1. Summary of Significant Accounting Policies

- A. Allstate Insurance Company (the “Company” or “Allstate”) prepares its financial statements in conformity with accounting practices prescribed or permitted by the Illinois Department of Insurance (“IL DOI”). Prescribed statutory accounting practices include a variety of publications of the National Association of Insurance Commissioners (“NAIC”), as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

The State of Illinois requires its domestic insurance companies to prepare financial statements in conformity with the NAIC Accounting Practices and Procedures Manual (“APPM”), which includes all Statements of Statutory Accounting Principles (“SSAPs”), subject to any deviations prescribed or permitted by the IL DOI.

The Company’s net income and capital and surplus did not include any accounting practices prescribed or permitted by the IL DOI during 2025 and 2024.

C. Investments

Effective January 1, 2025, investments that qualify as an issuer credit obligation (“ICO”), including certificates of deposit with fixed payment schedules and maturity dates in excess of a year, bank loans and Securities Valuation Office Identified Bond Exchange Traded Funds (“SVO-ETFs”), or asset-backed securities (“ABS”) are reported as bonds. ICO, excluding SVO-ETFs, and ABS with an NAIC designation of 1 or 2 are reported at amortized cost using the effective yield method. ICO, excluding SVO-ETFs, and ABS with an NAIC designation of 3 through 6 are reported at the lower of amortized cost or fair value, with the difference reflected in unassigned surplus as an unrealized capital loss. The NAIC designations are determined in accordance with requirements detailed in the Purposes and Procedures Manual of the NAIC Investment Analysis Office. SVO-ETFs are reported at fair value. Changes in the fair value of SVO-ETFs are recorded as a change in net unrealized capital gains (losses), which is a component of unassigned surplus.

Debt securities that do not qualify as bonds are reported within other invested assets at the lower of amortized cost or fair value, with the changes recorded in unassigned surplus as unrealized capital loss. These investments follow the same accounting guidance as ABS for calculating amortized cost and determining and recognizing other-than-temporary impairments (“OTTI”).

Investments considered bonds and loan-backed and structured securities (“LBASS”) as of December 31, 2024 used the same valuation basis, income recognition policy and impairment process as ICO and ABS, respectively. Therefore, information provided for ABS in this policy note is also applicable to LBASS prior to January 1, 2025.

Other invested assets includes residual tranche securities. Effective January 1, 2025, the Company elected to use the practical expedient method and carries these securities at cost less inception-to-date distributions received. Investment income for residual tranche securities is recorded on a cash basis after full recovery of cost.

For ABS of high credit quality with fixed interest rates, the effective yield is recalculated on a retrospective basis. For all others, the effective yield is generally recalculated on a prospective basis.

Debt securities that did not qualify as bonds as of January 1, 2025 were reclassified from bonds to other invested assets at their amortized cost basis.

- D. Based upon its evaluation of relevant conditions and events, management did not have substantial doubt about the Company’s ability to continue as a going concern as of March 31, 2025 and December 31, 2024.

2. Accounting Changes and Corrections of Errors

Effective January 1, 2025, the Company adopted the NAIC’s Principles-Based Bond Definition (“PBBD”) standards, including changes to SSAP No. 26, *Bonds*, SSAP No. 43, *Asset-Backed Securities* and SSAP No 21, *Other Admitted Assets*. Adoption of these standards impacts classification, accounting and reporting requirements for investments that were previously classified as bonds, including LBASS. Pursuant to the requirements, debt securities representing a creditor relationship with a fixed payment schedule are now classified as ICO or ABS based on the source of repayment, substantive credit enhancements, and the level of cash flows. Debt securities that do not meet the requirements in substance are classified as other invested assets. Investments previously classified as bonds, including LBASS, follow existing accounting and reporting requirements for bonds, ABS and other invested assets based on their new classification upon adoption of the PBBD standards. Changes were adopted on a prospective basis.

Upon adoption of the new standards on January 1, 2025, debt securities with an aggregate carrying value of \$32 million were reclassified from bonds to other invested assets at amortized cost with no gain or loss recognized in surplus. Upon reclassification, other invested assets were valued at the lower of amortized cost or fair value of \$32 million, resulting in no unrealized gains or losses within surplus.

5. Investments

D. Asset-Backed Securities

1. Prepayment assumptions for ABS and LBASS were obtained from external sources and, if not available, developed internally.

