NOTES TO FINANCIAL STATEMENTS

Notes required on a quarterly basis have been updated in their entirety. There have been no material changes to the following December 31, 2015 Annual Statement notes: 1(B), 2-4, 5(A-C, F, G, K), 6-8, 9(B, E-G), 10(D, E, G-N), 11(A), 12(B-I), 13(1-3, 5-9, 11-13), 14(B-F), 15, 17(A), 18, 19, 21, 23(B-J), 24(A, B, D, E) and 26-35. Only material or significant changes from the Annual Statement have been updated for all other notes, or portions thereof.

1. Summary of Significant Accounting Policies

- A. Allstate Insurance Company (the “Company” or “Allstate”) prepares its financial statements in conformity with accounting practices prescribed or permitted by the Illinois Department of Insurance (“IL DOI”). Prescribed statutory accounting practices include a variety of publications of the National Association of Insurance Commissioners (“NAIC”), as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

The State of Illinois requires its domestic insurance companies to prepare financial statements in conformity with the NAIC Accounting Practices and Procedures Manual, which includes all Statements of Statutory Accounting Principles (“SSAPs”), subject to any deviations prescribed or permitted by the IL DOI.

The Company’s net income and capital and surplus did not include any accounting practices prescribed or permitted by the IL DOI during 2016 and 2015.

C. Investments

Loan-backed and structured securities (“LBASS”) with a NAIC designation of 1 or 2 are reported at amortized cost using the effective yield method. LBASS with a NAIC designation of 3 through 6 are reported at the lower of amortized cost or fair value, with the difference reflected in unassigned surplus as unrealized capital loss. In general, LBASS utilize a multi-step process for determining carrying value and NAIC designation in accordance with SSAP No. 43R, *Loan-backed and Structured Securities*. For LBASS that are purchased with high credit quality and fixed interest rates, the effective yield is recalculated on a retrospective basis. For all other LBASS, the effective yield is recalculated on a prospective basis.

5. Investments

D. Loan-Backed Securities

1. Prepayment assumptions for LBASS were obtained from external sources and internal estimates.
2. The following table presents the aggregate amortized cost of LBASS before recognized other-than-temporary impairment (“OTTI”) adjustments, the amount of OTTI adjustments recognized and the fair value of those securities.

This includes any such impaired LBASS where there was also the intent to sell or the inability or lack of intent to retain the security for a period of time sufficient to recover the amortized cost basis. For these impaired LBASS the amortized cost after LBASS will be equal to the fair value at the time of the OTTI and not the present value of the projected cash flows.

4. Unrealized losses are calculated as the difference between amortized cost and fair value. They result from declines in fair value below amortized cost and are evaluated for OTTI. Every LBASS with unrealized losses was included in the portfolio monitoring process.

The following table summarizes gross unrealized losses and the fair value of LBASS by the length of time these individual securities have been in a continuous unrealized loss position.

(in millions)		September 30, 2016	December 31, 2015
a. The aggregate amount of unrealized losses:			
1. Less than 12 months	\$	-	\$ (8)
2. 12 months or longer	\$	(3)	\$ (7)
b. The aggregate related fair value of securities with unrealized losses:			
1. Less than 12 months	\$	45	\$ 334
2. 12 months or longer	\$	190	\$ 288

5. As of September 30, 2016, the aggregate amount of unrealized losses related to LBASS was \$3 million. Of the \$3 million of unrealized losses, \$2 million were related to investment grade LBASS with an unrealized loss position less than 20% of amortized cost, the degree of which suggests these securities did not pose a high risk of being other than temporarily impaired. Investment grade is defined as a security having an NAIC designation of 1 or 2; a rating of Aaa, Aa, A or Baa from Moody's; a rating of AAA, AA, A or BBB from Standard & Poor's; a comparable rating from another nationally recognized rating agency; or a comparable internal rating if an externally provided rating is not available. Market prices for certain securities may have credit spreads which imply higher or lower credit quality than the current third party rating. Unrealized losses on investment grade securities are principally related to an increase in market yields which may include increased risk-free interest rates and/or wider credit spreads since the time of initial purchase.

