NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Allstate Insurance Company (the “Company” or “Allstate”) prepares its financial statements in conformity with accounting practices prescribed or permitted by the Illinois Department of Insurance (“IL DOI”). Prescribed statutory accounting practices include a variety of publications of the National Association of Insurance Commissioners (“NAIC”), as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

The State of Illinois requires its domestic insurance companies to prepare financial statements in conformity with the NAIC Accounting Practices and Procedures Manual (“APPM”), which includes all Statements of Statutory Accounting Principles (“SSAPs”), subject to any deviations prescribed or permitted by the IL DOI.

The Company’s net income and capital and surplus did not include any accounting practices prescribed or permitted by the IL DOI during 2020 and 2019.

B. The preparation of financial statements in conformity with the NAIC Annual Statement Instructions and accounting practices prescribed or permitted by the IL DOI requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

C. Listed below is a summary of the accounting policies that materially affect the financial statements.

Investments

Bonds with an NAIC designation of 1 or 2, including loan-backed and structured securities (“LBASS”) and excluding Securities Valuation Office (“SVO”)-identified investments, are reported at amortized cost using the effective yield method. Bonds with an NAIC designation of 3 through 6 are reported at the lower of amortized cost or fair value, with the difference reflected in unassigned surplus as an unrealized capital loss. In general, LBASS utilize a multi-step process for determining carrying value and NAIC designation in accordance with SSAP No. 43R, *Loan-backed and Structured Securities*. The Company’s bond portfolio also includes SVO-identified investments, which are reported at fair value. Changes in the fair value of SVO-identified investments are recorded as a change in net unrealized capital gains (losses), which is a component of unassigned surplus.

Redeemable preferred stocks are reported at cost, amortized cost or the lower of cost, amortized cost or fair value, depending on the assigned NAIC designation. Perpetual preferred stocks are reported at fair value or the lower of cost or fair value depending on the assigned NAIC designation. Unaffiliated common stocks are reported at fair value. For preferred stocks reported at fair value and unaffiliated common stocks, the differences between amortized cost or cost and fair value are recorded as a change in net unrealized capital gains (losses), which is a component of unassigned surplus.

Common stock investments in insurance subsidiaries domiciled in the United States are recorded based on the underlying statutory equity of the subsidiary. Common stock investments in foreign insurance subsidiaries are recorded based on the underlying accounting principles generally accepted in the United States of America (“GAAP”) equity from audited GAAP financial statements adjusted for items described in SSAP No. 97, *Investments in Subsidiary, Controlled and Affiliated Entities*.

Mortgage loans are reported at unpaid principal balances, net of unamortized premium or discount.

Investments in real estate are reported at depreciated cost less encumbrances or the lower of depreciated cost or fair value, less encumbrances and estimated cost to sell the property. Single real estate property investments, that are wholly owned by a limited liability company that is directly and wholly owned by the reporting entity, are reported as real estate investments.

Cash equivalents are reported at fair value or amortized cost. Due to a change in APPM requirements for SSAP No. 2R, *Cash, Cash Equivalents, Drafts and Short-Term Investments* (“SSAP No. 2R”), cash equivalents include the investment in the Allstate Short term pool (“Short term pool”) as of December 31, 2020. Cash equivalents reported at amortized cost are *readily convertible into known amounts of cash* and so near their maturity that they present an insignificant risk of change in value because of changes in interest rates.

Short-term investments, excluding December 31, 2019 investments in the Short term pool, are reported at amortized cost. As of December 31, 2019, investments in the Short term pool were included in short-term investments and were stated at the net asset value (“NAV”) as a practical expedient to determine fair value.

Other invested assets consist of investments in joint ventures, partnerships, limited liability companies, low income housing tax credit (“LIHTC”) property investments, collateral loans and surplus notes. Investments in joint ventures, partnerships and limited liability companies are generally reported based on the underlying audited GAAP equity of the investee, with undistributed earnings or losses reflected in unassigned surplus as a change in net unrealized capital gains and losses and, are generally recognized on a delay due to the availability of financial statements. LIHTC property investments are carried at proportional amortized cost, based on the proportion of tax benefits received in the current year to total estimated tax benefits allocated to the Company. Collateral loans are reported at the outstanding principal balance and any related interest. Surplus notes are reported at amortized cost or the lower of amortized cost or fair value depending on the NAIC designation.

Investment income primarily consists of interest, dividends, income from limited partnership interests, rental income from real estate, income from certain derivative transactions and amortization of any premium or discount. Interest is recognized on an accrual basis using the effective yield method and dividends are recorded at the ex-dividend date. Interest income for LBASS is determined considering estimated pay-downs, including prepayments, obtained from third-party data sources and internal estimates. Actual prepayment experience is periodically reviewed, and effective yields are recalculated when differences arise between the prepayments originally anticipated and the actual prepayments received and currently anticipated. For LBASS of high credit quality with fixed interest rates, the effective yield is recalculated on a retrospective basis. For all others, the effective yield is recalculated on a prospective basis. In periods subsequent to the recognition of an other-than-temporary impairment (“OTTI”) on a bond, including LBASS, the difference between the new amortized cost basis and the cash flows expected to be collected is accreted as interest income. Accrual of income is suspended for other-than-temporarily impaired bonds when the timing and amount of cash flows expected to be received is not reasonably estimable. Accrual of income is suspended for mortgage loans and bank loans that are in default or when the full and timely collection of principal and interest payments is not probable. Cash receipts on investments on nonaccrual

## NOTES TO FINANCIAL STATEMENTS

status are generally recorded as a reduction of carrying value. Cash distributions received from investments in joint ventures, partnerships and limited liability companies are recognized in investment income to the extent that they are not in excess of the undistributed accumulated earnings attributable to the investee and the unrealized gain would be reversed. Any distributions that are in excess of the undistributed accumulated earnings attributable to the investee reduce the carrying amount of the investment.

Realized capital gains and losses include gains and losses on investment sales, write-downs in value due to other than temporary declines in fair value, expirations and settlements of certain derivatives. Realized capital gains and losses on investment sales are determined on a specific identification basis.

The Company has a comprehensive portfolio monitoring process to identify and evaluate each bond, including LBASS, and common and preferred stock, whose carrying value may be other-than-temporarily impaired. For each bond, excluding LBASS, in an unrealized loss position (fair value is less than amortized cost), the Company assesses whether management with the appropriate authority has made a decision to sell the bond prior to its maturity at an amount below its carrying value. If the decision has been made to sell the bond, the bond's decline in fair value is considered other than temporary and the Company recognizes a realized capital loss equal to the difference between the amortized cost and the fair value of the bond at the balance sheet date the assessment is made. If the Company has not made the decision to sell the bond, but it is probable the Company will not be able to collect all amounts due according to contractual terms, the bond's decline in value is considered other-than-temporarily impaired, and a write-down of the amortized cost to fair value is required. For securities with an NAIC designation of 3 through 6, unrealized losses that are not deemed other-than-temporarily impaired are reflected in the Company's unassigned surplus.

For LBASS, the Company assesses whether management with the appropriate authority has made a decision to sell each LBASS in an unrealized loss position or does not have the intent and ability to retain the LBASS for a period of time sufficient to recover the amortized cost basis. If either situation exists, the security's decline in value is considered other-than-temporarily impaired and the security is written down as a realized capital loss to fair value. If management has not made the decision to sell the LBASS and management intends to hold the security for a period of time sufficient to recover the amortized cost basis, the Company analyzes the present value of the discounted cash flows expected to be collected. If the present value of the discounted cash flows expected to be collected is less than the amortized cost, the security is considered other-than-temporarily impaired and the Company recognizes a realized capital loss for the difference between the present value of the discounted cash flows and the amortized cost. For securities with an NAIC designation of 3 through 6, unrealized losses that are not deemed other-than-temporarily impaired are reflected in the Company's unassigned surplus.

For common and preferred stocks, the Company considers various factors, including whether the Company has the intent and ability to hold the stock for a period of time sufficient to recover its cost basis. Where the Company lacks the intent and ability to hold to recovery, or believes the recovery period is extended, the stock's decline in fair value is other than temporary and the difference between the stock's cost and fair value is recognized as a realized capital loss. A decision to sell stock for an amount below its cost would be an other than temporary decline and a realized capital loss is recorded. For stocks managed by a third party, either the Company has contractually retained its decision making authority as it pertains to selling stocks that are in an unrealized loss position or it recognizes an unrealized loss at the end of the period through a charge to realized capital loss.

The Company's portfolio monitoring process includes a quarterly review of all securities to identify instances where the fair value of a security compared to its amortized cost (for bonds, including LBASS) or cost (for stocks) is below internally established thresholds. The process also includes the monitoring of other impairment indicators such as ratings, ratings downgrades and payment defaults. The securities identified, in addition to other securities for which the Company may have a concern, are evaluated for potential OTTI using all reasonably available information relevant to the collectibility or recovery of the security. Inherent in the Company's evaluation of OTTI for these securities are assumptions and estimates about the financial condition and future earnings potential of the issue or issuer. Some of the factors that may be considered in evaluating whether a decline in fair value is other than temporary are: (1) the financial condition, near-term and long-term prospects of the issue or issuer, including relevant industry specific market conditions and trends, geographic location and implications of rating agency actions and offering prices; (2) the specific reasons that a security is in an unrealized loss position, including overall market conditions which could affect liquidity; and (3) the length of time and extent to which the fair value has been less than amortized cost or cost.

Impairment adjustments on mortgage loans are recorded when it is probable contractual principal and interest will not be collected. OTTI adjustments reduce the carrying value of mortgage loans to the fair value of the collateral less the estimated cost to sell. The carrying value of real estate is adjusted for OTTI only if it is not recoverable and exceeds fair value.

### Derivative financial instruments

Derivative financial instruments include total return, credit default and interest rate swap agreements, foreign currency forward contracts, futures contracts and indexed option contracts, including swaption agreements. When derivatives meet specific criteria, they may be designated as accounting hedges, which means they may be accounted for and reported on in a manner that is consistent with the hedged asset or liability. Derivatives that are not designated as accounting hedges are accounted for on a fair value basis, with changes in fair value recorded as unrealized gains or losses in unassigned surplus. The Company's accounting policy for the various types of derivative instruments is discussed further in Note 8, Parts A, B & C.

### Securities loaned

The Company's business activities include securities lending transactions, which are used primarily to generate net investment income. The proceeds received in conjunction with securities lending transactions are reinvested in short-term investments, cash equivalents or bonds.

### Off-balance sheet financial instruments

Commitments to invest, commitments to purchase private placement securities, commitments to fund loans and financial guarantees have off-balance-sheet risk because their contractual amounts are not recorded in the Company's Statements of Financial Position. The details of the off-balance-sheet commitments are discussed further in Note 16.

### Premium revenue

Premiums are deferred and earned on a pro-rata basis over the policy period. The policy term on some Shared Economy policies is only one month. As a result, those policies are fully earned in the period they are written. The portion of premiums written applicable to the unexpired periods of the policies is recorded as unearned premiums. Premiums received in advance of the policies' effective dates are recorded as advance premiums. Premiums written and not yet collected and agents' balances are shown as a receivable, with balances older than 90 days generally nonadmitted. The Company regularly evaluates this receivable and establishes valuation allowances, as appropriate, for items less than 90 days.

The company also writes contractual liability insurance policies ("CLPs") related to warranty coverage for the sale of mobile phones, televisions, tablets, computers, and other miscellaneous consumer products in all states except Florida, Washington and New Jersey. Premiums on these policies are deferred and earned over the risk period of the policies which would vary by product and range from one to five years. The CLPs that support these protection plan products are earned monthly based on loss emergence patterns that were developed using actual warranty loss trends, net of an estimate for cancellations.

### Reserves for losses and loss adjustment expenses

Reserves for losses and loss adjustment expenses are the estimated amounts necessary to settle all reported and unreported claims for the ultimate cost of insured losses, based upon the facts in each case and the Company's experience with similar cases. These reserves are reported net of unpaid reinsurance recoverables and estimated amounts of salvage and subrogation. The establishment of appropriate reserves,

NOTES TO FINANCIAL STATEMENTS

including reserves for catastrophes, is an inherently uncertain and complex process. Reserve estimates are regularly reviewed and updated using the most current information available. Any resulting reestimates are reflected in the current Statement of Income.

Reinsurance

In the normal course of business, the Company seeks to limit aggregate and single exposure to losses on large risks by purchasing reinsurance. The Company may also use reinsurance to affect the disposition of certain blocks of business. Reinsurance does not extinguish the Company's primary liability under the policies written. The Company regularly evaluates whether a provision for reinsurance is needed by evaluating the admissibility, collectability and collateralization of reinsurers' balances in accordance with the APPM. A provision for reinsurance is established, as appropriate, and this liability is netted against the reported reinsurance recoverable.