NOTES TO FINANCIAL STATEMENTS

3. None of the Company's ABS in 2025 or LBASS in 2024 were other-than-temporarily impaired as a result of the discounted present value of the cash flows expected to be collected being less than amortized cost.

4. Unrealized losses are calculated as the difference between amortized cost and fair value. They result from declines in fair value below amortized cost and are evaluated for OTTI. Every ABS in 2025 and LBASS in 2024 with unrealized losses was included in the portfolio monitoring process.

None of the Company's ABS or LBASS were in an unrealized loss position as of March 31, 2025 or December 31, 2024, respectively.

5. None of the Company's ABS were in an unrealized loss position as of March 31, 2025.

ABS in an unrealized loss position were evaluated based on actual and projected collateral losses relative to the securities' positions in the respective securitization trusts, security specific expectations of cash flows, and credit ratings. This evaluation also takes into consideration credit enhancement, measured in terms of: (1) subordination from other classes of securities in the trust that are contractually obligated to absorb losses before the class of security the Company owns, and (2) the expected impact of other structural features embedded in the securitization trust beneficial to the class of securities the Company owns, such as overcollateralization and excess spread.

K. Investments in Tax Credit Structures

- The Company invests in federal and state low-income housing tax credit ("LIHTC") programs aimed at developing affordable housing units. The investments are structured as equity investments in limited partnerships that own and operate housing projects. The Company accounts for its investments using the proportional amortization method. This method amortizes investments in proportion to the allocation of tax credits and other tax benefits received.
- Tax credits and other tax benefits, net of federal income taxes, were \$63 million and \$65 million for the three months ended March 31, 2025 and 2024, respectively.
- The balance of admitted tax credit investments recognized within other invested assets was \$1.46 billion and \$1.51 billion as of March 31, 2025 and December 31, 2024, respectively.
- The amount of tax credit investment amortization recognized within net investment gain (loss) was \$49 million for the three months ended March 31, 2025. The amount of premium tax credits recognized as a reduction of other underwriting expenses incurred, after reinsurance, was \$10 million for the three months ended March 31, 2025.
- As of March 31, 2025, the Company's investments in tax credit structures are expected to generate the following amounts of tax credits by year.

On February 11, 2025, the FAIR Plan received regulatory approval to assess member insurers \$1.00 billion. The Company's personal lines and commercial lines average market share used for the assessment was 4.6% and 2.0%, respectively, net of credits. Members are allowed to request the state insurance commission's approval to collect temporary supplemental fees from policyholders in the state in order to recoup amounts assessed. Insurers can request recoupment for 50% of their portion of assessments up to \$1.00 billion and 100% thereafter for each residential property and commercial property insurance. As of March 31, 2015, the Company had accrued for its share of future estimated assessments based on the wildfire event that began on January 7, 2025. Several of the Company's traditional markets per occurrence agreements also provide for the inclusion of non-recoupable assessments as part of the definition of loss.

Legal and regulatory proceedings and inquiries

Background

The Company and certain subsidiaries are involved in a number of lawsuits, regulatory inquiries, and other legal proceedings arising out of various aspects of its business.

The Company currently estimates that the aggregate range of reasonably possible loss in excess of the amount accrued, if any, for the disclosed matters where such an estimate is possible is zero to \$70 million, pre-tax. This disclosure is not an indication of expected loss, if any. Under APPM, an event is "reasonably possible" if "the chance of the future event or events occurring is more than remote but less than likely" and an event is "remote" if "the chance of the future event or events occurring is slight." This estimate is based upon currently available information and is subject to significant judgment and a variety of assumptions and known and unknown uncertainties. The matters underlying the estimate will change from time to time, and actual results may vary significantly from the current estimate. The

NOTES TO FINANCIAL STATEMENTS

estimate does not include matters or losses for which an estimate is not possible. Therefore, this estimate represents an estimate of possible loss only for certain matters meeting these criteria. It does not represent the Company's maximum possible loss exposure. Information is provided below regarding the nature of all of the disclosed matters and, where specified, the amount, if any, of plaintiff claims associated with these loss contingencies.

Due to the complexity and scope of the matters disclosed in the "Claims related proceedings" and "Other proceedings" subsections below and the many uncertainties that exist, the ultimate outcome of these matters cannot be predicted and in the Company's judgment, a loss, in excess of amounts accrued, if any, is not probable. In the event of an unfavorable outcome in one or more of these matters, the ultimate liability may be in excess of amounts currently accrued, if any, and may be material to the Company's operating results or cash flows for a particular quarterly or annual period. However, based on information currently known to it, management believes that the ultimate outcome of all matters described below, as they are resolved over time, is not likely to have a material effect on the financial position of the Company.

