NOTES TO FINANCIAL STATEMENTS

Notes required on a quarterly basis have been updated in their entirety. There have been no material changes to the following December 31, 2017 Annual Statement notes: 1(B), 2-4, 5(B, C, J, K, O-R), 6, 7, 8(A-G), 9(A, B, E-G), 10, 11(A), 12(B-I), 13-16, 17(A), 18, 19, 21(A, B, D-H), 23, 24(A-D) and 26-35. Only material or significant changes from the Annual Statement have been updated for all other notes, or portions thereof.

1. Summary of Significant Accounting Policies

- A. Allstate Life Insurance Company (the “Company”) prepares its financial statements in conformity with accounting practices prescribed or permitted by the Illinois Department of Insurance (“IL DOI”). Prescribed statutory accounting practices include a variety of publications of the National Association of Insurance Commissioners (“NAIC”), as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

The State of Illinois requires its domestic insurance companies to prepare financial statements in conformity with the NAIC Accounting Practices and Procedures Manual, which includes all Statements of Statutory Accounting Principles (“SSAPs”), subject to any deviations prescribed or permitted by the IL DOI.

The Company’s net income and capital and surplus did not include any accounting practices prescribed or permitted by the IL DOI during 2018 and 2017.

C. Investments

Loan-backed and structured securities (“LBASS”) with an NAIC designation of 1 through 5 are reported at amortized cost using the effective yield method. LBASS with an NAIC designation of 6 are reported at the lower of amortized cost or fair value, with the difference reflected in unassigned surplus as unrealized capital loss. In general, LBASS utilize a multi-step process for determining carrying value and NAIC designation in accordance with SSAP No. 43R, *Loan-backed and Structured Securities*. For LBASS of high credit quality with fixed interest rates, the effective yield is recalculated on a retrospective basis. For all others, the effective yield is recalculated on a prospective basis.

The Company’s bond portfolio also includes Securities Valuation Office (“SVO”)–identified investments, which are reported at fair value. Changes in the fair value of the SVO-identified investments are recorded as a change in net unrealized capital gains (losses), which is a component of unassigned surplus.

- D. Based upon its evaluation of relevant conditions and events, management did not have substantial doubt about the Company’s ability to continue as a going concern as of March 31, 2018 or December 31, 2017.

5. Investments

A. Mortgage Loans, including Mezzanine Real Estate Loans

1. The minimum and maximum lending rates for new mortgage loans in the first three months of 2018 were 3.90% and 4.64%. The minimum and maximum lending rates for new mortgage loans in 2017 were 3.50% and 5.68%. All new mortgage loans were commercial.

D. Loan-Backed Securities

1. Prepayment assumptions for LBASS were obtained from external sources and, if not available, developed internally.

4. Unrealized losses are calculated as the difference between amortized cost and fair value. They result from declines in fair value below amortized cost and are evaluated for OTTI adjustments. Every LBASS with unrealized losses was included in the portfolio monitoring process.

The following table summarizes gross unrealized losses and the fair value of LBASS by the length of time individual securities have been in a continuous unrealized loss position.

(in millions)

	March 31, 2018	December 31, 2017
a. The aggregate amount of unrealized losses:		
1. Less than 12 months	\$ (3)	\$ (1)
2. 12 months or longer	\$ (5)	\$ (6)
b. The aggregate related fair value of securities with unrealized losses:		
1. Less than 12 months	\$ 322	\$ 182
2. 12 months or longer	\$ 52	\$ 75

5. As of March 31, 2018, the aggregate amount of unrealized losses related to LBASS was \$8 million. Of the \$8 million of unrealized losses, \$6 million were related to investment grade LBASS. Of the \$6 million of unrealized losses related to investment grade LBASS, \$5 million were related to securities with an unrealized loss position less than 20% of amortized cost, the degree of which suggested these securities did not pose a high risk of being other-than-temporarily impaired. Investment grade is defined as a security having a NAIC designation of 1 or 2, a rating of Aaa, Aa, A or Baa from Moody's, a rating of AAA, AA, A or BBB from S&P Global Ratings, a comparable rating from another nationally recognized rating agency or a comparable internal rating if an externally provided rating is not available. Market prices for certain securities may have credit spreads which imply higher or lower credit quality than the current third party rating. Unrealized

NOTES TO FINANCIAL STATEMENTS

losses on investment grade securities were principally related to an increase in market yields which may include increased risk-free interest rates and/or wider credit spreads since the time of initial purchase.