Indemnification

The Company may also participate in various indemnification mechanisms, including industry pools and facilities, which are reimbursement mechanisms that assess participating insurers for expected claims, reimburse participating insurers for qualifying paid claims and may permit participating insurers to recoup amounts assessed directly from insureds. Indemnification recoverables are backed by the financial resources of the property and casualty insurance company market participants. Indemnification recoverables are considered collectible based on the industry pool and facility enabling legislation.

The amounts reported in the Assets page as reinsurance and indemnification recoverables include amounts paid and due from reinsurers and indemnitors. Reserves are reported net of amounts expected to be recovered from reinsurers and indemnitors on losses and loss adjustment expense reserves that have not yet been paid. Reinsurance and indemnification recoverables on unpaid losses are estimated based upon assumptions consistent with those used in establishing the liabilities related to the underlying contract. Reinsurance and indemnification premiums are generally reflected in income in a manner consistent with the recognition of premiums on the associated contracts. For catastrophe coverage, the cost of reinsurance premiums is recognized ratably over the contract period to the extent coverage remains available. Certain catastrophe agreements are subject to reinstatement premiums. Reinstatement premium is earned over the period from the reinstatement of the limit to the expiration of the agreement.

Income taxes

The income tax provision is calculated under the liability method. Deferred tax assets ("DTAs") and deferred tax liabilities ("DTLs") are recorded based on the difference between the statutory financial statement and tax bases of assets and liabilities at the enacted tax rates. Deferred income taxes also arise from net unrealized capital gains and losses on certain investments carried at fair value. The net change in DTAs and DTLs is applied directly to unassigned surplus. The nonadmitted portion of gross DTAs is determined by applying the rules prescribed by SSAP No. 101, *Income Taxes* ("SSAP No. 101").

4. Unrealized losses are calculated as the difference between amortized cost and fair value. They result from declines in fair value below amortized cost and are evaluated for OTTI. Every LBASS with unrealized losses was included in the portfolio monitoring process.

The following table summarizes gross unrealized losses and the fair value of LBASS by the length of time individual securities have been in a continuous unrealized loss position as of December 31.

(in millions)		2020	2019
a. The aggregate amount of unrealized losses:			
1. Less than 12 months	\$	(1)	\$ -
2. 12 months or longer	\$	(1)	\$ (2)
b. The aggregate related fair value of securities with unrealized losses:			
1. Less than 12 months	\$	118	\$ 105
2. 12 months or longer	\$	101	\$ 179

NOTES TO FINANCIAL STATEMENTS

5. The following table summarizes the gross unrealized losses by unrealized loss position and credit quality as of December 31, 2020.

(in millions)	Investment	Below	Total
	Grade	Investment	
	Grade	Grade	
LBASS with unrealized loss position less than 20% of amortized cost <sup>(1)(2)</sup>	\$ (1)	\$ (1)	\$ (2)
<sup>(1)</sup> Substantially all below investment grade LBASS have been in an unrealized loss position for less than twelve months.			
<sup>(2)</sup> Related to LBASS with an unrealized loss position less than 20% of amortized cost, the degree of which suggested that these securities did not pose a high risk of being other-than-temporarily impaired.			

Investment grade is defined as a security having an NAIC designation of 1 or 2, a rating of Aaa, Aa, A or Baa from Moody's, a rating of AAA, AA, A or BBB from S&P Global Ratings, a comparable rating from another nationally recognized rating agency, or a comparable internal rating if an externally provided rating is not available. Market prices for certain securities may have credit spreads which imply higher or lower credit quality than the current third-party rating. Unrealized losses on investment grade securities were principally related to an increase in market yields which may include increased risk-free interest rates and/or wider credit spreads since the time of initial purchase. The unrealized losses are expected to reverse as the securities approach maturity.

LBASS in an unrealized loss position were evaluated based on actual and projected collateral losses relative to the securities' positions in the respective securitization trusts, security specific expectations of cash flows and credit ratings. This evaluation also takes into consideration credit enhancement, measured in terms of: (1) subordination from other classes of securities in the trust that are contractually obligated to absorb losses before the class of security the Company owns, and (2) the expected impact of other structural features embedded in the securitization trust beneficial to the class of securities the Company owns, such as overcollateralization and excess spread.

As of December 31, 2020, the Company had not made the decision to sell and it was not more likely than not the Company would be required to sell LBASS with unrealized losses before recovery of the amortized cost basis. As of December 31, 2020, the Company had the intent and ability to hold LBASS with unrealized losses for a period of time sufficient for them to recover.

3. Derivative financial instruments utilized by the Company during 2020 and 2019 included total return, credit default and interest rate swap agreements, foreign currency forward contracts, futures contracts and indexed option contracts, including swaption agreements. The notional amounts specified in the contracts are used to calculate the exchange of contractual payments under the agreements and are generally not representative of the potential for gain or loss on these agreements. However, the notional amounts specified in credit default swap agreements where the Company has sold credit protection represents the maximum amount of potential loss, assuming no recoveries.

Market risk is the risk that the Company will incur losses due to adverse changes in market rates and prices. Market risk exists for all of the derivative financial instruments the Company currently holds, as these instruments may become less valuable due to adverse changes in market conditions. To limit this risk, the Company's senior management has established risk control limits. In addition, changes in fair

## NOTES TO FINANCIAL STATEMENTS

value of the derivative financial instruments that the Company uses for risk management purposes are generally offset by the change in the fair value or cash flows of the hedged risk component of the related assets, liabilities or forecasted transactions.

The Company manages its exposure to credit risk by utilizing highly rated counterparties, establishing risk control limits, executing legally enforceable master netting agreements and obtaining collateral where appropriate. The Company has not incurred any losses on derivative financial instruments due to counterparty nonperformance. Other derivatives, including futures and certain option contracts, are traded on organized exchanges, which require margin deposits and guarantee the execution of trades, thereby mitigating any potential credit risk.

Counterparty credit exposure represents the Company's potential loss if all of the counterparties concurrently fail to perform under the contractual terms of the contracts and all collateral, if any, becomes worthless. This exposure is measured by the statement value of over-the-counter and cleared derivative contracts with a positive statement value at the reporting date.

The Company uses derivatives for risk reduction and to increase investment portfolio returns through asset replication. Risk reduction activity is focused on managing the risks with certain assets and liabilities arising from the potential adverse impacts from changes in risk-free interest rates, changes in equity market valuations, increases in credit spreads and foreign currency fluctuations. Asset replication refers to the "synthetic" creation of assets through the use of derivatives. The Company replicates bonds using a combination of a credit default swap agreement, total return swap agreement or a foreign currency forward contract and one or more highly rated bonds, primarily investment grade host bonds, to synthetically replicate the economic characteristics of one or more cash market securities. The Company replicates equity returns using total return swap agreements, futures and options to increase equity exposure. With the exception of non-hedge derivatives used for asset replication, all of the Company's derivatives are evaluated for their ongoing effectiveness as either accounting hedge or non-hedge derivative financial instrument on at least a quarterly basis. The Company does not use derivatives for speculative purposes.

The paragraphs below describe the derivatives the Company uses, including the objectives, cash requirements and accounting policies.

### Swaps

Total return swap agreements are agreements where one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains. The Company uses total return swap agreements for asset replication and as a hedge to offset valuation losses in the portfolio during periods of declining market values. Cash settlements usually occur at dates specified in individual agreements. The amount of cash exchanged is equal to the difference between the set rate in the contract and the return of the underlying asset.

Credit default swap agreements are used for either buying credit protection or selling credit protection on a specified entity or index. Buying credit protection requires a payment of a premium to a counterparty or a clearing house in exchange for a future cash settlement or a promise to deliver a bond, if a specified credit event occurs. Selling credit protection provides for the receipt of a premium from a counterparty or a clearing house in exchange for a future cash settlement, or a promise to purchase a bond, if a specified credit event occurs. The Company enters into certain credit default swap agreements as a means to buy protection, mitigating the credit risk in a particular bond or bond portfolio, while leaving the security or bond portfolio intact. The Company enters into other credit default swap agreements as replication transactions, enabling greater diversification of credit risk by selling protection on specified entities that may not be frequent issuers in the traditional corporate bond market and by selling protection on indices also as a less expensive alternative to the cash market.

Interest rate swap agreements are agreements that periodically exchange the difference between two designated sets of cash flows, (fixed to variable rate, variable to fixed rate, or variable to variable rate), based upon designated market rates or rate indices and a notional amount. Cash settlements usually occur at dates specified in individual agreements. The Company uses interest rate swap agreements to manage the interest rate risks of existing investments and to reduce exposure to rising or falling interest rates. Portfolio duration management is a risk management strategy that is principally employed wherein interest rates swap agreements are utilized to change the duration of the portfolio in order to offset the economic effect that interest rates would otherwise have on the fair value of its bonds. Cash settlements usually occur at dates specified in individual agreements. The amount of cash exchanged is equal to the difference between the rate in the contract at which the Company receives cash compared to the rate at which the Company is to pay cash.

Total return, credit default and interest rate swap agreements are reported in Schedule DB, Part A. Contracts used for replication purposes are also reported in Schedule DB, Part C. Total return and interest rate swap agreements used as a hedge receive non-hedge accounting treatment. Credit default swap agreements used for buying protection receive non-hedge accounting treatment. Periodic settlements, which represent amounts receivable from/payable to the counterparties or a clearing house are based on the settlement terms within the agreement, and reported as a component of net investment income. The change in the fair value of open swap agreements that receive non-hedge accounting treatment are reported as net unrealized capital gains and losses, within unassigned surplus. Total return and credit default swap agreements entered into as replication transactions are valued at amortized cost.

Foreign currency forward contracts involve the future exchange or delivery of foreign currencies based on terms negotiated at the inception of the contract which are settled at the end of the contract. They are used to reduce foreign currency risk associated with holding foreign currency denominated investments. Cash settlement is required when the contract matures. The amount of cash exchanged is based on the difference between the specified rate on the date the contract was entered into (contract rate) compared to the actual rate on the settlement date. On the settlement date, the Company will either pay or receive cash equal to the difference between the contract rate and the actual rate multiplied by the specified notional amount. The change in the fair value of open foreign currency forward contracts is reported as net unrealized capital gains and losses, within unassigned surplus, until closed (e.g. terminated or settled). If the contract was hedging coupon payments of a bond, any gains and losses at closing are reported in net investment income. If the contract was hedging the original principal of a bond or the bond the Company was hedging is sold, any gains and losses at closing are reported in realized capital gains or losses. Foreign currency forward contracts entered into as a replication transaction are valued at amortized cost. These contracts are reported in Schedule DB, Part A and receive non-hedge accounting treatment. If any of these contracts were used for replication purposes, then they are also reported in Schedule DB, Part C.

### Futures

The Company utilizes equity index and interest rate futures contracts. Futures contracts are defined as commitments to buy or sell designated financial instruments based on specified prices, yields or indices. Futures contracts provide returns at specified or optional dates based upon a specified index or interest rate applied to a notional amount. The Company utilizes futures contracts to (1) manage the interest rate risks of existing investments by changing the duration of the portfolio in order to offset the economic effect that interest rates would otherwise have on the fair value of the bonds; (2) offset valuation losses in the common and preferred stock portfolios during periods of declining equity market values and (3) increase equity exposure through asset replication. In addition, equity index futures are used to hedge the market risk related to deferred compensation liability contracts. Daily cash settlement of variation margins is required for futures contracts and is based on the changes in daily prices. The final settlement of equity index and interest rate futures contracts is always in cash. Daily cash settlements of margin gains or losses for futures contracts receiving fair value hedge accounting treatment are reported in net investment income. The daily cash settlements of margin gains and losses for futures contracts that receive non-hedge accounting treatment and have terminated are reported in net realized capital gains or losses. The daily cash settlements of margin gains and losses for open futures contracts that receive non-hedge accounting treatment are reported as net unrealized capital gains and losses within unassigned surplus. Futures contracts are reported in Schedule DB, Part B and receive either fair value hedge accounting or non-hedge accounting treatment, depending on the strategy. Futures contracts used for replication purposes are also reported in Schedule DB, Part C.

NOTES TO FINANCIAL STATEMENTS

Options

Index option contracts provide returns at specified or optional dates based on a specified equity index applied to the option's notional amount. When the Company purchases and write (sells) option contracts at specific prices, a premium is calculated for the right, but not the obligation, to buy/sell the value of an underlying index at a stated price on or before the expiration date of the option. The amount of premium calculated is based on the number of contracts purchased/sold, the specified price and the maturity date of the contract. Premiums are paid or received in cash at either the inception of the purchase/sale of the contract or throughout the life of the contract depending on the agreement with the counterparties and brokers. If the option is exercised, the Company receives/pays cash equal to the product of the number of contracts and the specified price in the contract (strike price). Purchased and written put and call index option contracts are cash settled upon exercise. If the options are not exercised, then no additional cash is exchanged when the contract expires. Premiums incurred when purchasing option contracts are reported as a derivative asset and premiums received when writing option contracts are reported as a derivative liability. Purchased and written option contracts are reported on Schedule DB, Part A. Purchased and written option contracts used for replication purposes are also reported in Schedule DB, Part C.

