NOTES TO FINANCIAL STATEMENTS

Notes required on a quarterly basis have been updated in their entirety. There have been no material changes to the following December 31, 2018 Annual Statement notes: 1(B), 2-4, 5(B, C, J, K, O-R), 6, 7, 8(A-G), 9, 10(D-O), 11(A), 12(B-I), 13(1-3, 5-13), 14-16, 17(A), 18, 19, 21(A, B, D-H), 23, 24(A-D) and 26-35. Only material or significant changes from the Annual Statement have been updated for all other notes, or portions thereof.

1. Summary of Significant Accounting Policies

- A. Allstate Life Insurance Company (the “Company”) prepares its financial statements in conformity with accounting practices prescribed or permitted by the Illinois Department of Insurance (“IL DOI”). Prescribed statutory accounting practices include a variety of publications of the National Association of Insurance Commissioners (“NAIC”), as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

The State of Illinois requires its domestic insurance companies to prepare financial statements in conformity with the NAIC Accounting Practices and Procedures Manual, which includes all Statements of Statutory Accounting Principles (“SSAPs”), subject to any deviations prescribed or permitted by the IL DOI.

The Company’s net income and capital and surplus did not include any accounting practices prescribed or permitted by the IL DOI during 2019 and 2018.

C. Investments

Loan-backed and structured securities (“LBASS”) with an NAIC designation of 1 through 5 are reported at amortized cost using the effective yield method. LBASS with an NAIC designation of 6 are reported at the lower of amortized cost or fair value, with the difference reflected in unassigned surplus as unrealized capital loss. In general, LBASS utilize a multi-step process for determining carrying value and NAIC designation in accordance with SSAP No. 43R, *Loan-backed and Structured Securities*. For LBASS of high credit quality with fixed interest rates, the effective yield is recalculated on a retrospective basis. For all others, the effective yield is recalculated on a prospective basis.

- D. Based upon its evaluation of relevant conditions and events, management did not have substantial doubt about the Company’s ability to continue as a going concern as of June 30, 2019 or December 31, 2018.

5. Investments

A. Mortgage Loans, including Mezzanine Real Estate Loans

1. The minimum and maximum lending rates for new mortgage loans in the first six months of 2019 were 3.77% and 4.68%. The minimum and maximum lending rates for new mortgage loans in 2018 were 3.90% and 6.46%. All new mortgage loans were commercial.

D. Loan-Backed Securities

1. Prepayment assumptions for LBASS were obtained from external sources and, if not available, developed internally.

4. Unrealized losses are calculated as the difference between amortized cost and fair value. They result from declines in fair value below amortized cost and are evaluated for OTTI adjustments. Every LBASS with unrealized losses was included in the portfolio monitoring process.

The following table summarizes gross unrealized losses and the fair value of LBASS by the length of time individual securities have been in a continuous unrealized loss position.

(in millions)

	June 30, 2019	December 31, 2018
a. The aggregate amount of unrealized losses:		
1. Less than 12 months	\$ -	\$ (3)
2. 12 months or longer	\$ (4)	\$ (3)
b. The aggregate related fair value of securities with unrealized losses:		
1. Less than 12 months	\$ 26	\$ 415
2. 12 months or longer	\$ 24	\$ 55

5. As of June 30, 2019, \$1 million of the \$4 million of unrealized losses were related to investment grade LBASS with an unrealized loss position less than 20% of amortized cost, the degree of which suggested that these securities did not pose a high risk of being other-than-temporarily impaired. Investment grade is defined as a security having an NAIC designation of 1 or 2, a rating of Aaa, Aa, A or Baa from Moody's, a rating of AAA, AA, A or BBB from S&P Global Ratings, a comparable rating from another nationally recognized rating agency or a comparable internal rating if an externally provided rating is not available. Market prices for certain securities may have credit spreads which imply higher or lower credit quality than the current third party rating. Unrealized losses on investment grade securities were principally related to an increase in market yields which may include increased risk-free interest rates and/or wider credit spreads since the time of initial purchase. The unrealized losses are expected to reverse as the securities approach maturity.

