and projected collateral losses relative to the securities' positions in the respective securitization trusts, security specific expectations of cash flows and credit ratings. This evaluation also takes into consideration credit enhancement, measured in terms of: (1) subordination from other classes of securities in the trust that are contractually obligated to absorb losses before the class of security the Company owns; (2) the expected impact of other structural features embedded in the securitization trust beneficial to the class of securities the Company owns, such as overcollateralization and excess spread; and (3) for certain LBASS in an unrealized loss position, credit enhancements from reliable bond insurers, where applicable.

As of September 30, 2015, the Company had not made a decision to sell and it was not more likely than not the Company would be required to sell these securities with unrealized losses before recovery of the amortized cost basis. As of September 30, 2015 the Company had the intent and ability to hold LBASS with unrealized losses for a period of time sufficient for them to recover.

I. Working Capital Finance Investments

The Company did not hold working capital finance investments as of September 30, 2015 or December 31, 2014.

J. Offsetting and Netting of Assets and Liabilities

None of the Company's derivative transactions or securities lending agreements contains a valid right to offset assets and liabilities per the requirements of SSAP No. 64, *Offsetting and Netting of Assets and Liabilities*. The Company does not enter into repurchase, reverse repurchase or securities borrowing agreements.

Legal and regulatory proceedings and inquiries

Claims related proceedings

The Florida Personal Injury Protection (“PIP”) statute permits insurers to pay Florida PIP benefits for reasonable medical expenses based on certain benefit reimbursement limitations which are authorized by the PIP statute (generally referred to as “fee schedules”) resulting from automobile accidents. The Company is litigating two class action cases in federal courts in Florida and Illinois in which the plaintiffs allege that Allstate’s PIP policies failed to include sufficient language providing notice of Allstate’s election to apply the fee schedules. These cases are brought on behalf of health care providers and insureds who submitted claims for no-fault benefits under PIP policies which were in effect from 2008 through 2012 and were reimbursed based on the fee schedules. They seek a declaratory judgment that Allstate could not properly apply the fee schedules and seek damages for the difference between what they allege are the reasonable medical expenses payable under the PIP coverage and the fee schedule amounts Allstate actually paid. They also seek recovery of attorneys’ fees and costs pursuant to Florida statutes. In the Florida case, the court granted summary judgment in favor of Allstate on February 13, 2015, holding that Allstate’s language provided sufficient notice of an election to apply the fee schedules. Plaintiff has appealed that ruling to the 11th Circuit Court of Appeals. Plaintiff’s brief is due November 8, 2015. The Illinois case has been stayed by the Illinois federal court pending the outcome of several Florida state court appeals. This fee schedule issue has been the subject of thousands of individual lawsuits filed against Allstate in Florida county courts. Four of those matters are on appeal to the Florida District Courts of Appeals. On March 18, 2015, the District Court of Appeal for the First District unanimously reversed a summary judgment that had been entered against Allstate, holding that Allstate’s language was clear and unambiguous and provided adequate notice of its intent to use the fee schedules. The plaintiffs’ appeal to the Florida Supreme Court is pending. On August 19, 2015, the District Court of Appeal for the Fourth District issued a divided decision (three separate opinions, two against Allstate and one dissenting opinion deeming Allstate’s language sufficient), holding that Allstate’s language was not sufficient. The District Court of Appeal for the Fourth District has certified that its decision is in direct conflict with the District Court of Appeal for the First District’s decision. Allstate’s motion for rehearing of the District Court of Appeal for the Fourth District’s decision is pending. In the District Court of Appeal for the Second District, the court heard oral argument on September 22, 2015, and has taken the matter under advisement. In the District Court of Appeal for the Third District, briefing has just commenced on this issue. In the Company’s judgment, a loss is not probable.

The Company is defending certain matters in the U.S. District Court for the Eastern District of Pennsylvania relating to the Company’s agency program reorganization announced in 1999. The current focus in these matters relates to a release of claims signed by the vast majority of the former agents whose employment contracts were terminated in the reorganization program. These matters include the following:

