There have been no material changes to the following December 31, 2022 Annual Statement notes: 1(B), 2, 4, 5(B, C, K, O-Q), 6, 7, 9(B, D-I), 10(E-L, N, O), 12(B-I), 13, 14(A-F), 15, 16(Off-balance-sheet financial instruments), 17(A), 18, 19, 21(A, B, D-F, H), 23(A, B, D, F-K), 24(A-E) and 26-35. Only material or significant changes from the Annual Statement have been updated for all other notes, or portions thereof.

1. Summary of Significant Accounting Policies

A. Allstate Insurance Company (the “Company” or “Allstate”) prepares its financial statements in conformity with accounting practices prescribed or permitted by the Illinois Department of Insurance (“IL DOI”). Prescribed statutory accounting practices include a variety of publications of the National Association of Insurance Commissioners (“NAIC”), as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

The State of Illinois requires its domestic insurance companies to prepare financial statements in conformity with the NAIC Accounting Practices and Procedures Manual, which includes all Statements of Statutory Accounting Principles (“SSAPs”), subject to any deviations prescribed or permitted by the IL DOI.

The Company’s net income and capital and surplus did not include any accounting practices prescribed or permitted by the IL DOI during 2023 and 2022.

C. Investments

Loan-backed and structured securities (“LBASS”) with an NAIC designation of 1 or 2 are reported at amortized cost using the effective yield method. LBASS with an NAIC designation of 3 through 6 are reported at the lower of amortized cost or fair value, with the difference reflected in unassigned surplus as an unrealized capital loss. In general, LBASS utilize a multi-step process for determining carrying value and NAIC designation in accordance with SSAP No. 43R, *Loan-backed and Structured Securities* (“SSAP No. 43R”). The Securities Valuation Office (“SVO”) may assign an NAIC designation for use in determining carrying value for certain LBASS. For LBASS of high credit quality with fixed interest rates, the effective yield is recalculated on a retrospective basis. For all others, the effective yield is generally recalculated on a prospective basis.

D. Based upon its evaluation of relevant conditions and events, management did not have substantial doubt about the Company’s ability to continue as a going concern as of September 30, 2023 or December 31, 2022.

3. Business Combinations and Goodwill

A. Statutory Purchase Method

The Company purchased several limited liability companies in 2021 in preparation of the sale of a former subsidiary, Allstate Life Insurance Company. These transactions were accounted for as statutory purchases and reflected as followings:

NOTES TO FINANCIAL STATEMENTS

4. Unrealized losses are calculated as the difference between amortized cost and fair value. They result from declines in fair value below amortized cost and are evaluated for OTTI. Every LBASS with unrealized losses was included in the portfolio monitoring process.

The following table summarizes gross unrealized losses and the fair value of LBASS by the length of time individual securities have been in a continuous unrealized loss position.

(in millions)		September 30, 2023	December 31, 2022
a. The aggregate amount of unrealized losses:			
	1. Less than 12 months	\$ -	\$ (2)
	2. 12 months or longer	\$ -	\$ (3)
b. The aggregate related fair value of securities with unrealized losses:			
	1. Less than 12 months	\$ 4	\$ 26
	2. 12 months or longer	\$ 2	\$ 22

5. As of September 30, 2023, the aggregate amount of unrealized losses related to LBASS was less than \$1 million. The unrealized losses were primarily related to investment grade LBASS with an unrealized loss position less than 20% of amortized cost, the degree of which suggested these securities did not pose a high risk of being other-than-temporarily impaired. Investment grade is defined as a security having an NAIC designation of 1 or 2, which is comparable to a rating of Aaa, Aa, A or Baa from Moody's Investors Service or AAA, AA, A or BBB from S&P Global Ratings, or a comparable internal rating if an externally provided rating is not available. Market prices for certain securities may have credit spreads which imply higher or lower credit quality than the current third-party rating. Unrealized losses on investment grade securities were principally related to an increase in market yields which may include increased risk-free interest rates or wider credit spreads since the time of initial purchase. The unrealized losses are expected to reverse as the securities approach maturity.