As of March 31, 2018, the remaining \$2 million of unrealized losses were related to below investment grade LBASS. Of the \$2 million of unrealized losses related to below investment grade LBASS, \$1 million of unrealized losses were related to securities with an unrealized loss position less than 20% of amortized cost, the degree of which suggested these securities did not pose a high risk of being other-than-impaired. The remaining \$1 million of unrealized losses related to below investment grade LBASS with unrealized loss positions equal to or greater than 20% of amortized cost and have been in an unrealized loss position for a period of twelve months or more. Unrealized losses on below investment grade LBASS were the result of wider credit spreads resulting from higher risk premiums since the time of the initial purchase. These wider spreads were largely due to the risk associated with the underlying collateral supporting certain LBASS.

LBASS in an unrealized loss position were evaluated based on actual and projected collateral losses relative to the securities' positions in the respective securitization trusts, security specific expectations of cash flows and credit ratings. This evaluation also takes into consideration credit enhancement, measured in terms of: (1) subordination from other classes of securities in the trust that are contractually obligated to absorb losses before the class of security the Company owns, and (2) the expected impact of other structural features embedded in the securitization trust beneficial to the class of securities the Company owns, such as overcollateralization and excess spread.

As of March 31, 2018, the Company had not made a decision to sell and it was not more likely than not the Company would be required to sell LBASS with unrealized losses before recovery of the amortized cost basis. As of March 31, 2018, the Company had the intent and ability to hold LBASS with unrealized losses for a period of time sufficient for them to recover.

M. Working Capital Finance Investments

The Company did not hold working capital finance investments as of March 31, 2018 or December 31, 2017.

N. Offsetting and Netting of Assets and Liabilities

None of the Company's derivative or securities lending transactions contain a valid right to offset assets and liabilities per the requirements of SSAP No. 64, *Offsetting and Netting of Assets and Liabilities*. The Company did not enter into repurchase agreements, reverse repurchase agreements or securities borrowing transactions.

8. Derivative Instruments

H. The Company did not have open option contracts as of March 31, 2018 or December 31, 2017.

9. Income Taxes

On December 22, 2017, Public Law 115-97, known as the Tax Cuts and Jobs Act of 2017 became effective, permanently reducing the U.S. corporate income tax rate from 35% to 21% beginning January 1, 2018. As a result, the corporate tax rate is not comparable between periods.

C. The provision for incurred income taxes for the three months ended March 31, was:

(In millions)	(1)	(2)	(3)
	03/31/2018	03/31/2017	(Col 1-2) Change

(e) Utilization of capital loss carry-forwards	-	-	-
(f) Other	-	-	-
(g) Federal and foreign income taxes incurred	\$ -	\$ 303	\$ (303)

D. The provision for federal income taxes incurred was different from that which would have been obtained by applying the statutory federal income tax rate to income before taxes. The items causing this difference were as follows as of March 31:

(In millions)	2018	Effective Tax Rate	2017	Effective Tax Rate
Provision computed at statutory rate	\$ 13	21.0 %	\$ 310	35.0 %

Change in net deferred income taxes	(1)	(1.1)	3	0.3
Total statutory income taxes	\$ -	0.7 %	\$ 303	34.2 %

11. Debt

B. The Company did not hold capital stock of the FHLB or have funding agreements or borrowing arrangements with this entity as of March 31, 2018 or December 31, 2017.

12. Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Postretirement Benefit Plans

A. 4. The Company was not a sponsor of defined benefit pension, other postretirement, or special or contractual termination benefit plans.

17. Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

B. Transfer and Servicing of Financial Assets

- The Company's business activities included securities lending programs with third parties, mostly large banks. As of March 31, 2018 and December 31, 2017, bonds, including LBASS and common stocks within the General Account with fair values of \$383 million and \$466 million, respectively, were on loan under these agreements. Separate Accounts did not have its own securities lending program. However, bonds not legally insulated within the Separate Accounts with fair values of \$5 million and \$1 million as of March 31, 2018 and December 31, 2017, respectively, were on loan as part of the General Account securities lending programs. Securities lent were either specifically identified by the lending bank or segregated into a separate custody account. See Note 5, Part E for more information on securities lending collateral.
- The Company did not enter into agreements to service assets or liabilities.
- The Company was not a transferor or transferee with respect to securitizations and asset-backed financing arrangements.

