NOTES TO FINANCIAL STATEMENTS

Notes required on a quarterly basis have been updated in their entirety. There have been no material changes to the following December 31, 2023 Annual Statement notes: 1(B), 3, 4, 5(A-C, J-L, O-Q), 6, 7(A, B, D, E), 9(A, B, E-I), 10(D-L, N, O), 12(B-I), 13(A-I, K-M), 14(A-F), 15, 16(Off-balance-sheet financial instruments), 17(A), 18, 19, 21(A, B, D-H), 23(B, D-K), 24(A, B, D, E) and 26-35. Only material or significant changes from the Annual Statement have been updated for all other notes, or portions.

1. Summary of Significant Accounting Policies

- A. Allstate Insurance Company (the “Company” or “Allstate”) prepares its financial statements in conformity with accounting practices prescribed or permitted by the Illinois Department of Insurance (“IL DOI”). Prescribed statutory accounting practices include a variety of publications of the National Association of Insurance Commissioners (“NAIC”), as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

The State of Illinois requires its domestic insurance companies to prepare financial statements in conformity with the NAIC Accounting Practices and Procedures Manual, which includes all Statements of Statutory Accounting Principles (“SSAPs”), subject to any deviations prescribed or permitted by the IL DOI.

The Company’s net income and capital and surplus did not include any accounting practices prescribed or permitted by the IL DOI during 2024 and 2023.

C. Investments

Loan-backed and structured securities (“LBASS”) with an NAIC designation of 1 or 2 are reported at amortized cost using the effective yield method. LBASS with an NAIC designation of 3 through 6 are reported at the lower of amortized cost or fair value, with the difference reflected in unassigned surplus as an unrealized capital loss. In general, LBASS utilize a multi-step process for determining carrying value and NAIC designation in accordance with SSAP No. 43R, *Loan-backed and Structured Securities*. The Securities Valuation Office may assign an NAIC designation for use in determining carrying value for certain LBASS. For LBASS of high credit quality with fixed interest rates, the effective yield is recalculated on a retrospective basis. For all others, the effective yield is generally recalculated on a prospective basis.

- D. Based upon its evaluation of relevant conditions and events, management did not have substantial doubt about the Company’s ability to continue as a going concern as of September 30, 2024 or December 31, 2023.

2. Accounting Changes and Corrections of Errors

In 2024, the Company discovered an accounting error related to deferred ceding commission associated with an intercompany reinsurance agreement with an affiliate totaling \$151 million that should have transferred to the Company during 2021 and reported in receivables from parent, subsidiaries and affiliates (Assets Page, Line 23) and other underwriting expenses incurred (Statement of Income Page, Line 4) by the Company. The adjustment recorded in June 2024 included an increase to receivables from parent, subsidiaries and affiliates (Assets Page, Line 23) of \$151 million, a reduction to current federal and foreign income tax recoverable and interest thereon (Assets Page, Line 18.1) of \$31 million, and an increase to unassigned funds (surplus) (Liabilities, Surplus and Other Funds Page, Line 35) of \$120 million as of June 30, 2024. There was no impact to net income in 2024 or 2023.

4. Unrealized losses are calculated as the difference between amortized cost and fair value. They result from declines in fair value below amortized cost and are evaluated for OTTI. Every LBASS with unrealized losses was included in the portfolio monitoring process.

NOTES TO FINANCIAL STATEMENTS

As of September 30, 2024, the aggregate amount of unrealized losses related to LBASS was less than \$1 million. The following table summarizes gross unrealized losses and the fair value of LBASS by the length of time individual securities have been in a continuous unrealized loss position as of December 31, 2023:

(in millions)			
a. The aggregate amount of unrealized losses:			
1. Less than 12 months	\$	—	
2. 12 months or longer	\$	—	
b. The aggregate related fair value of securities with unrealized losses:			
1. Less than 12 months	\$	—	
2. 12 months or longer	\$	1	

5. As of September 30, 2024, the aggregate amount of unrealized losses related to LBASS was less than \$1 million. Investment grade is defined as a security having an NAIC designation of 1 or 2, which is comparable to a rating of Aaa, Aa, A or Baa from Moody's Investors Service or AAA, AA, A or BBB from S&P Global Ratings, or a comparable internal rating if an externally provided rating is not available. Market prices for certain securities may have credit spreads which imply higher or lower credit quality than the current third-party rating. The unrealized losses are expected to reverse as the securities approach maturity.