LBASS in an unrealized loss position were evaluated based on actual and projected collateral losses relative to the securities' positions in the respective securitization trusts, security specific expectations of cash flows and credit ratings. This evaluation also takes into consideration credit enhancement, measured in terms of: (1) subordination from other classes of securities in the trust that are contractually obligated to absorb losses before the class of security the Company owns, and (2) the expected impact of other structural features embedded in the securitization trust beneficial to the class of securities the Company owns, such as overcollateralization and excess spread.

As of September 30, 2023, the Company had not made the decision to sell and it was not more likely than not the Company would be required to sell LBASS with unrealized losses before recovery of the amortized cost basis. As of September 30, 2023, the Company had the intent and ability to hold LBASS with unrealized losses for a period of time sufficient for them to recover.

8. The Company did not have open option contracts with financing premiums due as of September 30, 2023 or December 31, 2022.

- B. Derivatives under SSAP No. 108 – *Derivative Hedging Variable Annuity Guarantees* – Not applicable.

9. Income Taxes

The Inflation Reduction Act of 2022 ("Act") which contains several tax-related provisions, was enacted on August 16, 2022.

The Act created a 15% corporate alternative minimum tax ("CAMT") on certain large corporations, effective beginning in 2023. The controlled group of corporations of which the Company is a member has determined that it is considered an "applicable corporation" under the rules of CAMT, and as such, the controlled group is expected to be required to perform the CAMT computations. The controlled group of which the Company is a member has not determined as of the reporting date if it will be liable for CAMT in 2023. Therefore, the September 30, 2023 financial statement does not include an estimated impact of the CAMT, because a reasonable estimate cannot be made.

Claims related proceedings

The Company is defending putative class actions in various courts that raise challenges to the Company's depreciation practices in homeowner property claims. In these lawsuits, plaintiffs generally allege that, when calculating actual cash value, the costs of "non-materials" such as labor, general contractor's overhead and profit, and sales tax should not be subject to depreciation. The Company is currently defending the following lawsuits on this issue: *Sims, et al. v. Allstate Fire and Casualty Insurance Company, et al.* (W.D. Tex. filed June 2022); *Thompson, et al. v. Allstate Insurance Company* (Circuit Court of Cole Co., Mo. filed June 2022); *Hill v. Allstate Vehicle and Property Insurance Company* (Circuit Court of Cole Co., Mo. filed October 2022); *Tabuga v. Allstate Vehicle and Property Insurance Company* (D. Md. filed April 2023); and *Shumway, et al. v. Allstate Vehicle and Property Insurance Company* (D. Ariz. filed April 2023). No classes have been certified in any of these matters. The court granted preliminary approval of a class-wide settlement in: *Perry v. Allstate Indemnity Company, et al.* (N.D. Ohio filed May 2016); *Lado v. Allstate Vehicle and Property Insurance Company* (S.D. Ohio filed March 2020); *Maniaci v. Allstate Insurance Company* (N.D. Ohio filed March 2020); *Ferguson-Luke, et al. v. Allstate Property and Casualty Insurance Company* (N.D. Ohio filed April 2020); *Mitchell, et al. v. Allstate Vehicle and Property Insurance Company, et al.* (S.D. Ala. filed August 2021).