NOTES TO FINANCIAL STATEMENTS

As of September 30, 2016, the remaining \$1 million of unrealized losses were related to LBASS in unrealized loss positions greater than or equal to 20% of amortized cost, of which \$732 thousand was below investment grade LBASS. Unrealized losses on below investment grade LBASS were the result of wider credit spreads resulting from higher risk premiums since the time of initial purchase. These wider spreads were largely due to the risk associated with the underlying collateral supporting certain LBASS.

LBASS in an unrealized loss position were evaluated based on actual and projected collateral losses relative to the securities' positions in the respective securitization trusts, security specific expectations of cash flows and credit ratings. This evaluation also takes into consideration credit enhancement, measured in terms of: (1) subordination from other classes of securities in the trust that are contractually obligated to absorb losses before the class of security the Company owns; (2) the expected impact of other structural features embedded in the securitization trust beneficial to the class of securities the Company owns, such as overcollateralization and excess spread; and (3) for certain LBASS in an unrealized loss position, credit enhancements from reliable bond insurers, where applicable.

As of September 30, 2016, the Company had not made a decision to sell and it was not more likely than not the Company would be required to sell these securities with unrealized losses before recovery of the amortized cost basis. As of September 30, 2016, the Company had the intent and ability to hold LBASS with unrealized losses for a period of time sufficient for them to recover.

10. Information Concerning Parent, Subsidiaries, Affiliates and Other Related Parties

- A.,
B. &
C. The Company paid a total of \$1.51 billion of dividends in cash and bonds to its parent, Allstate Insurance Holdings, LLC (“AIH”), in the first nine months of 2016. See Note 13, Part 4 for details.

During the third quarter of 2016, the Company invested in the Allstate Short Term Pool (“Short term pool”), which is offered by the Allstate Short Term Pool, LLC to certain wholly-owned affiliated companies of The Allstate Corporation (“Corporation”). The Short term pool is an investment pool managed by Allstate Investment Management Company (“AIMCO”), an affiliate of the Corporation, whose purpose is to efficiently manage cash and cash equivalents for its member companies. Each member company has an undivided interest in the underlying assets of the Short term pool in proportion to the member’s Membership Percentage, as defined in the Operating Agreement of Allstate Short Term Pool, LLC (“Operating Agreement”). All income, gains, losses and deductions of the Short term pool are allocated among the member companies based on the member’s Membership Percentage. As of September 30, 2016, the Company’s investment in the Short term pool was \$366 million.

There were no other transactions entered into by the Company with related parties in 2016 that involved more than ½ of 1% of the Company’s admitted assets. Activity resulting from reinsurance agreements, insurance contracts or cost allocation transactions in accordance with intercompany agreement provisions was excluded.

- F. The Company, the Corporation and certain of its wholly-owned affiliated companies are parties to the Operating Agreement, which provides a framework for AIMCO to efficiently manage cash and cash equivalents of the Short term pool’s members.

11. Debt

- B. The Company did not hold capital stock of the Federal Home Loan Bank or have funding agreements or borrowing arrangements with this entity as of September 30, 2016 or December 31, 2015.

Legal and regulatory proceedings and inquiries

Claims related proceedings

The Company is litigating two class action cases in California in which the plaintiffs allege off-the-clock wage and hour claims. Plaintiffs in both cases seek recovery of unpaid compensation, liquidated damages, penalties, and attorneys’ fees and costs.

The first case is *Christopher Williams, et al. v. Allstate Insurance Company*. The *Williams* case is pending in Los Angeles Superior Court and was filed in December 2007. The case involves two classes. The first class includes auto field physical damage adjusters employed in the state of California from January 1, 2005 to the date of final judgment, to the extent the Company failed to pay for off-the-clock work to those adjusters who performed certain duties prior to their first assignments. The other class includes all non-exempt employees in California from December 19, 2006 until June 2011 who received pay statements from Allstate which allegedly did not comply with California law. On April 13, 2016, the court granted the Company’s motion to decertify both classes; both classes are thus dissolved unless and until the appellate court orders the classes recertified. On May 17, 2016, plaintiffs filed their notice of appeal.