LBASS in an unrealized loss position were evaluated based on actual and projected collateral losses relative to the securities' positions in the respective securitization trusts, security specific expectations of cash flows and credit ratings. This evaluation also takes into consideration credit enhancement, measured in terms of: (1) subordination from other classes of securities in the trust that are contractually obligated to absorb losses before the class of security the Company owns, and (2) the expected impact of other structural features embedded in the securitization trust beneficial to the class of securities the Company owns, such as overcollateralization and excess spread.

As of September 30, 2024, the Company had not made the decision to sell and it was not more likely than not the Company would be required to sell LBASS with unrealized losses before recovery of the amortized cost basis. As of September 30, 2024, the Company had the intent and ability to hold LBASS with unrealized losses for a period of time sufficient for them to recover.

(m) Total collateral reinvested (k+l)	\$ 2,032	\$ 2,033	\$ 1,851	\$ 1,848

b. The cash collateral was invested in primarily short-term investments and bonds that can be liquidated based on current market conditions on demand to match the liability. As of September 30, 2024, the Company had invested assets with a fair value of \$2.03 billion, which included \$923 million of investment grade bonds and money market funds with remaining maturities greater than one year. As of December 31, 2023, the Company had invested assets with a fair value of \$1.85 billion, which included \$503 million of investment grade bonds and cash equivalents with remaining maturities greater than one year. Unrealized losses on investment grade securities were principally related to an increase in market yields which include increased risk-free interest rates or wider credit spreads since the time of initial purchase. The unrealized losses are expected to reverse as the securities approach maturity. Additionally, the Company has sufficient liquidity to cover any shortfall on demand.

F. Repurchase Agreements Transactions Accounted for as Secured Borrowing - Not applicable.

G. Reverse Repurchase Agreements Transactions Accounted for as Secured Borrowing - Not applicable.

H. Repurchase Agreements Transactions Accounted for as a Sale - Not applicable.

I. Reverse Repurchase Agreements Transactions Accounted for as a Sale - Not applicable.

M. Working Capital Finance Investments - Not applicable.

N. Offsetting and Netting of Assets and Liabilities

None of the Company's derivative or securities lending transactions contain a valid right to offset assets and liabilities per the requirements of SSAP No. 64, *Offsetting and Netting of Assets and Liabilities*. The Company did not enter into repurchase agreements, reverse repurchase agreements or securities borrowing transactions.

Legal and regulatory proceedings and inquiries

Claims related proceedings

The Company is defending various disputes in Florida that raise challenges to the Company’s practices, processes, and procedures relating to claims for personal injury protection benefits under Florida auto policies. Medical providers continue to pursue litigation under various theories that challenge the amounts that the Company pays under the personal injury protection coverage, seeking additional benefit payments, as well as applicable interest, penalties and fees. In one such lawsuit, *Revival Chiropractic v. Allstate Insurance Company, et al.* (M.D. Fla. filed January 2019), the federal district court denied class certification and plaintiff’s request to file a renewed motion for class certification. In *Revival*, on June 2, 2022, the Eleventh Circuit certified to the Florida Supreme Court Allstate’s appeal of the federal district court’s interpretation of the state personal injury protection statute. The Eleventh Circuit held determination on plaintiff’s class certification appeal pending the outcome of the Florida Supreme Court certification. The oral argument before the Florida Supreme Court was on March 8, 2023. On April 25, 2024, the Florida Supreme Court issued a decision in the Company’s favor, finding that the Company’s practice with respect to its payment of certain medical provider charges is consistent with the Company’s policy language and with the state personal injury protection statute. On May 24, 2024, the Eleventh Circuit entered an order dismissing plaintiff’s class certification appeal and directing the federal district court to enter summary judgment in favor of Allstate. On July 2 , 2024, the federal district court entered judgment in Allstate’s favor.