The Company is defending putative class actions pending in multiple states alleging that the Company underpays total loss vehicle physical damage claims on auto policies. The alleged systematic underpayments result from the following theories: (a) the third party valuation tool used by the Company as part of a comprehensive adjustment process is allegedly flawed, biased, or contrary to applicable law; and/or (b) the Company allegedly does not pay sales tax, title fees, registration fees, and/or other specified fees that are allegedly mandatory under policy language or state legal authority. The following cases are currently pending against the Company: *Kronenberg v. Allstate Insurance Company and Allstate Fire and Casualty Insurance Company* (E.D.N.Y. filed December 2018); *Durgin v. Allstate Property and Casualty Insurance Company* (W.D. La., filed June 2019); *Bass v. Imperial Fire and Casualty Insurance Company* (W.D. La. filed February 2022); *Cummings v. Allstate Property and Casualty Insurance Company* (M.D. La. filed April 2022); *Golla v. Allstate Insurance Company* (N.D. Ohio filed June 2023); and *Bibbs v. Allstate Insurance Company and Allstate Fire and Casualty Insurance Company* (N.D. Ohio filed August 2023). None of the courts in any of the pending matters has ruled on class certification.

Other proceedings

In re The Allstate Corp. Securities Litigation is a certified class action filed on November 11, 2016 in the United States District Court for the Northern District of Illinois against the Corporation and two of its officers asserting claims under the federal securities laws. Plaintiffs allege that they purchased The Allstate Corporation common stock during the class period and suffered damages as the result of the conduct alleged. Plaintiffs seek an unspecified amount of damages, costs, attorney's fees, and other relief as the court deems appropriate. Plaintiffs allege that the Corporation and certain senior officers made allegedly material misstatements or omissions concerning claim frequency statistics and the reasons for a claim frequency increase for Allstate brand auto insurance between October 2014 and August 3, 2015. Plaintiffs further allege that a senior officer engaged in stock option exercises during that time allegedly while in possession of material nonpublic information about Allstate brand auto insurance claim frequency. The Corporation, its chairman, president and chief executive officer, and its former president are the named defendants. After the court denied their motion to dismiss on February 27, 2018, defendants answered the complaint, denying plaintiffs' allegations that there was any misstatement or omission or other misconduct. On June 22, 2018, plaintiffs filed their motion for class certification. The court allowed the lead plaintiffs to amend their complaint to add the City of Providence Employee Retirement System as a proposed class representative and on September 12, 2018, the amended complaint was filed. A class was certified on March 26, 2019, vacated by the U.S. Court of Appeals for the Seventh Circuit on July 16, 2020 and remanded for further consideration by the district court. On December 21, 2020, the district court again granted plaintiffs' motion for class certification and certified a class consisting of all persons who purchased The Allstate Corporation common stock between October 29, 2014 and August 3, 2015. Defendants' petition for permission to appeal this ruling was denied on January 28, 2021. Following the close of discovery, defendants moved for summary judgment on March 23, 2022. On July 26, 2022, the court entered its order granting summary judgment in part (as to plaintiffs' claims relating to certain statements made in October 2014) and denying it as to the remainder of plaintiffs' claims. On January 10, 2023, the parties filed a joint pre-trial order. A pre-trial conference has not occurred. Subsequently, on June 28, 2023, the parties reached an agreement in principle to settle the action, without any admission of liability or wrongdoing. On September 26, 2023, an order was entered by the district court granting preliminary approval of the class settlement. The settlement is subject to final approval by the district court and any appeals therefrom. The final approval hearing is scheduled for December 19, 2023.

The Company is continuing to defend two putative class actions in California federal court, *Holland Hewitt v. Allstate Life Insurance Company* (E.D. Cal. filed May 2020) and *Farley v. Lincoln Benefit Life Company* (E.D. Cal. filed Dec. 2020), following the sale of ALIC. On April 19, 2023, the court certified a class in *Farley*. On September 28, 2023, the Ninth Circuit accepted LBL's petition to appeal the district court's class certification ruling. There has been no ruling on plaintiff's motion for class certification in *Hewitt*. In these cases, plaintiffs generally allege that the defendants failed to comply with certain California statutes which address contractual grace periods and lapse notice requirements for certain life insurance policies. Plaintiffs claim that these statutes apply to life insurance policies that existed before the statutes' effective date. The plaintiffs seek damages and injunctive relief. Similar litigation is pending against other insurance carriers. In August 2021, the California Supreme Court in *McHugh v. Protective Life*, a matter involving another insurer, determined that the statutory notice requirements apply to life insurance policies issued before the statutes' effective date. The Company asserts various defenses to plaintiffs' claims and to class certification.

17. Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

B. Transfer and Servicing of Financial Assets

1. The Company's business activities included securities lending programs with third parties, mostly large banks. As of September 30, 2023 and December 31, 2022, bonds, including LBASS and common stocks with fair values of \$1.67 billion and \$1.93 billion, respectively, were on loan under these agreements. Securities lent were either specifically identified by the lending bank or segregated into a separate custody account. See Note 5, Part E for more information about securities lending collateral.
2. The Company did not enter into agreements to service assets or liabilities.

NOTES TO FINANCIAL STATEMENTS

4. The Company was not a transferor or transferee with respect to securitizations and asset-backed financing arrangements.

C. Wash Sales

1. In the course of managing the investment portfolio, securities may be sold and reacquired within 30 days of the sale date in order to enhance the portfolio's yield.
2. In December 2019, the NAIC adopted guidance which clarified that only investments that meet the definition of a wash sale in accordance with SSAP No. 103R, *Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, that crosses reporting periods are subject to disclosure. Prior to December 2019 reporting, wash sales that were within the same reporting period were also disclosed.

The details of securities with an NAIC designation of 3 or below, and those without an NAIC designation, which were sold during the third quarter of 2023 and 2022 and reacquired within 30 days of the sale date were as follows:

20. Fair Value Measurements

- A. Fair value is defined, per SSAP No. 100R, *Fair Value* ("SSAP No. 100R"), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP No. 100R identified three valuation techniques which are used, either independently or in combination, to determine fair value: (1) market approach; (2) income approach; and (3) cost approach. SSAP No. 100R also contains guidance about observable and unobservable inputs, which are assumptions that market participants would use in pricing an asset or liability. To increase consistency and comparability in fair value measurements, the fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels: 1, 2 and 3. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Certain assets are measured utilizing net asset value ("NAV") as a practical expedient to determine fair value.

The Company has two types of situations where investments are classified as Level 3 in the fair value hierarchy:

- (1) Specific inputs significant to the fair value estimation models are not market observable. This primarily occurs in the Company's use of broker quotes to value certain securities where the inputs have not been corroborated to be market observable, and the use of valuation models that use significant non-market observable inputs.
- (2) Quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources.

Transfers into Level 3 during the first nine months of 2023 and 2022 included securities measured at lower of cost or market and reported at fair value in 2023 and 2022, and at cost in 2022 and 2021, respectively. Transfers into Level 3 during the first nine months of 2023 included situations where securities were written down utilizing an internal price where the inputs have not been corroborated to be market observable resulting in the securities being classified as Level 3.

Transfers out of Level 3 during the first nine months of 2023 and 2022 included securities measured at lower of cost or market and reported at cost in 2023 and 2022, and fair value in 2022 and 2021, respectively. Transfers out of Level 3 during the first nine months of 2023 and 2022 were also the result of assets utilizing NAV as a practical expedient to determine fair value. Transfers out of Level 3 during the first nine months of 2022 included a situation where the valuation was not based on market observable inputs in the prior period, a price quote utilizing market observable inputs became available and was utilized; any gains and losses related to the change in valuation source were not significant.

3. The Company consistently follows its policy for determining when transfers between levels are recognized. The policy about the timing of recognizing transfers into Level 3 is the same as that for recognizing transfers out of Level 3.
4. In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 and Level 3 valuations, a combination of the market and income approaches is used.

Listed below is a summary of the significant valuation techniques for assets and liabilities measured and reported at fair value.

Level 2 measurements

Bonds - Includes corporate bonds, including those that are privately placed, asset-backed securities (“ABS”) and municipal bonds.

The primary inputs to the valuation for publicly traded corporate bonds and municipal bonds include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Privately placed corporate bonds are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The primary inputs to the valuation for ABS include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, collateral performance and credit spreads. Certain ABS are valued based on non-binding broker quotes whose inputs have been corroborated to be market observable.