The Company purchases and writes option contracts for asset replication and as a hedge to offset valuation losses in the investment portfolio during periods of declining market values. Purchased and written index option contracts used as a hedge receive non-hedge accounting treatment. The change in the fair value of purchased/written option contracts is reported as net unrealized capital gains and losses, within unassigned surplus, with an adjustment to derivative assets/liabilities. The gain or loss on the cash settled exercise of a purchased/written index option is reported in realized capital gains or losses. If the purchased/written option contract expires without being exercised the premiums paid/received are reported as realized capital gains or losses and the corresponding asset/liability previously recorded is reversed.

Purchased and written index option contracts entered into as replication transactions are valued at amortized cost. Premiums paid for a purchased/written option contract are amortized/accreted into net investment income over the life of the option. The gain or loss on the cash settled exercise of a purchased/written index option contract is reported in realized capital gains or losses.

Swaption agreements give the holder the right, but not the obligation, to enter into an interest rate swap agreement at a future date. Swaption agreements are primarily used to hedge interest rate risk. Typically, a premium is paid to the counterparty at the inception of a swaption agreement. Cash settlements usually occur at dates specified in individual agreements. The amount of cash exchanged is equal to the difference between the rate in the agreement at which the Company receives cash compared to the rate at which the Company is to pay cash. Premiums paid when purchasing swaption agreements are reported as a derivative asset. The change in the fair value of open swaption agreements is reported as net unrealized capital gains and losses, within unassigned surplus, with an adjustment to the derivative asset. If a swaption agreement terminates prior to its expiration, or if it expires, the premiums paid are reported as realized gains or losses. Swaption agreements are reported on Schedule DB, Part A and receive non-hedge accounting treatment.

- 4. The Company entered into option contracts which required the payment/receipt of premiums at either the inception of the contract or throughout the life of the contract, depending on the agreement with counterparties and brokers.
- 5. The Company did not have gains or losses in net unrealized capital gains or losses that represented a component of any derivatives' gain or loss that was excluded from the assessment of hedge effectiveness in 2020 or 2019.
- 6. The Company did not have gains or losses in net unrealized capital gains or losses that resulted from derivatives that no longer qualify for hedge accounting treatment in 2020 or 2019.
- 7. The Company did not have derivatives accounted for as cash flow hedges of a forecasted transaction.
- 8. The Company did not have open option contracts with financing premiums due as of December 31, 2020 or 2019.

B. Derivatives under SSAP No. 108 – *Derivative Hedging Variable Annuity Guarantees* – Not applicable.

9. Income Taxes

The application of SSAP No. 101 requires the Company to evaluate the recoverability of DTAs and to establish a statutory valuation allowance adjustment ("valuation allowance") if necessary to reduce the DTA to an amount which is more likely than not to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary, and if so, the amount of such valuation allowance. In evaluating the need for a valuation allowance the Company considers many factors, including: (1) the nature of the DTAs and DTLs; (2) whether they are ordinary or capital; (3) the timing of their reversal; (4) taxable income in prior carryback years as well as projected taxable earnings exclusive of reversing temporary differences and carryforwards; (5) the length of time that carryovers can be utilized; (6) unique tax rules that would impact the utilization of the DTAs; and (7) any tax planning strategies that the Company would employ to avoid an operating loss or tax credit carryforward from expiring unused. Although the realization is not assured, management believes it is more likely than not that the DTAs, net of the valuation allowance, will be realized. The Company did not record a valuation allowance as of December 31, 2020 or 2019.

The Company will adopt revised disclosure requirements for SSAP No. 92, *Postretirement Benefits Other than Pensions* ("SSAP No. 92"), and SSAP No. 102, *Pensions* ("SSAP No. 102"), as detailed in Statutory Accounting Principles Working Group ("SAPWG") maintenance agenda item #2018-37 when Financial Accounting Standard Board ("FASB") Accounting Standards Update ("ASU") 2018-14, *Changes to the Disclosure Requirements for Defined Benefit Plans*, is adopted.

A. Defined Benefit Plan

- (1) Change in benefit obligation

a. Pension Benefits

The Company was not a sponsor of defined benefit pension plans.

NOTES TO FINANCIAL STATEMENTS

b. Postretirement Benefits

The Company provides a medical coverage subsidy for eligible claim employees hired before January 1, 2003, including their eligible dependents, when they retire (“postretirement benefits”). In September 2020, the Company announced it will eliminate the medical coverage subsidy effective January 1, 2021 for employees who are not eligible to retire as of December 31, 2020. Qualified employees may become eligible for a medical subsidy if they retire in accordance with the terms of the applicable plans and are continuously insured under the Company’s group plans or other approved plans in accordance with the plan’s participation requirements. The Company shares the cost of retiree medical benefits with non Medicare-eligible retirees based on years of service, with the Company’s share being subject to a 5% limit on future annual medical cost inflation after retirement. For Medicare-eligible retirees, the Company provides a fixed Company contribution based on years of service and other factors, which is not subject to adjustments for inflation. The Company has reserved the right to modify or terminate its benefit plans at any time and for any reason.

The Company calculates benefit obligations based upon generally accepted actuarial methodologies using the accumulated postretirement benefit obligation (“APBO”) for other postretirement plans. The other postretirement obligations are determined using a December 31 measurement date. The benefit obligations represent the actuarial present value of all benefits attributed to employee service rendered as of the measurement date. The Company’s other postretirement benefit plans are not funded.

its share of the costs associated with these benefits in accordance with the Agreement. The Company's allocated share of these benefits, before reinsurance, was \$(3) million and \$21 million in 2020 and 2019, respectively.

13. Capital and Surplus, Dividend Restrictions and Quasi-Reorganizations

- A. The Company had 42,000 common shares authorized and 38,820 shares issued and outstanding as of December 31, 2020 and 2019. All common shares had a par value of \$100 per share.
- B. Preferred Stock – Not applicable.
- C. The ability of the Company to pay dividends is generally dependent on business conditions, income, cash requirements, receipt of dividends and other relevant factors. More specifically, the Illinois Insurance Code ("Code") provides a two-step process. First, no dividend may be declared or paid except from earned (unassigned) surplus, as distinguished from contributed surplus, nor when the payment of a dividend reduces surplus below the minimum amount required by the Code. Secondly, a determination of the ordinary versus extraordinary dividends that can be paid is formula based and considers net income and capital and surplus, as well as the timing and amounts of dividends paid in the preceding twelve months as specified by the Code. Ordinary dividends to shareholders do not require prior approval of the IL DOI. Dividends are not cumulative. As of December 31, 2020, the maximum ordinary dividend that can be declared and paid in 2021 by the Company is limited to \$5.95 billion.
- D. The Company paid the following ordinary cash dividends to AIH:

(in millions)

October 18	-	200
October 19	200	-
December 18	400	400
Total	\$ 3,332	\$ 2,368

In addition, the Company paid ordinary dividends to AIH consisting of bonds with fair values of \$200 million and \$198 million, and related accrued interest of \$2 million and \$1 million, on February 12, 2020 and July 22, 2020, respectively.

The Company also paid extraordinary dividends of \$703 million to AIH on December 18, 2020.

The Company paid ordinary dividends to AIH consisting of bonds with fair values of \$242 million and \$119 million, and related accrued interest of \$2 million and \$1 million, on March 25, 2019 and April 18, 2019, respectively.

- E. Within the limitations of Part C above, there were no restrictions placed on the portion of the Company's profits that may be paid as ordinary dividends to stockholders.
- F. The unassigned funds, which are held for the benefit of the shareholder, are unrestricted except by requirement for regulatory approval as described in Part C above.
- G. Advances to Surplus for Mutual Companies – Not applicable.
- H. Stock Held for Special Purposes – Not applicable.
- I. The special surplus funds balance was \$20 million and \$24 million as of December 31, 2020 and 2019, respectively. The change in the balance of special surplus funds between years was primarily due to amortization of deferred gains on sale-leaseback transactions.
- J. Cumulative unrealized gains and losses increased unassigned funds by \$3.53 billion and \$3.91 billion as of December 31, 2020 and 2019, respectively.
- K. Surplus Notes – Not applicable.
- L. Restatements Due to Quasi-Reorganizations – Not applicable.
- M. Dates of Quasi-Reorganizations – Not applicable.

14. Liabilities, Contingencies and Assessments

A. Contingent Commitments

- 1. The Company made commitments to invest in limited partnership interests, including commitments to invest in SCA entities engaged in the development of real estate of \$2.02 billion as of December 31, 2020. These commitments are generally for making additional capital contributions or acquiring financial interests.

The Company made commitments to invest in limited partnership interests of \$1.78 billion as of December 31, 2019. In addition, the Company made a commitment to provide additional capital contributions of \$9 million for the development of a real estate property which one of its wholly owned SCA entities invested in as of December 31, 2019.

In addition, the Company, as part of an investment in a joint venture, agreed to guarantee certain items related to a building, including payments of interest due on the loan to finance the construction of the building, taxes and other assessments imposed on the property, cost of insurance and maintenance expenses, not to exceed \$7 million as of December 31, 2020 and 2019. The probability the Company will be required to make a payment on the guarantees is remote.

The Company has made no other additional contingent commitments or guarantees related to its investments in SCA entities, joint ventures, limited liability companies or LIHTC property investments.

NOTES TO FINANCIAL STATEMENTS

The Company and ALIC entered into the ALIC Agreement effective December 14, 2007. <sup>(1)</sup> Guarantees made to/or on behalf of a wholly-owned subsidiary and intercompany and related party guarantees are not required to record a liability in accordance with SSAP No. 5R.

None of the agreements above contained recourse provisions that would enable the Company to recover amounts paid to third parties under the guarantees and there were no assets held by the Company as collateral under the agreements.

In the normal course of business, the Company provides standard indemnifications to contractual counterparties in connection with numerous transactions. The types of indemnifications typically provided include indemnifications for breaches of representations and warranties, taxes and certain other liabilities, such as third-party lawsuits. The indemnification clauses are often standard contractual terms and are entered into in the normal course of business based on an assessment that the risk of loss would be remote. The terms of the indemnifications vary in duration and nature. In many cases, the maximum obligation is not explicitly stated and the contingencies triggering the obligation to indemnify have not occurred and are not expected to occur. Consequently, the maximum amount of the obligation under such indemnifications is not determinable. Historically, the Company has not made any material payments pursuant to these obligations.

3. Total guarantee obligations if performance under the guarantees had been triggered were as follows as of December 31:

(in millions)		2020	2019

B. Assessments

Guaranty funds

Under state insurance guaranty fund laws, insurers doing business in a state can be assessed, up to prescribed limits, for certain obligations of insolvent insurance companies to policyholders and claimants. Amounts assessed to each company are typically related to its proportion of business written in each state. The Company's policy is to accrue assessments when the entity for which the insolvency relates has met its state of domicile's statutory definition of insolvency, the amount of the loss is reasonably estimable and the related premium upon which the assessment is based is written. In most states, the definition is met with a declaration of financial insolvency by a court of competent jurisdiction. In certain states there must also be a final order of liquidation. Since most states allow a credit against premium or other state related taxes for assessments, an asset is recorded based on paid and accrued assessments for the amount the Company expects to recover on the respective state's tax return and is realized over the period allowed by each state. As of December 31, 2020 and 2019, the liability balance included in other expenses was \$4 million and \$5 million. There were no accruals for premium tax offsets related to future assessments as of December 31, 2020 or 2019.

The Company did not incur assessments related to insolvencies of entities that wrote long-term care contracts as of December 31, 2020 or 2019.

State facilities

The Company is also subject to assessments from the Louisiana Citizens Property Insurance Corporation ("LA Citizens"). LA Citizens can levy a regular assessment on participating companies for a deficit in any calendar year up to a maximum of the greater of 10% of the calendar year deficit or 10% of Louisiana direct property premiums industry-wide for the prior calendar year. If the plan year deficit exceeds the amount that can be recovered through Regular Assessments, LA Citizens may fund the remaining deficit by issuing revenue assessment bonds in the capital markets. LA Citizens then declares Emergency Assessments each year to provide debt service on the bonds until they are retired. Companies writing assessable lines must surcharge their policyholders Emergency Assessments in the percentage established annually by LA Citizens and must remit amounts collected to the bond trustee on a quarterly basis. Emergency assessments to pay off bonds issued in 2007 for the hurricanes of 2005 will continue until 2025.