The Company is defending putative class actions pending in multiple states alleging that the Company underpays total loss vehicle physical damage claims on auto policies. The alleged systematic underpayments result from the following theories: (a) the third-party valuation tool used by the Company as part of a comprehensive adjustment process is allegedly flawed, biased, or contrary to applicable law; and/or (b) the Company allegedly does not pay sales tax, title fees, registration fees, and/or other specified fees that are allegedly mandatory under policy language or state legal authority. The Company is currently defending the following lawsuits: *Kronenberg v. Allstate Insurance Company and Allstate Fire and Casualty Insurance Company* (E.D.N.Y., filed December 2018); *Durgin v. Allstate Property and Casualty Insurance Company* (W.D. La., filed June 2019); *Golla v. Allstate Insurance Company* (N.D. Ohio filed June 2023); *Bibbs v. Allstate Insurance Company and Allstate Fire and Casualty Insurance Company* (N.D. Ohio filed August 2023); *Hail v. Allstate Property and Casualty Insurance Company* (State Court of Habersham Co., Ga. filed December 2023); *Katz v. Esurance Property and Casualty Insurance Company and National General Insurance Company* (E.D.N.Y. filed February 2024); *Jarrett-Kelly v. Direct General Insurance Agency, Inc.* (Circuit Court of Pulaski Co., Ark. filed May 2024); and *Schott v. Allstate Insurance Company and Allstate Property and Casualty Insurance Company* (M.D. Ga. filed October 2024). No classes have been certified in any of these matters.

Other proceedings

The Company is defending a lawsuit in the U.S. District Court for the Southern District of California, *Chavez v. Allstate Northbrook Indemnity Company*, filed February 2022, where plaintiffs generally allege that Allstate’s Shelter in Place Payback program provided insufficient premium relief in response to the reduction in driving in California during the state’s COVID-19 stay-at-home restrictions in 2020 and 2021. Plaintiffs seek damages that include additional premium refunds and punitive damages. On June 25, 2024, the court

NOTES TO FINANCIAL STATEMENTS

issued an order granting plaintiffs’ motion for class certification. The Company continues to defend the litigation and oppose plaintiffs’ allegations.

The Company had an investigatory hearing before the California Insurance Commissioner concerning the private passenger automobile insurance rating practices of Allstate Insurance Company and Allstate Indemnity Company in California. The investigatory hearing was captioned: *In the Matter of the Rating Practices of Allstate Insurance Company and Allstate Indemnity Company*. Pursuant to the Notice of Hearing issued by the California Insurance Commissioner, the California Insurance Commissioner was investigating: (1) whether Allstate has potentially violated California insurance law by using illegal price optimization; (2) how Allstate implemented any such potentially illegal price optimization in its private passenger auto insurance rates and/or class plans; and (3) how such potentially illegal price optimization impacted Allstate’s private passenger auto insurance policyholders. Pursuant to an agreement between the Company and the California Department of Insurance, the matter was dismissed on September 17, 2024.

16. Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk

Derivative financial instruments

1. The following table summarizes the notional amount of the Company’s derivative financial instruments, including those with off-balance-sheet risk:

(in millions)	Assets		Liabilities	
	September 30,	December 31,	September 30,	December 31,
	2024	2023	2024	2023
a. Swaps	\$ 46	\$ 105	\$ 629	\$ 533
b. Futures	598	308	2,698	185
c. Options	—	15	—	—
d. Total (a+b+c)	<u>\$ 644</u>	<u>\$ 428</u>	<u>\$ 3,327</u>	<u>\$ 718</u>

See Schedule DB of the Company’s Annual Statement for additional detail.

The notional amounts specified in the contracts are used to calculate the exchange of contractual payments under the agreements and are generally not representative of the potential for gain or loss on these agreements. However, the notional amounts specified in credit default swap agreements where the Company has sold credit protection represents the maximum amount of potential loss, assuming no recoveries.

17. Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

B. Transfer and Servicing of Financial Assets

2. The Company did not enter into agreements to service assets or liabilities.
4. The Company was not a transferor or transferee with respect to securitizations and asset-backed financing arrangements.

C. Wash Sales

1. In the course of managing the investment portfolio, securities may be sold and reacquired within 30 days of the sale date in order to enhance the portfolio’s yield.
2. In December 2019, the NAIC adopted guidance which clarified that only investments that meet the definition of a wash sale in accordance with SSAP No. 103R, *Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, that crosses reporting periods are subject to disclosure. Prior to December 2019 reporting, wash sales that were within the same reporting period were also disclosed.

There were no securities with an NAIC designation of 3 or below sold during the third quarter of 2024 and 2023 and reacquired within 30 days of the sale date. The details of securities without an NAIC designation, which were sold during the third quarter of 2024 and 2023 and reacquired within 30 days of the sale date, were as follows:

Description	NAIC Designation	Number of Transactions	2024		
			Book Value of Securities Sold	Cost of Securities Repurchased	Gain (Loss)
Unaffiliated common stocks		2	\$ 2	\$ 2	\$ —

Description	NAIC Designation	Number of Transactions	2023

20. Fair Value Measurements

- A. Fair value is defined, per SSAP No. 100R, *Fair Value* (“SSAP No. 100R”), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP No. 100R identified three valuation techniques which are used, either independently or in combination, to determine fair value: (1) market approach; (2) income approach; and (3) cost approach. SSAP No. 100R also contains guidance about observable and unobservable inputs, which are assumptions that market participants would use in pricing an asset or liability. To increase consistency and comparability in fair value measurements, the fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels: 1, 2 and 3. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Certain assets are measured utilizing net asset value (“NAV”) as a practical expedient to determine fair value.