The second case is *Jack Jimenez, et al. v. Allstate Insurance Company*. *Jimenez* was filed in the U.S. District Court for the Central District of California in September 2010. The plaintiffs allege that they worked off-the-clock; they also allege other California Labor Code violations resulting from purported unpaid overtime. In April 2012, the court certified a class that includes all adjusters in the state of California, except auto field adjusters, from September 29, 2006 to final judgment. Allstate appealed the court’s decision to certify the class, first to the Ninth Circuit Court of Appeals and then to the U.S. Supreme Court. On June 15, 2015, the U.S. Supreme Court denied Allstate’s petition for a writ of certiorari. The case was scheduled for trial on September 27, 2016. On May 4, 2016, the court vacated that trial date in part because the court had not approved a trial plan.

In addition to the California class actions, the case of *Maria Victoria Perez and Kaela Brown, et al. v. Allstate Insurance Company* was filed in the U.S. District Court for the Eastern District of New York. Plaintiffs allege that no-fault claim adjusters have been improperly classified as exempt employees under New York Labor Law and the Fair Labor Standards Act. The case was filed in April 2011, and the plaintiffs are seeking unpaid wages, liquidated damages, injunctive relief, compensatory and punitive damages, and attorneys’ fees. On September 16, 2014, the court certified a class of no-fault adjusters under New York Labor Law and refused to decertify a Fair Labor Standards Act class of no-fault adjusters. Notice to the class was issued in December 2015 and no opt outs were received. During the discovery phase of the case, it was determined that 50 Encompass adjusters had been erroneously omitted from the New York Labor Law and Fair Labor Standards Act classes. On April 8, 2016, notice was sent to the omitted Encompass adjusters. Eleven Encompass adjusters opted in. As a result, there are now 105 members of the Fair Labor Standards Act class and 137 members of the New York Labor Law class.

In the Company’s judgment, a loss is not probable in these three cases.

The Florida personal injury protection statute permits insurers to pay personal injury protection benefits for reasonable medical expenses based on certain benefit reimbursement limitations which are authorized by the personal injury protection statute (generally referred to as “fee schedules”) resulting from automobile accidents. The Company is involved in litigation challenging whether the Company’s personal injury protection policies include sufficient language providing notice of the Company’s election to apply the fee schedules.

NOTES TO FINANCIAL STATEMENTS

The Company is litigating one class action, *Randy Rosenberg, et al. v. Allstate Fire & Casualty Insurance Company, Allstate Insurance Company, and Allstate Property & Casualty Insurance Company*, in the U.S. District Court for the Northern District of Illinois. This case is brought on behalf of health care providers and insureds who submitted claims for no-fault benefits under personal injury protection policies which were in effect from 2008 through 2012 and were reimbursed based on the fee schedules. They seek a declaratory judgment that Allstate could not properly apply the fee schedules and seek damages for the difference between what they allege are the reasonable medical expenses payable under the personal injury protection coverage and the fee schedule amounts Allstate actually paid. They also seek recovery of attorneys' fees and costs pursuant to Florida statutes. This case has been stayed by the Illinois federal court pending a decision on this issue by the Florida Supreme Court.

This fee schedule issue has also been the subject of thousands of individual lawsuits filed against Allstate in Florida. On March 18, 2015, in *Stand-Up MRI of Tallahassee, et al. v. Allstate Fire & Casualty Insurance Company*, the District Court of Appeal for the First District unanimously reversed a summary judgment that had been entered against Allstate. The court held that Allstate's language was clear and unambiguous and provided adequate notice of its intent to use the fee schedules. The plaintiff's appeal to the Florida Supreme Court was stayed.