As of June 30, 2019, the remaining \$3 million of unrealized losses were related to below investment grade LBASS with an unrealized loss position greater than or equal to 20% of amortized cost. Unrealized losses on below investment grade LBASS were the result of wider credit spreads resulting from higher risk premiums since the time of the initial purchase. These wider spreads were largely due to the risk associated with the underlying collateral supporting certain LBASS.

NOTES TO FINANCIAL STATEMENTS

LBASS in an unrealized loss position were evaluated based on actual and projected collateral losses relative to the securities' positions in the respective securitization trusts, security specific expectations of cash flows and credit ratings. This evaluation also takes into consideration credit enhancement, measured in terms of: (1) subordination from other classes of securities in the trust that are contractually obligated to absorb losses before the class of security the Company owns, and (2) the expected impact of other structural features embedded in the securitization trust beneficial to the class of securities the Company owns, such as overcollateralization and excess spread.

As of June 30, 2019, the Company had not made a decision to sell and it was not more likely than not the Company would be required to sell LBASS with unrealized losses before recovery of the amortized cost basis. As of June 30, 2019, the Company had the intent and ability to hold LBASS with unrealized losses for a period of time sufficient for them to recover.

10. Information Concerning Parent, Subsidiaries, Affiliates and Other Related Parties

A.,
B. &
C. The Company invests in the Allstate Short Term Pool ("Short term pool"), which is offered by the Allstate Short Term Pool, LLC to certain wholly owned affiliated companies of The Allstate Corporation (the "Corporation"). The Short term pool is an investment pool managed by Allstate Investment Management Company, an affiliate of the Corporation, whose purpose is to efficiently manage cash and cash equivalents for its member companies. Each member company has an undivided interest in the underlying assets of the Short term pool maintained at net asset value per share ("NAV") as a practical expedient per the Operating Agreement of Allstate Short Term Pool, LLC. NAV is based on marking to market the underlying Short term pool's net assets and is the basis for current transactions between the Short term pool and member companies. The value of net assets and each share is determined daily by the Short term pool custodian. As of June 30, 2019, the Company's investment in the Short term pool was \$216 million.

There were no other transactions entered into by the Company with related parties in 2019 that involved more than 1/2 of 1% of the Company's admitted assets. Activity resulting from reinsurance agreements, insurance contracts or cost allocation transactions in accordance with intercompany agreement provisions was excluded.

11. Debt

B. The Company did not hold capital stock of the Federal Home Loan Bank or have funding agreements or borrowing arrangements with this entity as of June 30, 2019 or December 31, 2018.

12. Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Postretirement Benefit Plans

A. 4. The Company was not a sponsor of defined benefit pension, other postretirement, or special or contractual termination benefit plans.

NOTES TO FINANCIAL STATEMENTS

13. Capital and Surplus, Dividend Restrictions and Quasi-Reorganizations

4. The Company paid the following ordinary cash dividends to Allstate Insurance Company:

(in millions)

Date of Payment	2019	2018
June 24	\$ 75	\$ -
September 25	-	100
December 17	-	150

17. Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

B. Transfer and Servicing of Financial Assets

1. The Company's business activities included securities lending programs with third parties, mostly large banks. As of June 30, 2019 and December 31, 2018, bonds, including LBASS and common stocks within the General Account with fair values of \$485 million and \$435 million, respectively, were on loan under these agreements.
2. The Company did not enter into agreements to service assets or liabilities.
4. The Company was not a transferor or transferee with respect to securitizations and asset-backed financing arrangements.

C. Wash Sales

1. In the course of managing the investment portfolio, securities may be sold and reacquired within 30 days of the sale date in order to enhance the portfolio's yield.
2. The details of securities with an NAIC designation of 3 or below, and those without an NAIC designation, which were sold during the second quarter of 2019 and 2018, and reacquired within 30 days of the sale date were as follows:

(\$ in millions)

20. Fair Value Measurements

A. Fair value is defined, per SSAP No. 100R, *Fair Value* ("SSAP No. 100R"), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP No. 100R identified three valuation techniques which are used, either independently or in combination, to determine fair value: (1) market approach; (2) income approach; and (3) cost approach. SSAP No. 100R also contains guidance about observable and unobservable inputs, which are assumptions that market participants would use in pricing an asset or liability. To increase consistency and comparability in fair value measurements, the fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels: 1, 2 and 3. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Certain assets are measured utilizing NAV as a practical expedient to determine fair value.