- Romero I*: In 2001, approximately 32 former employee agents, on behalf of a putative class of approximately 6,300 former employee agents, filed a putative class action alleging claims for age discrimination under the Age Discrimination in Employment Act (“ADEA”), interference with benefits under ERISA, breach of contract, and breach of fiduciary duty. Plaintiffs also assert a claim for a declaratory judgment that the release of claims constitutes unlawful retaliation and should be set aside. Plaintiffs seek broad but unspecified “make whole relief,” including back pay, compensatory and punitive damages, liquidated damages, lost investment capital, attorneys’ fees and costs, and equitable relief, including reinstatement to employee agent status with all attendant benefits.
- Romero II*: A putative nationwide class action was also filed in 2001 by former employee agents alleging various violations of ERISA (“*Romero II*”). This action has been consolidated with *Romero I*. The *Romero II* plaintiffs, most of whom are also plaintiffs in *Romero I*, are challenging certain amendments to the Agents Pension Plan and seek to have service as exclusive agent independent contractors count toward eligibility for benefits under the Agents Pension Plan. Plaintiffs seek broad but unspecified “make whole” or other equitable relief, including loss of benefits as a result of their conversion to exclusive agent independent contractor status or retirement from the Company between November 1, 1999 and December 31, 2000. They also seek repeal of the challenged amendments to the Agents Pension Plan with all attendant benefits revised and recalculated for thousands of former employee agents, and attorneys’ fees and costs. The court granted the Company’s initial motion to dismiss the complaint. The Third Circuit Court of Appeals reversed that dismissal and remanded for further proceedings.
- Romero I and II consolidated proceedings*: In 2004, the court ruled that the release was voidable and certified classes of agents, including a mandatory class of agents who had signed the release, for purposes of effectuating the court’s declaratory judgment that the release was voidable. In 2007, the court vacated its ruling and granted the Company’s motion for summary judgment on all claims. Plaintiffs appealed and in July 2009, the U.S. Court of Appeals for the Third Circuit vacated the trial court’s entry of summary judgment in the Company’s favor, remanded the case to the trial court for additional discovery, and instructed the trial court to first address the validity of the release after additional discovery. Following the completion of discovery limited to the validity of the release, the parties filed cross motions for summary judgment with respect to the validity of the release. On February 28, 2014, the trial court denied plaintiffs’ and the Company’s motions for summary judgment, concluding that the question of whether the releases were knowingly and voluntarily signed under a totality of circumstances test raised disputed issues of fact to be resolved at trial. Among other things, the court also held that the release, if valid, would bar all claims in *Romero I and II*. On May 23, 2014, plaintiffs moved to certify a class as to certain issues relating to the validity of the release. The court denied plaintiffs’ class certification motion on October 6, 2014, stating, among other things, that individual factors and circumstances must be considered to determine whether each release signer entered into the release knowingly and voluntarily. The court entered an order on December 11, 2014, (a) stating that the court’s October 6, 2014 denial of class certification as to release-related issues did not resolve whether issues relating to the merits of plaintiffs’ claims may be subject to class certification at a later time, and (b) holding that the court’s October 6, 2014 order restarted the running of the statute of limitation for any former employee agent who wished to challenge the validity of the release. In an order entered January 7, 2015, the court denied reconsideration of its December 11, 2014 order and clarified that all statutes of limitations to challenge the release would resume running on March 2, 2015. Since the Court’s January 7 order, a total of 459 additional individual plaintiffs have filed separate lawsuits similar to *Romero I* or sought to intervene in the *Romero I* action. Trial proceedings have commenced to determine the question of whether the releases of the original named plaintiffs in *Romero I* and *II* were knowingly and voluntarily signed. The first trial of ten plaintiffs was completed on June 17, 2015, with the jury reaching verdicts finding that two plaintiffs signed their releases knowingly and voluntarily and eight plaintiffs did not sign their releases knowingly and voluntarily. This result is not yet final and may be subject to further proceedings. The remaining two trials for the original *Romero I* and *II* plaintiffs were

NOTES TO FINANCIAL STATEMENTS

scheduled to commence in the fourth quarter of 2015; however these trials have been postponed. The current judge is retiring and a new judge will be assigned. No new trial dates have been set and no other trials are currently scheduled. The Court has not yet addressed a schedule for deciding the validity of the release signed by the new plaintiffs.

Based on the trial court’s February 28, 2014 order in *Romero I* and *II*, if the validity of the release is decided in favor of the Company for any plaintiff, that would preclude any damages or other relief being awarded to that plaintiff. If the validity of the release is decided in favor of a plaintiff, further proceedings with respect to the merits of that plaintiff’s claims relating to the reorganization would have to occur before there could be any determination of liability or award of damages in either *Romero I* or *Romero II*. The final resolution of these matters is subject to various uncertainties and complexities including how individual trials, post trial motions and possible appeals with respect to the validity of the release will be resolved. Depending upon how these issues are resolved, the Company may or may not have to address the merits of plaintiffs’ claims relating to the reorganization and amendments to the Agents Pension Plan described herein. In the Company’s judgment, a loss is not probable.