NOTES TO FINANCIAL STATEMENTS

The Company participates in the mandatory coverage provided by the Florida Hurricane Catastrophe Fund (“FHCF”) and therefore has access to reimbursement for certain qualifying Florida hurricane losses from the FHCF. The Company has exposure to assessments and pays annual premiums to the FHCF for this reimbursement protection. The FHCF has the authority to issue bonds to pay its obligations to participating insurers in excess of its capital balances. Payment of these bonds is funded by emergency assessments on all property and casualty premiums in the state, except workers’ compensation, medical malpractice, accident and health insurance and policies written under the National Flood Insurance Program (“NFIP”). Companies collect the emergency assessments directly from policyholders and then remit the funds to the FHCF. The FHCF emergency assessments are limited to 6% of premiums per year beginning the first year in which reimbursements require bonding, and up to a total of 10% of premiums per year for assessments in the second and subsequent years, if required to fund additional bonding. The FHCF issued \$2 billion in pre-event bonds in 2013 to build their capacity to reimburse member companies’ claims. The FHCF plans to fund these pre-event bonds through current FHCF cash flows. Pursuant to an Order issued by the FL OIR, the emergency assessment is zero for all policies issued or renewed on or after January 1, 2015.

The Company is also subject to assessments from the Citizens Property Insurance Corporation in the state of Florida (“FL Citizens”), which was initially created by the state of Florida to provide insurance to property owners unable to obtain coverage in the private insurance market. FL Citizens, at the discretion and direction of its Board of Governors, can levy a regular assessment on assessable insurers and assessable insureds for a deficit in any calendar year up to a maximum of the greater of: 2% of the projected deficit or 2% of the aggregate statewide direct written premium for the prior calendar year. The base of assessable insurers includes all property and casualty premiums in the state, except workers’ compensation, medical malpractice, accident and health insurance and policies written under the NFIP. An insurer may recoup a regular assessment through a surcharge to policyholders. In order to recoup this assessment, an insurer must file for a policy surcharge with the FL OIR at least fifteen days prior to imposing the surcharge on policies. If a deficit remains after the regular assessment, FL Citizens can also levy emergency assessments in the current and subsequent years. Companies are required to collect the emergency assessments directly from residential property policyholders and remit to FL Citizens as collected. Currently, the emergency assessment is zero for all policies issued or renewed on or after July 1, 2015.

Facilities such as LA Citizens and FL Citizens are generally designed so that the ultimate cost is borne by policyholders; however, the exposure to assessments from these facilities and the availability of recoupments or premium rate increases may not offset each other in the Company’s financial statements. Moreover, even if they do offset each other, they may not offset each other in financial statements for the same fiscal period due to the ultimate timing of the assessments and recoupments or premium rate increases, as well as the possibility of policies not being renewed in subsequent years.

Reconciliations of assets recognized from policy surcharges and recorded in premiums and considerations were as follows:

(in millions)	2020	2019
Assets recognized from paid and accrued premium tax offsets and policy surcharges prior year-end	\$ 1	\$ 1

Increases during the year:

Assets recognized from paid and accrued premium tax offsets and policy surcharges at current year-end	<u>\$ 1</u>	<u>\$ 1</u>

C. Gain Contingencies

The Company has not recognized gain contingencies subsequent to December 31, 2020, but prior to the issuance of the Company’s Annual Statement.

D. Claims Related Extra Contractual Obligation and Bad Faith Losses Stemming from Lawsuits – Not applicable.

E. Product Warranties – Not applicable.

F. Joint and Several Liabilities - Not applicable.

G. All Other Contingencies

Premium Balances Reasonably Possible to be Uncollectible

The Company routinely assesses the collectibility of its premiums and considerations that are less than 90 days old. Premiums and considerations older than 90 days are generally nonadmitted. The allowance for uncollectible premiums and considerations is determined based on the age of the receivable and prior collection experience. The allowance balance for admitted premiums and considerations, after reinsurance, was \$37 million and \$27 million as of December 31, 2020 and 2019, respectively.

California Earthquake Authority (“CEA”)

Exposure to certain potential losses from earthquakes in California is limited by the Company’s participation in the CEA, which provides insurance for California earthquake losses. The CEA is a privately-financed, publicly-managed state agency created to provide insurance coverage for earthquake damage. Insurers selling homeowners insurance in California are required to offer earthquake insurance to their customers either through their company or by participation in the CEA. The Company’s homeowners policies continue to include coverages for losses caused by explosions, theft, glass breakage and fires following an earthquake, which are not underwritten by the CEA.

As of October 31, 2020, the CEA’s capital balance was approximately \$6.00 billion. Should losses arising from an earthquake cause a deficit in the CEA, an additional \$1.10 billion would be obtained from the proceeds of revenue bonds the CEA may issue, an existing \$9.50 billion reinsurance layer, \$1.00 billion from policy surcharge, and finally, if needed, assessments on participating insurance companies. Participating insurers are required to pay an assessment, currently estimated not to exceed \$1.70 billion, if the capital of the CEA falls below \$350 million. Within the limits previously described, the assessment could be intended to restore the CEA’s capital to a level of \$350 million. There is no provision that allows insurers to recover assessments through a premium surcharge or other mechanism. The CEA’s projected aggregate claim paying capacity is \$19.30 billion as of October 31, 2020 and if an event were to result in claims greater than its capacity, affected policyholders may be paid a prorated portion of their covered losses, paid on an installment basis, or no payments may be made if the claim paying capacity of the CEA is insufficient.

All future assessments on participating CEA insurers are based on their CEA insurance market share as of December 31 of the preceding year. As of December 31, 2019, the Company’s market share was 9.3%. The Company does not expect its market share to materially change. At this level, the Company’s maximum possible CEA assessment was \$155 million during 2020. These amounts are re-evaluated by the board of directors of the CEA on an annual basis. Accordingly, assessments from the CEA for a particular quarter or annual period may be material to the results of operations and cash flows, but not the financial position of the Company. Management believes the Company’s exposure to earthquake losses in California has been significantly reduced as a result of its participation in the CEA.

Texas Fair Plan Association (“FAIR Plan”)

The Company participates as a member of the FAIR Plan, which provides residential property insurance to inland areas designated as underserved by the Commissioner of Insurance and the applicant(s) are unable to procure coverage in the voluntary market. The FAIR Plan issues insurance policies, like an insurance company, and it also functions as a pooling mechanism that allocates premiums, claims and expenses back to the insurance industry. As a result of the losses incurred related to Hurricane Harvey, in 2017 the FAIR Plan Board unanimously voted to approve its first ever member assessment of which the Company’s share was \$8 million based on total direct premium written in Texas.

## NOTES TO FINANCIAL STATEMENTS

Insurers are permitted to recover the assessment through either a premium surcharge applied to existing customers over a three-year period or increased rates, but the ability to fully recover the assessment may be impacted by market conditions or other factors.

### North Carolina Reinsurance Facility (“NCRF”)

The NCRF provides automobile liability insurance to drivers that insurers are not otherwise willing to insure. All insurers licensed to write automobile insurance in North Carolina are members of the NCRF. Premiums, losses and expenses are assigned to the NCRF. North Carolina law allows the NCRF to recoup operating losses for certain insureds through a surcharge to policyholders. As of September 30, 2020, the NCRF reported a deficit of \$125 million in members' equity. The NCRF implemented a loss recoupment surcharge on all private passenger and commercial fleet policies effective October 1, 2020, through September 30, 2021. Member companies are assessed the recoupment surcharge. The loss recoupment surcharge will be adjusted on October 1, 2021 and discontinued once losses are recovered. The NCRF results are shared by the member companies in proportion to their respective North Carolina automobile liability writings.

### North Carolina Joint Underwriters Association (“NCJUA”)

The NCJUA was created to provide property insurance for properties (other than the state's beach and coastal areas) that insurers are not otherwise willing to insure. All insurers licensed to write property insurance in North Carolina are members of the NCJUA. Premiums, losses and expenses of the NCJUA are shared by the member companies in proportion to their respective North Carolina property insurance writings. Member companies participate in plan deficits or surpluses based on their participation ratios, which are determined annually. The Company had a \$2 million receivable from the NCJUA at December 31, 2020 representing our participation in the NCJUA's surplus of \$33 million for all open years.

### North Carolina Insurance Underwriting Association (“NCIUA”)

The NCIUA provides windstorm and hail coverage as well as homeowners policies for properties located in the state's beach and coastal areas that insurers are not otherwise willing to insure. All insurers licensed to write residential and commercial property insurance in North Carolina are members of the NCIUA. Members are assessed in proportion to their North Carolina residential and commercial property insurance writings, which is determined annually and varies by coverage, for plan deficits. As of December 31, 2020, the NCIUA had a surplus of \$555 million. No member company is entitled to the distribution of any portion of the Association's surplus. The Company does not recognize any interest related to this surplus. Legislation in 2009 capped insurers' assessments for losses incurred in any calendar year at \$1.00 billion. Subsequent to an industry assessment of \$1.00 billion, if the plan continues to require funding, it may authorize insurers to assess a 10% catastrophe recovery charge on each property insurance policy statewide to be remitted to the plan.

### Federal Government - National Flood Insurance Program (“NFIP”)

NFIP is a program administered by the Federal Emergency Management Agency (“FEMA”) whereby the Company sells and services NFIP flood insurance policies as an agent of FEMA and receives fees for its services. The Company is fully indemnified for claims and claim expenses and does not retain any ultimate risk for the indemnified business. The federal government is obligated to pay all claims and certain allocated loss adjustment expenses in accordance with the arrangement.

Congressional authorization for the NFIP is periodically evaluated and may be subjected to freezes, including when the federal government experiences a shutdown. FEMA has a NFIP reinsurance program to manage the future exposure of the NFIP through the transfer of risk to private reinsurance companies and capital market investors. Congress is evaluating the funding of the program as well as considering reforms to the program that would be incorporated in legislation to reauthorize the NFIP.

The amounts recoverable as of December 31, 2020 and 2019 was \$29 million and \$24 million, respectively. Premiums earned under the NFIP include \$252 million and \$249 million in 2020 and 2019, respectively. Qualifying losses incurred include \$87 million and \$150 million in 2020 and 2019, respectively.

### Shared markets

The Company is required to participate in assigned risk plans, reinsurance facilities and joint underwriting associations in various states that provide insurance coverage to individuals or entities that otherwise are unable to purchase such coverage from private insurers. The Company routinely reviews its exposure to assessments from these plans, facilities and government programs. Underwriting results related to these arrangements, which tend to be adverse, have been immaterial to the Company's results of operations in the last three years. Because of the Company's participation, it may be exposed to losses that surpass the capitalization of these facilities or assessments from these facilities.

### Legal and regulatory proceedings and inquiries

#### Background

The Company and certain subsidiaries are involved in a number of lawsuits, regulatory inquiries, and other legal proceedings arising out of various aspects of its business.

The Company currently estimates that the aggregate range of reasonably possible loss in excess of the amount accrued, if any, for the disclosed matters where such an estimate is possible is zero to \$85 million, pre-tax. This disclosure is not an indication of expected loss, if any. Under APPM, an event is “reasonably possible” if “the chance of the future event or events occurring is more than remote but less than likely” and an event is “remote” if “the chance of the future event or events occurring is slight.” This estimate is based upon currently available information and is subject to significant judgment and a variety of assumptions, and known and unknown uncertainties. The matters underlying the estimate will change from time to time, and actual results may vary significantly from the current estimate. The estimate does not include matters or losses for which an estimate is not possible. Therefore, this estimate represents an estimate of possible loss only for certain matters meeting these criteria. It does not represent the Company's maximum possible loss exposure. Information is provided below regarding the nature of all of the disclosed matters and, where specified, the amount, if any, of plaintiff claims associated with these loss contingencies.

Due to the complexity and scope of the matters disclosed in the “Claims related proceedings” and “Other proceedings” subsections below and the many uncertainties that exist, the ultimate outcome of these matters cannot be predicted and in the Company's judgment, a loss, in excess of amounts accrued, if any, is not probable. In the event of an unfavorable outcome in one or more of these matters, the ultimate liability may be in excess of amounts currently accrued, if any, and may be material to the Company's operating results or cash flows for a particular quarterly or annual period. However, based on information currently known to it, management believes that the ultimate outcome of all matters described below, as they are resolved over time, is not likely to have a material effect on the financial position of the Company.

#### Claims related proceedings

The Company is managing various disputes in Florida that raise challenges to the Company's practices, processes, and procedures relating to claims for personal injury protection benefits under Florida auto policies. Medical providers continue to pursue litigation under various theories that challenge the amounts that the Company pays under the personal injury protection coverage, seeking additional benefit payments, as well as applicable interest, penalties and fees. There are two pending class actions, *Pierce v. Allstate Insurance Company, et al.* (Broward County, Fla. filed August 2013), the class settlement of which has received final approval, and *Revival Chiropractic v. Allstate Insurance Company, et al.* (M.D. Fla. filed January 2019), where the court denied class certification and plaintiff's request to file a renewed motion for class certification. The Company is also defending litigation involving individual plaintiffs. The Company is vigorously asserting both procedural and substantive defenses to these lawsuits.