Claims related proceedings

The Company is defending putative class actions in various courts that raise challenges to the Company's depreciation practices in homeowner property claims. In these lawsuits, plaintiffs generally allege that, when calculating actual cash value, the costs of "non-materials" such as labor, general contractor's overhead and profit, and sales tax should not be subject to depreciation. The Company is currently defending the following lawsuits on this issue: *Sims, et al. v. Allstate Fire and Casualty Insurance Company, et al.* (W.D. Tex. filed June 2022); *Thompson, et al. v. Allstate Insurance Company* (Circuit Court of Cole Co., Mo. filed June 2022); *Hill v. Allstate Vehicle and Property Insurance Company* (Circuit Court of Cole Co., Mo. filed October 2022); and *Hernandez v. Allstate Vehicle and Property Insurance Company* (D. Ariz. filed April 2023). No classes have been certified in any of these matters.

The Company is defending putative class actions pending in multiple states alleging that the Company underpays total loss vehicle physical damage claims on auto policies. The alleged systematic underpayments result from the following theories: (a) the third party valuation tool used by the Company as part of a comprehensive adjustment process is allegedly flawed, biased, or contrary to applicable law; and/or (b) the Company allegedly does not pay sales tax, title fees, registration fees, and/or other specified fees that are allegedly mandatory under policy language or state legal authority. The Company is currently defending the following lawsuits: *Golla v. Allstate Insurance Company* (N.D. Ohio filed June 2023); *Bibbs v. Allstate Insurance Company and Allstate Fire and Casualty Insurance Company* (N.D. Ohio filed August 2023); *Katz v. Esurance Property and Casualty Insurance Company and National General Insurance Company* (E.D.N.Y. filed February 2024); *Jarrett-Kelly v. Direct General Insurance Agency, Inc.* (Circuit Court of Pulaski Co., Ark. filed May 2024); and *Schott v. Allstate Insurance Company and Allstate Property and Casualty Insurance Company* (M.D. Ga. filed October 2024). No classes have been certified in any of these matters.

Settlements have been reached in the following cases: *Bass v. Imperial Fire and Casualty Insurance Company* (W.D. La. filed February 2022); *Durgin v. Allstate Property and Casualty Insurance Company* (W.D. La. filed June 2019); *Kronenberg v. Allstate Insurance Company and Allstate Fire and Casualty Insurance Company* (E.D.N.Y. filed December 2018); *Hail v. Allstate Property and Casualty Insurance Company* (State Court of Habersham Co., Ga. filed December 2023); and *Gleichman Law Firm v. Allstate Insurance Company* (N.D. Ga. filed February 2025).

The Company is defending a lawsuit in the U.S. District Court for the Southern District of California, *Chavez v. Allstate Northbrook Indemnity Company*, filed February 2022, where plaintiffs generally allege that Allstate's Shelter in Place Payback program provided insufficient premium relief in response to the reduction in driving in California during the state's COVID-19 stay-at-home restrictions in 2020 and 2021. Plaintiffs seek damages that include additional premium refunds and punitive damages. On June 25, 2024, the court issued an order granting plaintiffs' motion for class certification. The Company continues to defend the litigation and oppose plaintiffs' allegations.

The Company is a defending putative class action in the U.S. District Court for the District of Arizona that alleges underpayment of uninsured/underinsured motorist claims, *Dorazio v. Allstate Fire and Casualty Insurance Company*, filed December 2022. The plaintiffs allege that uninsured/underinsured motorist coverages must be stacked, which is combining separate uninsured/underinsured coverage limits of multiple vehicles into one higher coverage limit, where the defendants allegedly did not include specified policy language and did not provide specified notice to policyholders. No class has been certified in this matter. A settlement in principle has been reached in *Loughran v. MIC General Insurance Corporation*, a second putative class action alleging the same claims. In July 2023, the Arizona Supreme Court issued a ruling in *Franklin v. CSAA General Insurance*, a matter involving another insurer. The *Franklin* decision held, under the factual circumstances of that case, that stacking of uninsured/underinsured motorist coverages was required because the insurer did not include specified policy language and did not issue specified notice.