The Company has two types of situations where investments are classified as Level 3. The first is where specific inputs significant to the fair value estimation models are not market observable. This primarily occurs in the Company's use of broker quotes to value certain securities where the inputs have not been corroborated to be market observable, and the use of valuation models that use significant non-market observable inputs. The second situation where the Company classifies securities in Level 3 is where quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources.

Transfers into Level 3 during the first six months of 2019 included securities measured at lower of cost or market and reported at fair value in 2019 and at cost in 2018. There were no transfers into Level 3 during the first six months of 2018. Transfers out of Level 3 during the first six months of 2019 and 2018 were the result of assets utilizing NAV as a practical expedient to determine fair value. Transfers out of Level 3 during the first six months of 2018 included securities measured at lower of cost or market and reported at cost in 2018, and at fair value in 2017.

3. Transfers between level categorizations may occur due to changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity, trading volume or bid-ask spreads. Transfers between level categorizations may also occur due to changes in the valuation source, including situations where a fair value quote is not provided by the Company's

NOTES TO FINANCIAL STATEMENTS

independent third-party valuation service provider resulting in the price becoming stale or replaced with a broker quote whose inputs have not been corroborated to be market observable. This situation will result in the transfer of a security into Level 3. Transfers in and out of level categorizations are reported as having occurred at the beginning of the quarter in which the transfer occurred.

4. In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 and Level 3 valuations, a combination of the market and income approaches is used.

Listed below is a summary of the significant valuation techniques for assets and liabilities measured and reported at fair value.

Level 2 measurements

Unaffiliated common stocks – The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that are not active.

Derivatives - Free-standing exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives, including interest rate swap, foreign currency swap and total return swap agreements, certain options and credit default swap agreements, are valued using models that rely on inputs such as interest rate yield curves, implied volatilities, index price levels, currency rates, and credit spreads that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

Separate Accounts - Indexed variable annuity contracts may be supported by corporate bonds, including those that are privately placed. The primary inputs to the valuation for public corporate bonds include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Privately placed corporate bonds are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. In addition, indexed variable annuity contracts may be supported by exchange listed derivatives that are not actively traded and are valued based on quoted prices for identical instruments in markets that are not active.

Level 3 measurements

Bonds – Bank loans are valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable.

Unaffiliated common stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 measurements.

Derivatives - Certain over-the-counter derivatives, such as interest rate cap agreements are valued using models that are widely accepted in the financial services industry. These are categorized as Level 3 as a result of the significance of non-market observable inputs such as volatility. Other primary inputs include interest rate yield curves and credit spreads.

Separate Accounts - Indexed variable annuity contracts are supported by mortgage loans. The fair value of mortgage loans on real estate is based on discounted contractual cash flows or, if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics using similar types of properties as collateral.

5. All information related to derivatives measured and reported at fair value is presented above.

NOTES TO FINANCIAL STATEMENTS

The fair value of bonds in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of publicly traded bonds in Level 2 is based upon quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Non-publicly traded bonds in Level 2 are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The fair value of municipal bonds in Level 3 not rated by third party credit rating agencies, but receiving an NAIC designation is based on quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields and credit spreads. Also included are municipal bonds valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable and municipal bonds in default valued based on present value of expected cash flows. The fair value of corporate bonds in Level 3 is primarily based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Other inputs for corporate bonds include an interest rate yield curve, as well as published credit spreads for similar assets that incorporate credit quality and industry sector of the issuer. The fair value of LBASS in Level 2 is primarily based on valuation models utilizing quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads to determine fair value. Certain LBASS in Level 2 are valued based on non-binding broker quotes whose inputs have been corroborated to be market observable. The fair value of LBASS in Level 3 is primarily based on non-binding broker quotes received from brokers who are familiar with the investments and where the inputs have not been corroborated to be market observable or internal models with non-market observable inputs.