## NOTES TO FINANCIAL STATEMENTS

The Company is defending putative class actions in various courts that raise challenges to the Company's depreciation practices in homeowner property claims. In these lawsuits, plaintiffs generally allege that, when calculating actual cash value, the costs of "non-materials" such as labor, general contractor's overhead and profit, and sales tax should not be subject to depreciation. The Company is currently defending the following lawsuits on this issue: *Perry v. Allstate Indemnity Company, et al.* (N.D. Ohio filed May 2016); *Lado v. Allstate Vehicle and Property Insurance Company* (S.D. Ohio filed March 2020); *Maniaci v. Allstate Insurance Company* (N.D. Ohio filed March 2020); *Ferguson-Luke et al. v. Allstate Property and Casualty Insurance Company* (N.D. Ohio filed April 2020); *Brasher v. Allstate Indemnity Company* (N.D. Ala. filed February 2018); *Huey v. Allstate Vehicle and Property Insurance Company* (N.D. Miss. filed October 2019); *Floyd, et al. v. Allstate Indemnity Company et al.* (D.S.C. filed January 2020); *Clark v. Allstate Vehicle and Property Insurance Company* (Circuit Court of Independence Co., Ark. filed February 2016); *Thaxton v. Allstate Indemnity Company* (Madison Co., Ill. filed July 2020); *Hester v. Allstate Vehicle and Property Insurance Company* (St. Clair Co., Ill. filed June 2020). The trial court denied class certification in *Brasher*, and plaintiff's motion for reconsideration of this ruling was denied. No classes have been certified in any of the other matters.

The Company is defending putative class actions pending in multiple states alleging that the Company underpays total loss vehicle physical damage claims on auto policies. The allegedly systematic underpayments result from one or more of the following theories: (a) the third party valuation tool used by the Company as part of a comprehensive adjustment process is allegedly flawed, biased, or contrary to applicable law; (b) the Company allegedly does not pay sales tax, title fees, registration fees, and/or other specified fees that are allegedly mandatory under policy language or state legal authority; or (c) after paying for the value of the loss vehicle, then the Company allegedly is not entitled to retain the residual salvage value, and the Company allegedly must pay salvage value to the owner (or if the loss vehicle is retained by the owner, then the Company allegedly may not apply any offset for the salvage value).

The following cases are currently pending against the Company: *Olberg v. Allstate Insurance Company, Allstate Fire and Casualty Insurance Company, and CCC Information Services, Inc.* (W.D. Wash., filed April 2018); *Bloomgarden v. Allstate Fire and Casualty Insurance Company* (S.D. Fla., filed July 2018, dismissed August 2019, refiled on September 2019, remanded to 17th Judicial Circuit, Broward County October 2020); *Erby v. Allstate Fire and Casualty Insurance Company* (E.D. Pa., filed October 2018); *Kronenberg v. Allstate Insurance Company and Allstate Fire and Casualty Insurance Company* (E.D. N.Y., filed December 2018); *Ryan v. Allstate Fire and Casualty Insurance Company* (7<sup>th</sup> Judicial Circuit, Volusia County, Fla.; filed May 2019, dismissed and refiled October 2019); *Durgin v. Allstate Property and Casualty Insurance Company* (W.D. LA, filed June 7, 2019); *Anderson v. Allstate Insurance Company* (20th Judicial Circuit, Collier County, Fla.; filed August 2019); *Cody v. Allstate Fire and Casualty Insurance Company and Allstate County Mutual Insurance Company* (N.D. Tex., filed August 2019); *Williams v. Esurance Property and Casualty Insurance Company* (C.D. Cal.; filed September 2020); *Cotton v. Allstate Fire and Casualty Insurance Company* (Cir. Ct. of Cook County, Chancery Div., Ill.; filed October 2020); *Romaniak v. Esurance Property and Casualty Insurance Company* (N.D. Ohio, filed December 2020); *Gosa v. Esurance Property and Casualty Insurance Company* (S.D. Ill., filed December 2020).

None of the courts in any of the pending matters has ruled on class certification.

### Other proceedings

The stockholder derivative actions described below are disclosed pursuant to SEC disclosure requirements for these types of matters. The putative class action alleging violations of the federal securities laws is disclosed because it involves similar allegations to those made in the stockholder derivative actions.

**Biefeldt / IBEW Consolidated Action.** Two separately filed stockholder derivative actions have been consolidated into a single proceeding that is pending in the Circuit Court for Cook County, Illinois, Chancery Division. The original complaint in the first-filed of those actions, *Biefeldt v. Wilson, et al.*, was filed on August 3, 2017, in that court by a plaintiff alleging that she is a stockholder of the Company. On June 29, 2018, the court granted defendants' motion to dismiss that complaint for failure to make a pre-suit demand on the Allstate board but granted plaintiff permission to file an amended complaint. The original complaint in IBEW Local No. 98 Pension Fund v. Wilson, et al., was filed on April 12, 2018, in the same court by another plaintiff alleging to be a stockholder of the Company. After the court issued its dismissal decision in the *Biefeldt* action, plaintiffs agreed to consolidate the two actions and filed a consolidated amended complaint naming as defendants the Company's chairman, president and chief executive officer, its former president, and certain present or former members of the board of directors. In that complaint, plaintiffs allege that the directors and officer defendants breached their fiduciary duties to the Company in connection with allegedly material misstatements or omissions concerning the Company's automobile insurance claim frequency statistics and the reasons for a claim frequency increase for Allstate brand auto insurance between October 2014 and August 3, 2015. The factual allegations are substantially similar to those at issue in *In re The Allstate Corp. Securities Litigation*. Plaintiffs further allege that a senior officer and several outside directors engaged in stock option exercises allegedly while in possession of material nonpublic information. Plaintiffs seek, on behalf of the Company, an unspecified amount of damages and various forms of equitable relief. Defendants moved to dismiss the consolidated complaint on September 24, 2018 for failure to make a demand on the Allstate board. On May 14, 2019, the court granted defendants' motion to dismiss the complaint, but allowed plaintiffs leave to file a second consolidated amended complaint which they filed on September 17, 2019. Defendants moved to dismiss the complaint on November 1, 2019 for failure to make a demand on the Allstate board. The court subsequently requested supplemental briefing on the motion which concluded on February 1, 2021. A ruling is expected at a status conference scheduled for February 24, 2021.

In *Sundquist v. Wilson, et al.*, another plaintiff alleging to be a stockholder of the Company filed a stockholder derivative complaint in the United States District Court for the Northern District of Illinois on May 21, 2018. Plaintiff seeks, on behalf of the Company, an unspecified amount of damages and various forms of equitable relief. The complaint names as defendants the Company's chairman, president and chief executive officer, its former president, its former vice chairman, and certain present or former members of the board of directors. The complaint alleges breaches of fiduciary duty based on allegations similar to those asserted in *In re The Allstate Corp. Securities Litigation* as well as state law "misappropriation" claims based on stock option transactions by the Company's chairman, president and chief executive officer, its former vice chairman, and certain members of the board of directors. Defendants moved to dismiss and/or stay the complaint on August 7, 2018. On December 4, 2018, the court granted defendants' motion and stayed the case pending final resolution of the consolidated *Biefeldt/IBEW* matter.

*Mims v. Wilson, et al.*, is an additional stockholder derivative action filed on February 12, 2020 in the United States District Court for the Northern District of Illinois. Plaintiff alleges that she previously made a demand on the Allstate board of directors and seeks, on behalf of the Company, an unspecified amount of damages and various forms of equitable relief. The complaint names as defendants the Company's chairman, president and chief executive officer, its former president, its former vice chairman, and certain present or former members of the board of directors. The complaint alleges breaches of fiduciary duty and unjust enrichment based on allegations similar to those asserted in *In re The Allstate Corp. Securities Litigation*. On February 20, 2020, the Allstate board of directors appointed a special committee to investigate the allegations in plaintiff's demand. The Company moved to dismiss the complaint on August 24, 2020 and on December 8, 2020, the court granted defendants' motion, and dismissed the complaint with prejudice. On January 5, 2021, plaintiff filed a motion to alter the judgment and requested leave to file an amended complaint. Briefing is expected to be completed on February 5, 2021.

*In re The Allstate Corp. Securities Litigation* is a certified class action filed on November 11, 2016 in the United States District Court for the Northern District of Illinois against the Company and two of its officers asserting claims under the federal securities laws. Plaintiffs allege that they purchased Allstate common stock during the class period and suffered damages as the result of the conduct alleged. Plaintiffs seek an unspecified amount of damages, costs, attorney's fees, and other relief as the court deems appropriate. Plaintiffs allege that the Company and certain senior officers made allegedly material misstatements or omissions concerning claim frequency statistics and the reasons for a claim frequency increase for Allstate brand auto insurance between October 2014 and August 3, 2015. Plaintiffs further allege that a senior officer engaged in stock option exercises during that time allegedly while in possession of material nonpublic information about Allstate brand auto insurance claim frequency. The Company, its chairman, president and chief executive officer, and its former president are the named defendants. After the court denied their motion to dismiss on February 27, 2018, defendants answered the complaint, denying plaintiffs' allegations that there was any misstatement or omission or other misconduct. On June 22, 2018, plaintiffs filed their motion for class certification. The court allowed the lead plaintiffs to amend their complaint to add the City of Providence Employee Retirement System as a proposed class representative and on September 12, 2018, the amended complaint was filed. On March 26, 2019, the court granted plaintiffs' motion for class certification and certified a class consisting of all persons who purchased Allstate common

stock between October 29, 2014 and August 3, 2015. On April 9, 2019, defendants filed with the U.S. Court of Appeals for the Seventh Circuit a petition for permission to appeal this ruling and the Seventh Circuit granted that petition on April 25, 2019. On July 16, 2020, the Seventh Circuit vacated the class certification order and remanded the matter for further consideration by the district court. Discovery in this matter concluded on October 5, 2020. On December 21, 2020, the district court again granted plaintiffs' motion for class certification and certified a class consisting of all persons who purchased Allstate common stock between October 29, 2014 and August 3, 2015. On January 4, 2021, defendants filed with the Seventh Circuit a petition for permission to appeal this ruling. The petition was denied on January 28, 2021.

15. Leases

A. Lessee Operating Lease

1. The Company leases certain office facilities, computer and office equipment, internal-use computer software, aircraft and automobiles under various noncancelable operating lease agreements that expire through 2029. Total rent expense, net of sublease rental income, was \$210 million and \$203 million in 2020 and 2019, respectively, before allocation to affiliates. Sublease rental income was \$2 million in 2020 and 2019.

The Company closed certain leased office facilities, which resulted in the early termination or non-use of leased property benefits. Under these lease agreements, the Company recognized a liability of \$19 million and \$2 million as of December 31, 2020 and 2019, respectively.

2. a. As of December 31, 2020, the minimum aggregate rental commitments under noncancelable operating leases with an initial or remaining term of more than one year were as follows:

3. 2023	\$	83
4. 2024	\$	67
5. 2025	\$	54
6. Total*	\$	499

\*Includes \$60 million required after December 31, 2025

- b. As of December 31, 2020, the total of minimum aggregate rental commitments to be received under noncancelable subleases with an initial or remaining term of more than one year was \$3 million.

16. Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk

Derivative financial instruments

1. The following table summarizes the notional amount of the Company's derivative financial instruments, including those with off-balance-sheet risk as of December 31:

	Assets		Liabilities	
	2020	2019	2020	2019
a. Swaps	\$ 1,015	\$ 681	\$ 1,028	\$ 298
b. Futures	155	198	66	1
c. Options	19	634	-	634
d. Total	\$ 1,189	\$ 1,513	\$ 1,094	\$ 933

See Schedule DB of the Company's Annual Statement for additional detail.

The notional amounts specified in the contracts are used to calculate the exchange of contractual payments under the agreements and are generally not representative of the potential for gain or loss on these agreements. However, the notional amounts specified in credit default swap agreements where the Company has sold credit protection represent the maximum amount of potential loss, assuming no recoveries.

2. The credit risk, market risk and cash requirements of the Company's derivative instruments utilized during 2020 and 2019 are discussed in Note 8, Parts A-C. The accounting policies for the Company's derivative instruments are disclosed in Note 1, Part C and Note 8, Parts A-C.
3. The Company's credit exposure related to its outstanding over-the-counter and cleared swap contracts was \$4 million and \$12 million as of December 31, 2020 and 2019, respectively.

Counterparty credit exposure represents the Company's potential loss if all counterparties concurrently fail to perform under the contractual terms of the contracts and all collateral, if any, becomes worthless. This exposure is measured by the statement value of over-the-counter and cleared derivative contracts with a positive statement value at the reporting date. The Company has not incurred any losses on derivative financial instruments due to counterparty nonperformance.

4. The Company's policy for requiring collateral is discussed in Note 8, Parts A-C. In general, the collateral pledged by the Company is in the custody of a counterparty, a clearing house or an exchange. However, the Company has access to this collateral at any time, subject to replacement. For certain exchange traded and cleared derivatives, margin deposits are required as well as daily cash settlements of margin accounts. As of December 31, 2020, the Company pledged cash and securities with fair values of \$54 million and received cash of \$12 million in the form of margin deposits. As of December 31, 2019, the Company pledged securities with fair values of \$41 million in the form of margin deposits.