Other proceedings

The Company is defending two putative class actions in the U.S. District Court for the Eastern District of California, *Holland Hewitt v. Allstate Life Insurance Company* ("ALIC") filed May 2020 and *Farley v. Lincoln Benefit Life Company* ("LBL") filed December 2020, following the sale of ALIC. On April 19, 2023, the district court certified a class in *Farley*. LBL is appealing the district court's order in the Ninth Circuit Court of Appeals. On March 27, 2024, the Magistrate Judge issued his Findings and Recommendations denying class certification in *Hewitt*. Plaintiffs filed their objection to the Magistrate's recommendation. In these cases, plaintiffs generally allege that the defendants failed to comply with certain California statutes which address contractual grace periods and lapse notice requirements for certain life insurance policies. Plaintiffs claim that these statutes apply to life insurance policies that existed before the statutes' effective date. The plaintiffs seek damages and injunctive relief. Similar litigation is pending against other insurance carriers. In August 2021, the California Supreme Court in *McHugh v. Protective Life*, a matter involving another insurer, determined that the statutory notice requirements apply to life insurance policies issued before the statutes' effective date. The Company asserts various defenses to plaintiffs' claims and to class certification.

The Company is subject to lawsuits related to the collection and use of driving behavior data, including a civil lawsuit filed by the Texas Attorney General in Montgomery County, Texas District Court and putative class actions filed in federal court. The lawsuits allege privacy and consumer protection claims and seek actual, statutory and punitive damages, restitution, injunctive relief and attorneys' fees.

20. Fair Value Measurements

- A. Fair value is defined, per SSAP No. 100, *Fair Value* ("SSAP No. 100"), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP No. 100 identified three valuation techniques which are used, either independently or in combination, to determine fair value: (1) market approach; (2) income approach; and (3) cost approach. SSAP No. 100 also contains guidance about observable and unobservable inputs, which are assumptions that market participants would use in pricing an asset or liability. To increase consistency and comparability in fair value measurements, the fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels: 1, 2 and 3. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Certain assets are measured utilizing net asset value ("NAV") as a practical expedient to determine fair value.

The Company has two types of situations where investments are classified as Level 3 in the fair value hierarchy:

- (1) Specific inputs significant to the fair value estimation models are not market observable. This primarily occurs in the Company's use of broker quotes to value certain securities where the inputs have not been corroborated to be market observable, and the use of valuation models that use significant non-market observable inputs.
- (2) Quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources.

Transfers into Level 3 during 2025 and 2024 included securities measured at lower of cost or market and reported at fair value in 2025 and 2024, and at cost in 2024 and 2023, respectively.

Transfers out of Level 3 during 2025 and 2024 included securities measured at lower of cost or market and reported at cost in 2025 and 2024, and fair value in 2024 and 2023, respectively.

3. The Company consistently follows its policy for determining when transfers between levels are recognized. The policy about the timing of recognizing transfers into Level 3 is the same as that for recognizing transfers out of Level 3.
4. In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 and Level 3 valuations, a combination of the market and income approaches is used.

Listed below is a summary of the significant valuation techniques for assets and liabilities measured and reported at fair value.

Level 2 measurements

Bonds - The primary inputs to the valuation for publicly traded corporate bonds and municipal bonds include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Privately placed corporate bonds are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer.

Unaffiliated common and perpetual preferred stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that are not active.

Short-term Investments – The primary inputs to the valuation for short-term investments include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

Derivatives - Free-standing exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives are valued using models that rely on inputs such as interest rate yield curves, implied volatilities, index price levels, currency rates and credit spreads that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

Level 3 measurements

Bonds - The primary inputs to the valuation for corporate bonds, including those that are privately placed, and bank loans are valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Other inputs for corporate bonds include expected cash flows, an interest rate yield curve, as well as published credit spreads for similar assets that incorporate credit quality and industry sector of the issuer. For municipal bonds that are not rated by third-party credit rating agencies, but receive an NAIC designation, the primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not market observable, contractual cash flows, benchmark yields and credit spreads. Also included are municipal bonds valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable and municipal bonds in default valued based on the present value of expected cash flows.

Perpetual preferred stocks - The primary inputs to the valuation include non-binding broker quotes where the inputs have not been corroborated to be market observable.

Unaffiliated common stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that are not market observable.

Debt securities that do not qualify as bonds - The primary inputs to the valuation are discounted expected cash flows.