The fair value of preferred stocks in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads. The fair value of preferred stocks in Level 3 is based on non-binding broker quotes where the inputs have not been corroborated to be market observable.

The fair value of unaffiliated common stocks in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of unaffiliated common stocks in Levels 2 and 3 is based on the valuation methods described in Part A4 of this note.

The fair value of mortgage loans on real estate in Level 3 is based on discounted contractual cash flows, or if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics, using similar types of properties as collateral.

The fair value of cash equivalents in Level 1 is based on unadjusted quoted prices or daily quoted net asset values for identical assets in active markets the Company can access. The fair value of cash equivalents in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

The fair value of short-term investments in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. The fair value of short-term investments in Level 3 is primarily based on non-binding broker quotes from brokers who are familiar with the investments or based on internal valuation models. The fair value of the short-term investment in the Short term pool is measured at NAV. NAV is based on marking to market the underlying Short term pool's net assets and is the basis for current transactions between the Short term pool and member companies. The value of net assets and each share is determined daily by the Short term pool custodian.

The fair value of derivatives in Levels 2 and 3 is based on the valuation methods described in Part A4 of this note.

The fair value of LIHTC property investments in Level 3 is based on amortized cost, using the proportional amortization method, which approximates fair value.

The fair value of unaffiliated surplus notes in Level 2 is based upon quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. The fair value of affiliated surplus notes in Level 3 is based on discounted cash flow calculations using current interest rates for instruments with comparable terms.

The fair value of reinvested collateral from securities lending in Level 2 is based on carrying value due to its short-term nature.

The fair value of the assets of the Separate Account in Level 1 is based on actively traded mutual funds that have daily quoted net asset values that are readily determinable for identical assets the Company can access. The fair value of the assets of the Separate Accounts in Levels 2 and 3 is based on the valuation methods described in Part A4.

Financial liabilities

Presented below are the aggregate fair value estimates and statement values of financial instruments:

(in millions)		June 30, 2019						
Type of Financial Instrument	Aggregate Fair Value	Statement Value	(Level 1)	(Level 2)	(Level 3)	NAV	Not Practicable (Carrying Value)	
Deposit-type contract	\$ 2,229	\$ 1,853	\$ -	\$ -	\$ 2,229	\$ -	\$ -	\$ -
Securities lending collateral	\$ 498	\$ 498	\$ -	\$ 498	\$ -	\$ -	\$ -	\$ -
Derivatives	\$ 24	\$ 24	\$ -	\$ 24	\$ -	\$ -	\$ -	\$ -
Separate Accounts - Derivatives	\$ 5	\$ 5	\$ -	\$ 5	\$ -	\$ -	\$ -	\$ -

		December 31, 2018						
Type of Financial Instrument	Aggregate Fair Value	Statement Value	(Level 1)	(Level 2)	(Level 3)	NAV	Not Practicable (Carrying Value)	
Deposit-type contract	\$ 2,314	\$ 1,923	\$ -	\$ -	\$ 2,314	\$ -	\$ -	\$ -
Securities lending collateral	\$ 448	\$ 448	\$ -	\$ 448	\$ -	\$ -	\$ -	\$ -
Derivatives	\$ 5	\$ 5	\$ -	\$ 5	\$ -	\$ -	\$ -	\$ -
Separate Accounts - Derivatives	\$ 1	\$ 1	\$ -	\$ 1	\$ -	\$ -	\$ -	\$ -

The fair value of the liability for deposit-type contracts is generally based on the terms of the underlying contracts incorporating current market-based crediting rates for similar contracts that reflect the Company's own credit risk. Immediate annuities without life contingencies and fixed rate funding agreements are valued at the present value of future benefits using current market-based implied interest rates and reflect the Company's own credit risk. Fixed annuities are valued at the account value less surrender charges.

The fair value of the liabilities for collateral related to securities lending and derivatives in Level 2 is based on carrying value due to its short-term nature.

The fair value of derivatives in Level 2 is based on the valuation methods described in Part A4 of this note.