Unaffiliated common and perpetual preferred stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that are not active.

Derivatives - Free-standing exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives, including total return swap agreements, certain options and certain credit default swap agreements, are valued using models that rely on inputs such as interest rate yield curves, implied volatilities, index price levels, currency rates and credit spreads that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

Level 3 measurements

Bonds - Includes corporate bonds, including those that are privately placed, bank loans, residential mortgage-backed securities (“RMBS”), commercial mortgage-backed securities (“CMBS”), ABS and municipal bonds.

Corporate bonds, including those that are privately placed, and bank loans are valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Other inputs for corporate bonds include an interest rate yield curve, as well as published credit spreads for similar assets that incorporate credit quality and industry sector of the issuer. RMBS, CMBS and ABS are valued based on non-binding broker quotes received from brokers where the inputs have not been corroborated to be market

NOTES TO FINANCIAL STATEMENTS

observable. For municipal bonds that are not rated by third-party credit rating agencies, but receive an NAIC designation, the primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not market observable, contractual cash flows, benchmark yields and credit spreads. Also included are municipal bonds valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable and municipal bonds in default valued based on the present value of expected cash flows.

Perpetual preferred stocks - The primary inputs to the valuation include non-binding broker quotes where the inputs have not been corroborated to be market observable, or quoted prices or quoted net asset values for identical or similar assets in markets that are not market observable.

Redeemable preferred stocks - The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

Unaffiliated common stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that are not market observable.

The fair value of bonds in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of publicly traded bonds in Level 2 is based upon quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Non-publicly traded bonds in Level 2 are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The fair value of municipal bonds in Level 3 not rated by third-party credit rating agencies, but receiving an NAIC designation is based on quoted prices for identical or similar assets that are not market observable, contractual cash flows, benchmark yields and credit spreads. Also included are municipal bonds valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable and municipal bonds in default valued based on the present value of expected cash flows. The fair value of corporate bonds in Level 3 is primarily based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Other inputs for corporate bonds include an interest rate yield curve, as well as published credit spreads for similar assets that incorporate the credit quality and industry sector of the issuer.

The fair value of LBASS and residual tranche securities in Level 2 is primarily based on valuation models utilizing quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. Certain LBASS in Level 2 are valued based on non-binding broker quotes whose inputs have been corroborated to be market observable. The fair value of LBASS in Level 3 is primarily based on non-binding broker quotes where the inputs have not been corroborated to be market observable.

The fair value of preferred stocks in Levels 2 and 3 is based on valuation methods described in Part A4 of this note. Certain preferred stocks, which do not have readily determinable fair values, and are investments in investment companies are measured utilizing NAV as a practical expedient.

The fair value of unaffiliated common stocks in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of unaffiliated common stocks in Levels 2 and 3 is based on the valuation methods described in Part A4 of this note. Certain unaffiliated private common stocks carried at fair value, which do not have readily determinable fair values, and are investments in investment companies that measure their assets at fair value on a recurring basis, are reported utilizing NAV as a practical expedient and are excluded from the fair value hierarchy.

NOTES TO FINANCIAL STATEMENTS

The fair value of mortgage loans on real estate in Level 3 is based on discounted contractual cash flows or, if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics, using similar types of properties as collateral.

The fair value of cash equivalents in Level 1 is based on unadjusted quoted prices or daily quoted net asset values for identical assets in active markets the Company can access. The fair value of cash equivalents in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

The fair value of short-term investments in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of short-term investments in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. The fair value of short-term investments in Level 3 is primarily based on amortized cost.

The fair value of free-standing exchange listed derivatives in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of derivatives in Level 2 is based on the valuation methods described in Part A4 of this note.

The fair value of LIHTC property investments in Level 3 is based on amortized cost, using the proportional amortization method, which approximates fair value.