The Company has two types of situations where investments are classified as Level 3 in the fair value hierarchy:

- (1) Specific inputs significant to the fair value estimation models are not market observable. This primarily occurs in the Company’s use of broker quotes to value certain securities where the inputs have not been corroborated to be market observable, and the use of valuation models that use significant non-market observable inputs.
- (2) Quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources.

Transfers into Level 3 during 2024 and 2023 included securities measured at lower of cost or market and reported at fair value in 2024 and 2023, and at cost in 2023 and 2022, respectively. Transfers into Level 3 during the first nine months of 2024 included a situation where an asset no longer utilized NAV as a practical expedient and was reclassified to Level 3. Transfers into Level 3 during the first nine months of 2023 also included situations where securities were written down utilizing price where the inputs have not been corroborated to be market observable resulting in the securities being classified as Level 3.

Transfers out of Level 3 during the first nine months of 2024 and 2023 included securities measured at lower of cost or market and reported at cost in 2024 and 2023, and fair value in 2023 and 2022, respectively. Transfers out of Level 3 during the first nine months of 2023 were also the result of assets utilizing NAV as a practical expedient to determine fair value.

3. The Company consistently follows its policy for determining when transfers between levels are recognized. The policy about the timing of recognizing transfers into Level 3 is the same as that for recognizing transfers out of Level 3.
4. In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 and Level 3 valuations, a combination of the market and income approaches is used.

Listed below is a summary of the significant valuation techniques for assets and liabilities measured and reported at fair value.

Level 2 measurements

Bonds - Includes corporate bonds, including those that are privately placed, asset-backed securities (“ABS”) and municipal bonds. The primary inputs to the valuation for publicly traded corporate bonds and municipal bonds include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Privately placed corporate bonds are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The primary inputs to the valuation for ABS include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, collateral performance and credit spreads. Certain ABS are valued based on non-binding broker quotes whose inputs have been corroborated to be market observable.

Unaffiliated common and perpetual preferred stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that are not active.

Derivatives - Free-standing exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives, including total return swap agreements, certain options and certain credit default swap agreements, are valued using models that rely on inputs such as interest rate yield curves, implied volatilities, index price levels, currency rates and credit spreads that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

Level 3 measurements

Bonds - Includes corporate bonds, including those that are privately placed, bank loans, residential mortgage-backed securities (“RMBS”) commercial mortgage-backed securities (“CMBS”), ABS and municipal bonds.

Corporate bonds, including those that are privately placed, and bank loans are valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Other inputs for corporate bonds include an interest rate yield curve, as well as published credit spreads for similar assets that incorporate credit quality and industry sector of the issuer. RMBS, CMBS and ABS are valued based on non-binding broker quotes received from brokers where the inputs have not been corroborated to be market observable. For municipal bonds that are not rated by third-party credit rating agencies, but receive an NAIC designation, the primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not market observable, contractual cash flows, benchmark yields and credit spreads. Also included are municipal bonds valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable and municipal bonds in default valued based on the present value of expected cash flows.

Perpetual preferred stocks - The primary inputs to the valuation include non-binding broker quotes where the inputs have not been corroborated to be market observable.

Unaffiliated common stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that are not market observable.

5. All information related to derivatives measured and reported at fair value is presented above.

The fair value of bonds in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of publicly traded bonds in Level 2 is based upon quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Non-publicly traded bonds in Level 2 are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The fair value of municipal bonds in Level 3 not rated by third-party credit rating agencies, but receiving an NAIC designation is based on quoted prices for identical or similar assets that are not market observable, contractual cash flows, benchmark yields and credit spreads. Also included are municipal bonds valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable and municipal bonds in default valued based on the present value of expected cash flows. The fair value of corporate bonds in Level 3 is primarily based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Other inputs for corporate bonds include an interest rate yield curve, as well as published credit spreads for similar assets that incorporate the credit quality and industry sector of the issuer.