The fair value of bonds in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of publicly traded bonds in Level 2 is based upon quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Non-publicly traded bonds in Level 2 are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The fair value of municipal bonds in Level 3 not rated by third-party credit rating agencies, but receiving an NAIC designation is based on quoted prices for identical or similar assets that are not market observable, contractual cash flows, benchmark yields and credit spreads. Also included are municipal bonds valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable and municipal bonds in default valued based on the present value of expected cash flows. The fair value of corporate bonds in Level 3 is primarily valued using a discounted cash flow model that is widely accepted in the financial services industry using inputs that have not been corroborated to be market observable. In certain situations, non-binding broker quotes where the inputs have not been corroborated to be market observable are used. Other inputs for corporate bonds include expected cash flows, an interest rate yield curve, as well as published credit spreads for similar assets that incorporate the credit quality and industry sector of the issuer.

The fair value of ABS (LBASS prior to January 1, 2025) and residual tranche securities in Level 2 is primarily based on valuation models utilizing quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. Certain ABS (LBASS prior to January 1, 2025) in Level 2 are valued based on non-binding broker quotes whose inputs have been corroborated to be market observable. The fair value of ABS (LBASS prior to January 1, 2025) in Level 3 is primarily based on expected cash flows, benchmark yields, collateral performance, prepayment speeds and credit spreads.

The fair value of preferred stocks in Levels 2 and 3 is based on valuation methods described in Part A4 of this note. Certain preferred stocks, which do not have readily determinable fair values, and are investments in investment companies are measured utilizing NAV as a practical expedient.

The fair value of unaffiliated common stocks in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of unaffiliated common stocks in Levels 2 and 3 is based on the valuation methods described in Part A4 of this note. Certain unaffiliated private common stocks carried at fair value, which do not have readily determinable fair values, and are investments in investment companies that measure their assets at fair value on a recurring basis, are reported utilizing NAV as a practical expedient and are excluded from the fair value hierarchy.

The fair value of mortgage loans on real estate in Level 3 is based on discounted contractual cash flows or, if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics, using similar types of properties as collateral.

The fair value of cash equivalents in Level 1 is based on unadjusted quoted prices or daily quoted net asset values for identical assets in active markets the Company can access. The fair value of cash equivalents in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

NOTES TO FINANCIAL STATEMENTS

The fair value of short-term investments in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of short-term investments in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. The fair value of short-term investments in Level 3 is primarily based on amortized cost.

The fair value of free-standing exchange listed derivatives in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of derivatives in Level 2 is based on the valuation methods described in Part A4 of this note.

The fair value of LIHTC property investments in Level 3 is based on amortized cost, using the proportional amortization method, which approximates fair value.

The fair value of affiliated surplus notes and collateral loans in Level 3 is based on discounted cash flow calculations using current interest rates for instruments with comparable terms.

The fair value of debt securities that do not qualify as bonds is based on the valuation methods in Part A4 of this note.

The fair value of reinvested collateral from securities lending in Level 2 is based on carrying value due to its short-term nature.

Presented below are the aggregate fair value estimates and statement values of financial instruments:

(in millions)		March 31, 2025					
Type of Financial Instrument	Aggregate Fair Value	Statement Value	(Level 1)	(Level 2)	(Level 3)	NAV	Not Practicable (Carrying Value)
Securities lending collateral	\$ 2,136	\$ 2,136	\$ —	\$ 2,136	\$ —	\$ —	\$ —
Derivatives	\$ 7	\$ 7	\$ —	\$ 7	\$ —	\$ —	\$ —

		December 31, 2024					
Type of Financial Instrument	Aggregate Fair Value	Statement Value	(Level 1)	(Level 2)	(Level 3)	NAV	Not Practicable (Carrying Value)
Securities lending collateral	\$ 2,023	\$ 2,023	\$ —	\$ 2,023	\$ —	\$ —	\$ —
Derivatives	\$ 2	\$ 1	\$ 1	\$ 1	\$ —	\$ —	\$ —

The fair value of the liabilities for collateral related to securities lending in Level 2 is based on carrying value due to its short-term nature.

The fair value of free-standing exchange listed derivatives in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of derivatives in Level 2 is based on the valuation methods described in Part A4 of this note.