On August 19, 2015, in *Orthopedic Specialists, et al. v. Allstate Insurance Company*, the District Court of Appeal for the Fourth District issued a divided decision (three separate opinions, two against Allstate and one dissenting opinion deeming Allstate's language sufficient), holding that Allstate's language was not sufficient. Allstate's motion for rehearing was denied. The court certified that its decision is in direct conflict with the District Court of Appeal for the First District's decision. Allstate's notice to the Florida Supreme Court seeking to invoke the discretionary jurisdiction of that court was accepted on January 20, 2016. The Florida Medical Association was granted leave to file an amicus brief in support of the plaintiff. The Florida Supreme Court heard oral argument on September 1, 2016, and has taken the matter under advisement. The decision by the Florida Supreme Court will establish Florida law on the sufficiency of Allstate's fee schedule policy language which will be binding on all Florida courts, as well as the Illinois federal class action. An outcome in favor of Allstate's position that the fee schedule policy language was sufficient will result in the resolution of all related claims that are currently in litigation along with those claims that are not currently in litigation. Allstate may be able to seek restitution from some plaintiffs for attorneys' fees and costs. An outcome in the plaintiffs' favor will result in significant costs to Allstate in the form of additional benefits due to medical providers along with penalties, interest, postage, and attorneys' fees. The Company does not know when the Florida Supreme Court will issue their decision.

On March 30, 2016, in *Markley Chiropractic & Acupuncture LLC, et al. v. Allstate Indemnity Insurance Company*, the District Court of Appeal for the Second District unanimously reversed a summary judgment that had been entered against Allstate. The court held that Allstate's language gave legally sufficient notice of its election to use the fee schedules. On June 20, 2016, the plaintiff filed a notice with the Florida Supreme Court seeking to invoke the discretionary jurisdiction of the court. On June 24, 2016, the Florida Supreme Court issued an order staying the entire case pending the disposition of the *Orthopedic Specialists* case.

On July 13, 2016, in *Florida Wellness & Rehabilitation Center of Hialeah, et al. v. Allstate Fire & Casualty Insurance Company*, the District Court of Appeal for the Third District unanimously affirmed summary judgment for Allstate and upheld the validity of Allstate's personal injury protection fee schedule language. The court also certified a conflict with the District Court of Appeal for the Fourth District's decision in *Orthopedic Specialists*. Further appeal of this case to the Florida Supreme Court has been stayed pending the disposition of the *Orthopedic Specialists* case.

In the Company's judgment, a loss is not probable in any of these cases.

Other proceedings

The Company is defending certain matters in the U.S. District Court for the Eastern District of Pennsylvania relating to the Company's agency program reorganization announced in 1999. The principal focus in these matters has related to a release of claims signed by the vast majority of the former agents whose employment contracts were terminated in the reorganization program. The court recently entered a schedule for determining the merits of certain claims asserted in the matters described below, with the release issue to be addressed in unspecified future proceedings.

Romero I: In 2001, approximately 32 former employee agents, on behalf of a putative class of approximately 6,300 former employee agents, filed a putative class action alleging claims for age discrimination under the Age Discrimination in Employment Act ("ADEA"), interference with benefits under Employee Retirement Income Security Act ("ERISA"), breach of contract, and breach of fiduciary duty. Plaintiffs also assert a claim for a declaratory judgment that the release of claims constitutes unlawful retaliation and should be set aside. Plaintiffs seek broad but unspecified "make whole relief," including back pay, compensatory and punitive damages, liquidated damages, lost investment capital, attorneys' fees and costs, and equitable relief, including reinstatement to employee agent status with all attendant benefits.

Romero II: A putative nationwide class action was also filed in 2001 by former employee agents alleging various violations of ERISA ("*Romero II*"). This action has been consolidated with *Romero I*. The *Romero II* plaintiffs, most of whom are also plaintiffs in *Romero I*, are challenging certain amendments to the Agents Pension Plan and seek to have service as exclusive agent independent contractors count toward eligibility for benefits under the Agents Pension Plan. Plaintiffs seek broad but unspecified "make whole" or other equitable relief, including loss of benefits as a result of their conversion to exclusive agent independent contractor status or retirement from the Company between November 1, 1999 and December 31, 2000. They also seek repeal of the challenged amendments to the Agents Pension Plan with all attendant benefits revised and recalculated for thousands of former employee agents, and attorneys' fees and costs. The court granted the Company's initial motion to dismiss the complaint. The Third Circuit Court of Appeals reversed that dismissal and remanded for further proceedings.