20. Fair Value Measurements

- A. Fair value is defined, per SSAP No. 100, *Fair Value Measurements* (“SSAP No. 100”), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP No. 100 identified three valuation techniques which are used, either independently or in combination, to determine fair value: (1) market approach; (2) income approach; and (3) cost approach. SSAP No. 100 also contains guidance about observable and unobservable inputs, which are assumptions that market participants would use in pricing an asset or liability. To increase consistency and comparability in fair value measurements, the fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels: 1, 2 and 3. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available.

The Company has two types of situations where investments are classified as Level 3. The first is where specific inputs significant to the fair value estimation models are not market observable. This primarily occurs in the Company’s use of broker quotes to value certain securities where the inputs have not been corroborated to be market observable, and the use of valuation models that use significant non-market observable inputs. The second situation where the Company classifies securities in Level 3 is where quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources.

Transfers into Level 3 during 2015 and 2014 included securities measured at lower of cost or market and reported at fair value in 2015 and 2014, and at cost in 2014 and 2013. In addition, transfers into Level 3 during 2015 and 2014 included situations where there was a change in the NAIC designation that resulted in the asset being reported and measured at fair value. Also, transfers into Level 3 during 2015 included situations where a broker quote is used in the current period and a fair value quote was available from the Company's independent third-party valuation service provider in the prior period. A quote utilizing the new pricing source was not available as of the current period, and any gains and losses related to the change in valuation source for individual securities were not significant.

Transfers out of Level 3 during 2015 and 2014 included securities measured at lower of cost or market and reported at cost in 2015 and 2014, and fair value in 2014 and 2013. In addition, transfers out of Level 3 during 2015 included situations where there was a change in the NAIC designation that resulted in the asset not being reported and measured at fair value. Transfers out of Level 3 during 2015 and 2014 included situations where a broker quote was used in the prior period and a fair value quote became available from the Company's independent third-party valuation service provider in the current period. A quote utilizing the new pricing source was not available as of the prior period, and any gains and losses related to the change in valuation source for individual securities were not significant.

3. Transfers between level categorizations may occur due to changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity, trading volume or bid-ask spreads. Transfers between level categorizations may also occur due to changes in the valuation source. For example, in situations where a fair value quote is not provided by the Company's independent third-party valuation service provider and as a result, the price is stale or has been replaced with a broker quote, whose inputs have not been corroborated to be market observable, the security is transferred into Level 3. Transfers in and out of level categorizations are reported as having occurred at the beginning of the quarter in which the transfer occurred.
4. In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 and Level 3 valuations, a combination of the market and income approaches is used.

Listed below is a summary of the significant valuation techniques for assets and liabilities measured and reported at fair value.

Level 2 measurements

Bonds - Industrial and miscellaneous bonds consist of corporate bonds, including those that are privately placed, commercial mortgage-backed securities and asset-backed securities. The primary inputs to the valuation for corporate bonds, including those that are privately placed include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Also included are privately placed securities valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The primary inputs to the valuation for residential mortgage-backed securities and asset-backed securities include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. Certain asset-backed securities are valued based on non-binding broker quotes whose inputs have been corroborated to be market observable.

NOTES TO FINANCIAL STATEMENTS

Hybrid bonds consist of corporate bonds. The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

Unaffiliated common and preferred stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

Derivatives - Free-standing exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives, including certain interest rate and foreign currency swap agreements, foreign exchange forward contracts and certain credit default swap agreements, are valued using models that rely on inputs such as interest rate yield curves, currency rates and counterparty credit spreads that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

Level 3 measurements

Bonds - Industrial and miscellaneous bonds consist of corporate bonds, including those that are privately placed, bank loans, commercial mortgage-backed securities and asset-backed securities. Corporate bonds, including those that are privately placed are valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Commercial mortgage-backed securities and asset-backed securities are valued based on non-binding broker quotes received from brokers who are familiar with the investments and where the inputs have not been corroborated to be market observable.

U.S. special revenue and special assessment obligations bonds consist of municipal bonds that are not rated by third party credit rating agencies but receive a NAIC designation and auction rate securities. The significant valuation techniques for these securities are explained above in the Level 3 industrial and miscellaneous bond paragraph.

U.S. political subdivisions of states, territories and possessions bonds also consist of municipal bonds that are not rated by third party credit rating agencies but are rated by the NAIC and auction rate securities. The significant valuation techniques for these securities are explained above in the Level 3 industrial and miscellaneous bond paragraph.

Perpetual preferred stocks - The primary inputs to the valuation include non-binding broker quotes where the inputs have not been corroborated to be market observable.