- D. The Company was able to estimate the fair value of all its financial instruments in 2025 and 2024.
- E. Investments in certain common and preferred stocks measured and reported at NAV in the Assets page and presented in the table in Part A1 are generally not redeemable with the issuing corporation and cannot be sold without approval of the managing members. Distributions of income are usually received from the sale of the common stock or the liquidation of the underlying asset or assets of the issuing corporation over the life of these investments, typically 3-7 years. The Company had \$13 million of remaining commitments to invest in these investments over their remaining lives.

Macroeconomic Impacts

Macroeconomic factors have and may continue to impact the results of operations, financial condition and liquidity, such as U.S. government fiscal and monetary policies, conflict in the Middle East, the Russia/Ukraine conflict, supply chain disruptions and labor shortages.

Beginning on April 2, 2025, the U.S. government announced additional tariffs on goods imported to the U.S. These actions are expected to impact the results of operations. Depending on the severity of these actions, the following may impact operations: higher new and used vehicle pricing, increasing claims costs; adverse impact on investment valuations on certain investments; declines in auto new issued applications due to lower car sales; reduced demand for business related to new car sales; bad debt and credit allowance exposure. This is not inclusive of all potential impacts and should not be treated as such.

Commutation and Amendment of Quota Share Reinsurance Agreement

Following receipt of regulatory approval from IL DOI on January 28, 2025, the Company and National General Re, Ltd. ("NG Re") entered into a commutation and release agreement, effective January 1, 2025, related to the 25% quota share participation under the previous agreement. NG Re transferred \$707 million of loss and loss expense reserves to the Company related to the commuted business. In addition, the Company and NG Re amended their intercompany quota share reinsurance agreement, effective January 1, 2025, whereby the Company will cede 15% of its business assumed from INIC to NG Re.

Transfer of Investments

During 2018, the Company transferred limited partnership investments with a book/adjusted carrying value of \$1.70 billion and cash of \$12 million to AIMCO Private Fund II, LLC ("AIMCO II"). Since the transfer of the assets did not meet the conditions of a sale per SSAP No. 103R, *Transfer and Servicing of Financial Assets and Extinguishments of Liabilities*, the assets of AIMCO II are directly reported in the Company's financial statements. In 2021, additional assets were transferred into AIMCO II prior to the sale of ALIC, a former subsidiary. As of March 31, 2025, AIMCO II consisted of limited partnership investments with a book/adjusted carrying value of \$1.82 billion and cash equivalents of \$108 million and were included in the Company's assets.

G. Insurance-linked Securities (“ILS”) Contracts

The Company and certain of its affiliated insurance companies were ceding insurers of eleven and ten ILS agreements related to directly-written insurance risks as of March 31, 2025 and December 31, 2024, respectively.

As of March 31, 2025, the ILS placements provide \$2.25 billion of reinsurance limits (with \$2.05 billion remaining limit available) for qualifying losses in all states except Florida caused by “Named Peril Basis” events with no reinstatement of limits. The ILS placements were comprised of seven occurrence only placements providing \$1.60 billion placed limits; two occurrence and aggregate placements providing \$325 million placed limits; and two aggregate only placements providing \$325 million placed limits.

As of December 31, 2024, the ILS placements provide \$1.95 billion of reinsurance limits (with \$1.95 billion remaining limit available) for qualifying losses in all states except Florida caused by “Named Peril Basis” events with no reinstatement of limits. The ILS placements were comprised of six occurrence only placements providing \$1.30 billion placed limits; two occurrence and aggregate placements providing \$325 million placed limits; and two aggregate only placements providing \$325 million placed limits.

Allstate declared catastrophes to personal lines property and automobile business can be aggregated to erode the aggregate retention and qualify for coverage under the aggregate limit. Recoveries are limited to our ultimate net loss from the reinsured event. Each agreement’s contractual limit applies to Allstate and its ceding affiliated property and casualty companies under the agreement as a group, and not separately to each ceding company. There were 46 ceding affiliated property and casualty companies under the agreement as a group as of March 31, 2025 and December 31, 2024. A ceding company’s share of loss recovery under an agreement for a loss occurrence is based on the proportion of the ceding company’s ultimate net loss for such loss occurrence to the total ultimate net loss incurred by the Company and its ceding affiliated property and casualty companies for the loss occurrence, and is limited to the ceding company’s ultimate net loss. Reinsurance recoveries under the contract are limited to our ultimate net loss from a covered event subject to the contract’s limit.