Romero I and II consolidated proceedings: In 2004, the court ruled that the release was voidable and certified classes of agents, including a mandatory class of agents who had signed the release, for purposes of effectuating the court's declaratory judgment that the release was voidable. In 2007, the court vacated its ruling and granted the Company's motion for summary judgment on all claims. Plaintiffs appealed and in July 2009, the U.S. Court of Appeals for the Third Circuit vacated the trial court's entry of summary judgment in the Company's favor, remanded the case to the trial court for additional discovery, and instructed the trial court to address the validity of the release after additional discovery. Following the completion of discovery limited to the validity of the release, the parties filed cross motions for summary judgment with respect to the validity of the release. On February 28, 2014, the trial court denied plaintiffs' and the Company's motions for summary judgment, concluding that the question of whether the releases were knowingly and voluntarily signed under a totality of circumstances test raised disputed issues of fact to be resolved at trial. Among other things, the court also held that the release, if valid, would bar all claims in *Romero I and II*. On May 23, 2014, plaintiffs moved to certify a class as to certain issues relating to the validity of the release. The court denied plaintiffs' class certification motion on October 6, 2014, stating, among other things, that individual factors and circumstances must be considered to determine whether each release signer entered into the release knowingly and voluntarily. The court entered an order on December 11, 2014, (a) stating that the court's October 6, 2014 denial of class certification as to release-related issues did not resolve whether issues relating to the merits of plaintiffs' claims may be subject to class certification at a later time, and (b) holding that the court's October 6, 2014 order restarted the running of the statute of limitation for any former employee agent who wished to challenge the validity of the release. In an order entered January 7, 2015, the court denied reconsideration of its December 11, 2014 order and clarified that all statutes of limitations to challenge the release would resume running on March 2, 2015. Since the court's January 7, 2015 order, a total of 459 additional individual plaintiffs have filed separate lawsuits similar to *Romero I* or sought to intervene in the *Romero I* action. Trial proceedings commenced to determine the question of whether the releases of the original named plaintiffs in *Romero I* and *II* were knowingly and voluntarily signed. Additionally, plaintiffs asserted two equitable defenses to the release which were to be determined by the court and not the jury. As to the first trial proceeding involving ten plaintiffs, the jury reached verdicts on June 17, 2015 finding that two plaintiffs signed their releases knowingly and voluntarily and eight plaintiffs did not sign their releases knowingly and voluntarily. On January 28, 2016, the court entered its opinion and judgment finding in Allstate's favor as to all ten plaintiffs on the two equitable defenses to the release. The trial result is not yet final and may be subject to further proceedings. The remaining two trials for the original *Romero I* and *II* plaintiffs were scheduled to commence in the fourth quarter of 2015; however, the order setting these trials was subsequently vacated.

NOTES TO FINANCIAL STATEMENTS

On February 1, 2016, these cases were reassigned to a new judge who initially entered orders addressing pending motions for reconsideration of the dismissal of plaintiffs' state law claims, but then vacated those orders. On April 12, 2016, these cases were again reassigned to a new judge. On May 2, 2016, the new judge entered an order vacating the setting of additional release trials, consolidating all of the original and intervening plaintiffs' claims, and granting leave to file a Consolidated Amended Complaint by May 20, 2016. The court entered a second order on May 2, 2016, scheduling deadlines for completion of discovery and filing of summary judgment motions on the merits of plaintiffs' ERISA and ADEA claims, and setting a non-jury ERISA trial to occur in December 2016. The court's order also sets deadlines for completion of discovery and summary judgment motions with regard to the remaining claims and defenses by the first quarter of 2017, with a jury trial on those claims and defenses to occur in May 2017. The court subsequently clarified the scope of the scheduled trials, ruling that (a) the December 2016 non-jury trial shall only resolve liability on plaintiffs' claims challenging certain plan amendments under ERISA ("Phase I"); (b) the second trial currently scheduled for May 2017 shall resolve alleged interference with employee benefits under ERISA and disparate impact under the ADEA, with the court deciding the ERISA claim ("Phase II"); and (c) plaintiffs' ADEA disparate treatment claims will not be resolved in the second trial but will be resolved in a manner to be determined at a later date. On May 4, 2016, the court entered an order denying Allstate's post-trial motion for judgment as a matter of law with respect to the jury's June 17, 2015 verdicts in favor of eight plaintiffs on the issue whether they knowingly and voluntarily signed their releases.