The Company pledges or obtains collateral for over-the-counter derivative transactions when certain predetermined exposure limits are exceeded. As of December 31, 2020, counterparties pledged \$4 million in cash collateral to the Company, and the Company pledged \$14 million in cash to counterparties. As of December 31, 2019, counterparties pledged \$23 million in cash collateral to the Company, and the Company pledged \$3 million in cash to counterparties.

20. Fair Value Measurements

- A. Fair value is defined, per SSAP No. 100R, *Fair Value* (“SSAP No. 100R”), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP No. 100R identified three valuation techniques which are used, either independently or in combination, to determine fair value: (1) market approach; (2) income approach; and (3) cost approach. SSAP No. 100R also contains guidance about observable and unobservable inputs, which are assumptions that market participants would use in pricing an asset or liability. To increase consistency and comparability in fair value measurements, the fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels: 1, 2 and 3. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Certain assets are measured utilizing NAV as a practical expedient to determine fair value.

The Company has two types of situations where investments are classified as Level 3 in the fair value hierarchy:

- (1) Specific inputs significant to the fair value estimation models are not market observable. This primarily occurs in the Company’s use of broker quotes to value certain securities where the inputs have not been corroborated to be market observable, and the use of valuation models that use significant non-market observable inputs.
- (2) Quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources.

Transfers into Level 3 during 2020 and 2019 included securities measured at lower of cost or market and reported at fair value in 2020 and 2019, and at cost in 2019 and 2018, respectively. In addition, transfers into Level 3 during 2020 included situations where a fair value quote was not provided by the Company’s independent third-party valuation service provider and, as a result, the price was stale or had been replaced with a broker quote where the inputs had not been corroborated to be market observable.

Transfers out of Level 3 during 2020 and 2019 included securities measured at lower of cost or market and reported at cost in 2020 and 2019, and fair value in 2019 and 2018, respectively. Transfers out of Level 3 during 2020 and 2019 were also the result of assets utilizing NAV as a practical expedient to determine fair value. Transfers out of Level 3 during 2020 and 2019 included situations where the valuation was not based on market observable inputs in the prior period; in the current period, a price quote utilizing market observable inputs became available and was utilized and any gains and losses related to the change in valuation source for individual securities were not significant.

3. The Company consistently follows its policy for determining when transfers between levels are recognized. The policy about the timing of recognizing transfers into Level 3 is the same as that for recognizing transfers out of Level 3.
4. In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 and Level 3 valuations, a combination of the market and income approaches is used.

Listed below is a summary of the significant valuation techniques for assets and liabilities measured and reported at fair value.

Level 2 measurements

**Bonds** - Includes corporate bonds, including those that are privately placed, residential mortgage-backed securities (“RMBS”), asset-backed securities (“ABS”) and municipal bonds.

The primary inputs to the valuation for publicly traded corporate bonds and municipal bonds include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Privately placed corporate bonds are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The primary inputs to the valuation for RMBS and ABS include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields,

NOTES TO FINANCIAL STATEMENTS

prepayment speeds, collateral performance and credit spreads. Certain ABS are valued based on non-binding broker quotes whose inputs have been corroborated to be market observable.

Unaffiliated common and perpetual preferred stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that are not active.

Redeemable preferred stocks - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

Derivatives - Free-standing exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives, including foreign currency contracts, total return swap agreements and certain credit default swap agreements, are valued using models that rely on inputs such as interest rate yield curves, implied volatilities, index price levels, currency rates and credit spreads that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

Level 3 measurements

Bonds - Includes corporate bonds, including those that are privately placed, bank loans, commercial mortgage-backed securities ("CMBS"), ABS and municipal bonds.

Corporate bonds, including those that are privately placed, and bank loans are valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Other inputs include an interest rate yield curve, as well as published credit spreads for similar assets that incorporate credit quality and industry sector of the issuer. CMBS and ABS are valued based on non-binding broker quotes received from brokers where the inputs have not been corroborated to be market observable. For municipal bonds that are not rated by third-party credit rating agencies, but receive an NAIC designation, the primary inputs to the valuation include quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields and credit spreads. Also included are municipal bonds valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable and municipal bonds in default valued based on the present value of expected cash flows.

Unaffiliated common stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 measurements.

5. All information related to derivatives measured and reported at fair value is presented above.

The fair value of bonds in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of publicly traded bonds in Level 2 is based upon quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Non-publicly traded bonds in Level 2 are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The fair value of municipal bonds in Level 3 not rated by third-party credit rating agencies, but receiving an NAIC designation is based on quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields and credit spreads. Also included are municipal bonds valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable and municipal bonds in default valued based on the present value of expected cash flows. The fair value of corporate bonds in Level 3 is primarily based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Other inputs for corporate bonds include an interest rate yield curve, as well as published credit spreads for similar assets that incorporate the credit quality and industry sector of the issuer. The fair value of LBASS in Level 2 is primarily based on valuation models utilizing quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment

speeds, collateral performance and credit spreads to determine fair value. Certain LBASS in Level 2 are valued based on non-binding broker quotes whose inputs have been corroborated to be market observable. The fair value of LBASS in Level 3 is primarily based on non-binding broker quotes where the inputs have not been corroborated to be market observable.

The fair value of preferred stocks in Levels 2 is based on valuation methods described in Part A4 of this note. The fair value of preferred stocks in Level 3 is based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Certain preferred stocks, which do not have readily determinable fair values, and are investments in investment companies are measured utilizing NAV as a practical expedient.

The fair value of unaffiliated common stocks in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of unaffiliated common stocks in Levels 2 and 3 is based on the valuation methods described in Part A4 of this note. Certain unaffiliated private common stocks carried at fair value, which do not have readily determinable fair values, and are investments in investment companies that measure their assets at fair value on a recurring basis, are reported utilizing NAV as a practical expedient and are excluded from the fair value hierarchy.

The fair value of mortgage loans on real estate in Level 3 is based on discounted contractual cash flows or, if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics, using similar types of properties as collateral.

As of December 31, 2020, the Short term pool was reported as a cash equivalent. The fair value of cash equivalents in Level 1 is based on unadjusted quoted prices or daily quoted net asset values for identical assets in active markets the Company can access. The fair value of cash equivalents in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

The fair value of short-term investments in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of short-term investments in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. As of December 31, 2019, the Short term pool was reported as a short-term investment and the fair value measured at NAV. NAV is based on marking to market the underlying Short term pool's net assets and is the basis for current transactions between the Short term pool and member companies. The value of net assets and each share is determined daily by the Short term pool custodian.

The fair value of free-standing exchange listed derivatives in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of derivatives in Level 2 is based on the valuation methods described in Part A4 of this note.

The fair value of LIHTC property investments in Level 3 is based on amortized cost, using the proportional amortization method, which approximates fair value.

The fair value of unaffiliated surplus notes in Level 2 is based upon quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. The fair value of affiliated surplus notes and collateral loans in Level 3 is based on discounted cash flow calculations using current interest rates for instruments with comparable terms.

The fair value of reinvested collateral from securities lending in Level 2 is based on carrying value due to its short-term nature.

- D. The Company was able to estimate the fair value of all its financial instruments in 2020 and 2019.
- E. Investments in certain common stock measured and reported at NAV in the Assets page and presented in the table in Part A1 are generally not redeemable with the issuing corporation and cannot be sold without approval of the managing members. Distributions of income are usually received from the sale of the common stock or the liquidation of the underlying asset or assets of the issuing corporation over the life of these investments, typically 3-7 years. The Company had \$504 thousand of remaining commitments to invest in these investments over their remaining lives.

The Company's investment in the Short term pool was measured and reported at NAV in the Assets page and presented in the table in Part A1 as of December 31, 2019. There are no restrictions on withdrawals from the Short term pool. Withdrawals are made at current NAV. Each member company may make withdrawals on demand without penalty on any business day with the settlement of funds not to exceed ten business days. The Short term pool's investment strategy is to invest in U.S. dollar-denominated, high quality and highly liquid investments with very low credit risk and a duration of less than 100 days. The Company did not have commitments to invest in the Short term pool.

Changes in APPM requirements, effective June 30, 2020, require the valuation of the assets in the Short term pool to be consistent with the valuations required by reported asset type as stipulated in SSAP No. 2R.

21. Other Items

A. Unusual or Infrequent Items

Due to the significant decline in the number of auto accidents caused by mandated stay-at-home orders, other pandemic containment actions and reduced economic activity from the Novel Coronavirus Pandemic or COVID-19 ("Coronavirus"), premium refunds were provided to certain policyholders. Auto and certain commercial lines customers received a Shelter-in-Place Payback under the terms of a policy endorsement reducing net premiums written and earned by \$869 million for the six months ended June 30, 2020.

NOTES TO FINANCIAL STATEMENTS

Additionally, the State of California requested that insurers assess the impact of the Coronavirus and issue premium refunds for passenger auto, motorcycle, various commercial lines of insurance as well as other lines. Net premiums written and earned were reduced by \$133 million for the six months ended December 31, 2020.

The Company did not have unusual or infrequent items as of December 31, 2019.

- B. Troubled Debt Restructuring: Debtors – Not applicable.
- C. Other Disclosures

Coronavirus

The Coronavirus resulted in governments worldwide enacting emergency measures to combat the spread of the virus. These measures, which have included the implementation of travel restrictions, government-imposed shelter-in-place orders, quarantine periods, social distancing and restrictions on large gatherings, have caused material disruption to businesses globally, resulting in increased unemployment, a recession and increased economic uncertainty. Additionally, there is no way of predicting with certainty how long the pandemic might last, including the potential for restrictions being restored or new restrictions being implemented that could result in further economic volatility.

The Coronavirus has affected the Company's operations and depending on its length and severity may continue to significantly affect the Company's results of operations, financial condition and liquidity, including sales of new and retention of existing policies, shared economy demand, claim severity costs, driving behavior and auto accident frequency, investment valuations and returns, and increases in bad debt and credit risk.

The magnitude and duration of the global pandemic and the impact of actions taken by governmental authorities, businesses and consumers, including timing of vaccine distribution, to mitigate health risks create significant uncertainty. The Company will continue to closely monitor and proactively adapt to developments and changing conditions. Currently, it is not possible to reliably estimate the length and severity of the pandemic or its impact to the Company's operations, but the effects could be material and may continue, emerge, evolve or accelerate into 2021.

PG&E Corporation and Pacific Gas and Electric Company (together "PG&E") Settlement

On June 20, 2020, the United States Bankruptcy Court for the Northern District of California confirmed PG&E's Chapter 11 Plan of Reorganization. The Plan of Reorganization included an agreement to resolve insurance subrogation claims arising from the 2017 Northern California wildfires and the 2018 Camp Fire for \$11 billion. The Company was party to the agreement.

On July 1, 2020, PG&E emerged from Chapter 11 and funded the subrogation trust from which distributions will be made to insurers. Insurers have five years from the effective date of the Plan of Reorganization to submit proof of paid losses to the trust prior to the final distribution.

The Company recognized a net underwriting gain of \$444 million, net of expenses and adjustments to reinsurance, related to the subrogation settlement in 2020, which was reflected as follows in the Statement of Income:

(In millions)	Underwriting Gain/(Loss)
Premiums earned	\$ 63
Losses incurred	393
Loss adjustment expense incurred	(12)
Net underwriting gain	\$ 444

The favorable impact to premiums earned was due to reinstatement premiums returned by reinsurers.

As of December 31, 2020, the Company had received distributions from the trust representing approximately 80% of the expected recovery.

Southern California Edison Settlement

On September 14, 2020, Southern California Edison reached a \$1.16 billion settlement agreement with insurance companies, resolving all insurance subrogation claims arising from the December 2017 Thomas and Koenigstein Wildfires and January 2018 Montecito Mudslides litigation. The Company was party to the agreement and recognized a net underwriting gain of \$44 million, net of expenses, related to the subrogation settlement in 2020, which was reflected as follows in the Statement of Income:

(In millions)	Underwriting Gain/(Loss)
Losses incurred	\$ 51
Loss adjustment expense incurred	(7)
Net underwriting gain	\$ 44

As of December 31, 2020, the Company had received substantially all distributions from the trust for its expected recovery.

Related party commitments

The Company negotiated settlement agreements with certain claimants to pay annuities. Prior to July 1, 2001, the Company assigned its obligation to pay those claimants to Allstate Settlement Corporation ("ASC"), a subsidiary of ALIC, who purchased structured settlement annuities from ALIC and ALNY. In addition, the Company sold surety bonds to ASC which guaranteed the payment of the structured settlement annuity in the event ALIC and ALNY could not pay. ASC conducted similar transactions with unrelated parties and acquired surety bonds from the Company to guarantee the payment of those structured settlement annuity contracts issued by ALIC and ALNY. Most of the structured settlements issued to ASC were under "qualified assignment" meaning ASC assumed the Company's and unaffiliated parties' obligations to make future payments. Reserves recorded by ALIC and ALNY for annuity payments that are indemnified by the surety bonds of the Company were \$4.75 billion and \$4.82 billion as of December 31, 2020 and 2019, respectively.

