NOTES TO FINANCIAL STATEMENTS

Notes required on a quarterly basis have been updated in their entirety. There have been no material changes to the following December 31, 2020 Annual Statement notes: 1(B), 2, 3, 5(A-C, J, K, O-R), 6, 7, 9(A-E, G-I), 10(D-O), 12(B-I), 13(A-C, E-I, K-M), 14, 15, 16-Off-balance-sheet financial instruments, 17(A), 18, 19, 21(A, B, D-I), 23, 24(A-D) and 26-36. Only material or significant changes from the Annual Statement have been updated for all other notes, or portions thereof.

1. Summary of Significant Accounting Policies

- A. Allstate Life Insurance Company (the “Company”) prepares its financial statements in conformity with accounting practices prescribed or permitted by the Illinois Department of Insurance (“IL DOI”). Prescribed statutory accounting practices include a variety of publications of the National Association of Insurance Commissioners (“NAIC”), as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

The State of Illinois requires its domestic insurance companies to prepare financial statements in conformity with the NAIC Accounting Practices and Procedures Manual (“APPM”), which includes all Statements of Statutory Accounting Principles (“SSAPs”), subject to any deviations prescribed or permitted by the IL DOI.

The Company holds one nonconforming credit tenant loan (“CTL”) with a carrying value of \$14 million as of December 31, 2020. This nonconforming CTL was reported on Schedule D, Part 1 with an NAIC Designation of 2.B FE. The asset was filed with the Securities Valuation Office (“SVO”) on January 14, 2021 and included as a permitted practice for the 2020 reporting year pursuant to the Statutory Accounting Principles Working Group INT 20-10. The CTL received an SVO-assigned designation during the first quarter of 2021.

A reconciliation of the Company’s net income and capital and surplus between statutory accounting principles (“SAP”) per the APPM and practices prescribed or permitted by the IL DOI is shown below.

C. Investments

Loan-backed and structured securities (“LBASS”) with an NAIC designation of 1 through 5 are reported at amortized cost using the effective yield method. LBASS with an NAIC designation of 6 are reported at the lower of amortized cost or fair value, with the difference reflected in unassigned surplus as an unrealized capital loss. In general, LBASS utilize a multi-step process for determining carrying value and NAIC designation in accordance with SSAP No. 43R, Loan-backed and Structured Securities. For LBASS of high credit quality with fixed interest rates, the effective yield is recalculated on a retrospective basis. For all others, the effective yield is recalculated on a prospective basis.

- D. Based upon its evaluation of relevant conditions and events, management did not have substantial doubt about the Company’s ability to continue as a going concern as of March 31, 2021 or December 31, 2020.

4. Discontinued Operations

A. Discontinued Operation Disposed of or Classified as Held for Sale

1. The following is a list of discontinued operations classified as held for sale as of March 31, 2021:

Discontinued Operation Identifier	Description of Discontinued Operation
1	Anticipated sale of 100% of the common stock of wholly owned insurance subsidiary, Allstate Life Insurance Company of New York (“ALNY”)

2. On March 29, 2021, the Company, Allstate Insurance Company (“AIC”), Allstate Insurance Holdings, LLC and Allstate Financial Insurance Holding Corporation (“AFIHC”) entered into a Stock Purchase Agreement with Wilton Reassurance Company to sell all of the shares of common stock of ALNY, a wholly owned subsidiary of the Company and Intramerica Life Insurance Company, a wholly owned subsidiary of AFIHC for \$220 million in cash. This transaction will result in the Company’s divestiture of all of its New York life and annuities business and is expected to close in the second half of 2021, subject to regulatory approvals, the consummation of certain pre-sale restructuring and reinsurance transactions and other customary closing conditions.

3. The Company recognized a loss on the sale of ALNY upon classification as held for sale as of March 31, 2021 as follows:

4. Unrealized losses are calculated as the difference between amortized cost and fair value. They result from declines in fair value below amortized cost and are evaluated for OTTI. Every LBASS with unrealized losses was included in the portfolio monitoring process.