The fair value of LBASS and residual tranche securities in Level 2 is primarily based on valuation models utilizing quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. Certain LBASS in Level 2 are valued based on non-binding broker quotes whose inputs have been corroborated to be market observable. The fair value of LBASS in Level 3 is primarily based on non-binding broker quotes where the inputs have not been corroborated to be market observable.

The fair value of preferred stocks in Levels 2 and 3 is based on valuation methods described in Part A4 of this note. Certain preferred stocks, which do not have readily determinable fair values, and are investments in investment companies are measured utilizing NAV as a practical expedient.

The fair value of unaffiliated common stocks in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of unaffiliated common stocks in Levels 2 and 3 is based on the valuation methods described in Part A4 of this note. Certain unaffiliated private common stocks carried at fair value, which do not have readily determinable fair values, and are investments in investment companies that measure their assets at fair value on a recurring basis, are reported utilizing NAV as a practical expedient and are excluded from the fair value hierarchy.

The fair value of mortgage loans on real estate in Level 3 is based on discounted contractual cash flows or, if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics, using similar types of properties as collateral.

The fair value of cash equivalents in Level 1 is based on unadjusted quoted prices or daily quoted net asset values for identical assets in active markets the Company can access. The fair value of cash equivalents in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

The fair value of short-term investments in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of short-term investments in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. The fair value of short-term investments in Level 3 is primarily based on amortized cost.

NOTES TO FINANCIAL STATEMENTS

The fair value of free-standing exchange listed derivatives in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of derivatives in Level 2 is based on the valuation methods described in Part A4 of this note.

The fair value of LIHTC property investments in Level 3 is based on amortized cost, using the proportional amortization method, which approximates fair value.

The fair value of affiliated surplus notes and collateral loans in Level 3 is based on discounted cash flow calculations using current interest rates for instruments with comparable terms.

The fair value of reinvested collateral from securities lending in Level 2 is based on carrying value due to its short-term nature.

Financial liabilities

Presented below are the aggregate fair value estimates and statement values of financial instruments:

(in millions)		September 30, 2024					
Type of Financial Instrument	Aggregate Fair Value	Statement Value	(Level 1)	(Level 2)	(Level 3)	NAV	Not Practicable (Carrying Value)
Securities lending collateral	\$ 2,021	\$ 2,021	\$ —	\$ 2,021	\$ —	\$ —	\$ —
Derivatives	\$ 25	\$ 17	\$ 9	\$ 16	\$ —	\$ —	\$ —

		December 31, 2023					
Type of Financial Instrument	Aggregate Fair Value	Statement Value	(Level 1)	(Level 2)	(Level 3)	NAV	Not Practicable (Carrying Value)
Securities lending collateral	\$ 1,890	\$ 1,890	\$ —	\$ 1,890	\$ —	\$ —	\$ —
Derivatives	\$ 12	\$ 10	\$ 2	\$ 10	\$ —	\$ —	\$ —

The fair value of the liabilities for collateral related to securities lending in Level 2 is based on carrying value due to its short-term nature.

The fair value of free-standing exchange listed derivatives in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of derivatives in Level 2 is based on the valuation methods described in Part A4 of this note.

- D. The Company was able to estimate the fair value of all its financial instruments in 2024 and 2023.
- E. Investments in certain common and preferred stocks measured and reported at NAV in the Assets page and presented in the table in Part A1 are generally not redeemable with the issuing corporation and cannot be sold without approval of the managing members. Distributions of income are usually received from the sale of the common stock or the liquidation of the underlying asset or assets of the issuing corporation over the life of these investments, typically 3-7 years. The Company had \$15 million of remaining commitments to invest in these investments over their remaining lives.
21. Other Items

C. Other Disclosures

Macroeconomic Impacts

Macroeconomic factors have and may continue to impact the results of operations, financial condition and liquidity, such as U.S. government fiscal and monetary policies, the Russia/Ukraine and Israel/Hamas conflicts, supply chain disruptions and labor shortages. These factors should be considered when comparing the current period to prior periods.

Transfer of Investments

During 2018, the Company transferred limited partnership investments with a book/adjusted carrying value of \$1.70 billion and cash of \$12 million to AIMCO Private Fund II, LLC ("AIMCO II"). Since the transfer of the assets did not meet the conditions of a sale per SSAP No. 103R, *Transfer and Servicing of Financial Assets and Extinguishments of Liabilities*, the assets of AIMCO II are directly reported in the Company's financial statements. In 2021, additional assets were transferred into AIMCO II prior to the sale of Allstate Life Insurance Company, a former subsidiary. As of September 30, 2024, AIMCO II consisted of limited partnership investments with a book/adjusted carrying value of \$2.01 billion, cash equivalents of \$77 million and cash of \$15 million and were included in the Company's assets.