C. Wash Sales

- In the course of managing the investment portfolio, securities may be sold and reacquired within 30 days of the sale date in order to enhance the portfolio's yield.

NOTES TO FINANCIAL STATEMENTS

2. The details of securities with an NAIC designation of 3 or below, and those without an NAIC designation, which were sold during the first quarter of 2018 and 2017, and reacquired within 30 days of the sale date were as follows:

2018

20. Fair Value Measurements

- A. Fair value is defined, per SSAP No. 100R, *Fair Value* ("SSAP No. 100R"), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP No. 100R identified three valuation techniques which are used, either independently or in combination, to determine fair value: (1) market approach; (2) income approach; and (3) cost approach. SSAP No. 100R also contains guidance about observable and unobservable inputs, which are assumptions that market participants would use in pricing an asset or liability. To increase consistency and comparability in fair value measurements, the fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels: 1, 2 and 3. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Certain assets are measured utilizing net asset value ("NAV") as a practical expedient to determine fair value.

The Company has two types of situations where investments are classified as Level 3. The first is where specific inputs significant to the fair value estimation models are not market observable. This primarily occurs in the Company's use of broker quotes to value certain securities where the inputs have not been corroborated to be market observable, and the use of valuation models that use significant non-market observable inputs. The second situation where the Company classifies securities in Level 3 is where quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources.

There were no transfers into Level 3 during the first three months of 2018 and 2017. Transfers out of Level 3 during the first three months of 2018 was a result of utilizing NAV as a practical expedient to determine fair value. Transfers out of Level 3 during the first three months of 2017 included securities measured at lower of cost or market and reported at cost in 2017, and at fair value in 2016.

3. Transfers between level categorizations may occur due to changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity, trading volume or bid-ask spreads. Transfers between level categorizations may also occur due to changes in the valuation source. For example, in situations where a fair value quote is not provided by the Company's independent third-party valuation service provider and as a result, the price is stale or has been replaced with a broker quote, whose inputs have not been corroborated to be market observable, the security is transferred into Level 3. Transfers in and out of level categorizations are reported as having occurred at the beginning of the quarter in which the transfer occurred.
4. In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 and Level 3 valuations, a combination of the market and income approaches is used.

Listed below is a summary of the significant valuation techniques for assets and liabilities measured and reported at fair value.

Level 2 measurements

Bonds - Industrial and miscellaneous bonds consist of corporate bonds, including those that are privately placed and asset-backed securities ("ABS"). The primary inputs to the valuation for public corporate bonds include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Privately placed corporate bonds are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The primary inputs to the valuation for ABS include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. Certain ABS are valued based on non-binding broker quotes whose inputs have been corroborated to be market observable.

Unaffiliated common stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that are not active.

Derivatives - Free-standing exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives, including interest rate swap and foreign currency swap agreements, certain options and credit default swap agreements, are valued using models that rely on inputs such as interest rate yield curves, implied volatilities, currency rates, and credit spreads that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

Separate Accounts - Indexed variable annuity contracts may be supported by corporate bonds, including those that are privately placed. The primary inputs to the valuation for public corporate bonds include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Privately placed corporate bonds are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. In addition, indexed variable annuity contracts may be supported by exchange listed derivatives that are not actively traded and are valued based on quoted prices for identical instruments in markets that are not active.

Level 3 measurements

Bonds - Industrial and miscellaneous bonds consist of corporate bonds, including those that are privately placed and ABS. Corporate bonds, including those that are privately placed are primarily valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Other inputs include an interest rate yield curve, as well as published credit spreads for similar assets that incorporate credit quality and industry sector of the issuer. ABS are valued based on non-binding broker quotes received from brokers who are familiar with the investments and where the inputs have not been corroborated to be market observable.

STATEMENT AS OF MARCH 31, 2018 OF THE ALLSTATE LIFE INSURANCE COMPANY

NOTES TO FINANCIAL STATEMENTS

Perpetual preferred stocks - The primary inputs to the valuation include non-binding broker quotes where the inputs have not been corroborated to be market observable.

Unaffiliated common stocks – The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 measurements.

Derivatives - Certain over-the-counter derivatives, such as interest rate cap agreements are valued using models that are widely accepted in the financial services industry. These are categorized as Level 3 as a result of the significance of non-market observable inputs such as volatility. Other primary inputs include interest rate yield curves and credit spreads.