On May 20, 2016, a Consolidated Amended Complaint was filed on behalf of 499 plaintiffs, most of whom had previously filed separate lawsuits or intervened in *Romero I*. Allstate filed a partial motion to dismiss the Consolidated Amended Complaint, which the court granted in part and denied in part on July 6, 2016. Among other things, the court denied without prejudice Allstate's motion to dismiss the state law claims, granted dismissal of plaintiffs' retaliation claims under the ADEA and ERISA.

Phase I discovery is closed and the Company filed a motion for summary judgment as to all Phase I claims. Plaintiffs did not move for summary judgment. The parties also filed motions seeking to exclude each other's ERISA experts. The court held argument on these motions on October 27, 2016.

On September 2, 2016, in two cases asserting similar claims to those asserted in *Romero I* that had been filed on May 15, 2015, the U.S. District Court for the Southern District of Texas entered judgment in Allstate's favor on statute of limitations and other grounds.

Based on the trial court's February 28, 2014 order in *Romero I* and *II*, if the validity of the release is decided in favor of the Company for any plaintiff, that would preclude any damages or other relief being awarded to that plaintiff. The final resolution of these matters is subject to various uncertainties and complexities including how trials, post trial motions, possible appeals with respect to the validity of the release, and any rulings on the merits will be resolved.

In the Company's judgment, a loss is not probable.

16. Information about Financial Instruments with Off-Balance Sheet Risk and Financial Instruments with Concentrations of Credit Risk

Derivative financial instruments

1. The following table summarizes the notional amount of the Company's derivative financial instruments, including those with off-balance sheet risk:

17. Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

B. Transfer and Servicing of Financial Assets

1. The Company's business activities included securities lending programs with third parties, mostly large banks. As of September 30, 2016 and December 31, 2015, bonds, including LBASS, and common stocks with fair values of \$577 million and \$280 million, respectively, were on loan under these agreements. Securities lent were either specifically identified by the lending bank or segregated into a separate custody account. See Note 5, Part E for more information about securities lending collateral.
2. The Company did not enter into agreements to service assets or liabilities.
4. The Company was not a transferor or transferee with respect to securitizations and asset-backed financing arrangements.

20. Fair Value Measurements

- A. Fair value is defined, per SSAP No. 100, *Fair Value* ("SSAP No. 100"), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP No. 100 identified three valuation techniques which are used, either independently or in combination, to determine fair value: (1) market approach; (2) income approach; and (3) cost approach. SSAP No. 100 also contains guidance about observable and unobservable inputs, which are assumptions that market participants would use in pricing an asset or liability. To increase consistency and comparability in fair value measurements, the fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels: 1, 2 and 3. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available.

The Company has two types of situations where investments are classified as Level 3. The first is where specific inputs significant to the fair value estimation models are not market observable. This primarily occurs in the Company's use of broker quotes to value certain securities where the inputs have not been corroborated to be market observable, and the use of valuation models that use significant non-market observable inputs. The second situation where the Company classifies securities in Level 3 is where quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources.

Transfers into Level 3 during 2016 and 2015 included securities measured at lower of cost or market and reported at fair value in 2016 and 2015, and at cost in 2015 and 2014. In addition, transfers into Level 3 during 2016 and 2015 included situations where a fair value quote was not provided by the Company's independent third-party valuation service provider and as a result the price was stale or had been replaced with a broker quote where the inputs had not been corroborated to be market observable. Also, transfers into Level 3 during 2015 included situations where there was a change in the NAIC designation that resulted in the asset being reported and measured at fair value.