The fair value of affiliated surplus notes and collateral loans in Level 3 is based on discounted cash flow calculations using current interest rates for instruments with comparable terms.

The fair value of reinvested collateral from securities lending in Level 2 is based on carrying value due to its short-term nature.

The fair value of the liabilities for collateral related to securities lending in Level 2 is based on carrying value due to its short-term nature.

The fair value of free-standing exchange listed derivatives in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of derivatives in Level 2 is based on the valuation methods described in Part A4 of this note.

- D. The Company was able to estimate the fair value of all its financial instruments in 2023 and 2022.
- E. Investments in certain common and preferred stocks measured and reported at NAV in the Assets page and presented in the table in Part A1 are generally not redeemable with the issuing corporation and cannot be sold without approval of the managing members. Distributions of income are usually received from the sale of the common stock or the liquidation of the underlying asset or assets of the issuing corporation over the life of these investments, typically 3-7 years. The Company had \$86 million of remaining commitments to invest in these investments over their remaining lives.

Commutation and Amendment of Quota Share Reinsurance Agreement

Following receipt of regulatory approval from IL DOI on September 22, 2023, the Company and National General Re, Ltd. (“NG Re”) entered into a commutation and release agreement, effective July 1, 2023, related to the 40% quota share participation under the previous agreement. NG Re transferred \$799 million of loss and loss expense reserves to the Company related to the commuted business. In addition, the Company and NG Re amended their intercompany quota share reinsurance agreement, effective July 1, 2023, whereby the Company will cede 25% of its business assumed from INIC to NG Re.

Macroeconomic Impacts

Macroeconomic factors have and may continue to impact the results of operations, financial condition and liquidity, such as U.S. government fiscal and monetary policies, banking system instability, the Russia/Ukraine and Israel/Hamas conflicts and the remaining impacts of the Novel Coronavirus Pandemic or COVID 19, through longer-term impacts such as supply chain disruptions, labor shortages and other macroeconomic factors that have increased inflation. These factors have affected operations and may continue to significantly affect results of operations, financial condition and liquidity and should be considered when comparing the current period to prior periods.

Transfer of Investments

During 2018, the Company transferred limited partnership investments with a book/adjusted carrying value of \$1.70 billion and cash of \$12 million to AIMCO Private Fund II, LLC (“AIMCO II”). Since the transfer of the assets did not meet the conditions of a sale per SSAP No. 103R, *Transfer and Servicing of Financial Assets and Extinguishments of Liabilities*, the assets of AIMCO II are directly reported in the Company’s financial statements. In connection with the Excluded investment assets transactions described in Note 10, Parts A, B & C in the Annual Statement, additional assets were transferred into AIMCO II during 2021. As of September 30, 2023, AIMCO II consisted of limited partnership investments with a book/adjusted carrying value of \$2.28 billion, cash equivalents of \$67 million and cash of \$5 million and were included in the Company’s assets.

- G. Insurance-linked Securities (“ILS”) Contracts

The Company and certain of its affiliated insurance companies were ceding insurers of eleven and nine ILS agreements related to directly-written insurance risks as of September 30, 2023 and December 31, 2022, respectively.

As of September 30, 2023, the ILS placements provide \$1.78 billion of reinsurance limits (with \$1.77 billion remaining limit available) for qualifying losses in all states except Florida caused by “Named Peril Basis” events with no reinstatement of limits. The ILS placements were comprised

NOTES TO FINANCIAL STATEMENTS

of six occurrence only placements providing \$1.05 billion placed limits; three occurrence and aggregate placements providing \$405 million placed limits; and two aggregate only placements providing \$325 million placed limits.

As of December 31, 2022, the ILS placements provide \$1.55 billion of reinsurance limits (with \$1.53 billion remaining limit available) for qualifying losses in all states except Florida caused by “Named Peril Basis” events with no reinstatement of limits. The ILS placements were comprised of five occurrence only placements providing \$950 million placed limits; three occurrence and aggregate placements providing \$425 million placed limits; and one aggregate only placement providing a \$175 million placed limit.