Separate Accounts - Indexed variable annuity contracts are supported by mortgage loans. The fair value of mortgage loans on real estate is based on discounted contractual cash flows or, if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics using similar types of properties as collateral.

Certain investments in common stock of investment companies, which do not have readily determinable fair values, use NAV provided by the issuing corporation and are excluded from the fair value hierarchy.

5. All information related to derivatives measured and reported at fair value is presented above.

The fair value of bonds in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of publicly traded bonds in Level 2 is based upon quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Non-publicly traded bonds in Level 2 are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The fair value of municipal bonds in Level 3 not rated by third party credit agencies, but receiving an NAIC designation is based on quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields and credit spreads. Also included are municipal bonds based on non-binding broker quotes where the inputs have not been corroborated to be market observable and municipal bonds in default valued based on present value of expected cash flows. The fair value of corporate bonds in Level 3 is primarily based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Other inputs for corporate bonds include an interest rate yield curve, as well as published credit spreads for similar assets that incorporate credit quality and industry sector of the issuer. The fair value of LBASS in Level 2 is primarily based on valuation models utilizing quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads to determine fair value. The fair value of LBASS in Level 3 is primarily based on non-binding broker quotes received from brokers who are familiar with the investments and where the inputs have not been corroborated to be market observable or internal models with non-market observable inputs.

The fair value of preferred stocks in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads. The fair value of the preferred stocks in Level 3 is based on the valuation method described in Part A4 of this note.

The fair value of unaffiliated common stocks in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of unaffiliated common stocks in Levels 2 and 3 is based on the valuation methods described in Part A4 of this note.

The fair value of mortgage loans on real estate in Level 3 is based on discounted contractual cash flows, or if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics, using similar types of properties as collateral.

NOTES TO FINANCIAL STATEMENTS

The fair value of cash equivalents in Level 1 is based on unadjusted quoted prices or net asset values for identical assets in active markets the Company can access. The fair value of cash equivalents and certain short-term investments in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. NAV was determined to be the practical expedient to fair value for the Company's investment in the Allstate Short Term Pool ("Short term pool") as of March 31, 2018, and is no longer included in Level 2. The fair value of short-term investments in Level 3 is primarily based on non-binding broker quotes where the inputs have not been corroborated to be market observable.

The fair value of derivatives in Levels 2 and 3 is based on the valuation methods described in Part A4 of this note. Cash collateral for futures contracts is also included in the derivatives line and the fair value, which is included in Level 2, is based on carrying value due to its short-term nature.

The fair value of LIHTC property investments in Level 3 is based on amortized cost, using the proportional amortization method, which approximates fair value.

The fair value of unaffiliated surplus notes in Level 2 is based upon quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. The fair value of affiliated surplus notes in Level 3 is based on discounted cash flow calculations using current interest rates for instruments with comparable terms.

The fair value of reinvested collateral from securities lending and collateral related to derivatives in Level 2 is based on carrying value due to its short-term nature.

The fair value of the assets of the Separate Accounts in Level 1 is based on actively traded mutual funds that have daily quoted net asset values for identical assets the Company can access. The fair value of the assets of the Separate Accounts in Levels 2 and 3 is based on the valuation methods described in Part A4.

The fair value of the liability for deposit-type contracts is generally based on the terms of the underlying contracts incorporating current market-based crediting rates for similar contracts that reflect the Company's own credit risk. Immediate annuities without life contingencies and fixed rate funding agreements are valued at the present value of future benefits using current market-based implied interest rates and reflect the Company's own credit risk. Fixed annuities are valued at the account value less surrender charges.

The fair value of the liabilities for collateral related to securities lending and derivatives in Level 2 is based on carrying value due to its short-term nature.

The fair value of derivatives in Level 2 is based on the valuation methods described in Part A4 of this note.

- D. The Company was able to estimate the fair value of all its financial instruments in 2018 and 2017.
- E. Investments in certain common stock measured and reported at NAV in the Assets page and presented in the table in Part A1 are generally not redeemable with the issuing corporation and cannot be sold without approval of the managing members. Distributions of income are usually received from the sale of the investee or the liquidation of the underlying asset or assets of the investees over the life of these investments, typically 3-7 years. As of March 31, 2018, the Company had no commitments to invest in these investments over their remaining lives.