Transfer of Investments

During 2018, the Company transferred limited partnership investments with a book/adjusted carrying value of \$1.70 billion and cash of \$12 million to AIMCO Private Fund II, LLC ("AIMCO II"). Since the transfer of the assets did not meet the conditions of a sale per SSAP No. 103R, *Transfer and Servicing of Financial Assets and Extinguishments of Liabilities*, the assets of AIMCO II, which consisted of limited partnership investments with a book/adjusted carrying value of \$1.81 billion, cash equivalents of \$173 million, receivable for securities of \$2 million and cash of \$6 million as of December 31, 2020, will continue to be directly reported in the Company's financial statements.

Other

Included in the Annual Statement is a schedule of net losses and loss expenses unpaid, as reported in Schedule P - Part 1, Columns 13 through 24, for accident years 1995 and prior through 2010, for each line of business reported.

Other expenses reported on Page 3, Line 5, Liabilities, Surplus and Other Funds, included \$43 million and \$33 million of reserves related to employee medical and dental plans as of December 31, 2020 and 2019, respectively.

NOTES TO FINANCIAL STATEMENTS

- D. Business Interruption Insurance Recoveries – Not applicable.
- E. State Transferable and Non-transferable Tax Credits – Not applicable.
- F. Subprime Mortgage Related Risk Exposure

1. As of December 31, 2020, the Company did not invest in asset-backed residential mortgage-backed securities (“ABS RMBS”). As of December 31, 2019, the Company identified it had exposure to subprime residential mortgage related risk in the form of ABS RMBS. The ABS RMBS portfolio included securities that were collateralized by mortgage loans issued to borrowers that cannot qualify for prime or alternative financing terms due in part to an impaired or limited credit history. It also included securities that were collateralized by certain second lien mortgages regardless of the borrower’s credit profile. As of December 31, 2019, the ABS RMBS portfolio had net unrealized gains of \$16 million, which were primarily comprised of gross unrealized gains.

The Company owns Alt-A securities, which it does not consider to be a component of its exposure to subprime mortgage related risk. The Alt-A portfolio consists of mortgage-backed securities at fixed or variable rates and includes certain securities that are collateralized by residential mortgage loans issued to borrowers with stronger credit profiles than subprime borrowers, but do not qualify for prime financing terms due to high loan-to-value ratios or limited supporting documentation. As of December 31, 2020, the Alt-A portfolio had net unrealized gains of \$27 thousand, due entirely to gross unrealized gains. As of December 31, 2019, the Alt-A portfolio had net unrealized gains of \$21 million which were primarily comprised of gross unrealized gains.

Both ABS RMBS and Alt-A securities are considered loan-backed, and included in bonds in the Company’s Asset page.

The Company has a comprehensive portfolio monitoring process to identify and evaluate, on a case-by-case basis, investments whose carrying value may be other-than-temporarily impaired. See Note 5, Part D5 for details regarding the Company’s portfolio monitoring process. OTTI losses were not recorded in the Alt-A portfolio in 2020. The Alt-A portfolio recorded OTTI losses related to asset impairments of less than \$1 million in 2019. OTTI losses due to the potential sale of assets to meet future cash flow requirements were not recorded in the Alt-A or ABS RMBS portfolios in 2019. OTTI losses in the ABS RMBS portfolio related to asset impairments were \$1 million in 2019.

The Company’s practice for acquiring and monitoring Alt-A securities takes into consideration the quality of the originator, quality of the servicer, security credit rating, underlying characteristics of the mortgages, borrower characteristics, level of credit enhancement in the transaction, and bond insurer strength, where applicable. The originators and servicers of the underlying mortgage loans are primarily subsidiaries of large banks and brokers.

- 2. The Company did not have direct exposure to subprime mortgage loans.
- 3. The Company did not have direct exposure to other subprime investments as of December 31, 2020. The Company’s direct exposure to other subprime investments is summarized as follows as of December 31, 2019:

- G. Insurance-linked Securities (“ILS”) Contracts

The Company and certain of its affiliated insurance companies were ceding insurers of five ILS agreements and three ILS agreements related to directly-written insurance risks as of December 31, 2020 and 2019, respectively.

As of December 31, 2020, ILS placements provide \$1.43 billion of reinsurance limits for qualifying losses in all states except Florida caused by “Named Peril Basis” events with no reinstatement of limits. ILS placements were comprised of \$150 million and \$375 million placements providing occurrence only coverage; and \$100 million, \$300 million and \$500 million placements providing occurrence and aggregate protection.

As of December 31, 2019, ILS placements provide \$1.18 billion of reinsurance limits for qualifying losses in all states except Florida caused by “Named Peril Basis” events with no reinstatement of limits. ILS placements were comprised of a \$375 million placement providing occurrence only coverage; and \$300 million and \$500 million placements providing occurrence and aggregate protection.

Allstate declared catastrophes to personal lines property and automobile business can be aggregated to erode the aggregate retention and qualify for coverage under the aggregate limit. Recoveries are limited to our ultimate net loss from the reinsured event. Each agreement’s contractual limit applies to Allstate and its 22 ceding affiliated property and casualty companies under the agreement as a group, and not separately to each ceding company. A ceding company’s share of loss recovery under an agreement for a loss occurrence is based on the proportion of the ceding company’s ultimate net loss for such loss occurrence to the total ultimate net loss incurred by the Company and its 22 ceding affiliated property and casualty companies for the loss occurrence, and is limited to the ceding company’s ultimate net loss. Reinsurance recoveries under the contract are limited to our ultimate net loss from a covered event subject to the contract’s limit.

NOTES TO FINANCIAL STATEMENTS

The table below reports all known ILS involvements that would likely be used to satisfy the Company's reinsurance agreements. The term "Aggregate Maximum Proceeds", as listed in the table, represents the aggregate of the contract limits of all of the Company's outstanding ILS contracts. The Company did not expect to receive proceeds under the terms of the ILS agreements as of December 31, 2020 or 2019.

22. Events Subsequent

The Company did not write accident and health insurance premium subject to Section 9010 of the federal Affordable Care Act ("ACA") in 2020 or 2019.

Acquisition of National General Holdings Corp.

On January 4, 2021, the Corporation completed the acquisition of National General Holdings Corp., expanding its independent agent channel business. In conjunction with the acquisition, the Company entered into a quota share reinsurance agreement with Integon National Insurance Company ("INIC"), a new affiliate, whereby the Company would assume 100% of the net underwriting liabilities of INIC, effective January 4, 2021. INIC transferred approximately \$1 billion in assets equal to the policy liabilities to the Company in connection with the quota share agreement.

Southern California Edison Settlement

On January 22, 2021, Southern California Edison reached a \$2.20 billion settlement agreement with insurance companies, resolving subrogation claims arising from the Woolsey Wildfire. The Company is party to the agreement and expects to recognize a favorable Statement of Income impact of approximately \$115 million, pre-tax, net of expenses and adjustments to reinsurance, in the first quarter of 2021.

Sale of ALIC

On January 26, 2021, the Company and Allstate Financial Insurance Holdings Corporation entered into a Stock Purchase Agreement with Antelope US Holdings Company, an affiliate of an investment fund associated with The Blackstone Group Inc. to sell ALIC and certain affiliates for approximately \$2.8 billion in cash. The Company or an affiliate will retain ownership of ALNY while pursuing alternatives to sell or otherwise transfer risk to a third party. As a result of the transaction, the Company estimates its surplus will increase by approximately \$150 million in the first quarter of 2021. The ultimate amount of the gain will be impacted by purchase price adjustments associated with certain pre-close transactions specified in the stock purchase agreement and changes in statutory capital and surplus prior to the closing date. The transaction is expected to close in the second half of 2021 subject to regulatory approvals and other customary closing conditions.

Plan of Division and Merger

In accordance with the Illinois Domestic Stock Company Law, 215 ILCS 5/35B-1 ("Division law"), the Company along with seven affiliate Illinois domestic insurance companies filed a Plan of Division dated January 29, 2021 with the Illinois Director of Insurance pursuant to which each Company proposes to divide into the Company, as surviving Illinois insurance company and a newly created Illinois insurance company that would contain certain inactive Michigan automobile insurance policies that had an outstanding claim reserve on a personal injury claim as of the division date. The Plan of Division is pending approval by the IL DOI and requires a public hearing and completion of other conditions of the Division law before it can be effective. Immediately following the Division, pursuant to a Merger Agreement and Plan of Merger, four of the newly formed Illinois insurance companies will merge with and into a newly formed Illinois insurance company, ASMI Auto Insurance Company, created for the purposes of being the surviving company in the merger. The Merger Agreement is pending approval by the IL DOI and is dependent upon approval and execution of the Plan of Division before it can be effective.

An evaluation of subsequent events was made through February 22, 2021 for the Annual Statement issued on February 24, 2021. There were no other significant subsequent events requiring adjustment to or disclosure in the financial statements.

23. Reinsurance

A. Unsecured Reinsurance Recoverables

The Company had the following unsecured reinsurance recoverables that exceeded 3% of the Company's policyholders surplus as of December 31:

(\$ in millions)	Reinsurer	NAIC Group Code	FEIN	2020	2019
	Michigan Catastrophic Claim Association ("MCCA")	0000	AA-9991159	\$ 2,629	\$ 2,848

The MCCA is a statutory indemnification mechanism for member insurers' qualifying personal injury protection claims paid for the unlimited lifetime medical benefits above the applicable retention level for qualifying injuries from automobile, motorcycle and commercial vehicle accidents. Indemnification recoverables on paid and unpaid claims, including IBNR, as of December 31, 2020 and 2019 include \$5.65 billion and \$5.50 billion, respectively, from the MCCA for its indemnification obligation. The MCCA is funded by annually assessing participating member companies actively writing motor vehicle coverage in Michigan on a per vehicle basis that is currently \$100 per vehicle insured. The MCCA's calculation of the annual assessment is based upon the total of members' actuarially determined present value of expected payments on lifetime claims by all persons expected to be catastrophically injured in that year and ultimately qualify for MCCA reimbursement, its operating expenses, and adjustments for the amount of excesses or deficiencies in prior assessments. The MCCA has also included its calculation of the impacts of the auto insurance reforms which have begun to phase in since their passage in June 2019, including the personal injury protection medical fee schedule that becomes effective July 2, 2021. The assessment is incurred by the Company as policies are written and recovered as a component of premiums from the Company's customers. The MCCA indemnifies qualifying claims of all current and former member companies (whether or not actively writing motor vehicle coverage in Michigan) for qualifying claims and claims expenses incurred while the member companies were actively writing the mandatory personal injury protection coverage in Michigan. Member companies actively writing automobile coverage in Michigan include the MCCA annual assessments in determining the level of premiums to charge insureds in the state. As required for member companies by the MCCA, the Company reports covered paid and unpaid claims to the MCCA when estimates of loss for a reported claim are

NOTES TO FINANCIAL STATEMENTS

expected to exceed the retention level, the claims involve certain types of severe injuries, or there are litigation demands received suggesting the claim value exceeds certain thresholds. The retention level is adjusted upward every other MCCA fiscal year by the lesser of 6% or the increase in the Consumer Price Index. The retention level will be \$600 thousand per claim for the fiscal two-years ending June 30, 2022 compared to \$580 thousand per claim for the fiscal two-years ending June 30, 2020. The MCCA is obligated to fund the ultimate liability of member companies' qualifying claims and claim expenses. The MCCA does not underwrite the insurance coverage or hold any underwriting risk. The MCCA indemnifies members as qualifying claims are paid and billed by members to the MCCA. Unlimited lifetime covered losses result in significant levels of ultimate incurred claim reserves being recorded by member companies along with offsetting indemnification recoverables. Disputes with claimants over coverage on certain reported claims can result in additional losses, which may be recoverable from the MCCA, excluding litigation expenses. There is currently no method by which insurers are able to obtain the benefit of managed care programs to reduce claims costs through the MCCA. The MCCA prepares statutory-basis financial statements in conformity with accounting practices prescribed or permitted by the State of Michigan Department of Insurance and Financial Services ("MI DOI"). The MI DOI has granted the MCCA a statutory permitted practice that expires in June 30, 2022 to discount its liabilities for loss and loss adjustment expense. As of June 30, 2020, the date of its most recent annual financial report, the MCCA had cash and invested assets of \$23.41 billion and an accumulated surplus of \$2.44 billion. The permitted practice reduced the accumulated deficit by \$34.73 billion.

B. Reinsurance Recoverable in Dispute

The Company did not have reinsurance recoverables on paid or unpaid (including incurred but not reported) losses in dispute by reason of notification, arbitration or litigation as of December 31, 2020 or 2019, that either individually exceeded 5% of the Company's policyholders surplus, or in the aggregate exceeded 10% of the Company's policyholders surplus.