Allstate declared catastrophes to personal lines property and automobile business can be aggregated to erode the aggregate retention and qualify for coverage under the aggregate limit. Recoveries are limited to our ultimate net loss from the reinsured event. Each agreement’s contractual limit applies to Allstate and its ceding affiliated property and casualty companies under the agreement as a group, and not separately to each ceding company. There were 46 ceding affiliated property and casualty companies under the agreement as a group as of September 30, 2023 and December 31, 2022. A ceding company’s share of loss recovery under an agreement for a loss occurrence is based on the proportion of the ceding company’s ultimate net loss for such loss occurrence to the total ultimate net loss incurred by the Company and its ceding affiliated property and casualty companies for the loss occurrence, and is limited to the ceding company’s ultimate net loss. Reinsurance recoveries under the contract are limited to our ultimate net loss from a covered event subject to the contract’s limit.

The table below reports all known ILS involvements that would likely be used to satisfy the Company’s reinsurance agreements. The term “Aggregate Maximum Proceeds”, as listed in the table, represents the aggregate of the contract limits of all of the Company’s outstanding ILS contracts. Proceeds of \$314 million and \$321 million were expected to be received under the terms of ILS agreements as of September 30, 2023 and December 31, 2022, respectively.

25. Changes in Incurred Losses and Loss Adjustment Expenses

- A. For a summary of management's policies and methodologies for estimating the liabilities for losses and loss adjustment expenses, please refer to this note in the Annual Statement.

Activity in the reserve for losses and loss adjustment expenses was summarized as follows:

(in millions)	September 30, 2023	December 31, 2022
Balance as of January 1	\$ 24,150	\$ 20,000
Incurred related to:		
Current year	28,303	31,474
Prior years	253	1,693
Total incurred	28,556	33,167
Paid related to:		
Current year	14,252	18,147
Prior years	10,602	10,870
Total paid	24,854	29,017
Balance	\$ 27,852	\$ 24,150

Incurred losses and loss adjustment expenses represent the sum of paid losses, loss adjustment expenses and reserve changes in the calendar year. This expense included net losses from catastrophes of \$5.35 billion and \$3.00 billion for the nine months ended September 30, 2023 and the year ended December 31, 2022, respectively.

Catastrophes are an inherent risk of the property and casualty insurance business that have contributed to, and will continue to contribute to, material year-to-year fluctuations in the Company's net income and financial position. The Company calculates and records a single best reserve estimate for losses from catastrophes, in conformance with generally accepted actuarial standards. As a result, management believes that no other estimate is better than the recorded amount. Due to the uncertainties involved, including the factors described above, the ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimates. Accordingly, management believes that it is not practical to develop a meaningful range for any such changes in losses incurred.

Incurred losses and loss adjustment expenses attributable to insured events of prior years were \$253 million and \$1.69 billion as a result of the reestimation of unpaid losses and loss adjustment expenses for the nine months ended September 30, 2023 and the year ended December 31, 2022, respectively. These changes were generally the result of ongoing analyses of recent loss development trends. Initial estimates were revised as additional information regarding claims became known.

Anticipated salvage and subrogation of \$1.62 billion and \$1.60 billion was included as a reduction of loss reserves as of September 30, 2023 and December 31, 2022, respectively.

- B. There were no significant changes in methodologies used in calculating the liability of unpaid losses and loss adjustment expenses for the most recent reporting period presented.

STATEMENT AS OF SEPTEMBER 30, 2023 OF THE ALLSTATE INSURANCE COMPANY

(a)

Code	Description of Hedged Risk(s)

(b)

Code	Financial or Economic Impact of the Hedge at the End of the Reporting Period
0001	Credit default swap effectively hedges credit risk exposure on the named debt security or related index or basket of debt securities. Notional amount is equivalent to hedged amount of par on debt security.
0002	Foreign Currency forward effectively reduces foreign currency exposure on foreign denominated equities.