- D. The Company was able to estimate the fair value of all its financial instruments in 2019 and 2018.
- E. Investments in certain common stock measured and reported at NAV in the Assets page and presented in the table in Part A(1) are generally not redeemable with the issuing corporation and cannot be sold without approval of the managing members. Distributions of income are usually received from the sale of common stock or the liquidation of the underlying asset or assets of the issuing corporation over the life of these investments, typically 3-7 years. The Company has no commitments to invest in these investments over their remaining lives.

NOTES TO FINANCIAL STATEMENTS

The Company's investment in the Short term pool is measured and reported at NAV in the Assets page and presented in the table in Part A(1). There are no restrictions on withdrawals from the Short term pool. Withdrawals are made at current NAV. Each member company may make withdrawals on demand without penalty on any business day with the settlement of funds not to exceed ten business days. The Short term pool's investment strategy is to invest in U.S. dollar-denominated, high quality and highly liquid investments with very low credit risk and a duration of less than 100 days. The Company did not have commitments to invest in the Short term pool.

21. Other Items

C. Other Disclosures

Transfer of Investments

During 2018, the Company transferred limited partnership investments with a book/adjusted carrying value of \$1.55 billion and cash of \$53 million to AIMCO Private Fund I, LLC ("AIMCO I"). Since the transfer of the assets did not meet the conditions of a sale per SSAP No. 103R, *Transfer and Servicing of Financial Assets and Extinguishments of Liabilities*, the assets of AIMCO I, which consisted of limited partnership investments with a book/adjusted carrying value of \$1.49 billion, cash equivalents of \$98 million and cash of \$4 million as of June 30, 2019, will continue to be directly reported in the Company's financial statements.

Scottish Re (U.S.), Inc. ("SRUS")

The parent of SRUS, Scottish Holdings, Inc. and their parent, collectively referred to as SHI, filed U.S. Chapter 11 proceedings on January 28, 2018. During 2018, a stock purchase agreement was executed between SHI and Hildene Re Holdings LLC for the purchase of SHI. The sale did not occur in 2018 and SRUS did not file December 31, 2018 statutory statements. The Company's reinsurance reserve credit and recoverables with SRUS, net of the allowance for uncollectible reinsurance of \$3 million as of June 30, 2019, were \$52 million and \$57 million, respectively as of June 30, 2019 and December 31, 2018.

On March 6, 2019, the Chancery Court of the State of Delaware entered a Rehabilitation and Injunction Order in response to a petition filed by the Insurance Commissioner (the "Petition") which declared SRUS impaired and in unsound financial condition. Pursuant to the Petition, it is expected that SRUS will submit a Plan of Rehabilitation and will not make payments relating to the claims or losses of ceding insurers. The Company joined in a joint motion filed on behalf of several affected parties asking the court to allow a specified amount of offsetting claim payments and losses against premiums remitted to SRUS. The Company and Allstate Life Insurance Company of New York also filed a separate motion related to the reimbursement of claim payments where SRUS is also acting administrator. The court has not yet ruled on either of these motions.

The Company will continue to monitor SRUS for future developments and reevaluate its allowance for uncollectible amounts as new information becomes available.

22. Events Subsequent

An evaluation of subsequent events was made through August 9, 2019 for the Quarterly Statement issued on August 13, 2019. There were no significant subsequent events requiring adjustment to or disclosure in the financial statements.

24. Retrospectively Rated Contracts and Contracts Subject to Redetermination

E. Risk Sharing Provisions of the Affordable Care Act ("ACA")

The accident and health insurance premiums and claims reported by the Company are for products not subject to the ACA's risk sharing provisions.

25. Change in Incurred Losses and Loss Adjustment Expenses

A. For accident and health insurance products within the Company's book of business, the changes in the provision for incurred losses and loss adjustment expenses attributable to insured events of prior years were immaterial in 2019 and 2018. The Company did not accrue additional premiums or return premiums related to the prior-year effects in 2019 or 2018.

B. There were no changes in methodologies and assumptions used in calculating the liability of unpaid losses and loss adjustment expenses for the most recent reporting period presented.