The Short term pool is an investment pool managed by Allstate Investment Management Company, an affiliate of The Allstate Corporation (the "Corporation"), whose purpose is to efficiently manage cash and cash equivalents for its member companies. Each member company has an undivided interest in the underlying assets of the Short term pool maintained at a stable net asset value ("stable NAV") and unit price in proportion to the member's Membership Percentage, as defined in the Operating Agreement of Allstate Short Term Pool, LLC. The stable NAV is calculated daily as original cost plus amortization balance and ending interest balance at the end of the day, prepaid expenses, and unsettled sale trades less unsettled distribution income, unsettled purchase trades and accrued expenses. The fair value of the underlying assets of the Short term pool are monitored daily to observe NAV does not deviate materially from a stable NAV which if occurred could be evaluated for possible actions. Net investment income and losses and net gains and losses incurred by the Short term pool are allocated pro-rata among the Members in proportion to their interest. Distributions of net investment income or losses and net realized capital gains and losses, if any, are declared daily and paid and reinvested monthly.

In the table in Parts B & C, the Company disclosed NAV as a practical expedient to fair value for its investment in the Short term pool. There are no restrictions on withdrawals from the Short term pool. Withdrawals are made at stable NAV and it is not probable investment in the Short term pool will be sold at an amount different from the stable NAV. Each member company may make withdrawals on demand without penalty on any business day with the settlement of funds not to exceed ten business days. The Short term pool's investment strategy is to invest in U.S. dollar-denominated, high quality and highly liquid investments with very low credit risk and a duration of less than 100 days. As of March 31, 2018, the Company did not have commitments to invest in the Short term pool. The Company's investment in the Short term pool was not measured and reported using NAV as a practical expedient to fair value in the Assets page as of March 31, 2018.

C. Other Disclosures

Scottish Re U.S. ("SRUS")

The Company's reinsurance reserve credit and recoverables with SRUS at March 31, 2018 and December 31, 2017 were \$79 million and \$81 million, respectively. SRUS's parent, Scottish Holdings, Inc. ("SHI") and SHI's parent filed U.S. Chapter 11 proceedings ("Chapter 11") on January 28, 2018. On January 29, 2018, Scottish Re announced that a stock purchase agreement had been executed between SHI (along

NOTES TO FINANCIAL STATEMENTS

with SHI's parent), and an investment hedge fund advised by Stamford, CT based Hudson Structured Capital Management Ltd. Certain Scottish Re subsidiaries including SRUS are not debtors in the SHI Chapter 11 and as such, contracts and relationships between the non-debtors and their reinsurance and other counterparties, vendors, and employees are largely unaffected by the Chapter 11 filing.

The actions described above do not impact the recoverability of the Company's reinsurance recoverables from SRUS. Due to the status of SRUS as a principal operating subsidiary of the Scottish Re group, it is expected that SHI will take all prudent actions necessary to allow SRUS to fully discharge its obligations in the most efficient and effective manner during the restructuring and sale process. As part of the Company's assessment process related to the collectability of its reinsurance recoverables, the Company will monitor the progress of Scottish Re's 2018 bankruptcy, sale and restructuring activities and the potential for any negative affect on SRUS.

Non-proprietary product revenue

Effective January 1, 2018, the Company revised the presentation of non-proprietary product revenue within the Summary of Operations so it is presented as part of Line 8.3, Aggregate Write-ins for miscellaneous income. For the periods ending December 31, 2017 and prior, non-proprietary product revenue was presented as an offset to Line 23, General expenses.

22. Events Subsequent

An evaluation of subsequent events was made through May 11, 2018 for the Quarterly Statement issued on May 14, 2018. There were no significant subsequent events requiring adjustment to or disclosure in the financial statements.

24. Retrospectively Rated Contracts and Contracts Subject to Redetermination

E. Risk Sharing Provisions of the Affordable Care Act ("ACA")

The accident and health insurance premiums and claims reported by the Company are for products not subject to the ACA's risk sharing provisions.

25. Change in Incurred Losses and Loss Adjustment Expenses

- A. For accident and health insurance products within the Company's book of business, the changes in the provision for incurred losses and loss adjustment expenses attributable to insured events of prior years were immaterial in 2018 and 2017. The Company did not accrue additional premiums or return premiums related to the prior-year effects in 2018 or 2017.
- B. There were no changes in methodologies and assumptions used in calculating the liability of unpaid losses and loss adjustment expenses for the most recent reporting period presented.