Unaffiliated common stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 measurements.

The fair value of U.S. Treasury bonds and exchange traded funds in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of publicly traded bonds in Level 2, including LBASS, is based upon quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. Non-publicly traded bonds in Level 2, including LBASS, are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The fair value of municipal bonds in Level 3 is

NOTES TO FINANCIAL STATEMENTS

based on quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields and credit spreads. The fair value of all other bonds, including LBASS in Level 3 is primarily based on non-binding broker quotes where the inputs have not been corroborated to be market observable.

The fair value of preferred stocks in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads. The fair value of preferred stocks in Level 3 is based on primary inputs including quoted prices or net asset values for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 measurements.

The fair value of unaffiliated common stocks in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of unaffiliated common stocks in Levels 2 and 3 is based on the valuation methods described in Part A4 of this note.

The fair value of mortgage loans on real estate in Level 3 is based on discounted contractual cash flows, or if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics, using similar types of properties as collateral.

The fair value of cash equivalents in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads or amortized cost.

The fair value of short-term investments in Level 1 is based on quoted prices or net asset values for identical assets in active markets the Company can access. The fair value of short-term investments in Level 3 is based on amortized cost which approximates fair value and is in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements.

The fair value of free-standing exchange listed derivatives in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of derivatives in Level 2 is based on the valuation methods described in Part A4 of this note.

The fair value of LIHTC property investments in Level 3 is based on amortized cost, using the proportional amortization method, which approximates fair value.

The fair value of affiliated surplus notes in Level 3 is based on discounted cash flow calculations using current interest rates for instruments with comparable terms.

The fair value of the collateral related to derivatives and reinvested collateral from securities lending in Level 2 is based on carrying value due to its short-term nature.

The fair value of the liabilities for collateral related to securities lending in Level 2 is based on carrying value due to its short-term nature.

The fair value of free-standing exchange listed derivatives in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of derivatives in Level 2 is based on the valuation methods described in Part A4 of this note.

D. The Company was able to estimate the fair value of all its financial instruments in 2015 and 2014.

22. Events Subsequent

An evaluation of subsequent events was made through November 11, 2015 for the Quarterly Statement issued on November 13, 2015. There were no significant subsequent events requiring adjustment to or disclosure in the financial statements.

24. Retrospectively Rated Contracts and Contracts Subject to Redetermination

F. Risk Sharing Provisions of the Affordable Care Act ("ACA")

The Company is not subject to the risk sharing provisions of the ACA.

25. Changes in Incurred Losses and Loss Adjustment Expenses

For a summary of management's policies and methodologies for estimating the liabilities for losses and loss adjustment expenses, please refer to this note in the Annual Statement.

Activity in the reserve for losses and loss adjustment expenses was summarized as follows:

(in millions)	2015	2014
Balance as of January 1	\$ 14,665	\$ 14,553
Incurred related to:		
Current year	14,320	17,682
Prior years	152	(12)
Total incurred	14,472	17,670
Paid related to:		
Current year	8,772	11,777
Prior years	4,963	5,781
Total paid	13,735	17,558
Balance	\$ 15,402	\$ 14,665

Incurred losses and loss adjustment expenses represent the sum of paid losses and reserve changes in the calendar year. This expense included net losses from catastrophes of \$1.34 billion and \$1.95 billion for the nine months ended September 30, 2015 and the year ended December 31,

NOTES TO FINANCIAL STATEMENTS

2014, respectively. Catastrophes are an inherent risk that have contributed to, and will continue to contribute to, material year-to-year fluctuations in the Company's net income and financial position.

The Company calculates and records a single best reserve estimate for losses from catastrophes, in conformity with generally accepted actuarial principles. As a result, management believes that no other estimate is better than the recorded amount. Due to the uncertainties involved, including the factors described above, the ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimates. Accordingly, management believes that it is not practicable to develop a meaningful range for such changes in losses incurred.

Incurred losses and loss adjustment expenses attributable to insured events of prior years were \$152 million and \$(12) million as a result of the reestimation of unpaid losses and loss adjustment expenses for the nine months ended September 30, 2015 and the year ended December 31, 2014, respectively. These changes were generally the result of ongoing analyses of recent loss development trends. Initial estimates were revised as additional information regarding claims became known.

Anticipated salvage and subrogation of \$660 million and \$602 million was included as a reduction of loss reserves as of September 30, 2015 and December 31, 2014, respectively.

36. Financial Guaranty Insurance

The Company did not write financial guaranty insurance in 2015 or 2014.