The following table summarizes gross unrealized losses and the fair value of LBASS by the length of time individual securities have been in a continuous unrealized loss position.

b. The aggregate related fair value of securities with unrealized losses:		
1. Less than 12 months	\$ 32	\$ 86
2. 12 months or longer	\$ 52	\$ 5

5. The following table summarizes the gross unrealized losses by unrealized loss position and credit quality as of March 31, 2021.

(in millions)

	Investment Grade	Below Investment Grade	Total
LBASS with unrealized loss position greater than or equal to 20% of amortized cost ⁽¹⁾⁽²⁾	\$ (2)	\$ (8)	\$ (10)

⁽¹⁾ Substantially all below investment grade LBASS have been in an unrealized loss position for a period of twelve or more consecutive months.

⁽²⁾ Evaluated based on factors such as discounted cash flows and the financial condition and near-term and long-term prospects of the issue or issuer and were determined to have adequate resources to fulfill contract obligations.

Investment grade is defined as a security having an NAIC designation of 1 or 2, a rating of Aaa, Aa, A or Baa from Moody's, a rating of AAA, AA, A or BBB from S&P Global Ratings, a comparable rating from another nationally recognized rating agency, or a comparable internal rating if an externally provided rating is not available. Market prices for certain securities may have credit spreads which imply higher or lower credit quality than the current third-party rating. Unrealized losses on investment grade securities were principally related to an increase in market yields which may include increased risk-free interest rates and/or wider credit spreads since the time of initial purchase. The unrealized losses are expected to reverse as the securities approach maturity.

LBASS in an unrealized loss position were evaluated based on actual and projected collateral losses relative to the securities' positions in the respective securitization trusts, security specific expectations of cash flows and credit ratings. This evaluation also takes into consideration credit enhancement, measured in terms of: (1) subordination from other classes of securities in the trust that are contractually obligated to absorb losses before the class of security the Company owns, and (2) the expected impact of other structural features embedded in the securitization trust beneficial to the class of securities the Company owns, such as overcollateralization and excess spread.

As of March 31, 2021, the Company had not made the decision to sell and it was not more likely than not the Company would be required to sell LBASS with unrealized losses before recovery of the amortized cost basis. As of March 31, 2021, the Company had the intent and ability to hold LBASS with unrealized losses for a period of time sufficient for them to recover.

20. Fair Value Measurements

- A. Fair value is defined, per SSAP No. 100R, *Fair Value* ("SSAP No. 100R"), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP No. 100R identified three valuation techniques which are used, either independently or in combination, to determine fair value: (1) market approach; (2) income approach; and (3) cost approach. SSAP No. 100R also contains guidance about observable and unobservable inputs, which are assumptions that market participants would use in pricing an asset or liability. To increase consistency and comparability in fair value measurements, the fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels: 1, 2 and 3. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Certain assets are measured utilizing net asset value ("NAV") as a practical expedient to determine fair value.

The Company has two types of situations where investments are classified as Level 3 in the fair value hierarchy:

- (1) Specific inputs significant to the fair value estimation models are not market observable. This primarily occurs in the Company's use of broker quotes to value certain securities where the inputs have not been corroborated to be market observable, and the use of valuation models that use significant non-market observable inputs.
- (2) Quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources.

There were no transfers into Level 3 during the first three months of 2021. Transfers into Level 3 during the first three months of 2020 included securities measured at lower of cost or market and reported at fair value in 2020 and at cost in 2019. Transfers out of Level 3 during 2021 included securities measured at lower of cost or market and reported at cost in 2021 and at fair value in 2020. There were no transfers out of Level 3 during the first three months of 2020.

3. The Company consistently follows its policy for determining when transfers between levels are recognized. The policy about the timing of recognizing transfers into Level 3 is the same as that for recognizing transfers out of Level 3.

NOTES TO FINANCIAL STATEMENTS

4. In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 and Level 3 valuations, a combination of the market and income approaches is used.

Listed below is a summary of the significant valuation techniques for assets and liabilities measured and reported at fair value.