The table below reports all known ILS involvements that would likely be used to satisfy the Company’s reinsurance agreements. The term “Aggregate Maximum Proceeds”, as listed in the table, represents the aggregate of the contract limits of all of the Company and affiliates’ outstanding ILS contracts described above. Aggregate proceeds of \$400 million and \$280 million were expected to be received under the terms of ILS agreements as of March 31, 2025 and December 31, 2024, respectively.

22. Events Subsequent

An evaluation of subsequent events was made through May 14, 2025 for the Quarterly Statement issued on May 15, 2025. There were no significant subsequent events requiring adjustment to or disclosure in the financial statements.

23. Reinsurance

E. Commutation of Ceded Reinsurance

The Company entered into a commutation agreement with NG Re, as described in Note 21, Part C, which had the following impact on operations for the three months ended March 31, 2025:

(in millions)		
1	Losses incurred	\$ —
2	Loss adjustment expenses incurred	\$ —
3	Premiums earned	\$ —
4	Other	\$ (206)
5	Company	Amount
	NG Re	\$ (206)

The Company had underwriting loss of \$206 million for the three months ended March 31, 2025 as a result of the commutation. There was no impact to the Company's operations as a result of commutations for the three months ended March 31, 2024.

24. Retrospectively Rated Contracts and Contracts Subject to Redetermination

F. Risk-Sharing Provisions of the Affordable Care Act (ACA)

- (1) Did the reporting entity write accident and health insurance premium that is subject to the ACA risk-sharing provisions?
Yes () No (X)
- As a result of the acquisition of National General Holdings Corp. and reinsurance agreements entered into with Integon National Insurance Company, the Company assumed balances related to the risk sharing provisions of the ACA as of December 31, 2021.
- (2) Impact of Risk-Sharing Provisions of the ACA on Admitted Assets, Liabilities and Revenue for the Current Year
- Premium adjustments receivable and payable due to ACA risk adjustment were immaterial as of March 31, 2025 and December 31, 2024.
- (3) Roll-Forward of Prior Year ACA Risk-Sharing Provisions
- Premium adjustments receivable and payable due to ACA risk adjustment were immaterial as of March 31, 2025 and December 31, 2024.

25. Changes in Incurred Losses and Loss Adjustment Expenses

- A. For a summary of management's policies and methodologies for estimating the liabilities for losses and loss adjustment expenses, please refer to this note in the Annual Statement.

Activity in the reserve for losses and loss adjustment expenses was summarized as follows:

(in millions)	March 31, 2025	December 31, 2024
Balance as of January 1	\$ 28,565	\$ 27,188
Incurred related to:		
Current year	9,782	35,790
Prior years	(233)	(363)
Total incurred	9,549	35,427
Paid related to:		
Current year	3,306	21,069
Prior years	4,885	12,981
Total paid	8,191	34,050
Balance as of December 31	\$ 29,923	\$ 28,565

Incurred losses and loss adjustment expenses represent the sum of paid losses, loss adjustment expenses and reserve changes in the calendar year. This expense included net losses from catastrophes of \$1.79 billion and \$4.68 billion for the three months ended March 31, 2025 and the year ended December 31, 2024, respectively. Catastrophes are an inherent risk of the property and casualty insurance business that have contributed to, and will continue to contribute to, material year-to-year fluctuations in the Company's net income and financial position.

The Company calculates and records a single best reserve estimate for losses from catastrophes, in conformance with generally accepted actuarial standards. As a result, management believes that no other estimate is better than the recorded amount. Due to the uncertainties involved, including the factors described above, the ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimates. Accordingly, management believes that it is not practical to develop a meaningful range for any such changes in losses incurred.

NOTES TO FINANCIAL STATEMENTS

Incurred losses and loss adjustment expenses attributable to insured events of prior years were \$(233) million and \$(363) million as a result of the reestimation of unpaid losses and loss adjustment expenses for the three months ended March 31, 2025 and for the year ended December 31, 2024, respectively. These changes were generally the result of ongoing analyses of recent loss development trends. Initial estimates were revised as additional information regarding claims became known.

Anticipated salvage and subrogation of \$1.40 billion and \$1.42 billion was included as a reduction of loss reserves as of March 31, 2025 and December 31, 2024, respectively.

- B. There were no significant changes in methodologies used in calculating the liability of unpaid losses and loss adjustment expenses for non-injury coverages.
- 36. Financial Guaranty Insurance - Not applicable.