22. Events Subsequent

An evaluation of subsequent events was made through November 11, 2024 for the Annual Statement issued on November 13, 2024. There were no significant subsequent events requiring adjustment to or disclosure in the financial statements.

23. Reinsurance

A. Unsecured Reinsurance Recoverables

The Company had unsecured reinsurance recoverables that exceeded 3% of the policyholders surplus of \$408 million with National Flood Insurance Program (NAIC Group Code 0000, FEIN AA-9992201) and \$322 million with New Jersey Unsatisfied Claim and Judgment Fund (NAIC Group Code 0000, FEIN AA-9991160) as of September 30, 2024 and December 31, 2023, respectively.

C. Reinsurance Assumed and Ceded

1. The maximum amount of return commission which would have been due to reinsurers if they or the Company had canceled all of the Company's reinsurance, or if the Company or reinsurers had canceled all the Company's insurance assumed with the return of unearned premium reserve was as follows:

24. Retrospectively Rated Contracts and Contracts Subject to Redetermination

- C. The amount of net premiums written by the Company in the nine months ended September 30, 2024 and 2023 subject to retrospective rating features was \$6.84 billion and \$5.92 billion, respectively. These amounts represented 17.9% and 17.4% of total net premiums written in the nine months ended September 30, 2024 and 2023, respectively.
- F. Risk-Sharing Provisions of the Affordable Care Act (ACA)

As a result of the acquisition of National General Holdings Corp. and reinsurance agreements entered into with INIC, the Company assumed balances related to the risk sharing provisions of the ACA as of December 31, 2021. Premium adjustments receivable and payable due to ACA risk adjustment were immaterial as of September 30, 2024 and December 31, 2023.

25. Changes in Incurred Losses and Loss Adjustment Expenses

- A. For a summary of management's policies and methodologies for estimating the liabilities for losses and loss adjustment expenses, please refer to this note in the Annual Statement.

Activity in the reserve for losses and loss adjustment expenses was summarized as follows:

(in millions)	September 30,	December 31,
	2024	2023
Balance as of January 1	\$ 27,188	\$ 24,150
Incurred related to:		
Current year	27,703	35,892
Prior years	(347)	453
Total incurred	<u>27,356</u>	<u>36,345</u>
Paid related to:		
Current year	14,425	20,902
Prior years	10,874	12,405
Total paid	<u>25,299</u>	<u>33,307</u>
Balance	<u>\$ 29,245</u>	<u>\$ 27,188</u>

Incurred losses and loss adjustment expenses represent the sum of paid losses, loss adjustment expenses and reserve changes in the calendar year. This expense included net losses from catastrophes of \$4.29 billion and \$5.40 billion for the nine months ended September 30, 2024 and the year ended December 31, 2023, respectively. Catastrophes are an inherent risk of the property and casualty insurance business that have contributed to, and will continue to contribute to, material year-to-year fluctuations in the Company's net income and financial position.

The Company calculates and records a single best reserve estimate for losses from catastrophes, in conformance with generally accepted actuarial standards. As a result, management believes that no other estimate is better than the recorded amount. Due to the uncertainties involved, including the factors described above, the ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimates. Accordingly, management believes that it is not practical to develop a meaningful range for any such changes in losses incurred.

Incurred losses and loss adjustment expenses attributable to insured events of prior years were \$(347) million and \$453 million as a result of the reestimation of unpaid losses and loss adjustment expenses for the nine months ended September 30, 2024 and the year ended December 31, 2023, respectively. These changes were generally the result of ongoing analyses of recent loss development trends. Initial estimates were revised as additional information regarding claims became known.

Anticipated salvage and subrogation of \$1.41 billion and \$1.59 billion was included as a reduction of loss reserves as of September 30, 2024 and December 31, 2023, respectively.

- B. In addition to the methods utilized discussed in Part A of this note in the Annual Statement, methods which account for accelerated claim settlement were used in calculating the liability of unpaid losses and loss adjustment expenses for injury coverages for the most recent reporting period presented. There were no significant changes in methodologies used in calculating the liability of unpaid losses and loss adjustment expenses for non-injury coverages.