G. Reinsurance Accounted for as a Deposit

On October 1, 1999, the Company completed the acquisition of the personal lines business from CNA Financial Corporation (“CNA”). The transaction included an indemnity reinsurance agreement and a reserve agreement. The reserve agreement guaranteed the adequacy, in all material respects, of the loss reserves transferred by CNA under the indemnity reinsurance agreement. The Company used deposit accounting to account for the indemnity reinsurance agreement, as the portion of the indemnity reinsurance agreement governing the transfer of the loss reserves did not, despite its form, transfer both components of insurance risk. The inception-to-date payments for this agreement totaled \$845 million as of December 31, 2020 and 2019. Inception-to-date net adjustments related to the reserve agreement reduced the reserves on deposit by \$187 million as of December 31, 2020 and 2019.

24. Retrospectively Rated Contracts and Contracts Subject to Redetermination

- A. The Company accrues estimated retrospective premium adjustments related to Your Choice Auto® platinum (“YCA”), Your Choice Home® platinum and gold (“YCH”), Allstate House and Home® Enhanced (“H&H”), Encompass Edge (“EE”), Condo Helix Enhanced (“CH”), and Allstate Blue® policies in eligible states. YCA, YCH, H&H, EE, and CH policies that are claim free during the policy period receive 5% of the premium paid for certain major coverages as a billing credit or refund. Allstate Blue policies offer non-standard auto coverage and contain a loyalty bonus, in certain states, which rewards eligible policyholders who stay with the Company for a full policy term with a 5% to 10% bonus of premium paid for certain major coverages. The amount of accrued retrospective premium adjustments is determined by analyzing the historical loss experience of these policyholders.

In connection with the Drivewise® program, the Company accrues estimated retrospective premium adjustments related to certain auto policies in eligible states. Drivewise monitors the driving habits of policyholders and provides rewards in the form of premium adjustments to eligible policyholders for certain low risk driving habits.

The Company sells retrospectively rated premium contract related to a car sharing program, Avail® (formerly Drift®). The ultimate premium on these commercial auto policies will be adjusted based on the loss experience over the course of three years. There was no estimated retrospective premium adjustment accrual as of December 31, 2020 and 2019 due to immateriality and limited loss experience.

- B. The Company records accrued retrospective premium as an adjustment to written premiums.

- C. The amount of net premiums written by the Company in 2020 and 2019 subject to retrospective rating features was \$5.38 billion and \$4.64 billion, respectively. These amounts represented 16.8% and 14.2% of total net premiums written in 2020 and 2019, respectively.

25. Changes in Incurred Losses and Loss Adjustment Expenses

A. The Company establishes reserves for losses and loss adjustment expenses on reported and unreported claims of insured losses. The Company's reserving process takes into account known facts and interpretations of circumstances and factors including the Company's experience with similar cases, actual claims paid, historical trends involving claim payment patterns and pending levels of unpaid claims, loss management programs, product mix and contractual terms, changes in law and regulation, judicial decisions, and economic conditions.

When the Company experiences changes in the mix or type of claims or changing claim settlement patterns, it may need to apply actuarial judgment in the determination and selection of development factors to be more reflective of the new trends. For example, the Coronavirus has had a significant impact on driving patterns and auto frequency that may lead to historical development trends being less predictive of future loss development, potentially creating additional reserve variability.

Generally, the initial reserves for a new accident year are established based on actual claim frequency and severity assumptions for different lines and coverages based on historical relationships to relevant inflation indicators. Reserves for prior accident years are statistically determined using several different actuarial estimation methods. Changes in auto claim frequency may result from changes in mix of business, the rate of distracted driving, miles driven or other macroeconomic factors. Changes in auto current year claim severity are generally influenced by inflation in the medical and auto repair sectors of the economy and the effectiveness and efficiency of claim practices. The Company mitigates these effects through various loss management programs. When such changes in claim data occur, actuarial judgment is used to determine appropriate development factors to establish reserves.

As part of the reserving process, the Company may also supplement its claims processes by utilizing third party adjusters, appraisers, engineers, inspectors, and other professionals and information sources to assess and settle catastrophe and non-catastrophe related claims. The effects of inflation are implicitly considered in the reserving process.

Because reserves are estimates of unpaid portions of losses that have occurred, including incurred but not reported losses, the establishment of appropriate reserves, including reserves for catastrophes, is an inherently uncertain and complex process. The ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimates.

The highest degree of uncertainty is associated with reserves for losses incurred in the initial reporting period as it contains the greatest proportion of losses that have not been reported or settled. The Company regularly updates its reserve estimates as new information becomes available and as events unfold that may affect the resolution of unsettled claims. Changes in prior year reserve estimates, which may be material, are reflected in the Statement of Income in the period such changes are determined.

Activity in the reserve for losses and loss adjustment expenses was summarized as follows:

(in millions)	2020	2019
Balance as of January 1	\$ 18,055	\$ 17,618
Incurred related to:		
Current year	20,626	22,017
Prior years	(333)	(49)
Total incurred	20,293	21,968
Paid related to:		
Current year	13,206	14,014
Prior years	7,273	7,517
Total paid	20,479	21,531
Balance as of December 31	\$ 17,869	\$ 18,055

Incurred losses and loss adjustment expenses represent the sum of paid losses, loss adjustment expenses and reserve changes in the calendar year. This expense included net losses from catastrophes of \$2.72 billion and \$2.50 billion in 2020 and 2019, respectively. Catastrophes are an inherent risk that have contributed to, and will continue to contribute to, material year-to-year fluctuations in the Company's net income and financial position.

The Company calculates and records a single best reserve estimate for losses from catastrophes, in conformance with generally accepted actuarial standards. As a result, management believes that no other estimate is better than the recorded amount. Due to the uncertainties involved, including the factors described above, the ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimates. Accordingly, management believes that it is not practical to develop a meaningful range for any such changes in losses incurred.

Incurred losses and loss adjustment expenses attributable to insured events of prior years were \$(333) million and \$(49) million as a result of the reestimation of unpaid losses and loss adjustment expenses for the years ended December 31, 2020 and 2019, respectively. These changes were generally the result of ongoing analyses of recent loss development trends. Initial estimates were revised as additional information regarding claims became known.

Anticipated salvage and subrogation of \$834 million and \$847 million was included as a reduction of loss reserves as of December 31, 2020 and 2019, respectively.

There were no changes in methodologies and assumptions used in calculating the liability of unpaid losses and loss adjustment expenses for the most recent reporting period presented.

26. Intercompany Pooling Arrangements

27. Structured Settlements

A. To settle certain claims, the Company purchased annuities from various life insurers where the claimant was the payee but for which the Company was contingently liable in the event the issuer of the annuity was unable to perform. NOTES TO FINANCIAL STATEMENTS

33. Asbestos/Environmental Reserves

- A. Does the company have on the books, or has it ever written an insured for which you have identified a potential for the existence of a liability due to asbestos losses? Yes (X) No ( )

The Company continues to receive asbestos and environmental claims. Asbestos claims relate primarily to bodily injuries asserted by people who were exposed to asbestos or products containing asbestos. Environmental claims relate primarily to pollution and related clean-up costs.

The Company's exposure to asbestos and environmental claims arise principally from assumed reinsurance coverage written during the 1960s through the mid-1980s, including reinsurance on primary insurance written on large U.S. companies, and from direct excess commercial insurance written from 1972 through 1985, including substantial excess general liability coverages on large U.S. companies. Additional exposure stems from direct primary commercial insurance written during the 1960s through the mid-1980s.

In 1986, the general liability policy form used by the Company and others in the property and casualty industry was amended to introduce an "absolute pollution exclusion," which excluded coverage for environmental damage claims, and added an asbestos exclusion. Most general liability policies issued prior to 1987 contain annual aggregate limits for product liability coverage. General liability policies issued in 1987 and thereafter contain annual aggregate limits for product liability coverage and annual aggregate limits for all coverages. The Company's experience to date has been that these policy form changes have limited the extent of its exposure to environmental and asbestos claim risks.

The Company's exposure to liability for asbestos and environmental losses manifests differently depending on whether it arises from assumed reinsurance coverage, direct excess commercial insurance or direct primary commercial insurance. The direct insurance coverage the Company provided for these exposures was substantially "excess" in nature.

Direct excess commercial insurance and reinsurance involve coverage written by the Company for specific layers of protection above retentions and other insurance plans. The nature of excess coverage and reinsurance provided to other insurers limits the Company's exposure to loss to specific layers of protection in excess of policyholder retention on primary insurance plans. The Company's exposure is further limited by the significant reinsurance that was purchased on the direct excess business.

The Company's assumed reinsurance business involved writing generally small participations in other insurers' reinsurance programs. The reinsured losses in which the Company participates may be a proportion of all eligible losses or eligible losses in excess of defined retentions. The majority of the Company's assumed reinsurance exposure, approximately 85%, is for excess of loss coverage, while the remaining 15% is for pro-rata coverage.

The Company's direct primary commercial insurance business did not include coverage to large asbestos manufacturers. This business comprises a cross section of policyholders engaged in many diverse business sectors throughout the country.

The Company conducts an annual review in the third quarter to evaluate, establish and adjust as necessary, asbestos and environmental reserves. Changes to reserves are recorded in the reporting period in which they are determined. Using established industry and actuarial best practices and assuming no change in the regulatory or economic environment, this detailed and comprehensive methodology determines asbestos reserves based on assessments of the characteristics of exposure (e.g. claim activity, potential liability, jurisdiction, products versus non-products exposure) presented by individual policyholders, and determines environmental reserves based on assessments of the characteristics of exposure (e.g. environmental damages, respective shares of liability of potentially responsible parties, appropriateness and cost of remediation) to pollution and related clean-up costs. The number and cost of these claims are affected by advertising by trial lawyers seeking asbestos plaintiffs, and entities with asbestos exposure seeking bankruptcy protection as a result of asbestos liabilities, initially causing a delay in the reporting of claims, often followed by an acceleration and an increase in losses and loss adjustment expenses as settlements occur.

After evaluating insureds' probable liabilities for asbestos and environmental claims, the Company evaluates the insureds' coverage programs for such claims. The Company considers the insureds' total available insurance coverage, including the coverage it issued. The Company also considers relevant judicial interpretations of policy language and applicable coverage defenses or determinations, if any.

Evaluation of both the insureds' estimated liabilities and the Company's exposure to the insureds depends heavily on an analysis of the relevant legal issues and litigation environment. This analysis is conducted by the Company's specialized claims adjusting staff and legal counsel. Based on these evaluations, case reserves are established by claims adjusting staff and actuarial analysis is employed to develop an IBNR reserve, which includes estimated potential reserve development and claims that have occurred but have not been reported.

For both asbestos and environmental reserves, the Company also evaluates its historical direct net loss and loss expense paid and incurred experience to assess any emerging trends, fluctuations or characteristics suggested by the aggregate paid and incurred activity.

Establishing net loss reserves for asbestos and environmental claims is subject to uncertainties that are much greater than those presented by other types of claims. Among the complications are lack of historical data, long reporting delays, uncertainty as to the number and identity of insureds with potential exposure and unresolved legal issues regarding policy coverage; unresolved legal issues regarding the determination, availability and timing of exhaustion of policy limits; plaintiffs' evolving and expanding theories of liability; availability and collectibility of recoveries from reinsurance; retrospectively determined premiums and other contractual agreements; estimates of the extent and timing of any contractual liability; the impact of bankruptcy protection sought by various asbestos producers and other asbestos defendants; and other uncertainties. There are also complex legal issues concerning the interpretation of various insurance policy provisions and whether those losses are covered, or were ever intended to be covered, and could be recoverable through retrospectively determined premium, reinsurance or other contractual agreements. Courts have reached different and sometimes inconsistent conclusions as to when losses are deemed to have occurred and which policies provide coverage; what types of losses are covered; whether there is an insurer obligation to defend; how policy limits are determined; how policy exclusions and conditions are applied and interpreted; and whether clean-up costs represent insured property damage. The Company's reserves for asbestos and environmental exposures could be affected by tort reform, class action litigation, and other potential legislation and judicial decisions. Environmental exposures could also be affected by a change in the existing federal Superfund law and similar state statutes. There can be no assurance that any reform legislation will be enacted or that any such legislation will provide for a fair, effective and cost-efficient system for settlement of asbestos or environmental claims. Management believes these issues are not likely to be resolved in the near future, and the ultimate costs may vary materially from the amounts currently recorded resulting in material changes in loss reserves.

Management believes its net loss reserves for asbestos and environmental exposures are appropriately established based on available facts, technology, laws, regulations, and assessments of other pertinent factors and characteristics of exposure (e.g. claim activity, potential liability, jurisdiction, products versus non-products exposure) presented by individual policyholders, assuming no change in the legal, legislative or economic environment. Due to the uncertainties and factors described above, management believes it is not practicable to develop a meaningful range for any such additional net loss reserves that may be required.