Transfers out of Level 3 during 2016 and 2015 included securities measured at lower of cost or market and reported at cost in 2016 and 2015, and fair value in 2015 and 2014. In addition, transfers out of Level 3 during 2016 and 2015 included situations where there was a change in the NAIC designation that resulted in the asset not being reported and measured at fair value. Transfers out of Level 3 during 2016 and 2015 included situations where a broker quote was used in the prior period and a fair value quote became available from the Company's independent third-party valuation service provider in the current period. A quote utilizing the new pricing source was not available as of the prior period, and any gains and losses related to the change in valuation source for individual securities were not significant.

3. Transfers between level categorizations may occur due to changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity, trading volume or bid-ask spreads. Transfers between level categorizations may also occur due to changes in the valuation source. For example, in situations where a fair value quote is not provided by the Company's independent third-party valuation service provider and as a result, the price is stale or has been replaced with a broker quote, whose inputs have not been corroborated to be market observable, the security is transferred into Level 3. Transfers in and out of level categorizations are reported as having occurred at the beginning of the quarter in which the transfer occurred.

NOTES TO FINANCIAL STATEMENTS

4. In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 and Level 3 valuations, a combination of the market and income approaches is used.

Listed below is a summary of the significant valuation techniques for assets and liabilities measured and reported at fair value.

Level 2 measurements

Bonds - Industrial and miscellaneous bonds consist of corporate bonds, including those that are privately placed, residential mortgage-backed securities ("RMBS"), commercial mortgage-backed securities ("CMBS") and asset-backed securities ("ABS"). The primary inputs to the valuation for corporate bonds, including those that are privately placed include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Also included are privately placed securities valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The primary inputs to the valuation for CMBS include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, collateral performance and credit spreads. The primary inputs to the valuation for RMBS and ABS include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. Certain ABS are valued based on non-binding broker quotes whose inputs have been corroborated to be market observable.

Unaffiliated common and preferred stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

Derivatives - Free-standing exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives, including certain interest rate and foreign currency swap agreements, foreign exchange forward contracts and certain credit default swap agreements, are valued using models that rely on inputs such as interest rate yield curves, currency rates and counterparty credit spreads that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

Level 3 measurements

Bonds - Industrial and miscellaneous bonds consist of corporate bonds, including those that are privately placed, bank loans, CMBS and ABS. Corporate bonds, including those that are privately placed are valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable. CMBS and ABS are valued based on non-binding broker quotes received from brokers who are familiar with the investments and where the inputs have not been corroborated to be market observable.

Both U.S. special revenue and special assessment obligations bonds and U.S. political subdivisions of states, territories and possessions bonds consist of municipal bonds that are not rated by third party credit rating agencies but receive an NAIC designation. Municipal bonds consist of securities that are not rated by third party credit rating agencies but receive an NAIC designation. The primary inputs to the valuation include quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields and credit spreads.

Perpetual preferred stocks - The primary inputs to the valuation include non-binding broker quotes where the inputs have not been corroborated to be market observable.

Unaffiliated common stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 measurements.

The fair value of bonds in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of publicly traded bonds in Level 2 is based upon quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Non-publicly traded bonds in Level 2 are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The fair value of LBASS in Level 2 is primarily based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. The fair value of municipal bonds in Level 3 is based on quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields and credit spreads. The fair value of corporate bonds in Level 3 is primarily based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Other inputs for corporate bonds include an interest rate yield curve, as well as published credit spreads for similar assets that incorporate the credit quality and industry sector of the issuer. The fair value of LBASS in Level 3 is primarily based on non-binding broker quotes received from brokers who are familiar with the investments and where the inputs have not been corroborated to be market observable.

The fair value of preferred stocks in Level 2 and 3 is based on valuation methods described in Part A4 of this note.

The fair value of unaffiliated common stocks in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of unaffiliated common stocks in Levels 2 and 3 is based on the valuation methods described in Part A4 of this note.

The fair value of mortgage loans on real estate in Level 3 is based on discounted contractual cash flows, or if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics, using similar types of properties as collateral.

The fair value of cash equivalents and short-term investments in Level 1 is based on quoted prices or net asset values for identical assets in active markets the Company can access. The fair value of cash equivalents and short-term investments in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads or amortized cost.