Level 2 measurements

Derivatives - Free-standing exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives, including total return swap agreements, certain options and credit default swap agreements, are valued using models that rely on inputs such as interest rate yield curves, implied volatilities, index price levels, currency rates, and credit spreads that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

Separate Accounts - Indexed variable annuity contracts may be supported by corporate bonds, including those that are privately placed. The primary inputs to the valuation for publicly traded corporate bonds include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Privately placed corporate bonds are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. In addition, indexed variable annuity contracts may be supported by exchange listed derivatives that are not actively traded and are valued based on quoted prices for identical instruments in markets that are not active.

Level 3 measurements

Bonds - Includes corporate bonds, including bank loans and asset-backed securities ("ABS").

Corporate bonds, including those that are privately placed, and bank loans are valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Other inputs include an interest rate yield curve, as well as published credit spreads for similar assets that incorporate credit quality and industry sector of the issuer. ABS are valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable.

Unaffiliated common stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 measurements.

Separate Accounts - Indexed variable annuity contracts are supported by mortgage loans. The fair value of mortgage loans on real estate is based on discounted contractual cash flows or, if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics using similar types of properties as collateral.

The fair value of bonds in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of publicly traded bonds in Level 2 is based upon quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Non-publicly traded bonds in Level 2 are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The fair value of municipal bonds in Level 3 not rated by third-party credit rating agencies, but receiving an NAIC designation is based on quoted prices for

NOTES TO FINANCIAL STATEMENTS

identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields and credit spreads. Also included are municipal bonds valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable and municipal bonds in default valued based on the present value of expected cash flows. The fair value of corporate bonds in Level 3 is primarily based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Other inputs for corporate bonds include an interest rate yield curve, as well as published credit spreads for similar assets that incorporate the credit quality and industry sector of the issuer. The fair value of LBASS in Level 2 is primarily based on valuation models utilizing quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads to determine fair value. Certain LBASS in Level 2 are valued based on non-binding broker quotes whose inputs have been corroborated to be market observable. The fair value of LBASS in Level 3 is primarily based on non-binding broker quotes where the inputs have not been corroborated to be market observable or internal models with non-market observable inputs.

The fair value of perpetual preferred stocks in Level 2 is based on quoted prices or quoted net asset values for identical or similar assets in markets that are not active. The primary input to the valuation for redeemable preferred stocks in Level 2 include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads. Certain preferred stocks, which do not have readily determinable fair values, and are investments in investment companies are measured utilizing NAV as a practical expedient.

The fair value of unaffiliated common stocks in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of unaffiliated common stocks in Level 3 is based on the valuation methods described in Part A4 of this note. Certain unaffiliated private common stocks carried at fair value, which do not have readily determinable fair values, and are investments in investment companies that measure their assets at fair value on a recurring basis, are reported utilizing NAV as a practical expedient and are excluded from the fair value hierarchy

The fair value of mortgage loans on real estate in Level 3 is based on discounted contractual cash flows or, if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics, using similar types of properties as collateral.

The fair value of cash equivalents in Level 1 is based on unadjusted quoted prices or daily quoted net asset values for identical assets in active markets the Company can access. The fair value of cash equivalents in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

The fair value of short-term investments in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of short-term investments in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

The fair value of derivatives in Level 2 is based on the valuation methods described in Part A4 of this note.

The fair value of LIHTC property investments in Level 3 is based on amortized cost, using the proportional amortization method, which approximates fair value. The fair value of unaffiliated surplus notes in Level 2 is based upon quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

The fair value of reinvested collateral from securities lending in Level 2 is based on carrying value due to its short-term nature.

The fair value of the assets of the Separate Account in Level 1 is based on actively traded mutual funds that have daily quoted net asset values that are readily determinable for identical assets the Company can access. The fair value of the assets of the Separate Accounts in Levels 2 and 3 is based on the valuation methods described in Part A4.