The fair value of free-standing exchange listed derivatives in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of derivatives in Level 2 is based on the valuation methods described in Part A4 of this note.

The fair value of LIHTC property investments in Level 3 is based on amortized cost, using the proportional amortization method, which approximates fair value.

The fair value of affiliated surplus notes in Level 3 is based on discounted cash flow calculations using current interest rates for instruments with comparable terms.

The fair value of collateral related to derivatives and reinvested collateral from securities lending in Level 2 is based on carrying value due to its short-term nature.

Financial liabilities

Presented below are the aggregate fair value estimates and statement values of financial instruments classified as liabilities:

September 30, 2016							Not Practicable (Carrying Value)
Type of Financial Instrument	Aggregate Fair Value	Statement Value	(Level 1)	(Level 2)	(Level 3)

Securities lending collateral	\$ 290	\$ 290	\$ -	\$ 290	\$ -	\$ -	-
Derivatives	\$ 4	\$ 3	\$ 1	\$ 3	\$ -	\$ -	-

The fair value of the liabilities for collateral related to securities lending in Level 2 is based on carrying value due to its short-term nature.

The fair value of free-standing exchange listed derivatives in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of derivatives in Level 2 is based on the valuation methods described in Part A4 of this note.

D. The Company was able to estimate the fair value of all its financial instruments in 2016 and 2015.

22. Events Subsequent

An evaluation of subsequent events was made through November 9, 2016 for the Annual Statement issued on November 11, 2016. There were no significant subsequent events requiring adjustment to or disclosure in the financial statements.

24. Retrospectively Rated Contracts and Contracts Subject to Redetermination

C. The amount of net premiums written by the Company in the first nine months of 2016 and 2015 subject to retrospective rating features was \$2.10 billion and \$1.77 billion, respectively. These amounts represented 9.8% and 8.4% of total net premiums written in the first nine months of 2016 and 2015, respectively.

F. Risk Sharing Provisions of the Affordable Care Act ("ACA")

The Company is not subject to the risk sharing provisions of the ACA.

25. Changes in Incurred Losses and Loss Adjustment Expenses

For a summary of management's policies and methodologies for estimating the liabilities for losses and loss adjustment expenses, please refer to this note in the Annual Statement.

Activity in the reserve for losses and loss adjustment expenses was summarized as follows:

(in millions)	September 30, 2016	December 31, 2015
Balance as of January 1	\$ 15,505	\$ 14,665
Incurred related to:		
Current year	15,594	19,097
Prior years	146	139
Total incurred	15,740	19,236
Paid related to:		
Current year	9,545	12,436
Prior years	5,280	5,960
Total paid	14,825	18,396
Balance	\$ 16,420	\$ 15,505

Incurred losses and loss adjustment expenses represent the sum of paid losses and reserve changes in the calendar year. This expense included net losses from catastrophes of \$2.21 billion and \$1.70 billion for the nine months ended September 30, 2016 and the year ended December 31, 2015, respectively. Catastrophes are an inherent risk that have contributed to, and will continue to contribute to, material year-to-year fluctuations in the Company's net income and financial position.

The Company calculates and records a single best reserve estimate for losses from catastrophes, in conformity with generally accepted actuarial principles. As a result, management believes that no other estimate is better than the recorded amount. Due to the uncertainties involved, including the factors described above, the ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimates. Accordingly, management believes that it is not practicable to develop a meaningful range for such changes in losses incurred.

Incurred losses and loss adjustment expenses attributable to insured events of prior years were \$146 million and \$139 million as a result of the reestimation of unpaid losses and loss adjustment expenses for the nine months ended September 30, 2016 and the year ended December 31, 2015, respectively. These changes were generally the result of ongoing analyses of recent loss development trends. Initial estimates were revised as additional information regarding claims became known.

Anticipated salvage and subrogation of \$710 million and \$677 million was included as a reduction of loss reserves as of September 30, 2016 and December 31, 2015, respectively.

36. Financial Guaranty Insurance

The Company did not write financial guaranty insurance in 2016 or 2015.