Financial liabilities

Presented below are the aggregate fair value estimates and statement values of financial instruments:

Separate Accounts - Derivatives	\$ 9	\$ 9	\$ -	\$ 9	\$ -	\$ -	\$ -	\$ -	

The fair value of the liability for deposit-type contracts in Level 3 is generally based on the terms of the underlying contracts incorporating current market-based crediting rates for similar contracts that reflect the Company's own credit risk. Immediate annuities without life contingencies and fixed rate funding agreements are valued at the present value of future benefits using current market-based implied interest rates and reflect the Company's own credit risk. Fixed annuities are valued at the account value less surrender charges.

The fair value of the liabilities for collateral related to securities lending in Level 2 is based on carrying value due to its short-term nature.

The fair value of derivatives in Level 2 is based on the valuation methods described in Part A4 of this note.

- D. The Company was able to estimate the fair value of all its financial instruments in 2021 and 2020.
- E. Investments in certain common stock measured and reported at NAV in the Assets page and presented in the table in Part A1 are generally not redeemable with the issuing corporation and cannot be sold without approval of the managing members. Distributions of income are usually received from the sale of common stock or the liquidation of the underlying asset or assets of the issuing corporation over the life of these investments, typically 3-7 years. The amount of remaining commitments to invest in these investments over their remaining lives is immaterial.

21. Other Items

C. Other Disclosures

The Novel Coronavirus Pandemic or COVID-19 ("Coronavirus")

The Coronavirus resulted in governments worldwide enacting emergency measures to combat the spread of the virus. These measures, which have included the implementation of travel restrictions, government-imposed shelter-in-place orders, quarantine periods, social distancing and restrictions on large gatherings, have caused material disruption to businesses globally, resulting in increased unemployment, a recession and

NOTES TO FINANCIAL STATEMENTS

increased economic uncertainty. Additionally, there is no way of predicting with certainty how long the pandemic might last, including the potential for restrictions being restored or new restrictions being implemented that could result in further economic volatility.

The magnitude and duration of the global pandemic and the impact of actions taken by governmental authorities, businesses and consumers, including the availability, utilization rate and effectiveness of vaccines, to mitigate health risks create significant uncertainty. The Company continues to closely monitor and proactively adapt to developments and changing conditions. Currently, it is not possible to reliably estimate the length and severity of the pandemic or its impact to the Company's operations, but the effects could be material and may continue, emerge, evolve or accelerate in 2021.

Transfer of Investments

During 2018, the Company transferred limited partnership investments with a book/adjusted carrying value of \$1.55 billion and cash of \$53 million to AIMCO Private Fund I, LLC ("AIMCO I"). Since the transfer of the assets did not meet the conditions of a sale per SSAP No. 103R, the assets of AIMCO I, which consisted of limited partnership investments with a book/adjusted carrying value of \$1.58 billion and cash equivalents of \$44 million as of March 31, 2021, will continue to be directly reported in the Company's financial statements.

Sale of the Company

On January 26, 2021, AIC and AFHC entered into a Stock Purchase Agreement with Everlake US Holdings Company (formerly Antelope US Holdings Company), an affiliate of an investment fund associated with The Blackstone Group Inc. to sell the Company and certain affiliates for approximately \$2.8 billion in cash. The transaction is expected to close in the second half of 2021, subject to regulatory approvals, pre-sale restructuring and reinsurance transactions and other customary closing conditions.

22. Events Subsequent

An evaluation of subsequent events was made through May 11, 2021 for the Quarterly Statement issued on May 13, 2021. There were no significant subsequent events requiring adjustment to or disclosure in the financial statements.

24. Retrospectively Rated Contracts and Contracts Subject to Redetermination

E. Risk Sharing Provisions of the Affordable Care Act – Not applicable.

25. Change in Incurred Losses and Loss Adjustment Expenses

- A. For accident and health insurance products within the Company's book of business, the changes in the provision for incurred losses and loss adjustment expenses attributable to insured events of prior years were immaterial in 2021 and 2020. The Company did not accrue additional premiums or return premiums related to the prior-year effects in 2021 or 2020.
- B. There were no changes in methodologies and assumptions used in calculating the liability of unpaid losses and loss adjustment expenses for the most recent reporting period presented.
